Notice is hereby given that the Advisory Committee on Construction Safety and Health, established under section 107(e)(1) of the Contract Work Hours and Safety Standard Act (40 U.S.C. 333) and section 7(b) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 656) will meet on September 13 and 14, 1989, in Room N–3437 B and C of the Francis Perkins Building, Department of Labor, Washington, DC. The meeting is open to the public and will begin at 9:00 a.m.

The agenda for this meeting includes reports by the Bureau of Labor Statistics on recordkeeping requirements, the work group on cadmium, OSHA's Technical Data Center Staff, the voluntary protection programs, the work group on steel erection, and the departmental legislative affairs staff. Written data, views or comments may be submitted, preferably with 20 copies, to the Division of Consumer Affairs. Any such submissions received prior to the meeting will be provided to the members of the Committee and will be included in the record of the meeting. Anyone wishing to make an oral presentation should notify the Division of Consumer Affairs before the meeting. The request should state the amount of time desired, the capacity in which the person will appear and a brief outline of the content of the presentation.

For additional information contact: Tom Hall, Division of Consumer Affairs, Occupational Safety and Health Administration, Room N–3647, 200 Constitution Avenue, NW., Washington, DC 20210. Telephone 202–523–8615. An official record of the meeting will be available for public inspection at the Division of Consumer Affairs.

Alan C. McMillan,
Acting Assistant Secretary.

BILLING CODE 4510-26-M

LEGAL SERVICES CORPORATION

Request for Comments on a Grant Award to Single Parents United 'N Kids (SPUNK)

AGENCY: Legal Services Corporation.

ACTION: Correction.

FOR FURTHER INFORMATION CONTACT: Victoria O'Brien, Counsel to the Director, or Charles T. Moses, Associate Director, Legal Services Corporation, Office of Field Services, 400 Virginia Ave., SW., Washington, DC 20024–2751, (202) 863–1837.

SUPPLEMENTARY INFORMATION: The Legal Services Corporation's article in the **Federal Register** Notice, dated Wednesday, August 30, 1989, Vol. 54, No. 167, page 35953, announced its intention to award a grant in the amount of $32,380 to SPUNK. However, in one instance, in the second sentence of the first paragraph under **SUPPLEMENTARY INFORMATION,** it was referred to as SUPPORT. It should have read "SPUNK".

Dated: September 5, 1989.

Ellen J. Smead,
Acting Director, Office of Field Services.

BILLING CODE 7050-01-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (89–60)]

NASA Advisory Council (NAC), Space Systems and Technology Advisory Committee (SSTAC); meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Systems and Technology Advisory Committee, Ad Hoc Review Team on Technology Requirements for Human Performance on Long Space Missions.

DATES: September 19, 1989, 12:15 p.m. to 5 p.m.

ADDRESSES: National Aeronautics and Space Administration, Federal Building 10B, Room 647, 600 Independence Avenue, SW, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Dr. James P. Jenkins, Office of Aeronautics and Space Technology, National Aeronautics and Space Administration, Washington, DC 20546, 202/453–2750.

SUPPLEMENTARY INFORMATION: The NAC Space Systems and Technology Advisory Committee (SSTAC) was established to provide overall guidance to the Office of Aeronautics and Space Technology (OAST) on space systems and technology programs. Special ad hoc review teams are formed to address specific topics. The Ad Hoc Review Team on Technology Requirements for Human Performance on Long Space Missions, chaired by Dr. Gerald P. Carr, is comprised of eight members. The meeting will be open to the public up to the seating capacity of the room (approximately 25 persons including the team members and other participants). It is imperative that the meeting be held on this date to accommodate the scheduling priorities of the participants.

Type of Meeting: Open.

Agenda:

September 19, 1989
  12:15 p.m.—Review Existing Studies of Human Space Explorations.
  5 p.m.—Adjourn.

Dated: August 30, 1989.

John W. Gaff,
Advisory Committee Management Officer, National Aeronautics and Space Administration.

[FR Doc. 89–20959 Filed 9–6–89; 8:45 am]

BILLING CODE 7510-01-M

[Notice (89–61)]

NASA Advisory Council (NAC), Space Systems and Technology Advisory Committee (SSTAC); Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Systems and Technology Advisory Committee and the Aerospace Research and Technology Subcommittee.

DATES: September 25, 1989, 8:30 a.m. to 5:30 p.m.; September 26, 1989, 8 a.m. to 4 p.m.; and September 27, 1989, 8:30 a.m. to 3 p.m.

ADDRESSES: National Aeronautics and Space Administration, Langley Research Center, Building 1222, H.J.E. Reid Conference Center, Hampton, VA 23665.

FOR FURTHER INFORMATION CONTACT: Ms. Catherine L. Smith, Office of Aeronautics and Space Technology, National Aeronautics and Space Administration, Washington, DC 20546, 202/453–2367.

SUPPLEMENTARY INFORMATION: The NAC Space Systems and Technology Advisory Committee was established to provide overall guidance of direction to the space research and technology activities in the Office of Aeronautics and Space Technology (OAST). The Aerospace Research and Technology Informal Subcommittee (ARTS) was formed to provide technical support for the SSTAC and to conduct ad hoc interdisciplinary studies and assessments. The Committee, chaired by Dr. Joseph F. Shea, is comprised of 20 members. The subcommittee is comprised of 26 members. The meeting will be open to the public up to the seating capacity of the room (approximately 150 persons including the Committee members and other participants).

Type of Meeting: Open.

Agenda:

September 25, 1989
  8:30 a.m.—Opening Remarks.
  8:45 a.m.—Overview of Langley Research Center Activities.
  9:45 a.m.—Space Overview and Current Planning.
  11 a.m.—Parallel Discipline Sessions.
  5:30 p.m.—Adjourn.
September 26, 1989
  8 a.m.—Continue Parallel Discipline Sessions.
  1:30 p.m.—Discipline Reports.
  3:30 p.m.—OAST Responses to Ad Hoc Review Team Recommendations.
  4 p.m.—Adjourn.
September 27, 1989
  8:30 a.m.—Opening Remarks.
  8:35 a.m.—OAST Overview.
  10 a.m.—Task Force Activities.
  12:45 p.m.—SSTAC Report Summaries.
  2:15 p.m.—Closing Remarks.
  3 p.m.—Adjourn.

Dated: August 30, 1989.

John W. Gaff,
Advisory Committee Management Officer, National Aeronautics and Space Administration.

[FR Doc. 89–20960 Filed 9–6–89; 8:45 am]

BILLING CODE 7510-01-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-295 and 50-304]

Commonwealth Edison Co.; Environmental Assessment and Finding of no Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. DPR-39 and DPR-48, issued to Commonwealth Edison Company, (the licensee) for Zion Station, Units 1 and 2, located in Lake County, Illinois.

Environmental Assessment

Identification of Proposed Action

The proposed amendments would permit temporary one-time changes to Zion Technical Specifications regarding the Auxiliary Electric Power that would allow performing extensive preventive maintenance, in accordance with the manufacturer's recommendation, on the diesel generator that is shared between the two units. Because the common diesel generator is shared, extended maintenance periods have not been available under present Technical Specifications, even during scheduled refueling outages of either of the two units. The proposed changes would extend the present allowable out-of-service period for the common diesel from 7 days to 45 days during which, with one unit in cold shutdown, two diesel generators would be required to satisfy the standby AC on-site power requirements for Unit 2. In addition, the remaining two diesels for Unit 1 will also be available while the shared diesel is out of service.

This revision to the licenses of Zion Station, Units 1 and 2, would be made in response to the licensee's application for amendment dated July 6, 1989, as supplemented August 4, August 10 and August 24, 1989.

The Need For The Proposed Action

Pursuant to 10 CFR 50.90, the licensee has proposed amendments to Facility Operating Licenses DPR-39 and DPR-48 for Zion Station, Units 1 and 2, respectively. The proposed amendments, would extend the allowable out-of-service period for a one-time maintenance overhaul of the "0" diesel generator.

The "0" diesel generator is shared between Units 1 and 2, and the existing Technical Specification Section 3.15.2.C permits reactor operation for 7 days, if the "0" diesel generator becomes inoperable. This amendment request would modify Section 3.15.2.C of the Technical Specifications to permit the allowable out-of-service period for the "0" diesel generator to be extended from 7 days to 45 days for a one-time maintenance overhaul. The proposed extension to 45 days is necessary in order to perform the extensive maintenance overhaul to the diesel generator in conformance with the manufacturer's recommendation that such overhaul be performed at 5 year intervals.

Environmental Impacts of the Proposed Action

The Commission has evaluated the radiological impact of the proposed amendments and determined that for any of the core melt sequences to be influenced by the "0" diesel outage one must first have a complete loss of offsite power, which has never occurred at Zion station since its criticality in 1973. The outage of "0" diesel may have some influence in case of a small break loss of coolant accident concurrent with complete loss of all offsite power and an additional failure of one of the remaining diesels. However, the staff has concluded that a simultaneous loss of all offsite power (i.e., 6 offsite lines and 4 paths to ESF buses) and a loss of coolant accident concurrent with additional single failure of a diesel generatcr is a very unlikely event over the 45-day period while the "0" DG is out for maintenance. The licensee has reviewed and verified their existing emergency operating procedures (EOP) for its applicability during LOCA with only one emergency safety feature bus available. The licensee stated that their EOP procedures allow for unit shutdown following a LOCA using either a single charging pump or single safety injection pump. Thus, the risk and likelihood of core melt are not significantly affected by Unit 2 operation while the "0" DG is out for maintenance.

The staff finds that the proposed extension of the allowable out-of-service period to allow for maintenance of the "0" diesel generator poses no undue risk to the public health and safety. This conclusion is based upon numerous compensatory actions planned by the licensee during this outage (e.g., removal of fuel from Unit 1 for most of the time the "0" diesel is unavailable and performance of maintenance on emergency safeguards features buses only when the "0" diesel is operable), and the likelihood of the event that may cause a significant damage to the core.

The proposed amendments involve a change to a requirement with respect to the installation and use of a facility component located within the restricted area as defined in 10 CFR part 20.

With regard to nonradiological impacts, the proposed amendments involve systems located entirely within the restricted area as defined in 10 CFR part 20. They do not affect non-radiological plant effluents and have no other environmental impact. Therefore, the Commission also concludes that there are no significant nonradiological environmental impacts associated with the proposed amendments.

Accordingly, the Commission findings in the "Final Environmental Statement related to the operation of Zion Station, Units 1 and 2 dated December 1972, regarding radiological environmental impacts from the plants during normal operation or after accident conditions, are not adversely altered by this action.

The Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on July 20, 1989 (54 FR 30485). No request for hearing or petition for leave to intervene was filed following this notice.

Alternative to the Proposed Actions

Since the Commission has concluded that no adverse environmental effects are associated with this proposed action, any alternatives with equal or greater environmental impact need not be evaluated.

The principal alternative would be to deny the requested amendment. This would not reduce environmental impacts of plant operation and would result in reduced operational flexibility.

Alternative Use of Resources

This action does not involve the use of resources not previously considered in the Nuclear Regulatory Commission's Final Environmental Statement for the Zion Nuclear Power Station, Units 1 and 2, dated December 1972.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's submittals of July 6, 1989, August 4, August 10 and August 24, 1989 and did not consult other agencies or persons.

Finding of no Significant Impact

The Commission has determined not to prepare an environmental impact statement of the proposed license amendment.

Based upon this environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the request for amendments dated July 6, 1989, as supplemented August 4, 1989, August 10, 1989, and August 24, 1989, and the Final Environmental Statement for Zion, dated December 1972, which are available for public inspection at the Commission's Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC 20555; and at the Local Public Document Room, Waukegan Public Library, 128 N. County Street, Waukegan, Illinois 60085.

Dated at Rockville, Maryland, this 1st day of September 1989.

For the Nuclear Regulatory Commission.

Paul C. Shemanski,

Acting Director, Project Directorate III-2, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 89-21001 Filed 9-6-89; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-445A]

Texas Utilities Electric Co., Comanche Peak Steam Electric Station, Unit 1; Reevaluation of Antitrust Funding

Notice is hereby given that counsel for Cap Rock Electric Cooperative, Inc. has requested a reevaluation by the Director of the Office of Nuclear Reactor Regulation of the "Finding of No Significant Change" pursuant to the operating license antitrust review of the captioned nuclear unit. After further review, I have decided not to change my finding.

A copy of my finding, the request for reevaluation, and my reevaluation are available for public examination and copying, for a fee, at the Commission's Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC 20555.

Dated at Rockville, Maryland, this 29th day of August 1989.

For the Nuclear Regulatory Commission.

Thomas E. Murley,

Director, Office of Nucler Reactor Regulation.

BILLING CODE 7590-01-M

[Docket Nos. 50-361 and 50-362]

Southern California Edison Co., et al.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 76 to Facility Operating License No. NPF-10 and Amendment No. 64 to Facility Operating License No. NPF-15, issued to Southern California Edison Company, San Diego Gas and Electric Company, The City of Riverside, California and the City of Anaheim, California (the licensees), which revised the Technical Specifications for operation of the San Onofre Nuclear Generating Station, Units 2 and 3, located in San Diego County California.

The amendments were effective as of the date of issuance.

These amendments revised the following Technical Specifications (TS):

a. TS 3/4.3.3.5, "Remote Shutdown Instrumentation." (Unit 2 only)

b. TS 3/4.3.3.6, "Accident Monitoring Instrumentation." (Unit 2 only)

c. TS 3/4.7.6, "Snubbers."

TS 3/4.3.3.5 and TS 3/4.3.3.6 are revised to allow a one-time extension of the surveillance interval for channel calibration of pressurizer level instruments used for remote shutdown monitoring and accident monitoring. TS 3/4.7.6 is revised to increase the interval for functional testing of snubbers to at least once per refueling interval, which is defined as 24 months. Also, TS 3/4.7.6 is revised to provide an extension of the visual inspection interval requirements for snubbers inspected during the Cycle 4 refueling outage. These amendments are in response to applications for amendments designated as PCN 246 and PCN 290, dated May 19, 1988 and March 10, 1989.

The applications for amendments comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations, the Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which is set forth in the license amendments.

Notices of Consideration of Issuance of Amendments and Opportunity for Hearing in connection with this action were published in the **Federal Register** on February 27, 1989 (54 FR 8250) and April 24, 1989 (54 FR 16438-D). No request for a hearing or petition for leave to intervene was filed following the notices.

The Commission has prepared an Environmental Assessment related to the action and has determined that an environmental impact statement will not be prepared and that issuance of the amendment will have no significant adverse effect on the quality of the human environment.

For further details with respect to the action see (1) the applications for amendments dated May 19, 1988 and March 10, 1989, (2) Amendment No. 76 to License No. NPF-10 and Amendment No. 64 to License No. NPF-15, (3) the Commission's related Safety Evaluation and (4) the Commission's Environmental Assessment. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC 20555, and the General Library, University of California, P.O. Box 19557, Irvine, California 92713. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects III, IV, V and Special Projects.

Dated at Rockville, Maryland this 30th day of August, 1989.

For the Nuclear Regulatory Commission.

Charles M. Trammell,

Senior Project Manager, Project Directorate V, Division of Reactor Projects III, IV, V and Special Projects, Office of Nuclear Regulatory Regulation.

[FR Doc. 89-20998 Filed 9-6-89; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-362]

Southern California Edison Co., et al.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-15 issued to Southern California Edison Company (SCE), San Diego Gas and Electric Company, the City of Riverside, California and the City of Anaheim, California (the licensees), for operation of San Onofre Nuclear Generating Station, Unit 3, located in San Diego County, California. The request for amendment was submitted by letter dated July 26, 1989, and identified as Proposed Change PCN-294.

The proposed change would revise Technical Specification 3/4.7.6, "Snubbers." Surveillance Requirement 4.7.6.b requires a visual inspection of all snubbers on a regular basis. The interval for visual inspections is decreased as a function of the number of inoperable snubbers is discovered. With no inoperable snubbers found, a maximum interval of 18 months plus or minus 25 percent is allowed. With one inoperable snubber per inspection period, the interval is 12 months plus or minus 25 percent. The proposal change would allow a one-time extension of the 12 month interval to 20 months plus or minus 25 percent, for the case where one inoperable snubber was found.

Before issuance of the proposed license amendments, the Commission

---

will have made findings required by the

reasonable specificity. Contentions shall

completion of any required hearing if it

---

coolant average temperature greater

the measured time, the licensees have

made a party to the proceeding; (2) the

will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By October 10, 1989, the licensees may file a request for a hearing with respect to issuance of the amendments to the subject facility operating licenses, and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel will rule on the request and/or petition, and the Secretary or the designated Atomic Safety Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition with requesting leave of the Board up to fifteen (15) days prior to the first pre-hearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first pre-hearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendments under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly inform the Commission by a toll-free telephone call to Western Union at 1–(800) 325–600 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to George W. Knighton: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Mr. Charles R. Kocher, Esq., Southern California Edison Company, 2244 Walnut Grove Avenue, P.O. Box 800, Rosemead, California 91770 and Orrick, Herrington and Sutcliffe, Attention: David R. Pigott, Esq., 600 Montgomery Street, San Francisco, California, 94111, attorneys for the licensees.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendments which is available for public inspection at the Commission's Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC, and at the General Library, University of California at Irvine, Irvine, California 92713.

Dated at Rockville, Maryland, this 30th day of August, 1989.

For the Nuclear Regulatory Commission.

George W. Knighton,

Director, Project Directorate V, Division of Reactor Projects III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 89–20999 Filed 9–6–89; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50–361 and 50–362]

Southern California Edison Co., et al.; Consideration of Issuance of Amendments to Facility Operating Licenses and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. NPF–10 and NPF–15 issued to Southern California Edison Company (SCE), San Diego Gas and Electric Company, the City of Riverside, California and the City of Anaheim, California (the licensees), for operation of San Onofre Nuclear Generating Station, Units 2 and 3, located in San Diego County, California. The request for amendment was submitted by letter dated July 31, 1989, and identified as Proposed Change PCN–295.

The proposed change would revise Technical Specification 3/4.1.3.4, "CEA Drop Time," and its Bases, to use both an arithmetic average Control Element Assembly (CEA) drop time and a maximum individual CEA drop time. The maximum individual CEA drop time restriction would be used to limit the CEA drop time distribution from the arithmetic average.

The requirements of Technical Specification 3/4.1.3.4 ensure that actual drop times for full length CEAs are consistent with the drop time assumed in the accident and transient analyses. The drop times for full length CEAs, from the fully withdrawn position until the CEA reaches its 90 percent insertion position, are measured with the reactor

coolant average temperature greater that 520 °F and all reactor coolant pumps running. CEA drop times are measured following each removal and reinstallation of the reactor vessel head; following any maintenance on, or modification to the CEA drive system which could affect the drop time of those specific CEAs; and at least once per refueling interval.

Prior to SONGS Unit 2 Cycle 4 start-up, CEA drop times were measured individually using a visicorder to simultaneously monitor CEA position (from the reed switch position transmitter) and power to the upper gripper coil. The CEA was withdrawn from the core to its full out position and dropped by opening its individual circuit breaker. From the visicorder chart, the time from the interruption of power to 90 percent CEA insertion could be determined.

Beginning with the SONGS Unit 2 Cycle 4 start-up, a new method of measuring CEA drop times was instituted. This method uses special software (CEA Drop Time Test or CDTT software) loaded into one of the Control Element Assembly Calculators (CEACs). The CDTT software initiates a Core Protection Calculator (CPC) trip and simultaneously monitors the positions of all 91 CEAs (83 full length and 8 part length) as a function of time. The data obtained is then analyzed to determine individual CEA drop times. Under this method, it is important to note that power is interrupted at the reactor trip breakers rather than at the individual breakers as in the previous method. This new method more accurately reflects the operation of the reactor protection system during a scram.

The CEA drop times measured using the new method during SONGS Unit 2 Cycle 4 start-up were unexpectedly longer than those measured by the visicorder method. This is due to the longer time constant for dissipation of the gripper coil stored energy when tripped by the reactor trip breakers than when tripped by the individual circuit breakers. Subsequently, SCE requested a Technical Specification change to revise the drop time to the current limit of 3.2 seconds. In addition, Core Operating Limits Supervisory System (COLSS) and CPC penalty factors were installed to account for the increased CEA drop time. All the design basis events were re-analyzed at that time to support the change to 3.2 seconds.

The SONGS Unit 3 Cycle 4 CEA drop time test found that the margin between the slowest CEA and the Technical Specification limit of 3.2 seconds was small. To increase the margin between the Technical Specification value and the measured time, the licensees have proposed to amend the CEA drop time specification to incorporate the use of an arithmetic average CEA drop time with a restriction on the maximum individual CEA drop time. In addition, the proposed amendment would expand the Technical Specifications to have a range of average and maximum individual drop times.

The proposed specification would provide three average CEA drop times of 3.0, 3.2, and 3.4 seconds, with corresponding maximum individual CEA drop times of 3.2, 3.4, and 3.6 seconds. It would also provide COLSS margin and CPC margin-to-trip adjustment factors, and a penalty would be applied (adjustment factor greater than 1.0) if the average time is longer than 3.2 seconds. The plant would not enter either Mode 2 or 1 if either the average CEA drop time is greater than 3.4 seconds or the maximum individual CEA drop time is greater than 3.6 seconds.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By October 10, 1989 the licensees may file a request for a hearing with respect to issuance of the amendments to the subject facility operating licensees, and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel will rule on the request and/or petition, and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first pre-hearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first pre-hearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendments under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly inform the Commission by a toll-free telephone call to Western Union at 1–(800)325–6000 (in Missouri 1–(800)342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to George W. Knighton: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Mr. Charles R. Kocher, Esq., Southern California Edison Company, 2244 Walnut Grove Avenue, P.O. Box 800, Rosemead, California 91770 and Orrick, Herrington and Sutcliffe, Attention: David R. Pigott, Esq., 600 Montgomery Street, San Francisco, Califorina 94111, attorneys for the licensees.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendments which is available for public inspection at the Commission's Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC, and at the General Library, University of California at Irvine, Irvine, California 92713.

Dated at Rockville, Maryland, this 30th day of August, 1989.

For the Nuclear Regulatory Commission.

George W. Knighton,

Director, Project Directorate V, Division of Reactor Projects III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

Docket No. 50–271–OLA (Spent Fuel Pool Amendment)

Appointment of Adjudicatory Employee; Vermont Yankee Nuclear Power Corp.

Commissioners: Kenneth M. Carr, Chairman, Thomas M. Roberts, Kenneth C. Rogers, James R. Curtiss.

In accord with the requirements of 10 CFR 2.4, notice is hereby given that Dr. Harold VanderMolen, a Commission employee in the Office of Nuclear Reactor Regulation, has been appointed as a Commission adjudicatory employee within the meaning of § 2.4 to advise the Commission on issues in the above-captioned proceeding related to consideration under the National Environmental Policy Act of the proposed spent fuel pool reracking.

Dr. VanderMolen has not been engaged in the performance of any investigative or litigating function in connection with the Vermont Yankee facility or in any factually-related proceeding.

Until such time as a final decision is issued in the above-captioned matter, interested persons outside the agency and agency employees performing investigation or litigating functions in the Vermont Yankee operating license amendment proceeding are required to observe the restrictions of 10 CFR 2.780 and 2.781 in their communications with Dr. VanderMolen.

It is so *ordered.*

Dated at Rockville, Maryland this 30th day of August, 1989.

For the Commission.

Samuel J. Chilk

Secretary of the Commission.

BILLING CODE 7590-01-M

[Docket No. 50–320]

Meeting of the Advisory Panel for the Decontamination of Three Mile Island, Unit 2 GPU Nuclear Corporation

Notice is hereby given pursuant to the Federal Advisory Committee Act that the Advisory Panel for the Decontamination of Three Mile Island, Unit 2 (TMI–2) will be meeting on September 21, 1989, from 7:00 p.m. to 10:00 p.m. at the Holiday Inn, 23 S. Second Street, Harrisburg, Pennsylvania. The meeting will be open to the public.

At this meeting, the Panel will receive a status report on the progress of defueling from the licensee, GPU Nuclear Corporation. The licensee will also discuss the radiation monitoring program around TMI–2, and the schedule and proposed funding for the remainder of the cleanup. The NRC staff will summarize the findings of Final Supplement 3 to the Programmatic Environmental Impact Statement related to decontamination and disposal of radioactive wastes resulting from the March 28, 1979 accident at TMI–2. Final Supplement 3 evaluates the licensee's proposal to place the facility in long term storage following defueling.

Further information on the meeting may be obtained from Dr. Michael T. Masnik, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 492–1373.

Dated: September 1, 1989.

For the Nuclear Regulatory Commission.

John C. Hoyle,

Advisory Committee, Management Officer.

BILLING CODE 7590-01-M

OFFICE OF PERSONNEL MANAGEMENT

Request for Approval of RI 20–1 Application for Minimum Annuity Submitted to OMB for Clearance

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980, (title 44, U.S. Code, chapter 35) this notice announces a request to extend the use of RI 20–1 (Application for Minimum Annuity). OPM currently uses RI 20–1 to determine if an annuitant qualifies for the minimum annuity, repealed under Section 305 of Public Law 99–251 (Federal Employees Benefits Improvement Act of 1986). Annuitants who were entitled to the minimum annuity prior to the repeal date of February 27, 1986 continue to receive the minimum annuity in accordance with Section 305.

Approximately 300 Civil Service annuitants complete the form, which requires approximately 15 minutes, for a total public burden of 75 hours. For copies of this proposal, call Larry Dambrose (632–0199) or Grace Butler (632–0259).

DATES: Comments on this proposal should be received within 10 working days from the date of this publication.

ADDRESSES: Send or deliver comments to—

C. Ronald Trueworthy, Agency Clearance Officer, U.S. Office of Personnel Management, 1900 E Street, NW., Room 6410, Washington, DC 20415.

and

Joseph Lackey, OPM Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, NW., Room 3235, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Mary Beth Smith-Toomey, 202–632–5472.

U.S. Office of Personnel Management.

Constance Newman,

Director.

BILLING CODE 6325-01-M

PENSION BENEFIT GUARANTY CORPORATION

Request for Exemption From Bond/Escrow Requirement Relating To Sale of Assets by an Employer

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of pendency of request.

SUMMARY: This notice advises interested persons that the Pension Benefit Guaranty Corporation has received a request from The Orioles, Inc. for an exemption from the bond/escrow requirement of section 4204(a)(1)(B) of the Employee Retirement Income Security Act of 1974, as amended. Section 4204(a)(1) provides that the sale of assets by an employer that contributes to a multiemployer pension plan will not constitute a complete or partial withdrawal from the plan if certain conditions are met. Two of these conditions are that the purchaser post a bond or deposit money in escrow for a five plan year period beginning after the sale, and that the contract of sale between the seller and the purchaser provide that the seller will be secondarily liable for its withdrawal liability if the purchaser withdraws from the plan within five years after the sale and does not pay its withdrawal liability. The PBGC is authorized to grant exemptions from these requirements. Prior to granting an exemption, the PBGC is required to give interested persons an opportunity to comment on the exemption request. The effect of this notice is to advise interested persons of this exemption request and to solicit their views on it.

DATES: Comments must be submitted on or before October 23, 1989.

ADDRESSES: All written comments (at least three copies) should be addressed to: Pension Benefit Guaranty Corporation, Office of General Counsel (22510), 2020 K Street, NW., Washington, DC 20006. The request for an exemption and the comments received will be available for public inspection at the PBGC's Communication and Public Affairs Department, Suite 7100, at the above address, between the hours of 9:00 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: J. Ronald Goldstein, Senior Counsel, Office of General Counsel (22510), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006; (202) 778–8850; (202–778–8859 for TTY and TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Background

Section 4204(a)(1) of the Employee Retirement Income Security Act of 1974, as amended ("ERISA") provides that a bona fide arm's length sale of assets to an unrelated party by an employer that contributes to a multiemployer pension plan will not result in a withdrawal if three conditions are met. These conditions, listed in section 4204(a)(1)(A)–(C), are that—

(A) The purchaser has an obligation to contribute to the plan for substantially the same number of contribution base units for which the seller was obligated to contribute;

(B) The purchaser obtains a bond or places an amount in escrow, for a period of five plan years after the sale, in an amount equal to the greater of the seller's average required annual contribution to the plan for the three plan years before the year of sale or the seller's required annual contribution for the plan year before the year of sale; and

(C) The contract of sale provides that if the purchaser withdraws from the plan within the first five plan years beginning after the sale and fails to pay its liability to the plan, the seller will be secondarily liable for the liability it (the seller) would have had but for section 4204.

The bond or escrow described above would be paid to the plan if the purchaser withdraws from the plan or fails to make any required contributions to the plan within the first five plan years beginning after the sale.

Additionally, section 4204(b)(1) provides that if a sale of assets is covered by section 4204, the purchaser assumes by operation of law the contribution record of the seller for the plan year in which the sale occurred and the preceding four plan years.

Section 4204(c) of ERISA authorizes the Pension Benefit Guaranty Corporation ("PBGC") to grant individual or class variances or exemptions from the purchaser's bond/escrow requirement of section 4204(a)(1)(B) and the sale-contract requirement of section 4204(a)(1)(C). The legislative history of section 4204 indicates a Congressional intent that the sales rules be administered in a manner that assures protection of the plan with the least practicable intrusion into normal business transactions. The granting of an exemption or variance from the requirements of section 4204(A)(1)(B) or (C) does not constitute a finding by PBGC that the transaction satisfies the other requirements of section 4204(a)(1).

Under the PBGC's regulation on variances for sales of assets (29 CFR Part 2643), requests for waivers of the bond/escrow and contract/provision requirements are normally made to the multiemployer plan in question. However, under § 2643.2 of the regulation, a waiver of these requirements may be sought from the PBGC, if the transaction does not satisfy any of the criteria in Subpart B of the regulation and the parties assert some other basis for granting the waiver. Under § 2643.3(a) of the regulation, the PBGC will approve a variance or exemption request if it determines that approval of the request—

(1) Would more effectively or equitably carry out the purposes of Title IV of the Act; and

(2) Would not significantly increase the risk of financial loss to the plan.

Section 4204(c) of ERISA and § 2643.3(b) of the regulation require the PBGC to publish a notice of the pendency of a request for a variance or exemption in the **Federal Register**, and to provide interested parties with an opportunity to comment on the proposed variance or exemption.

The Request

The PBGC has received a request from the purchaser, The Orioles, Inc. (the "Buyer"), a corporation formed under the laws of Maryland, for an exemption from the requirements of section 4204(a)(1)(B) of ERISA with respect to its purchase of the Baltimore Orioles baseball team from The Baltimore Orioles, Inc. (the "Seller"). In the request, the Buyer represents among other things that:

1. The Major League Baseball Players Benefit Plan (the "Plan") is established and maintained pursuant to a collective bargaining agreement between the 26 professional major league baseball teams and the Major League Baseball Players Association.

2. The Seller was a participating employer in the Plan.

3. The major league clubs have established the Major Leagues Central Fund (the "Central Fund") pursuant to the "Major League Agreement in re Major Leagues Central Fund." Under this Agreement, contributions to the Plan for all participating employers are paid by the Office of the Commissioner of Baseball from the Central Fund on behalf of the clubs in satisfaction of their pension liability arising under the

Plan's funding agreement. The monies in the Central Fund, which fund the Plan, are derived directly from (i) gate receipts from All-Star games, (ii) radio and television revenues from World Series, League Championships, intra-division play-offs and All-Star games, and (iii) certain other radio and television revenue (including foreign broadcasts) from regular and exhibition games.

4. In 1988, the major league clubs contributed the sum of $33,000,000 per year to cover both pension and welfare benefits, approximately $28,000,000 of which was remitted to the Plan. Each major league club is responsible the ¹⁄₂₆ of that amount. In 1988, the Central Fund paid approximately $1,000,000 as pension contributions to the Plan on behalf of the Seller.

5. The Buyer and the Seller entered into an agreement on March 16, 1989 for the sale of the Baltimore Orioles baseball team. The final closing occurred on or about May 26, 1989.

6. The contract of sale provides that the Buyer will have an obligation to contribute to the Plan for substantially the same number of contribution units as the Seller.

7. The sales agreement further provides that:

> If the Buyer hereafter, but prior to the end of the fifth plan year commencing after closing, partially or completely withdraws * * * Seller shall remain secondarily liabile for any withdrawal liability it would have had to the Plan but for the operation of ERISA § 4204.

8. In support of the variance request, the Buyer states that:

> [b]ecause the Plan is funded directly from the revenues which are paid from the Central Fund directly to the [Plan's trust fund] without first passing through the hands of any of the Employers, the Plan enjoys adequate security * * *. A change in ownership * * * does not in any way affect the obligation to fund the Plan * * * nor create the possibility that there will be difficulty in collecting Plan contributions from any new owner * * *.

9. The Buyer has sent by certified mail, return receipt requested, a complete copy of this request to the Plan and the collective bargaining representative of the Orioles baseball team.

Comments

All interested persons are invited to submit written comments on the pending exemption to the above address on or before [insert date 45 days after publication]. All comments will be made a part of the record. Comments received, as well as the application for exemption, will be available for public inspection at the address set forth above.

Issued at Washington, DC on this 30th day of August 1989.

James B. Lockhart III,

Executive Director Pension Benefit Guaranty Corporation.

BILLING CODE 7708–01–M

POSTAL RATE COMMISSION

[Order No. 843, Docket No. C89–4]

MOAA Catalog Subclass Proposal; Order on Filing of Complaint of Mail Order Association of America

Issued August 31, 1989.

Before Commissioners: Henry R. Folsom, Vice-Chairman; John W. Crutcher; W.H. "Trey" LeBlanc, III; Patti Birge Tyson.

Notice is hereby given that on August 18, 1989, a document entitled "Complaint of Mail Order Association of America Seeking the Creation of a Subclass for Catalogs Sorted to the Carrier Route" was filed with the Commission and assigned Docket No. C89–4. MOAA's complaint alleges that under the current classification, the Postal Service is charging third-class rates which do not conform to the policies of the Postal Reorganization Act and claims that creation of a subclass would remedy this allegedly inequitable situation.

The statutory basis set forth in the complaint is MOAA's assertion that the current classification system results in violations of the requirements of sections 3623(c)(1), 3622(b)(1), 3622(b)(3) and 3622(b)(6) of the Postal Reorganization Act, which generally relate to considerations of fairness and equity, costing, and mail preparation.[1] In support of its position, MOAA cites several factors which it believes have led to "overcharging" catalogs sorted to the carrier route level. These include the alleged failure of the current schedule to recognize cost differences between carrier and non-carrier route mail, the Commission's allegedly misplaced confidence that rate category treatment for carrier route pieces produces fair rates and the impact of the minimum-per-piece/per pound rate structure on heavier (pound-rated) pieces. *See* Complaint at pp. 3–5.

Relationship to Docket Nos. R80–1, R87–1 and C89–3. MOAA asserts (at pp. 5–8) that its complaint requires a review of the evidentiary basis for Commission action in Docket No. R80–1 eliminating a distinction between catalogs and circulars and argues against the ability of the existing three-tier rate structure, based on presortation, to reflect adequately cost savings. In addition, MOAA criticizes the Commission's decision, in Docket No. R87–1, not to recommend a carrier route subclass for bulk third class mail, specifically questioning the conclusion that there must be intrinsic differences for a type of mail to be given subclass status. It nonetheless argues that catalogs meet this criterion in that they are intrinsically different from the balance of third-class mail in terms of physical makeup, purpose, use and nature of the mailing customer. At the same time, MOAA claims that catalogs have intrinsic similarities in, among other things, their handling and cost characteristics, their use as a marketing tool, and their preparation. Complaint at pp. 9–13. Accordingly, MOAA argues in favor of a carrier route subclass for catalogs or, in the alternative, for a catalog subclass encompassing all three levels of sortation. Complaint at pp. 12–13.

Procedural matters. MOAA acknowledges the Complaint of Advo-System, Inc. (Docket No. C89–3) seeking a separate subclass for local saturation mail and urges consolidation of this and any related complaints. In addition, in conformance with the Commission's rules of practice, MOAA identifies "persons affected" as all those making use of third-class mail for the purpose of effecting delivery of their catalogs, particularly those persons entering their catalogs sorted to the carrier route level.

It is ordered:

(1) The Postal Service's answer to the MOAA Complaint is to be filed by September 18, 1989.

(2) Stephen A. Gold, Director of the Office of the Consumer Advocate, is appointed to represent the interests of the general public.

By the Commission.

Charles L. Clapp,

Secretary.

[FR Doc. 89–20978 Filed 9–6–89; 8:45 am]

BILLING CODE 7715–FW–M

---

[1] In MOAA's view, violations of the requirements of section 3623(c)(1) arise in that the current classification system fails adequately to reflect the cost differences for the various types of mail within the class. Violations of 3622(b)(1) allegedly occur because the current classification system results in a rate schedule which is not "fair and equitable." With respect to section 3622(b)(3), MOAA claims carrier route mail, particularly carrier route catalogs, bear a portion of non-attributable costs exceeding that which is "reasonably assignable." MOAA also claims that the classification fails to comply with the section 3622(b)(6)'s requirement that the schedule recognize "the degree of preparation of mail * * * and its effect upon reducing costs of the Postal Service."

PRESIDENTIAL COMMISSION ON CATASTROPHIC NUCLEAR ACCIDENTS

Meeting

The Presidential Commission on Catastrophic Nuclear Accidents, pursuant to its authority under Subsection 170(1), of Public Law 100–408, the Price-Anderson Amendments Act of 1988, will hold a meeting on September 27, 1989, from 10:00 a.m.–5:00 p.m., in the Potomac Rooms at the Wyndham-Bristol Hotel, 2430 Pennsylvania Avenue, NW., Washington, DC 20037. The Commission was created to conduct a comprehensive study of appropriate means of fully compensating victims of a catastrophic nuclear accidents and to submit a final report to Congress not later then August 20, 1990.

The purpose of the meeting is to receive a briefing from Joseph B. Knotts, Jr. of the law firm Bishop, Cook, Purcell and Reynolds on the present status, pursuant to the Price-Anderson Act, of persons injured as a result of an accident at a nuclear power plant in the United States; from representatives of the nuclear insurance pools on their claims experience with respect to the Three Mile Island accident in Pennsylvania; and from Kenneth R. Feinberg, a member of the Commission, on the American Bar Association's recent report on mass torts. The Commission will also discuss its plans for future meetings and activities and will be briefed by respresentatives of the General Services Administration on standards of conduct.

Further information on these meetings can be obtained from Jerome Saltzman whose temporary address is c/o Department of Energy, 1000 Independence Avenue, NW., RW–20, Washington, DC 20585, (202) 586–9692.

The public will be permitted to attend this meeting as observers. The meeting will be transcribed and procedures to obtain transcripts will be provided at the meeting. Members of the public wishing to attend the Commission should notify Jerome Saltzman on (202) 586-9692 by close of business, September 22, 1989.

Dated: September 1, 1989.

Jerome Saltzman,

Executive Director Presidential Commission on Catastrophic Nuclear Accidents.

[FR Doc. 89–20954 Filed 9–6–89; 8:45 am]

BILLING CODE 6820–SF–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–27202; File No. SR–PSE–89–16]

Self-Regulatory Organizations; Notice of Filing of Amendment to Proposed Rule Change by the Pacific Stock Exchange, Inc. Relating to a One-Year Pilot Which Requires the Trading Crowd to Make Ten-Up Markets

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on August 15, 1989, the Pacific Stock Exchange, Inc. ("PSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") an amendment to the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization.[1] The Commission is publishing this notice to solicit comments on the proposed rule change, as amended, from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its earlier rule filing, changing Rule VI, section 87, as set forth below (Amendments are indicated with brackets for deletions, and italics for new language.)

Rule VI, Section 87—Trading Crowd Firm Disseminated Market Quotes

Sec. 87. Each trading crowd is required to provide a depth of ten (10) option contracts for all non-broker/dealer customer orders, at the bid/offer which is displayed as the Disseminated market quote at the time such orders are announced or displayed at the trading post designated for trading the subject option class.

(a) The member/member organization entering an order for execution pursuant to this Rule is responsible for ascertaining the account origin of such order and for providing notation on the subject order ticket of such order's account origin.

(b) The Rule shall be in effect at all times other than during a trading rotation at the subject trading post and a reasonable period of time immediately following a trading rotation, not to exceed five (5) minutes.

(c) [Should the executing Floor Broker attempt to split the disseminated market quotes, or] *A trading crowd shall be exempt from the provisions of this rule* upon the declaration of a "fast market" pursuant to Rule VI, Section 38 [, the trading crowd shall be exempt from the provisions of this rule.]

(d) Should the response of members present at a trading post be insufficient to provide a depth of ten (10) contracts, the Order Book Official shall allocate among the Market Makers present at the trading post the balance of contracts necessary to provide an execution on ten contracts. The Order Book staff shall record and maintain lists of the individual Market Makers who were allocated contracts, and consider such allocations when similar occasions arise within the same trading session. The Order Book Official shall seek, as reasonably as possible, to equalize such allocations.

(e) The enforcement of this Rule, and the *determination of the* expiration months and strike prices subject to the provisions of this Rule shall be [determined by] *within the jurisdiction of* the Options Floor Trading Committee. Two Options Floor Officials may grant exemptions to the provisions of this Rule for either a class or series within a class of option contracts if, in their determination, the individual situation warrants such action, or upon their determination that an error occurred in the dissemination of a market quote.

(f) This Rule is effective on (approval by Commission) and shall continue in effect to and including (date one year after approval.) Any extension of the effectiveness of this Rule shall require further approval by the Securities and Exchange Commission.

Commentary:

.01 If a bid/offer displayed as a disseminated market quote is on behalf of an order represented by a Floor Broker or the Order Book Official and is for less than ten (10) contracts, the trading crowd is obligated to buy/sell the balance of contracts necessary to provide a depth of ten (10) contracts at the disseminated bid/offer.

.02 Should a Floor Broker cause a bid/offer to be disseminated and the order is subsequently executed or cancelled, the Floor Broker shall be responsible for causing the removal of such disseminated bid/offer. Failure to remove such bid/offer may result in the Floor Broker being held responsible for providing a depth of ten (10) contracts. A Market Maker who has caused a bid/offer to be disseminated is equally responsible for causing the removal of such bid/offer upon leaving a trading post.

---

[1] The original proposed rule change was published for comment in Securities Exchange Act Release No. 26957 (June 22, 1989), 54 FR 27445.

.03 Market Maker orders for less than ten (10) contracts that are represented at a trading post by a Floor Broker shall not be disseminated. Floor Brokers shall remain obligated to use due diligence in the representation of orders pursuant to Rule VI, Section 62(a).

.04 [Options Floor Officials, pursuant to Rule VI, Section 39, and Commentary .05 thereunder, may issue Floor Citations for v] Violations of this Section and its Commentary *shall be subject to formal disciplinary action* pursuant to Rule XX.

Rule VI, Section 1

Applicability, Definitions and References.

Sec. 1(a)(29). No Change.

Rule VI, Section 39

Admission to and Conduct on the Trading Floor.

Sec. 39. Commentary .05. No change.

Rule VI, Section 62

Responsibilities of Floor Brokers.

Sec. 62. Commentaries .04 and .05. No change.

Rule VI, Section 79

Obligations of Market Makers.

Sec. 79. Commentary .08. No change.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for the Proposed Rule Change

The Exchange proposes to amend the proposed Rule VI, section 87, to remove the exemption set forth in paragraph (c) that provides for a trading crowd's exemption from its "ten-up" obligation in the event a floor broker attempts to "split" the disseminated market quotes, to specifically state, in paragraph (e), that the enforcement of Section 87 is within the jurisdiction of the Options Floor Trading Committee ("OFTC"), and to require, in Commentary .04, that violations of Section 87 would be subject to formal disciplinary action, as opposed to disposition via floor citation.

The OFTC reconsidered the exemption with regard to a trading crowd's obligation in the event a floor broker attempts to split the market by announcing a bid or offer which betters the displayed market. The purpose of the exemption had been to preclude floor brokers from using the provisions of Section 87 as a leverage to obtain executions at better prices than those disseminated at the time an order is announced at the trading post. The OFTC determined that while this leverage activity should be discouraged, the exemption essentially provided that the "ten-up" requirement extend only to the market quotes caused to be disseminated by market makers, substantially limiting any benefit to public customers.

The Exchange proposes to amend Commentary .04 of section 87 to reflect that violations of Section 87, which would include the refusal by a market maker to accept an allocation of contracts by an Order Book Official pursuant to paragraph (d), and the failure of a floor broker to provide a "ten-up" execution as a result of his failure to remove a disseminated bid or offer for which he is responsible, would be subject to formal disciplinary action, as opposed to disposition via floor citation, pursuant to the Exchange's Minor Rule Plan. The Exchange believes that the formal disciplinary procedures as set forth in Rule XX would be more appropriate, due to the serious nature of these violations. The sanction amounts for these violations would be based on the premium value of the refused allocations or executions.

The Exchange believes that the proposed rule change will protect investors and promote the public interest by assuring a minimum ten contract execution of public customer orders at the displayed bid or offer.

The proposed rule changes are consistent with section 6(b)(5) of the 1934 Act, which provides, in pertinent part, that the rules of the Exchange be designated to promote just and equitable principles of trade and to protect the investing public.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change imposes a burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Written comments on the proposed rule change were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of the publication of this notice in the **Federal Register** or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding; or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposes rule change; or

(b) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file a six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by September 28, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: August 31, 1989.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 34-27204; File No. SR-PSE-88-07]

Self-Regulatory Organizations; Order Approving Proposed Rule Change by Pacific Stock Exchange, Inc. Relating to Arbitration Procedures and Filing Fees

I. Introduction

On June 3, 1988, the Pacific Stock Exchange, Inc. ("PSE" or "Exchange") submitted to the Securities and Exchange Commission ("Commission" or "SEC") pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b-4 thereunder,[2] a proposed rule change designed to simplify arbitration procedures for claims up to $10,000, to provide for three or five arbitrators in certain matters, to update the filing fees, and to increase the amount retained from the deposit where a matter is settled or withdrawn prior to the first arbitration session. Amendment No. 1, submitted by the PSE on August 25, 1989, makes additional changes to the Exchange's rules under the proposed rule change and the statements of purpose concerning the proposed rule change.

Notice of the proposed rule change was provided by the issuance of a Commission release (Securities Exchange Act Release No, 26832, May 18, 1989), and by publication in the **Federal Register** (53 FR 27254, July 19, 1988). The Commission received no comments on the proposed rule change.

II. Description of the Proposal

A Uniform Arbitration Code (the "Uniform Code") has been developed by the Securities Industry Conference on Arbitration ("SICA"), to establish a uniform system of arbitration procedures throughout the securities industry. The proposed rule changes are intended to conform certain provisions of PSE Rule XII of PSE with the Uniform Code. In general, the changes are intended to simplify arbitration procedures for claims up to $10,000, to provide for three or five arbitrators in certain matters, to update the filing fees, and to increase the amount retained from the deposit where a matter is settled or withdrawn prior to the first arbitration session.

Section 2(a) of PSE Rule XII currently provides that claims of less than $5,000 may be decided by a single arbitrator pursuant to expedited and simplified arbitration procedures. The proposed amendment would increase the limit on the size of claims for which the simplified arbitration procedures are available from $5,000 to $10,000, in order to increase substantially the number of cases processed under the expedited procedures. The proposal would also establish a filing fee of $200 in cases where the amount in controversy is more than $5,000 but does not exceed $10,000.

Section 2(d) PSE Rule XII currently provides that, in a simplified arbitration, if a counterclaim exceeding $5,000 is filed, the arbitrator may refer the claim, counterclaim, and/or third party claim, if any, to a panel of three or five arbitrators. The proposed amendment to section 2(d) would provide for an increased threshold of $10,000.

Section 8(a)(1) of PSE Rule XII currently provides that in all matters involving public customers where the claim does not exceed $500,000, or where the claim does not involve or disclose a monetary claim, the Director of Arbitration shall appoint a panel of no fewer than three nor more than five arbitrators.

Moreover, section 8(a)(2) currently provides that in all matters involving public customers where the claim is $500,000 or more, a panel of five arbitrators is required, unless the parties agree to have three arbitrators. In order to alleviate administrative delays and costs frequently encountered in such cases, an amendment would eliminate the requirement that the Director of Arbitration appoint five-member panels for large cases. The amended rule would allow the Director of Arbitration to exercise discretion in appointing panels of three or five arbitrators, as appropriate, in all cases not heard under the simplified arbitration procedures.

The proposed rule change amending section 31(a) of Rule XII would increase the deposit required for claims over $500,000 from $750 to $1,000. The proposed rule amendment to section 31(a) establishes a non-refundable filing fee of $500 imposed on all member firms for each arbitration Submission Agreement filed with PSE against a non-member. In the case of non-monetary claims, the proposed rule would amend section 31(c) to provide a maximum deposit of $1,000, rather than $750. The proposed rule change amending section 31(d) of Rule XII would provide that the administrative fee retained in an arbitration case which is settled or withdrawn prior to the first hearing session be increased from $25 to $100.

PSE has adopted the proposed rule change pursuant to section 6(b)(5) of the Securities Exchange Act of 1934, which requires that the PSE's rules be designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and, in general, protect investors and the public interest. The fee increases represented by these changes are reasonable and provide for an equitable allocation of fees among SRO members and investors using the arbitration facilities consistent with section 6(b)(4) of the Act.

III. Discussion and Conclusion

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of sections 6(b) (4) and (5) of the Act,[3] which require that national securities exchanges and registered securities associations have rules designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, provide for an equitable allocation of fees, and, in general, protect investors and the public interest. In accordance with the guidelines provided by SICA's recent revisions to the Uniform Code of Arbitration,[4] the Commission finds that the proposed amendments will streamline the Exchange's procedural rules governing arbitration, provide for more efficient arbitration proceedings involving smaller claims, and help defray the expenses associated with the Exchange's administration of the arbitration forum.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[5] that the above mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[6]

Dated: August 31, 1989.

Shirley E. Hollis,

Assistant Secretary.

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Order Approving Proposed Rule Change Relating to Crossing Agency Orders

I. Introduction

On March 27, 1989, the Philadelphia Stock Exchange, Inc. ("Exchange" or "Phlx") submitted to the Securities and Exchange Commission ("Commission" or "SEC"), pursuant to Section 19(b)(1) of the Securities and Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] a proposed rule change designed to clarify the rights and obligations of market participants in executing agency cross transactions. Amendment No. 1, submitted by the Exchange on July 31, 1989,[3] amends the operation of the proposed rule change as it applies to specialists and alternate specialists and addresses concerns raised by the proposal at it relates to customer priority rules.

Notice of the proposed rule change was provided by the issuance of a Commission release (Securities Exchange Act Release No. 26832, May 18, 1989), and by publication in the **Federal Register** (54 FR 22513, May 24, 1988). The Commission received no comments on the proposed rule change.

II. Description of the Proposal

Rule 126 of the Rules of the Exchange's Board of Governors generally requires that when a member is holding an order to buy and an order to sell the same security, the member must offer the security at a price which is higher than his bid by the minimum variation permitted in the security before making a transaction with himself. The proposed rule change amends Phlx Rule 126 to codify a policy that, as a general matter, a specialist or alternate specialist may not interfere with the customer side of a cross by buying or selling for his own account at that price. For the limited purposes of Exchange Rule 126, the proposal would generally define a "customer order" as any order which a broker represents in an agency capacity, including any order of a market maker or other broker-dealer not affiliated with the executing broker or of any associated person of such broker-dealer is excluded from the rule's definition of "customer order".

The proposal would allow the participation of a specialist or alternate specialist in a cross transaction executed on the Exchange in certain specified circumstances. When a member organization has both a customer's order to buy and a customer's order to sell the same security at the same price, or when one member organization has a customer's order on one side and another member organization has a customer's order on the other side, the proposed rule change will allow a specialist or alternate specialist to participate in the cross by buying or selling for his own account at that price only to the extent that the specialist had previously made a bid or offer at the same price as the cross and that bid or offer had been publicly disseminated. Similarly, where a member organization has a customer's order on one side only and the member organization (or another member organization) is acting as principal on the other side, a specialist or alternate specialist may participate on the customer side of the trade by buying or selling securities for his own account only to the extent that the specialist or alternate specialist had entered a publicly disseminated bid or offer at that price. In addition, specialists and alternate specialists are not required to yield priority to the member organization on the principal side of such a cross. Finally, the Phlx states that the specialist or alternate specialist could participate in the cross on behalf of any customer orders to buy or sell at the cross price.

The rule also specifies that a specialist cannot seek to avoid the operation of the rule by placing an order in one of his specialty stocks with another member in order to have that order placed on the specialist's own book. A specialist would not, however, be prevented from entering orders in securities traded by an unaffiliated specialist unit.

The proposal clarifies that an agency cross is entitled to priority over a member's proprietary bids or offers. Where a specialist or alternate specialist has exposed himself to market risk by publicly disseminating a bid or offer at a specified price, however, he will be protected from yielding priority to an agency cross up to the size of his disseminated market. In addition, because the specialist or alternate specialist can participate in the cross on behalf of any customer orders to buy or sell at the cross price, the proposal ensures that customer orders entrusted to Phlx specialists will not be disadvantaged by priority being granted to agency crosses.

The Exchange contends that the proposed rule change addresses concerns raised by the existence of multiple exchange markets in a trading environment increasingly characterized by substantial block positioning in a manner consistent with auction market principles, and that the proposal strikes a balance between the competing needs of various groups of customers and between the varying interests of equity specialists, options market makers and floor brokers.

III. Discussion and Conclusion.

In response to concerns raised by Commission staff about how the proposed rule change could affect customer priority rules,[4] the Exchange emphasized that the proposed rule change does not operate in a manner inconsistent with traditional auction market concepts of customer priority embodied in Section 11(a) of the Act.[5] For purposes of the proposed rule change, the Exchange stated that the term "customer order" would not include any transactions circumscribed by Section 11(a) of the Act, as it does not extend to any order for the account of a broker-dealer affiliated with the executing broker, or any associated person of the broker-dealer.[6]

In recognition of the fact that most principal trading activity originating on the Exchange's equity floor, other than facilitation crosses, is undertaken by the specialist or alternate specialist acting in that capacity, the proposed rule change would impose limitations on specialists or alternate specialists seeking to trade in such capacity while one or more member organizations are seeking to effect cross transactions. The Exchange believes that the proposed rule change does not permit a transaction, or give parity, priority, or precedence to the order of a member, in a manner inconsistent with the operation of section 11(a)(1)(G) of the Act.[7] Moreover, consistent with section 11(a)(1)(A) of the Act, to the extent a specialist or alternate specialist had made a publicly disseminated bid or offer at the cross price, the proposed rule change does not limit his or her ability to participate along with the customer side of the cross up the size of his or her disseminated market.

The Commission finds the proposed rule change to be consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange. In particular, the Commission finds the proposed rule change to be consistent with the requiremetns of section 6(b)(5) [8] in that it is designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, and protect investors and the public interest by assuring that agency cross transactions are executed in a fair and orderly auction market environment. In addition, the proposal is consistent with section 11A(a)(1)(C) (ii) and (iv) of the Act [9] because it should promote fair competition among brokers and dealers and the practicability of brokers executing investors' orders in the best market.

The Commission believes the proposed rule change strikes an appropriate balance between the competing needs of various customers' orders represented for execution on the Phlx and the proprietary trading operations of Exchange members and member organizations. The proposal clarifies that an agency cross is entitled to priority over a member's proprietary bids of offers, except where a specialist or alternate specialist had publicly disseminated a bid or offer at the cross price. The proposal will continue to afford price protection to customer limit orders entered on a specialist's book and prevent such orders from being disadvantaged by priority being granted to agency crosses. Orders on the book that coincide with the cross price will benefit by generally being assured of receiving an execution at the cross price. Finally, the proposed rule change does not limit the ability of customer orders to receive price improvement, since the proposed rule change covers only the proprietary trading activity of a member at the cross price, and therefore does not restrict the ability of a member to interfere with the execution of a cross at a better price.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[10] that the proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[11]

Dated: August 31, 1989.

Shirley E. Hollis,
Assistant Secretary.

[Release No. 34–27203; File No. SR–PHLX–89–37]

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Order Approving Proposed Rule Change Relating to Half Point Strike Prices

On June 26, 1989, the Philadelphia Stock Exchange, Inc. ("PHLX" or "Exchange") submitted to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) of the Securities Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] a proposed rule change to provide for the addition of half point (.005) strike price intervals for the Deutsche Mark, Japanese Yen, and Swiss Franc currency options.

The proposed rule change was published for comment in Securities Exchange Act Release No. 27014 (July 10, 1989), 54 FR 30123 (July 18, 1989). No comments were received on the proposed rule change.

The PHLX proposes to adopt a pilot program, pursuant to Exchange Rule 1011(a)(ii), to provide for the addition of half point (.005) strike price intervals for the Deutsche Mark (CFM/XDM), Japanese Yen (CJY/XJY) and Swiss Franc (CSF/XSF) currency options. In order to minimize any potential operational burdens that may result from the proliferation of options series, the pilot program would be limited to no more than the first three expiration cycles and the nearest four half point strike price intervals to the currency spot market (*i.e.*, two above the two below spot).

The Exchange believes that the additional half point strike prices will enable investors in Deutsche Mark, Japanese Yen, and Swiss Franc options contracts to manage and hedge their currency risk more effectively. Moreover, the Exchange believes that establishing these additional options series in both American and European style foreign currency options will provide foreign currency options market participants with competitive alternative products to the other foreign currency markets, particularly the over-the-counter options market and the forward market.

The PHLX believes that the proposed rule changes is consistent with section 6(b) of the Act in that it is designed to facilitate the trading of the Deutsche Mark, Japanese Yen and Swiss Franc foreign currency options contracts. In addition, the PHLX believes the proposal promotes the protection of investors and the public interest.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6.[3] By introducing half point intervals, the proposal provides investors in a non-volatile currency with greater flexibility in managing their currency risk, thereby promoting the mechanism of a free and open market and protecting investors and the public interest. Moreover, to avoid the proliferation of options series, the PHLX will add half point strikes only for at-or near-the-money strikes and for no more than the first three expiration cycles. Finally, the strike price revision is similar to others the Commission has approved in options for other non-volatile currencies traded on the PHLX.[4]

It is therefore ordered, pursuant to section 19(B)(2) of the Act,[5] that the proposed rule change (SR–PHLX–89–37) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[6]

Dated: August 31, 1989.

Shirley E. Hollis,
Assistant Secretary.

[Rel. No. IC-17122; File No. 812-7308]

Golden American Life Insurance Co., et al.

August 31, 1989.

AGENCY: The Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 (the "1940 Act").

APPLICANTS: Golden American Life Insurance Company ("Golden American" or "Company"), Golden American Knox Funds Separate Account B of Golden American Life Insurance Company (the "Account"), and Directed Services, Inc. ("DSI").

RELEVANT 1940 ACT SECTIONS: Exemption requested under section 6(c) from sections 26(a)(2)(C) and 27(c)(2).

SUMMARY OF APPLICATION: Applicants seek an order to the extent necessary to permit the deduction of a mortality and expense risk charge from the assets of the Account under a deferred variable annuity contract (the "Deferred Annuity") and an immediate variable annuity certain contract (the "Annuity Certain") (collectively, the "Contracts") and to permit the deduction of a guaranteed death benefit charge from the accumulation value in the Account under the Deferred Annuity.

FILING DATE: The application was filed on April 18, 1989 and amended on August 4, 1989.

HEARING OR NOTIFICATION OF HEARING: If no hearing is ordered, the requested exemption will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any request must be received by the SEC by 5:30 p.m., on September 25, 1989. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, in the case of an attorney-at-law, by certificate. Request notification of the date of hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicants, c/o Golden American Life Insurance Company, 909 Third Avenue, 19th Floor, New York, New York 10022.

FOR FURTHER INFORMATION CONTACT: Cindy J. Rose, Financial Analyst, at (202) 272-2058 or Clifford E. Kirsch, Acting Assistant Director, at (202) 272-2061.

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231-3282 (in Maryland (301) 258-4300).

Applicants' Representations

1. Golden American is a stock life insurance company organized under the laws of the State of Minnesota. From January 2, 1973 through December 31, 1987, the name of the company was St. Paul Life Insurance Company. On December 31, 1987, after all of St. Paul Life Insurance Company's business was sold, the name was changed to Golden American Life Insurance Company. The Account is a separate investment account of Golden American established to act as a funding vehicle of variable annuity contracts. The Account is registered with the Commission as a unit investment trust and a registration statement on Form N-4 has been filed with the Commission.

2. The Account is divided into divisions, each division investing in shares of a designated series of the Knox Funds (the "Fund"). The Fund is registered with the Commission as an open-end management investment company and has filed a registration statement on Form N-1A. The Fund is a series-type mutual fund that contains four series, each of which will pursue different investment objectives and policies.

3. Pursuant to a Distribution Agreement between Directed Services, Inc. (a wholly owned subsidiary of the Golden Financial Group, Inc.) and Golden American, DSI will solicit sales of the Contracts through registered representatives who are licensed to sell securities and variable insurance products including variable annuities. The registered representatives will be appointed by Golden American to sell the Company's Contracts. The offering of the Contracts will be continuous.

4. The Contracts provide for the accumulation of values on a variable basis except to the extent that a portion of the accumulation value is allocated to the Guaranteed Interest Division of the general account. Payment of annuity benefits will be on a fixed or variable basis. The variable aspects of the Contracts differ significantly from the fixed aspects in that the Contract owner and the Annuitant assume the risk of investment gain or loss under a Contract rather than Golden American. A Contract owner directs the allocation of premium payments and accumulation value to the Account.

5. The Deferred Annuity is an individual flexible premium payment contract which provides for an initial premium payment and for additional premium payments if the Contract owner so desires. There is, however, no obligation to make additional payments. In the Deferred Annuity, the Company guarantees a minimum death benefit payable to the beneficiary if the Contract owner or the Annuitant (when there is no Contingent Annuitant) dies prior to the annuity commencement date. The Company will pay the greater of: (1) The accumulation value or (2) the lesser of the guaranteed death benefit or the maximum guaranteed death benefit. The guaranteed death benefit is the accumulated value of the premiums paid adjusted at an annual interest rate of 5% minus the accumulated value of the partial withdrawals taken adjusted at an annual interest rate of 5%. The Company reserves the right to modify this interest rate structure to one which approximately yields equivalent results over the life of a contract. The maximum guaranteed death benefit is two times the sum of premiums paid minus two times the sum of partial withdrawals taken. The charge for the guaranteed death benefit will be no greater than $1.20 per $1,000 of guaranteed death benefit per contract year. In the future, the Account may offer other variable annuity contracts that may make a guaranteed death benefit charge of up to $1.20 per $1,000 of guaranteed death benefit per year. This charge is not an asset-based charge. Rather it is a contract charge imposed to compensate the Company for the risk that the minimum guaranteed death benefit due under a Deferred Annuity when the annuitant dies during the accumulation phase may exceed the normal death benefit otherwise payable. Expressed as an asset charge (assuming a hypothetical gross return of 5%), it would effectively increase the mortality and expense risk charge by approximately 0.10%. For higher hypothetical gross returns, this charge, when expressed as an asset charge, would be less; and for lower hypothetical gross returns, it would be more. In the Applicants' view, assessment of this risk charge in this manner will benefit Contract owners because it provides a better match of the charge and the risk than does assessing it as a daily percentage of assets charged against assets in each division of the Account.

6. The Annuity Certain is an immediate annuity which provides for a single premium payment and variable annuity payments to be paid to the Annuitant over a fixed period of time.

7. The Contracts provide for partial withdrawals. In the Deferred Annuity, the cash surrender value may be applied at any time before the annuity commencement date to an income plan and, on the annuity commencement date, the accumulation value may be applied to an income plan. In the Annuity Certain, the cash surrender value may be applied to an income plan at any time during the certain period.

8. Sales loading at a maximum rate of 1.5% of each premium is deducted from each premium payment. This charge is allocated to cover distribution expenses. All sales loading applicable to initial, single or additional premium payments is deducted by Golden American at the time of payment.

9. The Contracts provide that a maximum mortality and expense risk charge equal to 0.002477% of the asset values in each division of the Account will be deducted on a daily basis (equivalent to an annual charge of 0.90%). In the Deferred Annunity, approximately 0.55% of the maximum charge is for assuming the mortality risk and 0.35% is for assuming the expense risk. In the Annunity Certain, approximately 0.45% of the maximum charge is for assuming the mortality risk and 0.45% is for assuming the expense risk. The mortality risk assumed by the Company arises from its obligations to continue to make annunity payments under the Contracts or income plan provisions of the Contracts, determined in accordance with the guaranteed annunity tables and other provisions of the Contracts, regardless of how long each annuitant lives and regardless of how long all payees as a group live. The particular mortality risk assumed by the Company under the Deferred Annunity is the risk that, after annuitization or upon selection of an annuity option with a life contingency, annuitants will live longer than the Company's actuarial projections indicated, resulting in higher than expected payments during the payout phase, since the payment options are guaranteed not to be less than the tables discussed in the Deferred Annunity. The particular mortality risk assumed by the Company under the Annunity Certain relates to the fact that, at all times, the Company will offer the option to convert the Annunity Certain, which does not provide for payments based on life contingencies, to one or more annuity contracts that provide for payments based on life contingencies. The mortality risk assumed by the Company is the risk that annuitants, or beneficiaries after the death of the annuitant, will choose one such option and will possibly live longer than the Company's actuarial projections indicate, resulting in higher than expected payments during the payout phase, since any payment option is guaranteed not to be less than the tables discussed in the Annuity Certain. In addition, the Company assumes a risk that the charges for the administrative expenses may not be adequate to cover such expenses. In the Deferred Annuity, Golden American also assumes a risk to pay out a guaranteed death benefit in excess of the accumulation value. Golden American is compensated for this risk by the guaranteed death benefit charge. The guaranteed death benefit charge is based on the amount of the guaranteed death benefit and is less than 0.10% of net assets (assuming a hypthetical gross return of 5%).

10. Applicants represent that they have reviewed publicly available information regarding the level of the mortality and expense risk and guaranteed death benefit charges under comparable variable annuity contracts currently being offered in the industry, taking into consideration such factors as current charge level or annuity rate guarantees and the markets in which the Contracts will be offered. Based upon the foregoing, Applicants represent that the maximum charges under the Contracts are within the range of industry practice for comparable contracts. Applicants will maintain and make available to the Commission, upon request, a memorandum outlining the methodology underlying this representation.

11. Applicants do not believe that the sales loading imposed under the Contracts will necessarily cover the expected costs of distributing the Contracts. Any "shortfall" will be made up from the general account assets which includes amount derived from risk charges. The Company has concluded that there is a reasonable likelihood that the distribution financing arrangement being used in connection with the Contracts will benefit the Account and the Contract owners. The Company will keep and make available to the Commission, upon request, a memorandum setting forth the basis for this representation.

12. Applicants further represent that the Account will only invest in underlying funds which have undertaken to have a board of directors/trustees, a majority of whom are not interested persons of such funds, formulate and approve any plan under Rule 12b-1 under the 1940 Act to finance distribution expenses.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8025-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement; San Benito County, California

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this Notice to advise the public that an Environmental Impact Statement will be prepared for a proposed highway project in San Benito County, California.

FOR FURTHER INFORMATION CONTACT: Mr. John R. Schultz, District Engineer, Federal Highway Administration, P.O. Box 1915, Sacramento, California 95812–1915. Telephone: (916) 551–1307.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the California Department of Transportation, San Benito County, and the City of Hollister, will prepare an Environmental Impact Statement (EIS) on a proposal to improve highway facilities on State Highway Route 156 in San Benito County. The 7-mile section of highway to be improved is comprised of contiguous segments of 2–lane, 4-lane, and 4-lane divided highway beginning in the vicinity of the Union/Mitchell Road/Route 156 intersection, west of Hollister, passing through downtown Hollister and terminating in the vicinity of the San Felipe Road/Route 156 intersection, north of Hollister. Some intersections in Hollister are now operating at or near capacity during peak hours. The highway carries both through and local traffic, including large trucks which add to the congestion (especially when they don't follow the signed truck route). A Route 156 bypass is proposed to allow through trucks, recreational vehicles and cars to go around, instead of through, downtown Hollister.

The alternates under consideration are the "no-build," "upgrade" the existing facility, and construct a "bypass" around the north and west sides of town. The no-build alternate is not considered viable at this time since traffic volume is now very heavy and will continue to increase. It is not considered practicable to widen the existing highway through town since this would require taking many residential and commercial buildings. Several bypass alternates are being considered. All start west of town near the Union/Mitchell Road/Route 156 intersection, and end either just south of the City Airport near the Flynn Road/Route 156 intersection, or north of the airport near the San Felipe Road/Route 156 intersection. The selected bypass alternate could be constructed as a 2-lane limited access highway, but sufficient right-of-way would be purchased to accommodate an ultimate 4-lane divided highway.

The project would be partially funded by a County sales tax measure, which would provide $6,250,000 toward the cost of constructing a Route 156 bypass around the City of Hollister.

Advertised public meetings and community advisory committee meetings have been held to discuss the project and obtain public input. More such meetings will be held prior to the formal public hearing planned for early 1990. These meetings, and the comments to be received from this Notice of Intent (and the Notice of Preparation), will constitute the scope process for this project.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address previously provided in this document.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning, and Construction. The regulations implementing Executive Order 12472 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Issued on: August 29, 1989.

Susan E. Klekar,

District Engineer, Sacramento, California.

[FR Doc. 89–20973 Filed 9–6–89; 8:45 am]

BILLING CODE 4910-22-M

National Motor Carrier Advisory Committee

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of public meetings.

SUMMARY: The FHWA announces that the National Motor Carrier Advisory Committee will hold a meeting on September 26, and 17, 1989, in Ann Arbor, Michigan. The meeting on September 26 will begin at 9:15 a.m. and will be held in Room 1443 of the Chrysler Engineering Center on Bonisteel Boulevard on the North Campus of the University of Michigan. On September 27 the meeting will reconvene at 9:00 a.m. at the Ann Arbor Marriott, 3600 Plymouth Road, Ann Arbor Michigan. The meeting on both days will be open to the public.

The agenda will include discussion of the National Transportation Policy, possible revisions to streamline the Federal Motor Carrier Safety Regulations, proposed changes to the definition of a "commercial motor vehicle" regarding the weight of such vehicles, proposed actions of the Commercial Motor Vehicle Safety Regulatory Review Panel regarding uniformity of State motor carrier safety requirements, alcohol testing of commercial motor vehicle operators, the biometric identification of commercial motor vehicle operators, and intelligent Vehicle/Highway Systems. Recommendations will also be presented from the Subcommittee on Safety. The Committee will also tour the University of Michigan's Transportation Research Institute (UMTRI).

In conjunction with the full committee meeting, the Subcommittee on Safety will meet on September 25, 1989, to discuss the issue referenced above regarding the definition of a "commercial motor vehicle" and the appropriate weight threshold for the Federal regulation of those vehicles and their operators. The meeting will also be held at the Ann Arbor Marriott and will begin at 1:30 p.m. This Subcommittee meeting is open to the public.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph S. Toole, Executive Director, National Motor Carrier Advisory Committee, Federal Highway Administration, HOA–1, Room 4218, 400 7th Street, SW., Washington, DC 20590, (202) 366–2238, office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

Dated: August 30, 1989.

Thomas D. Larson,

Federal Highway Administrator.

RIN 0938-AD91

Medicare Program; Catastrophic Outpatient Drug Benefit

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: These proposed regulations would implement, in part, section 202 of the Medicare Catastrophic Coverage Act of 1988 (MCCA), which establishes a new catastrophic drug benefit under Medicare Part B. The new benefit would be added to the drug coverage already available under Medicare, which would continue largely unchanged.

The MCCA provides for payment of a catastrophic level of beneficiary expenditures for "covered outpatient drugs". The payment aspect of this benefit will be implemented in separate regulations. The MCCA defines the items and services included as "covered outpatient drugs" to include coverage of outpatient prescription drugs on a much broader scope than is now available under Part B. These proposed regulations describe that new benefit.

These regulations also describe the bases that HCFA would use to implement the statutory requirement for establishing standards for the prescribing of each "covered outpatient drug". These standards would be used to identify inappropriate drug prescribing and dispensing and adverse drug reactions and to educate physicians and pharmacists about them. They would not be used to define coverage or payment of covered outpatient drugs.

The regulations also describe limits on the supply of a "covered outpatient drug" that Medicare would pay for, and reflect other related changes in Medicare created by MCCA.

DATE: To assure consideration, comments must be received at the appropriate address, as provided below, no later than 5:00 p.m. on November 6, 1989.

ADDRESS: Mail comments to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: BPD-613-P, P.O. Box 26676, Baltimore, MD 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309-G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC, or
Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, MD

Due to staffing and resource limitations, we cannot accept facsimile (FAX) copies of comments.

In commenting, please refer to file code BPD-613-P. Comments received timely will be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, in Room 309-G of the Department's offices at 200 Independence Ave., SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (Phone 202-245-7890).

FOR FURTHER INFORMATION CONTACT: Walter Rutemueller, (301) 966-6849.

SUPPLEMENTARY INFORMATION: In this proposed rule, we explain in much detail, current Medicare coverage of drugs, as well as the expansion of drug coverage set forth in the Medicare Catastrophic Coverage Act of 1988 (Pub. L. 100-360, enacted on July 1, 1988). To assist readers in referencing sections contained in this proposed rule, we are providing a table of contents below:

I. Background

The Medicare program was established by Congress in 1965 with the enactment of title XVIII of the Social Security Act (the Act). The program provides payment for certain medical services and supplies for persons 65 years of age or over, disabled beneficiaries, and persons with end-stage renal disease. The program currently covers approximately 28.8 million aged, 3 million disabled individuals, and 100,000 persons with end-stage renal disease.

Medicare consists essentially of two complementary insurance programs, the Hospital Insurance program (known as Part A) and the Supplementary Medical Insurance program (known as Part B). Although Part A is called Hospital Insurance, covered benefits also include services furnished in skilled nursing facilities (SNFs) or by home health agencies and hospices.

Part B covers a wide range of medical services and supplies such as those furnished by physicians or others in connection with physicians' services, outpatient hospital services, and outpatient physical and occupational therapy services. Physicians' services covered under Part B include visits to patients in the home, office, hospital, and other institutions. Part B also currently covers certain drugs and biologicals that cannot be self-administered, diagnostic x-ray and laboratory tests, and purchase or rental of durable medical equipment, ambulance services, prosthetic devices, and certain medical supplies.

The Medicare program was not designed to cover the total cost of providing medical care for its beneficiaries. Under current law, beneficiaries are liable for specified cost-sharing charges, in the form of deductibles and coinsurance amounts, and the cost of the first 3 pints of whole blood (unless replacement blood is furnished). Part B of Medicare pays for Part B services according to formulae established by statute; generally 80 percent of the reasonable charge is paid for physicians' services and other covered medical services (including drugs used in immunosuppressive therapy furnished within 1 year of a

covered organ transplant) after the beneficiary has met the $75 deductible. The beneficiary is then liable for the remaining amount of the charge for the services, which is usually 20 percent of the reasonable charge (known as coinsurance). In addition, if a physician does not accept assignment (that is, does not agree to accept Medicare's determination of the reasonable charge amount as payment in full for covered services), the beneficiary may be liable for the difference between Medicare's reasonable charge and the physician's actual charge, subject to certain limits on that charge.

II. Pre-existing Drug Benefit

The Medicare Catastrophic Coverage Act of 1988 (Pub. L. 100-360, enacted on July 1, 1988) established a new catastrophic outpatient drug benefit under Part B. For purposes of coverage, payment, deductibles and coinsurance, the new Part B catastrophic outpatient drug benefit is distinct and separate from the current Medicare coverage of drugs that existed before the enactment of Public Law 100-360. The current Medicare drug benefit, to which we will refer in this preamble as the "pre-existing drug benefit", includes both Part A and Part B coverage. For the most part the pre-existing drug benefit has not been changed by Public Law 100-360. In this section of the preamble, we discuss both the Part A and Part B coverage requirements of the pre-existing drug benefit.

Pre-existing Medicare coverage of drugs is based on title XVIII of the Act; Medicare regulations at 42 CFR, Chapter IV; and the Medicare Carriers Manual (Part 3, Chapter II, section 2050.5).

A. General Statutory Provisions

- The Medicare statute, at section 1861(t)(1) of the Act, defines "drugs" and "biologicals", except for purposes of home health services, to include only those drugs and biologicals, respectively, as are included (or approved for inclusion)—

—In the U.S. Pharmacopoeia, the National Formulary, or the U.S. Homeopathic Pharmacopoeia;
—In New Drugs or Accepted Dental Remedies (except for any drugs and biologicals unfavorably evaluated therein); or
—As approved by the pharmacy and drug therapeutics committee (or equivalent committee) of the medical staff of a hospital furnishing the drugs and biologicals for use in the hospital.

- In addition, in accordance with section 1862(c)(1) of the Act, payment may not be made under Part B for any expenses incurred for a drug product if all of the following conditions are met:

—The drug product—
  +Meets the requirements of section 107(c)(3) of the Drug Amendments of 1962, that is, generally stated, was approved by the Secretary as safe before October 10, 1962;
  +May be dispensed only upon prescription;
  +Is one for which the Secretary has issued a notice of an opportunity for a hearing under section 505(e) of the Federal Food, Drug and Cosmetic Act (FFDCA) on a proposed order of the Secretary to withdraw approval of an application for the drug product under that section, because the Secretary has determined that the drug is less than effective for all conditions of use prescribed, recommended, or suggested in its labeling; and
  +Is one for which the Secretary has not determined that there is a compelling justification for its medical need.
—Any other drug product that is identical, related, or similar (as determined in accordance with 21 CFR 310.6(b)(1)) to a drug product described above and for which the Secretary has not determined that there is a compelling justification for its medical need.

B. Part A Statutory Provisions

Pre-existing Medicare Part A coverage of drugs and biologicals is provided for in section 1861 of the Act as follows:

- Drugs and biologicals used in the hospital that are ordinarily furnished by the hospital for the care and treatment of patients (paragraph (b)(2));
- Drugs and biologicals furnished for use in a SNF that ordinarily are furnished by the facility for the care and treatment of inpatients (paragraph (h)(5));
- Drugs and biologicals furnished to terminally ill individuals under a written plan as part of a hospice program (paragraph (dd)(1)(E)).

C. Part B Statutory Provisions

All Medicare Part B coverage of drugs is derived from the scope of benefits provided for in section 1832 of the Act. Section 1861 of the Act defines the coverage provisions specified in section 1832 of the Act.

Pre-existing Medicare Part B coverage of outpatient drugs and biologicals is provided for in section 1861 of the Act, as follows:

- Drugs and biologicals that cannot be self-administered and that are furnished as incident to a physician's service (subsections (s)(2) (A) and (B));
- Diagnostic services furnished by a hospital to outpatients, including drugs and biologicals required in the performance of these services (subsection (s)(2)(C));
- Dialysis supplies, including drugs and biologicals (subsection (s)(2)(F));
- Antigens that are prepared by a physician for a particular patient and that are administered by or under the supervision of a physician (subsection (s)(2)(G));
- Blood clotting factors, for hemophilia patients competent to use those factors to control bleeding without medical or other supervision (subsection (s)(2)(I));
- Immunosuppressive drugs and drugs that are needed for effective immunosuppressive therapy furnished to an individual who receives an organ transplant for which payment is made under Medicare, and that are furnished within 1 year after the date of the transplant procedure (subsection (s)(2)(J), as it was in effect before the enactment of Pub. L. 100-360).
- Supplies that are incident to a physician assistant's services furnished under the supervision of a physician, including drugs and biologicals (subsection (s)(2)(K)(ii));
- Pneumococcal, influenza, and hepatitis B vaccines (subsection (s)(10));
- Drugs and biologicals that cannot be self-administered and that are furnished to an individual who is an outpatient of a comprehensive outpatient rehabilitation facility (subsection (cc)(1)(F));
- Drugs and biologicals furnished as part of or incident to the provision of covered rural health clinic services (subsection (aa)(1)), partial hospitalization services (subsection (ff)(2)(D)), certified nurse-midwife services (subsection (gg)(1)), and qualified psychologist services (subsection (ii)).

Drugs and biologicals also are covered as part of or incident to services furnished in qualified ambulatory surgical centers as provided in section 1832(a)(2)(F)(i) of the Act.

Public Law 100-360 expanded Medicare coverage of prescription outpatient drugs and biologicals by creating a new drug benefit. Pre-existing coverage, as discussed above, will continue unchanged except for drugs used in immunosuppressive therapy. As discussed below, coverage for these drugs would be expanded under the provisions of Public Law 100-360 and would be included as part of the new catastrophic drug benefit.

---

in April 1987 (Carriers Manual, section

controls FDA approval of drugs and

DESI drug lacks substantial evidence of

D. Instructions

The Medicare Carriers Manual (HCFA Pub. 14–3) (Part 3, Chapter II, § 2050.5) provides instructions on the pre-existing Part B coverage of drugs and biologicals specified in the statute and in regulations (42 CFR 410.10 and 410.26 through 410.29).

- The drugs and biologicals that Medicare covers meet the definition of "drugs" or "biologicals" in section 1861(t)(1) of the Act and are not unfavorably evaluated in either the American Medical Association's Drug Evaluations or Accepted Dental Therapeutics. If a drug is excluded from coverage because it is unfavorably evaluated in either of these compendia, the exclusion applies only to those uses for which the drug or biological was so unfavorably evaluated.
- The drugs and biologicals are not covered if they are excluded as immunizations (section 1862(a)(7) of the Act). As stated in section 2050(c) of the Medicare Carriers Manual, vaccinations or inoculations are excluded as "immunizations" unless they are directly related to the treatment of an injury or direct exposure to a disease or condition, such as antirabies treatment, tetanus antitoxin or booster vaccine, botulin antitoxin, antivenin sera, or immune globlin. We note that coverage of the following vaccines has been specifically provided for by Congress.

—Pneumococcal vaccinations.

With the enactment of the Social Security Act Amendments of 1980 (section 1 of Pub. L. 96–611) on December 28, 1980, Part B pays 100 percent of the reasonable charges for pneumococcal vaccine and its administration to a patient if it is ordered by a physician who is a doctor of medicine or osteopathy (section 1861(s)(10) of the Act).

—Hepatitis B vaccine.

With the enactment of the Deficit Reduction Act of 1984 (section 2323 of Pub. L. 98–369), coverage under Part B was extended to hepatitis B vaccine and its administration furnished to a Medicare beneficiary who is at high or intermediate risk of contracting Hepatitis B (section 1861(s)(10) of the Act).

—Influenza vaccine.

The Omnibus Budget Reconciliation Act of 1987 (section 4071 of Pub. L. 100–203) provides for the coverage of influenza vaccine and its administration by either November 1, 1990 or April 1, 1993 contingent upon the Secretary demonstrating that the use of influenza vaccine is cost-effective.

- The drugs and biologicals are reasonable and necessary for the diagnosis or treatment of the illness or injury for which they are administered according to accepted standards of medical practice (section 1862(a)(1)(A) of the Act). In making national coverage decisions, HCFA interprets the terms "reasonable" and "necessary" contained in section 1862(a)(1)(A) of the Act to mean that a service is safe, effective, non-investigational, and appropriate as evidenced by available scientific and medical information. We published a proposed rule on January 30, 1989 (54 FR 4302) that would establish in regulations generally applicable criteria and procedures for determining whether a service is "reasonable" and "necessary" under the Medicare program, and to set forth the coverage decisionmaking process that we propose to include in regulations. The January 30, 1989 rule proposes to include cost-effectiveness considerations in addition to the other criteria we currently use when determining whether a service is reasonable and necessary. However, we note that not all of the criteria announced in the January 30, 1989 rule would apply to the Medicare catastrophic drug benefit. Public Law 100–360 added section 1834(c)(5)(C)(ii) to the Act, which prohibits the denial of coverage of or payment for any specific use of a covered outpatient drug for a specific indication except for those instances in which the Secretary determines under section 1862(a)(1) of the Act that use of the drug for that indication is not safe or not effective. (Accordingly, as discussed in greater detail below, except for exclusions based on section 1861(t)(4)(A) of the Act, which pertains to the definition of "covered home IV drugs", or section 1862(c)(2) of the Act, which pertains to prescriptions in excess of a 30-day supply, we would use only considerations concerning safety and effectiveness to make decisions to exclude from coverage or to deny payment for a specific covered outpatient drug or class of drugs under the Medicare catastrophic drug benefit.)

Under the current program, we have determined as a matter of national policy that drugs or biologicals approved for marketing by the Food and Drug Administration (FDA) are generally considered safe and effective for purposes of meeting the reasonable and necessary criteria when used for indications specified in their labeling (section 2050.5(D) of the Medicare Carriers Manual). In addition, except for drugs used in immunosuppressive therapy, FDA-approved drugs also may be covered when used for indications other than those specified on their labeling unless such use is contraindicated on the drugs' labels or is specifically not covered by HCFA.

- Drugs that are considered by the FDA to be experimental or investigational are not covered except for certain cancer drugs distributed by the National Cancer Institute (NCI).

Under its Cancer Therapy Evaluation, the Division of Cancer Treatment within NCI, distributes certain drugs for use in terminally ill cancer patients. One group of these drugs, designated by FDA and NCI as Group C drugs, unlike other drugs distributed by the NCI, is not limited to use in clinical trials for the purpose of testing their efficacy. In view of NCI controls on their distribution and use, Group C drugs are covered by Medicare under current rules if all other applicable coverage requirements are met.

- In accordance with section 1861(s)(2)(J) of the Act, as added by section 9335(c) of the Omnibus Budget Reconciliation Act of 1986 (Pub. L. 99–509), we covered, effective January 1, 1987, immunosuppressive drugs furnished to an individual who receives a Medicare covered organ transplant, for a period of up to 1 year beginning with the date of discharge from the inpatient hospital stay during which the transplant was performed. Section 4075 of the Omnibus Budget Reconciliation Act of 1987 (Pub. L. 100–203) amended section 1861(s)(2)(J) of the Act to expand Medicare coverage to include prescription drugs used in immunosuppressive therapy. We have restricted coverage of drugs used in immunosuppressive therapy to those specifically labelled by the FDA as immunosuppressive drugs and to those whose approved labels indicate they are used in conjunction with immunosuppressive drugs as part of a therapeutic regimen. We restricted coverage of these drugs to labelled indications to ensure that we did not allow coverage of these drugs beyond the scope of section 1861(s)(2)(J) of the Act, which before the enactment of Public Law 100–360 specifically authorized payment only for prescription drugs used in immunosuppressive therapy. Coverage of non-labeled uses for other drugs is ordinarily determined by our contractors taking into consideration the generally accepted medical practice in the community. The statutory changes mentioned above specified that the 1-year period during these drugs could be covered would begin with the date of a transplant. We issued manual instructions to our Medicare contractors

in April 1987 (Carriers Manual, section 2050.5, paragraph G). We interpreted the statutory phrase, "within one year after the date of the transplant procedure," to mean 365 days from the day on which the inpatient is discharged from the hospital. We believe the term "transplant procedure" can be interpreted to mean something broader than just the surgery itself, and for the reasons set forth below, we consider the procedure to end at the date of discharge. If the date of surgery was used instead of the date of discharge, the immunosuppressive drug benefit would vary from one Medicare beneficiary to another, depending upon the beneficiary's post-operative recovery period while an inpatient. For example, if one patient's hospital stay was 30 days longer than another patient's stay, one of the patients would receive less coverage under Part B. Further, the conference report accompanying Public Law 99–509 (H.R. Rept. 99–1012, page 337) indicates that Congress was aware that immunosuppressive drugs are already covered while a beneficiary is in the hospital.

Nonetheless, Congress added this coverage by amending section 1861(s)(2) of the Act, which is a listing of "medical and other health services" covered under Part B. By amending this section, Congress made immunosuppressive drugs a specific Part B benefit, which extends explicitly for 1 year. Since inpatient immunosuppressive drugs are covered already under Part A, and since the date of discharge is later than the date of surgery, to use the actual transplant date would require us to either shorten the coverage under Part B to less than 1 year or pay for inpatient hospital services with Part B funds. The former is inconsistent with Congressional intent. If we were to furnish Part B benefits beginning at the time of surgery, we would have to adjust the diagnosis related group weights to exclude the costs of post-operative immunosuppressive drugs. This would be cumbersome. Further, it is administratively more difficult for a carrier to determine the date of surgery rather than the date of discharge.

III. FDA Responsibilities and Categories of Prescription Drugs Resulting From Amendments to the Federal Food, Drug and Cosmetic Act

For purposes of discussing later in this preamble the expanded coverage of drugs mandated by Congress, we are providing a summary of the responsibilities of the FDA in approving drugs and licensing biologicals for marketing and of the statute that controls FDA approval of drugs and biologicals for marketing.

FDA protects the public health of the nation by regulating foods, drugs, biological products, cosmetics, medical devices, radiological products, poisons, pesticides, and food additives. FDA's regulatory functions are to assure that: foods are safe, pure, and wholesome; drugs, medical devices, and biological products are safe and effective; cosmetics are harmless; all of the above are honestly and informatively packaged, and that exposure to potentially injurious radiation is minimized. The role of FDA is critical to the Medicare coverage process since, as discussed earlier, FDA approval of drugs and devices precedes Medicare coverage in most cases.

The FDA's current role as it relates to approval of drugs is controlled by the Federal Food, Drug and Cosmetic Act of 1938 (FFDCA) (Pub. L. 75–717, 21 U.S.C. 301, et seq.). Before enactment of the FFDCA, drugs could be marketed in the United States as long as a drug's label did not present false information regarding the drug's strength and purity. The FFDCA first established the requirement that a manufacturer has to prove the safety of a drug before it could market it in the United States. In accordance with the FFDCA, drugs marketed before passage of the 1938 Act were "grandfathered" so that manufacturers, if they did not change the representations on the drugs' labels, were allowed to continue to market them unless evidence was developed to indicate that they were not safe. However, once a manufacturer changed the representation on a drug's label, that drug was considered a "new drug" and the manufacturer was required to prove that the drug was safe for its intended use.

In 1962, the FFDCA was amended to require that drugs sold in the United States be regulated more closely. Under the provisions of the Drug Amendments of 1962 (Pub. L. 87–781, enacted on October 10, 1962), all new drugs must be shown by adequate studies to be both safe and effective before they can be marketed. This legislation also applied retroactively to all drugs approved as safe from 1938 to 1962. These drugs were permitted to remain on the market while evidence of their effectiveness was reviewed. The program established to review the effectiveness of drugs approved between 1938 and 1962 was named the Drug Efficacy Study Implementation (DESI) program. The pre-1962 drugs that are subject to review under this program are referred to as the "DESI" drugs. If the FDA decides that a DESI drug lacks substantial evidence of effectiveness for the condition(s) it is intended to treat, it publishes a notice of opportunity for a hearing in the Federal Register concerning its proposal to withdraw approval for marketing. This process afforded the manufacturer an opportunity for a hearing before a final determination is made. Drugs for which a notice of opportunity for hearing has been issued but the hearing has not been completed are considered by the FDA to be less than effective.

Biologicals were first required to be licensed under the Biologics Control Act of 1902, which was recodified in 1944 as section 351 of the Public Health Service Act (PHS Act, 42 U.S.C. 262). To be licensed under section 351 of the PHS Act, a biological must be shown to be safe, pure, and potent. The majority of biological products also meet the drug definitions in the FFDCA subject to the drug adulteration, misbranding, and registration provisions of the FFDCA.

When the Bureau of Biologics (currently the Center for Biologics Evaluation and Research) became a part of FDA in 1972, biologicals licensed before July 1972 were reviewed for efficacy by expert advisory review panels. Similar to the DESI program described above, manufacturers of biologicals with inadequate evidence of effectiveness are offered an opportunity for a hearing on proposals to revoke product licenses.

When a manufacturer submits an application for the approval of a new drug, it indicates on the application the proposed uses for the drug. The FDA requires the manufacturer to submit clinical data and scientific information to prove the safety and effectiveness of the drug for these proposed uses. The FDA requires the manufacturer to submit clinical data and scientific information to prove the safety and effectiveness of the drug for these proposed uses and determines for which of the proposed uses the manufacturer has proven that the drug is safe and effective. If a drug is approved, it may be labeled, promoted, and advertised by the manufacturer only for those specific proposed uses of the drug that have been approved by the FDA as safe and effective. The labeling includes a description of the drug, its action, clinical pharmacology, and indications and usage for the drug. In addition, sections with the headings, contraindications, warnings, precautions, and adverse reactions are included when applicable. All labels conclude with sections on dosage and administration and how the drug is supplied.

After a drug is approved, additional medical and scientific information may be developed by the medical community that indicates there are other appropriate uses for the drug besides those specified on a drug's label. As previously stated, we may cover FDA-approved drugs for uses other than those specified on their labeling if the available medical and scientific information indicates that additional uses are appropriate and accepted in the medical community, unless the uses are contraindicated on a drug's label.

IV. The Medicare Catastrophic Coverage Act of 1988

The Medicare Catastrophic Coverage Act of 1988 (Pub. L. 100–360, enacted on July 1, 1988) made a number of significant changes to the Medicare program. Generally, the statute provides for—

- Expanded hosptial, SNF, and hospice care coverage under part A of the program beginning January 1, 1989;
- A cap on the amount a beneficiary must spend on specified services under part B before Medicare will assume the full part B payment beginning January 1, 1990;
- Coverage of screening mammography and in-home respite care benefits, and improved home health benefits beginning January 1, 1990; and
- Coverage of drugs used in immunosuppressive therapy without regard to the duration of that therapy or whether the organ transplant procedure was covered by Medicare and home intravenous (IV) therapy services beginning January 1, 1990, and for coverage of other outpatient prescription drugs, biologicals, and insulin beginning on January 1, 1991.

Specifically, section 202 of Public Law 100–360 amended the Act to include "covered outpatient drugs" as part of the "medical and other health services" benefit under sections 1832 (a)(1) and (a)(2)(B) of the Act. Pre-existing coverage of drugs, as described in section II of this preamble, would continue unchanged except for drugs used in immunosuppressive therapy. As discussed below, coverage for these drugs would be expanded and extended under the provisions of Public Law 100–360, and these drugs would be included as part of the new catastrophic drug benefit. A discussion of the specific provisions of section 202 of Public Law 100–360 that this proposed rule would implement follows.

A. Definition of Covered Outpatient Drugs

Section 202(a) of Public Law 100–360 amended sections 1861(s)(2)(J) and added section 1861(t)(2) of the Act. As revised, section 1861(s)(2)(J) provides coverage of "covered outpatient drugs", which is primarily defined in section 1861(t)(2). Section 1861(t)(2) defines the term to include a broad range of drugs, biological products, and insulin.

1. *Drugs*

A drug is covered if it may be dispensed only upon prescription and meets one of the following requirements:

a. The drug is approved for safety and effectiveness as a prescription drug under sections 505 or 507 of the FFDCA, or approved under section 505(j) of the FFDCA.

b. The drug was commercially used or sold in the United States before the date of enactment of the Drug Amendments of 1962 (October 10, 1962) or it is identical, similar or related to such a drug, as defined by 21 CFR 310.6(b)(1). Nevertheless, these drugs will not be covered if the Secretary has made a final determination that they are "new drugs" and have not been approved under sections 505 or 507 of the FFDCA, or if they are subject to certain actions brought by the Secretary to enforce provisions of section 502(f) or 505(a) of the FFDCA (21 U.S.C. 352(f), or 355(a)).

c. The drug is described in section 107(c)(3) of the Drug Amendments of 1962 and is one for which the Secretary has determined there is compelling justification for its medical need, or it is identical, similar, or related to such a drug. Also, the drug must be one for which the Secretary has not issued a notice to withdraw approval for marketing, because the Secretary has determined that the drug is less than effective for all conditions of use represented, recommended, or suggested on its labeling. These are the "DESI" drugs. (We note that the conference report that accompanied Public Law 100–360 indicates, apparently in error, that the only DESI drug that would be covered under Medicare because a notice for an opportunity for hearing has not been issued, is nitroglycerin patches (H.R. Rep. No. 100–661, 100th Congress, 2d Session 185–186 (1988)).

2. Biological Products

A biological product is considered a "covered outpatient drug" if it is one that may be dispensed only upon prescription, is licensed under section 351 of the PHS Act (42 U.S.C. 262), and is produced at an establishment licensed under that Act to produce that product.

3. Insulin

Insulin is covered if it is certified under section 506 of the FFDCA (21 U.S.C. 356) for the strength, quality, and purity necessary to ensure adequate safety and efficacy of use. In accordance with section 1861(t)(2)(C) of the Act, insulin would be considered a "covered outpatient drug" whether or not it is dispensed under a prescription.

B. Covered Home IV Drugs

Section 202(a)(2)(C) of Public Law 100–360 added sections 1861(t)(4) (A) and (B) to the Act to specify the following:

- "Covered home IV drugs" are defined as covered outpatient drugs that are dispensed to an individual and intravenously administered to an individual in a place of residence used as the individual's home, and that are—
  - —Antibiotic drugs unless the Secretary has determined, for a specific drug or for the indication for which it is applied, that the drug cannot generally be administered safely and effectively in a home setting; or
  - —Drugs that are not antibiotics, but only if the Secretary has determined for a specific drug and the indications for which the drug is being applied that it can generally be administered safely and effectively in a home setting.
- By January 1, 1990 and periodically thereafter, the Secretary is required to publish a list of covered home IV drugs, and indications for the drugs, with respect to which home IV drug therapy may be furnished under Medicare.

C. Drugs Excluded From Catastrophic Coverage

In enacting the expanded drug coverage under Public Law 100–360, Congress specified in section 202(a)(2)(C) several restrictions on which drugs can be included under the new benefit. Thus, section 1861(t)(3)(A) of the Act excludes from the new benefit certain drugs, biologicals, or insulin that were covered by Medicare before the enactment of Public Law 100–360 from the definition of "covered outpatient drugs". Coverage for any drug, biological, or insulin furnished as one of the following benefits or, as part of, or as incident to, any of the following benefits, for which payment may be made under Medicare, would continue but would not be included as part of this new catastrophic drug benefit. These items would not be subject to the same coverage standards and coinsurance and deductible requirements that apply to drugs covered as part of the catastrophic drug benefit.

- Inpatient hospital services (section 1861(b)(2)).
- Extended care services (section 1861(h)(5)).

- Physicians' services (section 1861(s)(2) (A) or (B)).
- Dialysis supplies (section 1861(s)(2)(F)).
- Antigens (section 1861(s)(2)(G)).
- Blood clotting factors for hemophiliacs (section 1861(s)(2)(I)).
- Services of a physician assistant (section 1861(s)(2)(K)(ii)).
- Pneumococcal, hepatitis B, or influenza vaccines (section 1861(s)(10)).
- Rural health clinic services (section 1861(aa)(1)).
- Comprehensive outpatient rehabilitation facility services (section 1861(cc)(1)(F)).
- Hospice care (section 1861(dd)(1)(E)).
- Certified nurse-midwife services (section 1861(gg)(1)).
- A covered surgical procedure in an ambulatory surgical center (section 1832(a)(2)(F)(i)).

The purpose of section 1861(t)(3)(A) of the Act is to preserve and keep separate from the catastrophic drug benefit the coverage of drugs authorized by the benefits listed above. The coverage of drugs authorized by these benefits would remain unchanged and would not be duplicated or replaced by the catastrophic drug benefit. For example, section 1861(t)(3) of the Act specifies, in part, that the term "covered outpatient drug" does not include any drug, biological, or insulin furnished as, as part of, or as incident to extended care services if payment for these drugs or biologicals may be included under Medicare. The term "extended care services" is defined at section 1861(h)(5) of the Act as including drugs and biologicals that may be ordinarily furnished by SNFs for the care and treatment of inpatients.

Therefore, drugs and biologicals furnished to beneficiaries who qualify for Part A covered inpatient care in a participating SNF would be excluded from the covered outpatient drug benefit since payment could be made for these drugs and biologicals as part of the extended care services benefit under section 1861(h)(5) of the Act. However, in those instances where Part A coverage is exhausted, or not available to a particular beneficiary who is eligible for Part B only, the catastrophic Part B drug benefit would apply. Therefore, except for drugs already included under a pre-existing Part B benefit (such as antigens) and covered home IV drugs, drugs furnished in a hospital or a SNF to a beneficiary who is not eligible for Medicare Part A services could be covered as part of the new catastrophic drug benefit. This individual could either be a beneficiary who is eligible for Part B only or one who has exhausted his or her Part A benefit. Consistent with this policy, drugs furnished to residents of a long term care facility would be eligible for payment under the catastrophic drug benefit if the nursing home stays does not qualify for Part A payment for inpatient services and the drugs are not otherwise payable under a pre-existing Part B benefit.

D. Phase-in of Coverage

While section 202(m)(1) of Public Law 100–360 specifies that the amendments made by section 202 shall apply to items dispensed on or after January 1, 1990, the provisions of section 1861(t)(3)(B) of the Act (as added by section 202(a)(2)(C) of Pub. L. 100–360) limit covered outpatient drugs dispensed in 1990 to the following drugs:

1. Immunosuppressive Drugs

Effective January 1, 1987, immunosuppressive drugs were covered if furnished within 1 year after the beneficiary's date of discharge from an inpatient hospital stay during which a covered organ transplant was performed (section 1861(s)(2)(J) of the Act, as in effect before the enactment of Pub. L. 100–360). (Medicare currently covers heart, kidney, and bone marrow transplants. Liver transplants in limited circumstances for children under age 18 are also covered.) The coverage of immunosuppressive drugs was expanded by section 4075 of Public Law 100–203, effective December 22, 1987, to include prescription drugs used in immunosuppressive therapy. Section 202(a) of Public Law 100–360, effective January 1, 1990, extends the coverage of drugs used in immunosuppressive therapy to include those drugs furnished in subsequent years after the first year following a covered transplant and those following a noncovered transplant irrespective of any prescribed time limitations.

2. Covered Home IV Drugs as Defined in Section 1861(t)(4) of the Act

Accordingly, in 1990, the new drug benefit would only include drugs used in immunosuppressive therapy and covered home IV drugs. It would not include all covered outpatient drugs described in section 1861(t)(2) of the Act until January 1, 1991.

E. Ensuring Appropriate Prescribing and Dispensing Practices

Section 202(b)(4) of Public Law 100–360 added section 1834(c)(5) to the Act, which requires the Secretary—

- To establish a program to identify (and educate physicians and pharmacists concerning)—
  - —Instances or patterns of unnecessary or inappropriate prescribing or dispensing practices for covered outpatient drugs,
  - —Instances or patterns of substandard care with respect to covered outpatient drugs, and
  - —Potential adverse reactions with respect to covered outpatient drugs.
- To establish standards for the prescribing of each covered outpatient drug for purposes of the program identified above. The standards must be based on accepted medical practice. In establishing these standards, we must incorporate standards from authoritative compendia we select; however, we may modify a standard through rulemaking on the basis of scientific and medical information that the standard is not consistent with the safe and effective use of a drug. Congress intended that we rely only on those compendia that base their standards on a review of published scientific and medical information and that employ a review process that allows public comment. The compendia should also provide adequate assurances that the panelists who establish the standards are free of financial (or other) conflicts of interest (H. R. Rept. No. 100–661, 100th Congress, 2d Session 192 (1988)).
- To provide for the coverage and payment of every specific covered outpatient drug, and specific class of covered outpatient drugs. However, the Secretary may exclude a specific use of a covered outpatient drug for a specific indication if he has found under section 1862(a)(1) of the Act that the use is not safe or effective. Also, the Secretary may exclude from coverage or payment certain drugs under section 1862(c)(2) of the Act (which relates to prescriptions in excess of a 30-day supply, unless a greater supply is authorized by the Secretary) or section 1861(t)(4)(A) of the Act (which relates to the definition of covered home IV drugs).

F. Limitations on the Length of Prescriptions

Section 202(d) of Public Law 100–360 added a new section 1862(c)(2) to the Act to prohibit payment under Part B for any expense incurred for a covered outpatient drug if the drug is dispensed in a quantity exceeding a 30-day supply or a longer period of time as the Secretary may authorize. Under this provision of the law, we may authorize payment for more than a 30-day supply, but not for more than a 90-day supply except in exceptional circumstances as determined by the Secretary. This extended supply policy may apply to specific drugs or classes of drugs.

G. Study and Report on Experimental Drugs

Finally, we note that in accordance with section 202(k)(1)(A) of Public Law 100–360, we are required to conduct a study and submit a report to Congress by January 1, 1990, on the possibility of covering certain experimental drugs and biologicals (for example, those used in the treatment of cancer or in immunosuppressive therapy) as covered outpatient drugs under the Medicare program. We received public comments on the issue of Medicare coverage of experimental or investigational drugs under the pre-existing drug benefit when we published a proposed rule on January 30, 1989 (54 FR 4302), pertaining to making Medicare coverage decisions. We are currently considering those comments and we will respond to them in the rule that finalizes our policies on Medicare coverage decisions.

V. Provisions of this Proposed Rule

To implement the provisions of section 202 of Public Law 100–360 described above, we are proposing in this rule to amend 42 CFR part 410, Subpart B as discussed below.

- We would add a new § 410.29 to expand coverage under Medicare Part B to include catastrophic expenses for covered outpatient drugs. We would use the statutory language to define "covered outpatient drugs". The definition would indicate that, except for insulin, "covered outpatient drugs" would be limited to those drugs and biologicals that may be dispensed only upon prescription. Therefore, except for insulin, drugs that can be purchased without a prescription, even if they are prescribed, would not be included in the definition of "covered outpatient drugs".

We would define the term "covered home IV drug" to mean a covered outpatient drug that is furnished by a qualified home IV drug therapy provider to an individual and that is intravenously administered in a place of residence used as that individual's home. The definition would include the requirement that a home IV drug, to be covered and reimbursed, must be furnished directly or under arrangements by a qualified home IV drug therapy provider. The statute at 1861(jj)(3)(i) of the Act requires, in part, that a qualified home IV drug therapy provider be capable of furnishing or arranging for covered home IV drugs. We believe that it is implicit in the statute that Congress intended that covered home IV drugs be furnished only by these providers. This requirement is consistent with the standards that Congress established in section 1861(jj) of the Act to ensure that covered home IV drugs are furnished as part of a safely and effectively administered home IV therapy benefit. We believe we would be undermining the intent of this section of the statute, if we did not require that covered home IV drugs be furnished directly or under arrangements by a home IV drug therapy provider that we have determined, in accordance with section 1861(jj) of the Act, is capable of furnishing or arranging for the services needed to conduct safely and effectively an IV drug therapy program.

There are many hazards associated with furnishing home IV drug therapy. The furnishing of home IV drugs may result in complications that could cause permanent damage or threaten the life of the patient. A patient could be afflicted with a possibly life-threatening condition such as anaphalaxis (severe allergic reaction), IV infiltration (accumulation of the IV drug in tissue surrounding the vein), or site infection, as a result of receiving home IV drug therapy. Also, these drugs may cause one or more other serious side effects such as diarrhea, fever, nephrotoxicity (destructive effect to kidney cells), coagulapathy (blood clotting disorder), and phlebitis (inflammation of the vein). Thus, while receiving home IV drug therapy, the patient must be carefully monitored to discern the presence of signs or symptoms of impending problems.

All home IV drug therapies involve the separate functions of mixing and administering potentially dangerous drugs. The preparation of IV drugs for administration is a specialty that has evolved over the years as the profession of pharmacy has expanded. It is a subspecialty of hospital pharmacy, and requires special training and education.

All IV drugs require special conditions for their preparation, including asceptic work areas, specific lighting requirements, and special equipment such as laminar flow hoods, pumps, tubing, needles, and syringes. Individual drug labels have specific requirements dealing with all aspects of preparation and storage before administration. These requirements include cautions concerning special needles and syringes necessary for reconstitution, inspection for particulate matter after reconstitution, temperature ranges at which the reconstituted drugs must be stored, as well as a whole range of other precautions. Because of the cost factors involved, as well as the specialization necessary on the part of the pharmacist to prepare these drugs, the local chain or community pharmacist could not be expected to have the expertise, equipment, or work area necessary to prepare these drugs in a manner to ensure their sterility and stability, a factor that is necessary to guarantee their safety for use in the home.

Additional complications associated with home IV drug therapy result from factors related to the patients, such as disease progression, combinations of disease processes and their therapies, and the aging process in general. Often, Medicare beneficiaries have several concurrent medical problems, and they are often in need of long-term, interrelated therapies. Frequently, these beneficiaries may lack visual acuity and manual dexterity. Psychoses or neuroses of patients can present additional problems for safe and effective home IV drug therapy. Also, patient safety might be affected by noncompliance with the drug therapy regimen, poor living conditions, or high stress levels of both a patient and the spouse or other caregiver, or a combination of these factors. Therefore, to prevent morbidity and mortality, and to achieve the desired therapeutic effect, it is critical that the provider be skilled in carefully screening and evaluating patients initially, and on a continuing basis.

Some home IV drugs have the potential to be toxic and to cause lethal consequences even when administered in the proper dosages. This potential exists because some drugs have undesired side effects on certain organs or body systems and a particular patient's organs or body systems may already be compromised by aging or specific disease processes. For example, antibiotics have the potential to cause anaphylaxis in patients who may be allergic to the drug, and morphine can cause respiratory depression, which can be life threatening.

In addition, the rate of infusion of some drugs is problematic. For example, if a drug such as aminophyline is administered at a rapid infusion rate, it can cause severe cardiovascular problems, which could lead rapidly to death from arrythmia. Furthermore, the site of infusion must be closely monitored, not only for infections or blood clot formation, but also for extravasation (leaking of the medication from the vein into the tissue).

Because of the risks and dangers associated with home IV drug therapy, it is critical that providers who furnish these drugs possess the expertise to evaluate patient signs and symptoms and to discern the potential for toxic reactions, such as renal or hepatic failure. In addition, the provider must be

able to teach and reinforce teaching about necessary safety precautions to be taken by its employees and patients.

Section 1862(a)(1)(A) of the Act prohibits payment under the Medicare program for an expense incurred for services "which are not reasonable and necessary for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member." In considering whether an IV drug is reasonable and necessary for coverage and payment purposes, we have to determine if the drug is being used safely and effectively. Additionally, the statute at section 1861(t)(4)(A) of the Act requires that we determine which drugs can or cannot be safely and effectively administered in a home setting. To make these determinations in a meaningful way, we had to use as a basis the expectation that the drugs would be furnished by a provider qualified to conduct a safe and effective home IV drug program. We believe that any rational determination that a drug can be safely and effectively administered in the home setting would have to be based on the premise that the drug would be furnished by a provider that meets our conditions of participation and is therefore qualified to furnish the services necessary to ensure that the drug is administered safely and effectively. Section 1861(jj)(3) of the Act describes the requirements that a home IV drug therapy provider must meet to qualify to furnish the services, including pharmacy and nursing services, "as are necessary to conduct safely and effectively an intravenously administered drug regimen through use of a covered home IV drug * * *." We believe it was the intent of Congress in using this language that covered home IV drugs be furnished only by providers who meet these requirements.

In addition, in compiling the list of IV drugs that should be included on the required list of covered home IV drugs, we determined that, to ensure that we would have a safe and effective home IV drug program, it would be necessary to require that each home IV drug be furnished by a qualified home IV drug therapy provider. Moreover, for the drugs included on the list, we determined that they could only be safely and effectively administered in a home setting if they were furnished by a qualified home IV drug therapy provider. We chose this approach because of the potentially serious or life threatening side effects of these drugs, the precautions that must be taken to ensure that IV drug therapy administered in a home setting is safe and effective, and the importance of proper patient selection when serving an older and more frail population.

In deciding upon the proposed policy that a covered home IV drug must be furnished directly or under arrangements by a qualified home IV drug therapy provider, we considered as an alternative also making Medicare payments directly to pharmacies that dispense these drugs. However, we rejected this alternative for the following reasons that relate to ensuring that covered home IV drugs are safely and effectively administered in a home setting.

If the Medicare program paid pharmacies directly for the covered home IV drugs they dispensed, we would lose the controls established by Congress in section 1861(jj) of the Act to ensure that these drugs would be safely and effectively administered in a home setting. These controls include requirements pertaining to the following:

a. Patients being under a plan of care established and periodically reviewed by a physician.

b. Patients receiving the items and services such as nursing, pharmacy, and related services (including medical supplies, IV fluids, proper delivery and equipment) that are necessary to conduct safely and effectively an IV administered drug regimen.

c. Patients having services available 7 days a week on a 24-hour basis and procedures being in place to handle their emergencies.

d. Patients being provided with drug regimen review and coordination of care.

e. Patients having services furnished by properly trained personnel.

If the Medicare program paid pharmacies directly for the covered home IV drugs they dispensed, we would be treating these drugs the same as other "covered outpatient drugs." However, Congress clearly singled-out these home IV drugs and treated them differently because of its concerns about ensuring the safety and effectiveness of home IV drug therapy. This is evidenced by sections 1861(t)(4) (A) and (B), 1834(d)(3), 1835(a)(2)(G), and 1861(jj) of the Act. Congress has included in the Act several provisions that involve certain precautions to ensure the safety and effectiveness of the covered home IV drug therapy program. It was because of the dangers associated with the use of home IV drugs for the treatment of the elderly that Congress established these precautions. We do not want these regulations to allow these precautions to be circumvented. We believe that one of the most important of these precautions is the link that Congress has established between covered home IV drugs and covered home IV therapy services furnished by a qualified provider.

If we paid pharmacies directly for the covered home IV drugs that they dispensed, we believe we would be undermining the purpose for which Congress enacted section 1861(jj) of the Act. In section 1861(jj) of the Act, Congress authorized home IV drug therapy services and established a new class of providers to ensure that covered home IV drugs are administered safely and effectively. The Act also stipulates that covered home IV drug therapy services must be furnished by a qualified home IV drug therapy provider. If we paid pharmacies directly for these drugs, we would possibly be allowing home IV drugs to be furnished to individuals who would receive them without the involvement of a qualified home IV drug therapy provider and without any assurance that they would receive the home IV drug therapy services, as defined in section 1861(jj) of the Act, that are necessary for safe and effective home IV drug therapy. The home IV drug therapy services were intended by Congress as means to an end. The ultimate concern is to ensure the safe and effective use of home IV drugs. Thus, we do not believe it was the intent of Congress to place restrictions on who can be paid by the Medicare program for furnishing covered home IV drug therapy services without at the same time intending that similar restrictions be placed on who can be paid by the Medicare program for furnishing covered home IV drugs.

Of course, a pharmacy can qualify as a provider of home IV drug therapy services by meeting the requirements applicable to such a provider in section 1861(jj)(3) of the Act and implementing regulations. However, if we directly paid pharmacies that dispensed covered home IV drugs, this practice would be contrary to the intent of section 1861(jj)(3) of the Act, which stipulates that certain requirements must be met by qualified home IV drug therapy providers. The purpose of these requirements is to ensure that those entities that furnish the services necessary to conduct home IV drug therapy safely and effectively in a home setting are qualified to do so. This is another step that Congress has taken as a result of its concerns about the safety and effectiveness of home IV drug therapy. However, if covered home IV drugs were available from other sources besides qualified home IV drug therapy providers, we would not be able to ensure that the services necessary for safe and effective home IV drug therapy are furnished by an entity that is qualified to do so.

While we have proposed to limit coverage and payment to "covered home IV drugs" that are furnished directly by or under arrangements with a qualified home IV therapy provider, we specifically invite comments concerning this proposal. (As defined in section 1861(w)(1) of the Act, the term "under arrangements" means that the Medicare payment for a service procured by a Medicare provider of services by contract with an outside entity may be made only to the Medicare provider of services, not to the outside entity. Further, the term "under arrangements" also means that this Medicare payment to the provider discharges the beneficiary's legal obligation to pay the bill for those services, whether the bill is from the provider or the outside entity.)

As illustrated by the statutory provisions relating to home IV therapy services, the definition of a qualified home IV therapy provider, and the requirement that covered home IV drug therapy services must have prior approval by a Peer Review Organization, Congress intended that the use of covered home IV drugs be strictly controlled and regulated. As set forth in section 1861(jj) of the Act, Congress established high standards to ensure the safety and effectiveness of IV drugs used in the home setting. We do not believe we can ensure the safe and effective use of these drugs in the home unless we require that these drugs be furnished by qualified home IV therapy providers. We believe that, were we to propose otherwise, we would be undercutting the high safety and effectiveness standards established by Congress for covered home IV drugs. Moreover, without this requirement, the purpose for which the statute established qualified home IV therapy providers as a special and separate type of Medicare provider would be seriously weakened and easily circumvented. Thus, we have included in the definition of a "covered home IV drug" the restriction that the drug must be furnished directly or under arrangements made by a qualified home IV therapy provider.

In essence, the totality of the home IV benefit as it is constructed by Congress in sections 1154(a)(16), 1834(d), 1816(k), 1835(a)(2)(G), 1861(t)(4), and 1861(jj) of the Act, anticipates close monitoring not only of the home IV therapy services in terms of use and administration of the drug but also of the quality of the preparation of the drug, its delivery to the home of a beneficiary, its proper maintenance, and storage. The home IV therapy legislation establishes a completely new class of providers that will be dealing with frail beneficiaries who, in many cases, will be self-administering home IV drugs or who will have caregivers perform the administration. A primary consideration is that the drugs involved will be dangerous, toxic substances that must be carefully prepared, delivered timely to a beneficiaries home by an entity that can ensure proper handling so that the stability of the drug is not compromised (for example, is properly refrigerated) and maintained in a manner that will ensure viability at the time of its use. We think that these considerations support the view that it was the intent of Congress that home IV drugs be furnished to beneficiaries only by qualified home IV providers.

We also believe that the statute reflects the intent of Congress that only qualified home IV therapy providers submit claims and receive payment for covered home IV drugs. Section 1816(k) of the Act authorizes the Secretary to use intermediaries to pay for home IV drugs and home IV drug therapy services. Thus, claims for covered home IV drugs and home IV drug therapy services would be processed by intermediaries. Traditionally, under the Medicare program only providers submit claims to intermediaries. In authorizing the use of intermediaries to process these claims, therefore, we believe it was the intent of Congress that only providers, rather than suppliers or beneficiaries, be allowed to bill for covered home IV drugs and home IV drug therapy services.

In addition, section 1834(c)(1)(A)(ii) of the Act exempts from the catastrophic drug deductible "covered home IV drugs dispensed in conjunction with home intravenous drug therapy services which are part of a continuous course of such therapy initiated while the individual was an inpatient in a hospital." Since all claims for home IV drug therapy services would be processed by intermediaries, only an intermediary would know if a home IV drug was dispensed in conjunction with home IV drug therapy services begun in a hospital. Thus, administratively we believe it would be impractical for other entities besides intermediaries to process claims for home IV drugs. Traditionally, as stated above, suppliers and beneficiaries do not submit claims to intermediaries.

It is important to note that qualified home IV therapy providers could either furnish covered home IV drugs directly or arrange for them. Accordingly, there is no reason for any outside entity to bill the Medicare program for the drug. Instead, the entity would seek payment from the provider. In fact, to permit splintering of services would be undesirable from both a medical and an administrative point of view.

The definition of "covered home IV drugs" would include antibiotics except for specific antibiotics or specific indications that we determine are not safe and effective for home use. We would include those non-antibiotics that we determine can be safely and effectively administered in the home. Also, as required by section 1861(t)(4)(B) of the Act as added by section 202(a) of Public Law 100–360, we will publish by January 1, 1990 in the **Federal Register** a list of home IV drugs that can generally be administered safely and effectively in a beneficiary's home, and the indications for which those drugs may be used. We are in the process of developing this list based on a review of available medical and scientific information, and consultations with providers of home IV drugs and publishers of authoritative compendia. Home IV drug therapy services could be covered under Medicare only for those listed drugs.

In new § 410.29(c)(1), we would specify that we will update the list (that is, in terms of additions or deletions) at least annually. Updates may occur more frequently as necessary, possibly semi-annually, contingent upon the information we receive about IV drugs that might safely and effectively be used in the home. We specifically request comments about the frequency of these updates. As we understand it, there may be only 10 to 20 new drugs approved for marketing by the FDA during the course of a year that might be administrable through the IV route. However, we would determine whether these newly approved drugs can be safely and effectively administered in the home. In addition, we would specify that home IV drugs would be covered irrespective of whether there was a prior inpatient hospital stay. We are including this clarification to ensure that it is understood that coverage of home IV drugs does not require a prior inpatient hospital stay. (The list of drugs proposed for the home IV benefit was published separately in the **Federal Register**. We will also be publishing separate proposed rules concerning a payment methodology for covered outpatient drugs; coverage requirements for home IV drug therapy services; conditions of participation for home IV drug therapy providers; drug deductible and

coinsurance amounts; the fee schedule for home IV drug therapy services; requirements for participating pharmacies and drug bill processors; and coverage of catastrophic Part B expenses, outpatient drug expenses, and respite care benefits for beneficiaries enrolled in pre-pay health plans, such as health maintenance organizations. We will propose a definition of "home" for purposes of the home IV benefit in the proposed rule on the general coverage requirements for home IV drug therapy services.)

We would specify in new § 410.29(c)(2) that a home IV drug would be covered separately under Medicare. Therefore, beginning on January 1, 1990, those drugs appearing on the list of home IV drugs promulgated by HCFA under the authority of section 1861(t)(4)(B) of the Act would be available as "covered home IV drugs" only through the covered home IV drug benefit under the authority of section 1861(t)(4)(A) of the Act. (We note that this does not mean that outside of the covered home IV drug benefit these drugs would not continue to be covered under the pre-existing drug coverage specified in section 1861(t)(3)(A) of the Act.) Considering all of the separate provisions in sections 202 and 203 of Public Law 100–360 regarding the safety and effectiveness of covered home IV drugs, we believe it was the intent of Congress that these drugs be covered only as part of the specifically identified pre-existing benefits or the covered home IV drug benefit and not as part of another benefit. Accordingly, these drugs would no longer be available as part of the durable medical equipment benefit, under which it is now possible for Medicare payment to be made for IV administered drugs.

- We would redesignate existing § 410.29 as § 410.30 and add the following limitations that pertain to the new drug coverage benefit under Public Law 100–360:

—For the period January 1, 1990 through December 31, 1990, "covered outpatient drugs" would be limited to the drugs that are used in immunosuppressive therapy, and covered home IV drugs for appropriate indications identified in the final list of covered home IV drugs to be published after we evaluate public comments on the proposed list mentioned above.

—The regulations would identify those categories of drugs that are currently covered by Medicare and that would be excluded from the definition of a "covered outpatient drug" under Public Law 100–360. As indicated earlier, section 1861(t)(3) of the Act specifies which currently covered categories of drugs would be excluded from the definition of "covered outpatient drugs." These drugs would continue to be covered but not as part of the new drug benefit.

—Initially, we are proposing to limit payment for covered outpatient drugs to those drugs dispensed in a 34-day supply or less under an original prescription or under a refill. Generally, the statute limits payment for a covered outpatient drug to a 30-day supply or a longer period as the Secretary may authorize up to 90 days, and beyond in exceptional circumstances. Although, as discussed in greater detail below, we are considering exceptions to this policy, we believe that by limiting the supply of prescription drugs to 34 days, we would accomplish certain objectives as follows:

+We would provide a means of controlling excessive prescribing and stockpiling of drugs for the period of the next year before the deductible is met.

+Physicians and pharmacists would be provided frequent and regular opportunities to review patients' drug utilization.

+We would reduce wastage of prescription drugs when a patient discontinues a drug therapy because of successful treatment of the condition for which the medication had been prescribed, because of an unsatisfactory or adverse outcome, or because a drug has reached its expiration date.

We have decided that 34-days is a more appropriate limit than 30 days for the following reasons:

+Many tablets and capsules are packaged in quantities of 100 by pharmaceutical manufacturers and distributors. Also, the dosage for many tablets and capsules is one taken three times a day. Thus, under a 30-day limit, if a physician orders 100 tablets or capsules, the pharmacist could dispense only 90 tablets or capsules at one time and 10 tablets or capsules (10%) would remain. The cost of the remaining quantity would not be recouped until another prescription for the same medication is dispensed. If the limit is set at a 34-day supply, the pharmacist could dispense the full quantity of 100 tablets or capsules.

+Many nursing homes receive pharmaceuticals under a unit dose system. The pharmacy usually bills the nursing home once a month, regardless of the dosage or the quantity of medication. In this circumstance, the closing date for the billing could be the first of the month or any other date of the month, but in those months in which there are 31 days, because the pharmacy bills on the basis of a calendar month, it would bill for a 31-day supply of medication.

+Many patients see their physicians "once a month". This does not always mean every 30 days. Because of weekends and holidays, appointments may not always be scheduled every 28 or 30 days. Setting the allowed upper limit quantity to a 34-day supply might alleviate the need for patients to call for authorization to refill medication just before an appointment when the medication might be discontinued by the prescriber.

For these reasons, we believe that a 34-day limit on the length of prescriptions is a more practical approach than to propose a 30-day drug limit.

Section 1862(c)(2) of the Act stipulates that no payment may be made under Part B for *any expense* incurred for a covered outpatient drug if the drug is dispensed in a quantity exceeding a supply authorized by the Secretary. In accordance with this limitation, we would not pay for any portion of a prescription, not even for a 34-day supply or less, that is dispensed for a supply of more than 34 days. This limitation would apply after the drug deductible is met. It also would apply to the drug claim by which an individual exceeds the deductible. Therefore, payment for these drugs would be the total responsibility of the beneficiary or another health insurer. We would notify Medicare providers of services of this limitation to discourage the prescribing of drugs for more than a 34-day supply.

For drugs prescribed for use on a "take as needed" basis, the pharmacist would be asked to calculate the number of days supply for which a drug is prescribed based on the physician's indicated dosage range if that range is known. If the range is unknown, the calculation would be based on the manufacturer's recommended maximum daily dosage specified in the drug's approved labeling. For drugs, such as creams and ointments, whose approved labeling does not include a manufacturer's recommended maximum daily dosage, the pharmacist would be asked to estimate, based on the patient's condition, the number of days supply for which a drug is prescribed.

The 34-day limitation would pertain to the quantity of drugs dispensed at one time. Therefore, payment could be made for a prescription that authorizes a 34-day supply or less of a drug, even if the prescription authorizes refills. Nevertheless, neither a prescription nor an authorized refill could be paid for if it was dispensed for more than a 34-day supply.

As noted earlier, the statute permits the Secretary to authorize payment for prescriptions up to 90 days and for exceptions beyond a 90-day supply. In proposing the 34-day limitation, we recognize that its application to all prescription drugs could be burdensome to some beneficiaries on maintenance drugs, especially those living in rural areas. Also, a 34-day limit would result in more claims being processed and a greater number of dispensing fees. Therefore, we are considering exceptions to the 34-day limit for certain types of maintenance drugs (for example, insulin, digitalis, antiarthritics, anticoagulants, hormones, antiarhythmics) for which more than a 34-day supply may be appropriate. One exception we are including in this proposed rule is for those covered outpatient drugs that are marketed only in an amount that exceeds a 34-day supply. For these covered outpatient drugs, payment would be allowed for the smallest supply in which the drugs are marketed. We invite comments to identify other specific drugs or categories of drugs we should consider paying for in excess of a 34-day supply. Also, we note that at the point of sale, the contractors that will be processing the drug bills (referred to as "drug bill processors") will ordinarily not know the beneficiary's diagnosis. For this reason, we ask commenters to base recommendations for exceptions to the 34-day limit on names of drugs or therapeutic categories of drugs rather than on types of diagnoses. In the final rule, we will identify any exceptions to this limit that we believe are appropriate based on the comments we receive.

- In § 410.31, we would expand the coverage requirements for drugs used in immunosuppressive therapy to provide for payment of all covered outpatient drugs used in immunosuppressive therapy, beginning January 1, 1990, irrespective of whether the beneficiary received a Medicare covered or noncovered organ transplant and irrespective of a prescribed time limit.
- We would add a new § 410.32 to establish standards based on accepted medical practice for the prescribing of each covered outpatient drug. Section 1834(c)(5) of the Act, as amended by section 202(b)(8) of Pub. L. 100-360, requires the Secretary to establish, for each covered outpatient drug, standards for the prescribing of the drug that are based on accepted medical practice. This section of the law indicates that these standards are for the purpose of carrying out the program required by section 1834(c)(5)(A) of the Act. This program must identify (and educate physicians and pharmacists concerning)—

—Unnecessary or inappropriate prescribing or dispensing practices for covered outpatient drugs,
—Instances or patterns of substandard care with respect to these drugs, and
—Potential adverse reactions with respect to covered outpatient drugs.

In establishing the standards that would be used to implement this program, the statute requires us to incorporate standards from those authoritative compendia that we select. The conference report that accompanied Public Law 100-360 states that the conferees expect that we would use only those compendia that base their standards on a review of published scientific and medical information, that provide for a public comment and review process, and that provide adequate assurances that the panelists who establish standards are free of financial (or other) conflicts of interest (H. R. Rep. No. 100-661, 100th Congress, 2d Session 192 (1988)).

We believe it is essential for a compendium to meet at least these three criteria to ensure that its standards are based on accepted medical practice. Therefore, we propose to incorporate drug standards only from compendia that meet these three criteria. Information included in an authoritative compendium should be based on a review of published scientific and medical information to ensure that it is consistent with accepted current medical practice and verified by the latest research and published literature in the field of pharmacology. We also believe that an authoritative compendium should provide for a comment and review process that allows experts who are directly responsible for developing the compendium to review and comment on its content. This process is needed to ensure that the compendium presents a consensus view based on the published literature and the advice of experts from the scientific and medical community. It is also essential that an authoritative compendium provide adequate assurances that the panelists who establish standards are free of financial (or other) conflicts of interest. It is crucial that a compendium be as unbiased as possible. Therefore, an authoritative compendium must ensure that those who establish its standards are free of conflicts of interest.

Additionally, the conference report states that the conferees expect that among the compendia we would consider for use would be the U.S. Pharmacopoeia Dispensing Information, volume 1 (Drug Information for the Health Care Professional), the American Medical Association's Drug Evaluations, and the American Hospital Formulary Service Drug Information. We have considered these three compendia and believe that all three meet the selection criteria described in the committee report and discussed above. Therefore, for purposes of certain provisions of the drug utilization review program; that is, the identification and education of physicians and pharmacists about inappropriate prescribing and dispensing practices and substandard care with respect to drugs and potential adverse reactions, we propose to adopt as our standards the standards established in these three compendia. These standards would not be used to define coverage or payment of covered outpatient drugs under the Act.

These standards together with the standards derived from accepted medical practice, medical literature, advice obtained from medical consultants and experts in the field (some of whom we expect would be under contract), would be used to develop criteria for purposes of drug utilization review. In conducting a drug utilization review program, we also would apply the requirements in the statute and regulations that govern the coverage of and payment for covered outpatient drugs. Parts of the drug utilization review program would serve as the basis for the program required by section 1834(c)(5)(A) of the Act to identify and educate physicians and pharmacists concerning inappropriate prescribing and dispensing practices. We intend to publish a separate proposed rule concerning the drug utilization review program when we have more information. That proposed rule will describe how, as part of retrospective drug utilization review, we would use data collected through the electronic point-of-sale claims processing system required by section 1842(o)(4) of the Act, as amended by Public Law 100-360. The data on covered outpatient drugs would be used to identify and educate physicians and

pharmacists concerning in apropriate prescribing and dispensing practices.

Section 1834(c)(5)(C)(ii) of the Act authorizes the Secretary to exclude from coverage or to deny payment for a specific use of a covered outpatient drug for a specific indication if the Secretary determines the use is not safe or is not effective. We anticipate that the use of this authority would be necessary only in a limited number of circumstances. The criteria mentioned above together with the statute and regulations would be used to identify those exceptional circumstances that warrant the use of this authority. Since diagnostic information will not be included on the prescription, ordinarily it would not be known by the drug processor at the time a claim is received either electronically or by mail. Therefore, in order to deny payment or exclude coverage for a specific use of a covered outpatient drug for a specific indication that we have determined is not safe or is not effective, as authorized by section 1834(c)(5)(C)(ii) of the Act, we would establish a pre-authorization review process. For those drug uses and indications for which we have determined that a pre-authorization review process is needed, we would require that information from the prescribing physician regarding the beneficiary's diagnosis and the purpose for which the drug has been prescribed must accompany the claim, or if it is a participating pharmacy that the pharmacist must have the information on file before payment could be approved. For example, beneficiaries using a nonparticipating pharmacy, would be required to submit this information directly to the drug bill processor as part of submitting a paper claim. For beneficiaries using a participating pharmacy, it would be sufficient for the pharmacist to have the required information on file. An override of an alert transmitted by the drug bill processor could be the means used by the participating pharmacy to indicate that the information is on file. The beneficiary would be obligated either to obtain the additional documentation from the physician, or if he or she is unwilling or unable to do so, to submit a paper claim for the drug. Of course, if the pharmacist in a participating pharmacy chooses to do so, he or she may call the physician to ascertain the diagnosis for which the physician prescribed the drug and then document the information in the pharmacy files.

Even though sections 1834(c)(5)(C)(ii) and 1861(t)(2) of the Act both refer to the safety and effectiveness of drugs, they pertain to two completely separate and distinct administrative processes. Thus, the words "safe" and "effective" as used in section 1834(c)(5)(C)(ii) have a different application and relate to a different purpose than the words "safety" and "effectiveness" that appear in section 1861(t)(2). Therefore, even though a drug may have been approved for "safety" and "effectiveness" by the FDA, the Secretary may determine that a specific use of the drug for a specific indication is not safe or is not effective.

Section 1834(c)(5)(C)(ii) pertains to determinations made by the Secretary to exclude coverage of or deny payment for specific uses of covered outpatient drugs for specific indications under Medicare. It gives the Secretary authority to deny payment or exclude coverage under the Medicare program if the Secretary determines that a specific use of a drug for a specific indication, which might not be limited to the labeled usages, is not safe or is not effective.

Section 1861(t)(2) of the Act refers to the process (described in section III of this preamble), whereby the FDA determines before a new drug can be marketed that the drug is safe and effective for certain specific indications identified on the drug's approved label. According to this process, before the FDA will approve a new drug for marketing, it has to be shown to be safe and effective for its proposed uses. The purpose of this process is to determine whether a drug is safe and effective for marketing for its labeled uses.

Thus, section 1834(c)(5)(C)(ii) authorizes exclusion of Medicare coverage or denial of Medicare payment for specific uses of covered outpatient drugs for specific indications, while the FDA process referred to in section 1861(t)(2) relates to the uses for which an approved drug may be marketed.

We are considering what the specific elements of a drug utilization review program should be. One of the elements under consideration is therapeutic drug utilization review. We propose to include this element as part of our drug utilization review program. Its purpose would be to identify prescribed drugs that may interact harmfully with either an existing disease or medical condition of a beneficiary. We specifically invite comments concerning the feasibility of including therapeutic drug utilization review as part of either prepayment or postpayment drug utilization review.

We plan to begin implementing the drug utilization review program in January 1991. At this time, we believe that a drug utilization review program should consist minimally of the following elements:

—Prepayment Review and Denial.

Claims for Medicare drug payments ordinarily would be submitted to drug bill processors directly by participating pharmacies through an electronic point-of-sale claims processing system or by beneficiaries who receive drugs from a nonparticipating pharmacy. (Claims for home IV drugs would be submitted to intermediaries. The drug utilization review program described here would only apply to claims submitted to drug bill processors, thus, it would not pertain to covered home IV drugs.) Before payment is approved, the drug claim would be reviewed by the drug bill processor regarding the following items:

+ Does the drug meet the definition of a "covered outpatient drug" as defined in section 1861(t) (2) through (4) of the Act? For example, a drug that may be dispensed without a prescription would not be covered.
+ Was the drug dispensed for more than a 34-day supply? If the drug was dispensed for more than a 34-day supply, it would not be paid for by Medicare unless Medicare regulations authorize an exception for that drug. Payment would not be approved for any portion of a supply of drugs if the supply exceeds the limitations set forth in regulations on the length of prescriptions.
+ Is the drug prescribed for a use that is not safe or is not effective? In accordance with section 1834(c)(5)(C)(ii) of the Act, the Secretary may determine that the specific use of a drug for a specific indication is not safe or effective for the diagnosis or treatment of an illness or injury as required by section 1862(a)(1)(A) of the Act. Drugs prescribed for cosmetic purposes (for example, those used to treat conditions such as wrinkles or balding) would not be covered. However, if these conditions are caused by a medical problem, covered outpatient drugs prescribed for the treatment of the medical problem would be covered. Similarly, we are considering whether other drugs (such as oral contraceptives) should be subject to this same exclusion.

- Under section 1834(c)(5)(C)(ii) of the Act, payment may be denied for a drug if the Secretary determines that it is not safe or effective for the particular beneficiary for whom it is prescribed. For purposes of safety and efficacy, payment for duplicate prescriptions for a drug would be denied, unless in the judgement of the pharmacist, after conferring with the beneficiary or

explain, for example, that if a

productivity, innovation, or on the

an exception), nevertheless, many drugs

prescribing physician, or in the judgement of the drug bill processor, there is a justifiable reason for filling the prescription. By the term "duplicate prescriptions" we mean prescriptions for the same drug and for the same patient that are prescribed for the same time period. A duplicate prescription could result from two different physicians unknowingly prescribing the same drug for the same patient. An example of a reason why payment for a duplicate prescription may be justifiable would be that the drugs obtained from a previous prescription might have been lost or stolen. Also, some allowance would be made to permit an individual to refill a prescription before all of the previously dispensed quantity of drugs has been consumed (that is, when there are 10 or fewer days of a supply remaining on the previous dispensing of that prescription). If prescriptions include refills, for purposes of convenience or to ensure that their medication is continued as directed, individuals do not ordinarily completely exhaust a current supply of drugs before having a prescription refilled. Therefore, we do not believe it would be warranted to alert pharmacies about a potential duplication of a prescription if the drug bill processor's records indicate that if the beneficiary had taken the drug as directed there would be a drug supply of 10 or fewer days remaining from the previous dispensing of that prescription. The drug bill processor would know how many days' supply would be remaining, since at the time the drug was dispensed the pharmacist would have informed the drug bill processor of the number of days for which the drug was prescribed. We decided on 10 or fewer days, because we believe this would give the beneficiary sufficient time to obtain a refill before his or her supply of drugs was exhausted. In addition, we believe it is a reasonable benchmark for identifying those instances when it is not necessary to alert a pharmacy about a possible situation in which an individual may be inappropriately having a prescription duplicated.

+ Does the beneficiary's medication profile indicate that a prescribed drug may interact harmfully with a drug in the profile? We anticipate that the pharmacy would be alerted regarding the possible need for counseling or some other type of intervention before filling a particular prescription if the drug bill processor's records indicate there is a risk of a significant drug interaction between a newly prescribed drug and a drug that has previously been dispensed to the beneficiary.
+ Was the drug prescribed in an amount that exceeds the recommended maximum daily dose? Pharmacies would be alerted by the drug bill processors concerning claims for drugs that are prescribed in amounts that are likely to cause severe adverse effects. Pharmacies would be expected to take what they consider to be appropriate action.

—Post-payment Review.

For purposes of implementing a post-payment drug review program, we plan to use expert consultants to help develop drug utilization review criteria. As mentioned above, these criteria would, in part, be based on the compendia whose standards we have adopted. These criteria would be used to identify and educate physicians and pharmacists concerning potential or possible inappropriate prescribing or dispensing practices or substandard care. In conducting post-payment drug utilization review, Medicare contractors would analyze and study the following data on beneficiaries:

+ A beneficiary's age, sex, and reason for entitlement (that is, by reason of disability or age).
+ The total number of prescriptions used by a beneficiary, particularly drug dosage form, and strength, including therapeutic class, doses per day, number of treatment drugs and remedial drugs and increases in the use of these drugs.
+ The number of different prescribing physicians and different pharmacies.
+ Diagnostic information reported on physician claims for services, number of physician visits, and increases in visits.
+ Other relevant information requested by our consultants.

—Education.

We would establish a program to educate physicians and pharmacists about inappropriate prescribing and dispensing practices. This program would educate physicians and pharmacists about the criteria that we use for drug utilization review and the findings that result from drug utilization review. The program would include the following educational aspects:

+ If post-payment utilization review indicates that, in accordance with our criteria, drugs may have been inappropriately prescribed or dispensed to a particular beneficiary, the individual's physician or pharmacist would be informed of the drug utilization review findings. For example, a physician may be informed that one of his or her patients with diabetes is taking a drug that raises blood sugar. The physician would be advised of this information for his or her evaluation and action, if appropriate.
+ We would utilize educational materials and continuing education programs to inform and advise physicians and pharmacists about unnecessary and inappropriate prescribing and dispensing of drugs.

We specifically request public comment regarding the establishment of standards for a covered drug that is not included in any of the three compendia we propose to adopt. Also, since we were not able to review all compendia before publishing this rule, we invite comments regarding other compendia whose standards may be appropriate for our use.

If we would decide to change our selection of any of the compendia after this rule is issued in final form, we would publish a proposed rule to announce the change(s). If we would wish to modify any of the standards in a selected compendia, we would publish a notice in the **Federal Register** describing the modification(s).

In accordance with section 1834(c)(5)(C) of the Act, we would base all decisions to exclude coverage or deny payment for any specific use of a covered outpatient drug for a specific indication on a finding under section 1862(a)(1) of the Act that the use of the drug for the particular indication was not safe or was not effective. Section 1862(a)(1)(A) of the Act precludes Medicare from paying for any expenses incurred for items or services that are not reasonable and necessary for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member. However, as explained earlier, Congress specified in section 1834(c)(5)(C) of the Act (as amended by section 202(b)(4) of Pub. L. 100–360) that under section 1862(a)(1) of the Act, payment or coverage of covered outpatient drugs can be denied only if the Secretary has determined they are not safe or effective for a particular indication. Hence, under section 1862(a)(1) of the Act, payment would be denied for a covered outpatient drug only when we determine, or in accordance with our guidelines, an authorized Medicare agent determines, that a specific use of a drug is not safe or effective for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member. Our guidelines would

explain, for example, that if a prescription is issued in the presence of a clear contraindication, the use of a drug would not be considered safe or effective and would not be covered. Also, a prescription for a drug that is not medically necessary or appropriate for a particular beneficiary would not be covered because of safety and effectiveness considerations. Therefore, carriers would be authorized to deny payment for a covered drug in specific situations and for particular beneficiaries, if scientific and medical information indicates that the use of the drug in those circumstances is not safe or effective for the treatment of a particular patient.

As stated above, in accordance with the requirements of section 1862(a)(1)(A) of the Act, services are not covered by Medicare unless they are reasonable and necessary for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member. We do not consider cosmetic changes that occur as part of the natural aging process to constitute illness or injury for purposes of Medicare coverage. Therefore, drugs prescribed for the treatment of cosmetic conditions that result from the natural process of aging (for example, wrinkles and balding) would not meet the requirements of section 1862(a)(1)(A) of the Act and would be excluded from coverage.

We would allow Medicare payment for uses of covered drugs even if those uses are not included in the official FDA approved label unless the use is contraindicated by the drug's label. (We note, however, that we would cover home IV drugs only for the indications set forth in the published list of home IV drugs discussed earlier in this preamble.) Also, if we determine on the basis of scientific and medical information that a use of a covered drug is not safe or effective, we would deny payment.

VI. Regulatory Impact Statement

A. Executive Order 12291

Executive Order 12291 (E.O. 12291) requires us to prepare and publish a regulatory impact analysis for any proposed rule that meets one of the E.O. criteria for a "major rule"; that is, that would be likely to result in—

- An annual effect on the economy of $100 million or more;
- A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or
- Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The central purpose of this proposed rule would be to bring our existing regulations into conformity with the definition of a "covered outpatient drug" contained in section 1861(t) of the Act. With respect to the provisions of section 1834(c)(5)(B) of the Act as added by section 202(b)(4) of Public Law 100–360, which require the Secretary to establish standards for the use of covered drugs, as described in section V of this preamble, we propose to adopt as our standards, the standards in the U.S. Pharmacopoeia Dispensing Information, volume 1 (Drug Information for the Health Care Professional), the American Medical Association's Drug Evaluations, and the American Hospital Formulary Service Drug Information. Since these compendia are to be used only as part of a program established under section 1834(c)(5)(A) to identify and educate physicians and pharmacists about instances or patterns of inappropriate prescribing or dispensing of covered outpatient drugs, substandard care or potential adverse drug reactions, their adoption as part of a monitoring and educational program would have only an indirect effect on physicians and pharmacists. Furthermore, in proposing to adopt these compendia, we would be utilizing standards that are widely and commonly accepted by physicians, pharmacists, and other health care professionals. Consequently, we believe that our proposed use of these compendia as part of the basis on which we would develop prescribing standards would not alter, to any significant degree, current prescribing patterns or practices.

Section 1862(c)(2) of the Act (which was added by section 202(d) of Pub. L. 100–360) requires the Secretary to deny payment for a covered outpatient drug, including any portion of the prescription, if a drug is dispensed in a quantity exceeding a specified number of days. The Act permits the Secretary to set limits from 30 days to 90 days (and for periods longer than 90 days under exceptional circumstances).

In section V of the preamble, we have explained our reasons for proposing a limit on the amount of a covered outpatient drug for which we would make payment to a 34-day supply (§ 410.30). Although we are considering exceptions to the proposed 34-day dispensing limit for certain types of maintenance drugs (we have specifically requested comments in section V of this proposed rule on which drugs to grant an exception), nevertheless, many drugs may be subject to the proposed limit and as a consequence, there may be some adverse effects resulting from this proposal.

For example, Medicare beneficiaries living in rural areas may find this proposed policy particularly onerous and costly. In addition, the proposed 34-day limitation on dosage supply could result in higher program costs. When we pay for a covered outpatient drug on the basis of the drug's average wholesale price (in accordance with section 1834(c)(3) of the Act that was added by section 202(b)(3) of Pub. L. 100–360), we are required to pay the dispensing pharmacy an administrative allowance of $4.50 to a participating pharmacy and $2.50 to another pharmacy. The proposed 34-day supply dispensing limit may result in more prescriptions being refilled than might occur under a policy that would permit the statutorily mandated maximum 90-day supply of a drug to be dispensed at one time. Consequently, the administrative allowance might be paid more frequently under the proposed policy. Also, we may incur additional administrative costs as a result of the higher volume of bills that would be processed. However, these additional costs for pharmacy administrative allowances and bill processing may be offset by savings generated from reducing the volume that might have been dispensed but, subsequently was never used. The proposed 34-day limit on the supply of drugs that may be dispensed at one time may reduce this kind of waste and produce savings for both the Medicare program and beneficiaries (the Medicare program would achieve savings by avoiding payment for unused drugs, and Medicare beneficiaries would save by not incurring the out-of-pocket expenses for the purchase of the unused drugs).

In conclusion, balancing possible higher payments for pharmacy administrative allowances and bill processing against savings resulting from reducing the unnecessary purchase of drugs, we believe that the total economic impact of the proposed 34-day limitation on the dispensing of covered outpatient drugs should be less than $100 million per year compared to a policy that would cover the maximum number of days permitted under the statute.

Thus, for the reasons we have given, we do not believe this rule would meet any of the criteria of a major rule under E.O. 12291 and a regulatory impact analysis is not required.

B. Regulatory Flexibility Act

We generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that a proposed rule would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, all pharmacists, most pharmacies, and some pharmaceutical manufacturers qualify as small entities.

As stated in the discussion on the applicability of E.O. 12291 to this proposed rule, we believe that the central provision of this rule, which specifies which drugs would be considered covered outpatient drugs under the Medicare program, is prescribed by the Act as amended by section 202 of Public Law 100-360. Thus, we view any benefits or adverse consequences that may affect small entities as a result of the applicable statute rather than of this proposed rule. Also, as explained in our discussion of the effects of this proposed rule under the E.O., we believe that adoption of the U.S. Pharmacopoeia Dispensing Information, volume 1 (Drug Information for the Health Care Professional), the American Medical Association's Drug Evaluations, or the American Hospital Formulary Service Drug Information as standards for drug utilization review and education purposes would have a minimal effect on the behavior of physicians and other health professionals licensed to prescribe medication.

Although our proposal in § 410.30 to limit the amount of a covered outpatient drug that may be dispensed at one time to a 34-day supply for either a prescription or a refill may provide substantial revenue increases to some pharmacies in the form of more frequent dispensing fees, we do not expect the provisions in § 410.30 to have a substantial effect on a significant number of small entities; given the projected dollar amount of national retail sales of covered outpatient drugs; the comparatively small increase in Medicare payments caused by requiring refills of a covered outpatient prescription drug every 34 days compared with the cost of paying for drugs which would have been dispensed in larger amounts; and the actual dollar amount of the dispensing fee established under the Act.

The proposed regulation at § 410.29(b) restricting coverage of or payment for home IV drugs to only those drugs dispensed either under arrangement or directly to the beneficiary by a qualified home IV provider may be perceived by some pharmacies as unnecessarily restricting entry of pharmacies into the Medicare home IV market. These pharmacies may argue that our interpretation of the law is too narrow, thus preventing many qualified pharmacies from competing for the sale of home IV drugs to Medicare beneficiaries.

As discussed in section V of this preamble, we believe that it is only prudent, on our part, to control the dispensing of home IV drugs to beneficiaries because of the high risk involved both in handling some of the drugs we would approve for home use and in the administration of all home IV drugs. Thus, to ensure that home IV drugs are prepared and administered safely and effectively, we believe it reasonable to restrict the source of IV drugs used in the home to those providers that meet the standards for home IV providers specified in the Act. Only by having a single provider organization responsible and accountable for all home IV services furnished at any one time to a beneficiary can we ensure that beneficiaries would receive safe end effective care.

With the assurance of adequate care, both the Medicare program and beneficiaries may realize certain economic benefits that might be lost if pharmacies and beneficiaries had access to the home IV drug market in the same manner as they would for the sale and purchase of other covered outpatient drugs. Without the proposed limitation on access to home IV drugs, patients might take it upon themselves to purchase home IV drugs without fully understanding the technical requirements of storing and handling these compounds. This could result in injuries to patients and higher costs to the program in the form of emergency care or hospitalization even if the drug were safely and effectively administered. Placing responsibility on a single entity for all home IV services, including pharmacy services should, we believe, greatly reduce the risk of an IV drug-related mishap and thus avoid the costs associated with treating these accidents.

As a final point, we note that the limitations we propose to impose on pharmacy access to the home IV drug market are no different, in practice, than the limitations hospitals and other types of providers place on pharmacy services. For example, in hospitals and nursing facilities, pharmacy access to beneficiaries is limited to the pharmacy services these providers either arrange for or furnish directly to patients. We believe that it is reasonable to maintain the same kind of relationship between the pharmacy and the home IV provider as exists between these other types of providers and their pharmacy services.

Therefore, for the reasons given in this section, we have determined, and the Secretary certifies, that this proposed rule would not have a significant effect on a substantial number of small entities.

Section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if a proposed rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital with fewer than 50 beds located outside of a Metropolitan Statistical Area.

We are not preparing a rural impact statement since we have determined, and the Secretary certifies, that this proposed rule would not have a significant economic impact on the operations of a substantial number of small rural hospitals.

C. Voluntary Statement of Effects

As we have stated, we believe that we are not obligated to provide an analysis of the effects of this proposed rule. Nevertheless, we are voluntarily providing a summary of the effects (particularly on Medicare beneficiaries) that we believe may result from implementing sections 1861 (s)(2)(J) and (t) of the Act as amended by section 202 of Public Law 100-360. We are providing this statement because coverage of outpatient prescription drugs represents a significant expansion of Medicare benefits.

Readers may find the following discussion to be very similar to impact analyses appearing in other regulations or notices implementing provisions of the Medicare catastrophic drug benefit. We have purposefully provided complete analyses in each document (even though they may be repetitious) so as to provide readers with complete discussions of the possible effects of the provisions being implemented without having to refer to other **Federal Register** documents.

1. Benefits Beginning in 1990

Under section 1861(t)(3)(B) of the Act, as added by section 202(a)(2)(C) of Public Law 100-360, drugs used in immunosuppressive therapy and covered home IV drugs would be covered as a part of the Medicare

catastrophic benefit beginning January 1, 1990.

a. Coverage of drugs used in immunosuppressive therapy. As added, section 1861(t)(3)(B)(i) of the Act extends coverage for prescription drugs used in immunosuppressive therapy furnished beyond the first year following an organ transplant to an individual regardless of whether the beneficiary receives a transplant that is covered under the Medicare program. Under section 202(b)(4) of Public Law 100-360, payment for prescription drugs used in connection with immunosuppressive therapy would be included as part of the new catastrophic benefit (see section 1834(c)(2) of the Act). However, under section 1834(c)(1)(A)(iii) of the Act, a beneficiary requiring immunosuppressive drug therapy during the first year following a Medicare covered organ transplant would not have to meet the covered outpatient drug deductible amount required under section 1834(c)(1)(C) of the Act (as added by section 202(b)(4) of Pub. L. 100-360). Also, under section 1834(c)(2)(C)(i) of the Act (as added by section 202(b)(4) of Pub. L. 100-360), the beneficiary coinsurance percentage for immunosuppressive drugs required in connection with a transplant covered under the Medicare program is limited to 20 percent during the first year following the organ transplant.

Under section 1861(t)(3)(B)(i) of the Act (as added by section 202(a)(2)(C) of Pub. L. 100-360), coverage would be provided under the catastrophic drug benefit beginning January 1, 1990 for drugs used in immunosuppressive therapy following a transplant that is not covered by the Medicare program (for example, a heart transplant performed in a hospital not approved by Medicare as a heart transplant facility). In these cases, however, the individual would be required to meet the deductible payment amount required by section 1834(c)(1)(C)(i) of the Act and the coinsurance percentages required under section 1834(c)(2)(C)(ii) of the Act (which were added by section 202(b)(4) of Pub. L. 100-360).

- In 1990, we estimate that about 9,500 beneficiaries will undergo an organ transplant that will be covered under the Medicare program. There may be an additional 7,600 beneficiaries who had undergone an organ transplant covered under the Medicare program sometime in 1989. Both groups would be covered under the catastrophic drug benefit for the drugs used in their immunosuppressive therapy beginning January 1, 1990, and would be exempt from the catastrophic drug deductible and subject only to a 20 percent catastrophic drug coinsurance rate for up to 1 year following their discharge from the hospital.

Also, beginning January 1, 1990, we expect that approximately 19,700 beneficiaries who had undergone a Medicare covered transplant before 1989 or had undergone or will undergo an organ transplant not covered under the Medicare program will be covered under the catastrophic drug benefit provisions. These beneficiaries, however, would be subject to the catastrophic drug deductible payment amount and to the 50 percent coinsurance rate that would be in effect for 1990.

b. Coverage of home IV drugs. Also, beginning January 1, 1990, home IV drugs would be covered under section 1861(t)(3)(B)(ii) of the Act (as added by section 202(a)(2)(C) of Pub. L. 100-360). For covered home IV drugs furnished as part of a continuous course of therapy initiated while a beneficiary is a hospital inpatient, the deductible amount specified in section 1834(c)(1)(C) of the Act (as added by section 202(b)(4) of Pub. L. 100-360) does not apply in accordance with section 1834(c)(1)(A)(ii) of the Act (as added by section 202(b)(4) of Pub. L. 100-360). The beneficiary coinsurance percentage for all covered home IV drugs would be 20 percent under section 1834(c)(2)(C)(i) of the Act (which was added by section 202(b)(4) of Pub. L. 100-360). We estimate that as many as 65,000 Medicare beneficiaries would utilize home IV drugs in 1990. Of these, we estimate that 56,550 beneficiaries would begin their IV drug therapy while still in the hospital, thereby being exempted from the catastrophic drug benefit deductible and subject only to a 20 percent coinsurance payment rate that applies to all covered home IV drugs.

2. Prescription Drugs Covered Under This Proposed Rule Beginning in 1991

As of June 1988, there were 378 pharmaceutical firms licensed to manufacture prescription drug products in the United States. There are now about 9,700 different drugs meeting the statutory definition of a covered outpatient drug marketed in the United States. Of the total number of approved drug products, 1,975 products are each manufactured by a single firm, and almost 7,795 drugs are manufactured by more than one firm. Under this proposed rule, all the approved prescription drugs described above would be paid for beginning in 1991, in accordance with payment rules that we plan to publish in a separate document.

3. Benefits for Medicare Beneficiaries, 1991 Through 1993.

Our actuaries project that, without the catastrophic drug benefits provided under sections 1832 and 1861 (s) and (t) of the Act as amended by section 202 of Public Law 100-360, in 1991, total beneficiary expenditures for covered outpatient drugs would have totaled $12.4 billion. By 1993, this figure would have grown to $14.2 billion. By distributing total projected spending for covered outpatient drugs in 1991 over all Medicare beneficiaries, we expect the average incurred expense per beneficiary would have equalled about $405 for an average 18.7 prescriptions. Similarly, in 1993, we projected the average expenditure per beneficiary would have been an average of $450 per beneficiary for an average of 19.4 prescriptions.

While we made these projections in terms of all beneficiaries, we estimate that only about 85 percent of aged beneficiaries would actually purchase covered outpatient drugs in any given year. Thus, the amount for each beneficiary who would purchase prescription drugs in 1991 (the average expense for covered outpatient drugs per Medicare user) is expected to be about $475. By 1993, the average expense per Medicare user would increase to about $530. Although the level of the covered outpatient drug deductible in 1991 is set by statute at $600 (a level that would permit an estimated 24 percent of all beneficiaries to receive covered outpatient drug benefits), the percentage of beneficiaries meeting this deductible would equal nearly 28 percent of those beneficiaries who actually would purchase covered outpatient drugs. In 1993, the level of the covered outpatient drug deductible would be set at an amount that would permit 16.8 percent of all Medicare beneficiaries to qualify for the prescription drug benefit. Yet in terms of those who are expected to purchase covered outpatient drugs, the percent of users meeting the deductible amount would be about 20 percent.

Beginning in 1991, those who meet the deductible would receive an average benefit of about $345 for the year. As envisioned by the statute, and assuming adequate financing, in 1993, the average benefit payment made on behalf of a beneficiary who had met the deductible amount would increase to about $700. The projected growth in benefit payments per beneficiary would be largely the result of the increased portion of prescription drug costs the Medicare program would be required to

---

pay. In accordance with the statute, the

for prescription drugs is expected to

proceed with a final rule, we will

---

§ 410.28 [Amended]

(1) Is an antibiotic drug and HCFA

incident to, any of the following services

OL

7
989
MI

pay. In accordance with the statute, the proportion of drug costs covered by the program after the deductible amount is reached would increase from 50 percent in 1991 to 80 percent in 1993.

While the portion of drug costs covered by Medicare would increase from 1990 through 1993, the proportion of beneficiaries expected to meet the deductible amount would drop during this period. By law, the deductible amount, in 1991, would be set at $600, enabling about 24 percent of all beneficiaries to qualify for drug payment benefits (or about 28 percent of projected actual Medicare beneficiaries requiring covered outpatient drugs). In 1992, the deductible amount would increase to $652, which would enable 23 percent of Part B enrollees (or almost 27 percent of those beneficiaries projected to actually use covered outpatient drugs) to qualify for the drug benefit. In 1993, the law requires the deductible amount to be set at a level that would permit 16.8 percent of all beneficiaries to receive covered outpatient drug benefits. This would be the equivalent of about 20 percent of those beneficiaries who would purchase covered outpatient drugs during that period.

4. Benefits to Pharmaceutical Manufacturers and Others Involved in the Distribution and Sale of Covered Outpatient Drugs

In developing our estimates of benefit payments, we assumed that once a beneficiary reached the deductible amount, there would be an induced demand for prescription drugs that would increase the number of prescriptions written, and possibly, the cost of the prescriptions as well. That is, prescribing health professionals may feel freer to prescribe both a larger quantity and more expensive drugs for a patient who has met the deductible amount than for one who has not met the deductible amount. Similarly, a patient who has met the deductible payment amount may feel less constrained to demand more medications or to have more prescriptions filled than a patient who has not met the deductible amount.

In attempting to predict the magnitude of the induced demand for covered outpatient drugs, we assumed that the effect would be directly related to the amount of program benefit payments. This amount, in turn, is a function of the deductible payment amount and the percentage of the beneficiary copayment. In 1991, we project that induced demand would account for about 23 percent of program benefit payments for covered outpatient drugs. In 1992, the percent of induced benefits for prescription drugs is expected to grow to 26.5 percent, and by 1993, the percentage is expected to reach 32.4 percent. Since these induced benefits would apply to purchases of additional covered outpatient drugs that would not otherwise have been purchased, in addition to possibly benefiting Medicare beneficiaries through enabling them to have greater access to medications, the induced demand for covered outpatient drugs could also financially benefit every entity involved in the manufacturing and marketing of prescription drugs.

It should be noted that the expected induced demand does not necessarily represent an abuse of the Medicare drug benefit. We believe that in many cases, the increased demand may represent a decision on the part of a health professional to treat a condition more aggressively than he or she might do if the catastrophic drug benefit were not available. Similarly, a beneficiary might forego having a prescription filled or avoid taking a drug at the prescribed frequency in order to conserve the available medication were it not for the coverage of outpatient drugs now afforded by the Act. Thus, the induced demand may represent, in part, a medically appropriate demand for prescription drugs that currently is not being met.

D. Conclusion

We have summarized the most significant effects of the covered outpatient drug provisions specified in section 1861 of the Act, as amended by section 202 of Pub. L. 100-360. We do not believe that we are required to furnish this information under either E.O. 12291 or the RFA. Nevertheless, in the interest of providing the public with information regarding a major revision to the Medicare program, we have voluntarily offered an analysis of the major effects of extending Medicare coverage to covered outpatient drugs as defined by the Act.

VII. Information Collection Requirements

These proposed regulations contain no information collection requirements and do not come under the provisions of the Paperwork Reduction Act of 1980.

VIII. Responses to Comments

Because of the large number of items of correspondence we normally receive on a proposed rule, we are not able to acknowledge or respond to them individually. However, we will consider all comments that we receive by the date and time specified in the "Date" section of this preamble, and, if we proceed with a final rule, we will respond to the comments in the preamble of that rule.

IX. List of Subjects in 42 CFR Part 410

Drugs, Health facilities, Health professions, Kidney diseases, Laboratories, Medicare, Rural areas, X-rays.

For the reasons set forth in the preamble, 42 CFR chapter IV, part 410, subpart B, would be amended as follows:

PART 410—SUPPLEMENTARY MEDICAL INSURANCE (SMI) BENEFITS

Subpart B—Medical and Other Health Services

A. The table of contents for part 410, subpart B, is amended by revising the title of §§ 410.29 and 410.32 and adding new §§ 410.30, 410.31, and 410.33 to read as follows:

PART 410—SUPPLEMENTARY MEDICAL INSURANCE (SMI) BENEFITS

* * * * *

Subpart B—Medical and Other Health Services

Sec.

* * * * *

410.29 Covered outpatient drugs.
410.30 Limitations on Part B coverage of drugs.
410.31 Prescription drugs used in immunosuppressive therapy.
410.32 Standards for assuring appropriate prescribing and dispensing practices of drugs.
410.33 Diagnostic X-ray tests, diagnostic laboratory tests, and other diagnostic tests: Conditions.

* * * * *

Authority: Secs. 1102, 1832, 1833, 1834, 1835, 1861 (r), (s), (t), and (cc), 1862, 1871, and 1881 of the Social Security Act (42 U.S.C. 1302, 1395k, 1395l, 1395m, 1395n, 1395x (r), (s), (t), and (cc), 1395y, 1395hh, and 1395rr).

B. In § 410.10, the introductory paragraph is republished and paragraph (r) is added to read as follows:

§ 410.10 Medical and other health services: Included services.

Subject to the conditions and limitations specified in § 410.12, "medical and other health services" includes the following services:

* * * * *

(r) Covered outpatient drugs, as described in § 410.29(a).

§§ 410.26 and 410.27 [Amended]

C. In §§ 410.26(b) and 410.27(b), the reference to "§ 410.29" is removed and "§ 410.30" is inserted in its place.

§ 410.28 [Amended]

D. In § 410.28(b), the reference to "§ 410.29 (b) and (c)" is removed and "§ 410.30" is inserted in its place.

E. Current §§ 410.29 and 410.32 are redesignated as §§ 410.30 and 410.33, respectively; new §§ 410.29, 410.31, and 410.32 are added, and the newly redesignated § 410.30 is revised to read as follows:

§ 410.29 Covered outpatient drugs.

(a) "*Covered outpatient drug*" includes the following:

(1) A drug that may be dispensed only upon prescription and that—

(i) FDA has approved for safety and effectiveness as a prescription drug under sections 505 or 507 of the Federal Food, Drug, and Cosmetic Act (FFDCA), or has approved under section 505(j) of the FFDCA;

(ii) Was commercially used or sold in the United States before October 10, 1962, or which is identical, similar or related to such a drug as defined in 21 CFR 310.6(b)(1), and which has not been the subject of a final determination by the FDA that it is a new drug or the subject of an action brought by the FDA under sections 301, 302(a), or 304(a) of the Federal Food, Drug and Cosmetic Act (21 U.S.C. 331, 332(a), or 334(a)) to enforce sections 502(f) or 505(a) of that Act (21 U.S.C. 352(f) or 355(a)); or

(iii) Was approved by the FDA before October 10, 1962 solely on the basis of safety, and for which the FDA has—

(A) Determined there is compelling justification for its medical need, or which is identical, similar, or related to such a drug as defined in 21 CFR 310.6(b)(1); and

(B) Not issued a notice of opportunity for a hearing on a proposal to withdraw approval for marketing because the FDA has determined that the drug is less than effective for all conditions of use represented, recommended, or suggested on its labeling.

(2) A biological product that may be dispensed only upon prescription, is licensed under section 351 of the Public Health Service Act (42 U.S.C. 262), and is produced at an establishment licensed under that Act to produce that product.

(3) Insulin certified under section 506 of the Federal Food, Drug and Cosmetic Act (21 U.S.C. 356), whether or not it is dispensed under a prescription.

(b) "*Covered home IV drug*" means a covered outpatient drug described in paragraph (a) of this section that is furnished directly or under arrangement by a qualified home IV drug therapy provider to an individual and is intravenously (IV) administered to that individual in a place of residence that is used as the individual's home and that—

(1) Is an antibiotic drug and HCFA has not determined, for the specific drug or for the indication for which it is applied, that the drug cannot generally be administered safely and effectively in a home setting, or

(2) Is not an antibiotic drug, and HCFA has determined for the specific drug and the indications for which the drug is being applied that it can generally be administered safely and effectively in a home setting.

A drug that would otherwise be a covered outpatient drug is excluded from coverage if the drug is intravenously administered in a home setting but does not meet the definition of a covered home IV drug set forth in this paragraph. (The drug must appear on the list that is published periodically under paragraph (c) of this section and be administered for one of the indications presented on that list.) Coverage does not require a prior inpatient hospital stay.

(c) *List of covered home IV drugs.*

(1) At least annually, HCFA will publish in the **Federal Register** a notice of additions or deletions to the list of covered home IV drugs and their indications with respect to which home IV drug therapy services under Medicare may be furnished.

(2) A covered home IV drug included on the list of covered home IV drugs may not be covered as part of durable medical equipment.

§ 410.30 Limitations on Part B coverage of drugs.

(a) Except for those drugs described as "covered outpatient drugs" in § 410.29(a), Medicare Part B does not pay for the following:

(1) Except as provided in § 410.29(a), any drug or biological that can be self-administered, whether furnished by a physician, a provider, or an entity other than a provider.

(2) Any drug product approved by the FDA before October 10, 1962 that is available only through prescription that does not meet all of the conditions identified in § 410.29(a)(1)(iii) (A) and (B).

(b) Beginning January 1, 1990 and until January 1, 1991, the term "covered outpatient drug" described in § 410.29 is limited to:

(1) Drugs that are used in immunosuppressive therapy.

(2) Covered home IV drugs as defined in § 410.29(b).

(c) The term "covered outpatient drug" does not include any drug, biological product, or insulin for which payment may be made under Medicare and that is furnished as, as part of, or as incident to, any of the following services or supplies:

(1) Inpatient hospital services (section 1861(b)(2) of the Act and § 409.10).

(2) Extended care services (section 1861(h)(5) of the Act and § 409.20).

(3) Physicians' services (section 1861(s)(2) (A) or (B) of the Act and § 410.10(c)).

(4) Dialysis supplies (section 1861(s)(2)(F) of the Act and § 410.10(k)).

(5) Antigens (section 1861(s)(2)(G) of the Act and § 410.10(q)).

(6) Blood clotting factors for hemophiliacs (section 1861(s)(2)(I) of the Act).

(7) Services of a physician assistant (section 1861(s)(2)(K)(ii) of the Act).

(8) Pneumococcal, hepatitis B, or influenza vaccines (section 1861(s)(10) of the Act and § 410.57).

(9) Rural health clinic services (section 1861(aa)(1) of the Act and § 491.9).

(10) Comprehensive outpatient rehabilitation facility services (section 1861(cc)(1)(F) of the Act and § 485.51).

(11) Hospice care (section 1861(dd)(1)(E) of the Act and § 418.202(f)).

(12) Certified nurse-midwife services (section 1861(gg)(1) of the Act).

(13) A covered surgical procedure in an ambulatory surgical center (section 1832(a)(2)(F)(i) of the Act and § 416.65).

(d) Payment may not be made under Part B for any expense incurred for a covered outpatient drug described in § 410.29(a) if one of the following conditions are met:

(1) HCFA finds that the specific use of the drug for a specific indication is not safe or not effective for the diagnosis or treatment of illness or injury, or to improve the functioning of a malformed body member, in a specific situation or for a particular beneficiary (for example, the drug is prescribed solely for cosmetic purposes, such as to correct or ameliorate conditions such as wrinkles and balding).

(2) After the drug deductible is met, the drug is dispensed in a quantity exceeding a 34-day supply (unless HCFA has specified an exception for a longer prescription as described in paragraph (e) of this section).

(e) An exception to the limitation described in paragraph (d)(2) of this section is allowed for drugs that are marketed only in an amount that exceeds a 34-day supply. For these drugs, payment may be made for the smallest supply in which the drug is marketed.

that are needed for effective

remaining amount of the charge

§ 410.31 Prescription drugs used in immunosuppressive therapy.

(a) *General rule.* Payment is made for prescription drugs used in immunosuppressive therapy only as described in paragraphs (b) and (c) of this section.

(b) *Drugs dispensed before January 1, 1990.* For drugs dispensed before January 1, 1990, payment may be made only for those drugs furnished after a Medicare covered organ transplant if the drugs—

(1) Have been approved for marketing by the FDA;

(2) Are either specifically labeled for the prevention or treatment of rejection of a transplanted organ or tissue, or identified in FDA-approved labeling for use in conjunction with immunosuppressive drug therapy; and

(3) Are used for a period of up to 1 year beginning with the beneficiary's date of discharge from the inpatient hospital stay during which the transplant was performed.

(c) *Drugs dispensed beginning January 1, 1990.* Beginning January 1, 1990, payment may be made for drugs that meet the requirements for covered outpatient drugs described in § 410.29(a)(1) and that are used in immunosuppressive therapy after either a covered or noncovered organ transplant and without any prescribed time limitations.

§ 410.32 Standards for assuring appropriate prescribing and dispensing practices of drugs.

(a) *Selected compendia.* Drug standards that appear in the following medical compendia are used for certain aspects of drug utilization review, that is, to identify and educate physicians and pharmacists about inappropriate prescribing and dispensing practices and potential adverse drug reactions:

(1) The U.S. Pharmacopoeia Dispensing Information, volume 1 (Drug Information for the Health Care Professional).

(2) The American Medical Association's Drug Evaluations.

(3) The American Hospital Formulary Service Drug Information.

(b) *Changes in selected compendia or standards.* (1) If HCFA changes its selection of any of the compendia identified in paragraph (a) of this section, it will publish a proposed rule and subsequent final rule to announce the change(s).

(2) If HCFA modifies any of the standards used for purposes of the education program described in paragraph (a) of this section that are adopted from a selected compendium, it will do so using appropriate rulemaking procedures.

RIN 0938-AD99

Medicare Program; Payment for Covered Outpatient Drugs

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: This proposed rule sets forth the methodology for determining payment for covered outpatient drugs under the new catastrophic drug benefit. This proposal would implement sections 1834(c) (2), (3), and (4) of the Social Security Act as added by section 202(b) of the Medicare Catastrophic Coverage Act of 1988. Coverage of and payment for these covered outpatient drugs under Part B of Medicare would be implemented on January 1, 1990 for drugs used in immunosuppressive therapy and covered home intravenous (IV) drugs and on January 1, 1991 for all other drugs.

DATE: To be considered, comments must be mailed or delivered to the appropriate address, as provided below, and must be received by 5:00 p.m. on November 6, 1989.

ADDRESS: Mail comments to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: BPD-614-P, P.O. Box 26676, Baltimore, Maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309-G, Hubert H. Humphrey Building, 200 Independence Ave. SW., Washington, DC.

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

Due to staffing and resource limitations, we cannot accept facsimile (FAX) copies of comments.

If comments concern information collection or recordkeeping requirements, please address a copy of the comments to: Office of Management and Budget, Office of Information and Regulatory Affairs, Room 3002, New Executive Office Building, Washington, DC 20503, Attention: Allison Herron.

In commenting, please refer to file code BPD-614-P. Comments received timely will be available for public inspection as they are received, beginning approximately three weeks after publication of this document, in Room 309-G of the Department's offices at 200 Independence Ave. SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (phone: 202-245-7890).

FOR FURTHER INFORMATION CONTACT: Janice Flaherty, (301) 966-4574.

SUPPLEMENTARY INFORMATION:

I. Background

- Medicare consists essentially of two separate but complementary insurance programs, the Hospital Insurance (Part A) program and the Supplementary Medical Insurance (Part B) program. Under Part A, in addition to payment for inpatient hospital services, payment is made for medical services furnished in skilled nursing facilities (SNFs) and by home health agencies (HHAs), and by hospices as an alternative to hospitalization. Part A covered benefits also include many drugs furnished to beneficiaries in hospitals, SNFs, and hospices.

Current Medicare Part A rules concerning coverage of and payment for prescription drugs and biologicals (referred to collectively as drugs in this document) are as follows:

- Under section 1861(b)(2) of the Social Security Act (the Act), we cover drugs used in the hospital that are ordinarily furnished by the hospital for the care and treatment of patients. For hospitals under the prospective payment system, payment is included in the prospective payment rates. For hospitals excluded from the prospective payment system, payment is made on a reasonable cost basis.
- Under section 1861(h)(5) of the Act, we cover drugs furnished for use in a SNF that ordinarily are furnished by the facility for the care and treatment of inpatients. Payment is determined on a reasonable cost basis.
- Under section 1861(dd)(1)(E) of the Act, we cover drugs furnished to terminally ill individuals under a written plan as part of a hospice program. Payment is made as a component of the prospective payment rate for hospices.

Currently, under the provisions of sections 1832, 1833, and 1842 of the Act, payment is made under Part B for a wide range of medical services and supplies including those furnished by physicians or others in connection with physicians' services, outpatient hospital services, outpatient physical and occupational therapy services, and home health services. Payment under Part B is also made for drugs provided as part of certain Part B services. Generally, these are drugs that cannot be self-administered. Payment is also made for a few specified drugs as separate services.

All Medicare Part B coverage of drugs is derived from the scope of benefits provisions in section 1832 of the Act. Certain paragraphs in section 1861 of the Act define the terms in the scope of benefits provisions as including outpatient drugs. Thus, section 1832 of the Act provides for Part B coverage of outpatient drugs. Current Medicare Part B rules generally provide coverage and payment for outpatient drugs as follows:

- Under section 1861(s)(2)(A) of the Act, we cover drugs that cannot be self-administered and that are furnished incident to a physician's professional services. Payment is determined on the basis of the approximate cost for ingredients and supplies plus an injection fee.
- Under section 1861(s)(2)(C) of the Act, we cover diagnostic services furnished by a hospital to outpatients, including drugs required in the performance of these services. Payment is determined on a reasonable cost basis.
- Under section 1861(s)(2)(F) of the Act, we cover dialysis supplies, including drugs, under the end-stage renal disease (ESRD) prospective payment rate. Under 42 CFR 413.170, payment to an ESRD facility is based on cost.
- Under section 1861(s)(2)(G) of the Act, we cover antigens that are prepared by a physician for a particular patient and that are administered by or under the supervision of a physician. Payment is determined based on the cost of the antigens plus an injection fee.
- Under section 1861(s)(2)(I) of the Act, we cover blood clotting factors for hemophilia patients competent to use those factors to control bleeding without medical or other supervision. Payment is determined on a reasonable charge basis.
- Under the former section 1861(s)(2)(J) of the Act, we covered immunosuppressive drugs and drugs that are needed for effective immunosuppressive therapy furnished to an individual who receives an organ transplant for which payment is made under Medicare and that are furnished within 1 year after the date of the transplant procedure. Payment is determined on the basis of approximate cost for ingredients and supplies. Because drugs used in immunosuppressive therapy are self-administered, no additional payment is made for administration.
- Under section 1861(s)(2)(K)(ii) of the Act, we cover drugs that cannot be self-administered that are incident to a physician assistant's services furnished under the supervision of a physician. Payment is determined based on the approximate cost for ingredients and supplies of the drug plus an injection fee.
- Under section 1861(s)(10) of the Act, we cover pneumococcal and hepatitis B vaccines, as well as influenza vaccines for some beneficiaries under a demonstration project. Payment is determined based on the approximate cost for ingredients and supplies plus an injection fee.
- Under section 1861(cc)(1)(F) of the Act, we cover drugs that cannot be self-administered and that are furnished to an individual who is an outpatient of a comprehensive outpatient rehabilitation facility. Payment is determined on a reasonable cost basis.
- We cover drugs that cannot be self-administered and that are furnished as part of or incident to the provision of the following covered services:

—Covered rural health clinic services (section 1861(aa)(1) of the Act). Payment is made on a cost-related rate per visit, subject to an upper limit.

—Partial hospitalization services (section 1861(ff)(2)(D) of the Act). Payment is determined on a reasonable cost basis.

—Certified nurse-midwife services (section 1861(gg)(1) of the Act). Payment is determined based on the approximate cost for ingredients and supplies plus an injection fee. Some carriers provide an amount for additional related supplies.

—Ambulatory surgical center (ASC) services (section 1832(a)(2)(F)(i) of the Act). Under §§ 416.61(c) and 416.120, payment is made as a component of the prospective payment rate for ASCs.

Medicare generally pays 80 percent of each payment amount determined above for covered drugs and services after the beneficiary has met a $75 deductible. The beneficiary is then liable for the remaining amount of the charge (coinsurance), which is usually 20 percent of the payment amount. The only exception to this rule is payment for pneumococcal and influenza vaccines and for the services connected with the furnishing of these two vaccines, which, under the authority of section 1833(a)(1)(B) of the Act, are not subject to the 20 percent coinsurance (that is, Medicare pays 100 percent of the payment amount). In addition to the deductible and coinsurance amounts, if a physician or other supplier does not accept assignment (that is, does not agree to accept Medicare's determination of the reasonable charge amount as payment in full for covered drugs), the beneficiary is liable for the difference between Medicare's reasonable charge and the supplier's actual charge, subject to certain limits on that charge.

II. The Medicare Catastrophic Coverage Act of 1988

The Medicare Catastrophic Coverage Act of 1988 (Pub. L. 100-360, enacted on July 1, 1988) established a new catastrophic outpatient drug benefit under Medicare Part B. For purposes of coverage, payment, deductibles, and coinsurance, the new Part B catastrophic outpatient drug benefit is distinct and separate from the pre-existing Medicare drug benefits. The current Medicare drug benefit includes both Part A and Part B coverge as described above. Except for drugs used in immunosuppressive therapy, the current drug benefit (including both coverage and payment provisions) has not been changed by Public Law 100-360.

In general, section 202 of Public Law 100-360 provides for coverage of and payment for drugs used in immunosuppressive therapy following an organ transplant without regard to the duration of that therapy or whether the organ transplant procedure was covered by Medicare, and for covered home intravenous (IV) drugs. Payment for these two categories of benefits begins January 1, 1990 and for all other covered outpatient drugs (including insulin) payment begins on January 1, 1991.

Specifically, section 202(a) of Public Law 100-360 amended sections 1861 (s)(2)(J) and (t) of the Act to include "covered outpatient drugs" as part of the "medical and other health services" benefit under sections 1832 (a)(1) and (a)(2)(B) of the Act. As discussed below, current coverage for drugs used in immunosuppressive therapy would be expanded under the provisions of Public Law 100-360, and these drugs would be included as part of the new catastrophic drug benefit.

As revised, section 1861(s)(2)(J) of the Act provides coverage of "covered outpatient drugs", as defined in section 1861(t)(2) of the Act. Section 1861(t)(2) of the Act defines that term to include a broad range of drugs, biological products, and insulin. In this proposed rule, we use the term "drugs" to include biologicals and insulin because payment would be determined in the same manner for these items as for drugs. Sections 1861(t)(4) (A) and (B) of the Act specify that, in general, covered home IV drugs are defined as covered outpatient drugs that are safe and effective for intravenous administration to an individual in a place of residence used as the individual's home.

The payment methodology for covered outpatient drugs is set forth in sections 1834(c) (2), (3), and (4) of the Act as added by section 202(b) of Pub. L. 100–360. Briefly, the payment methodology is as follows:

- Subject to the catastrophic drug deductible, the payment amount for covered outpatient drugs is equal to the payment percent of the lesser of—

—The actual charge for the drug; or

—The applicable payment limit for the drug.

- The payment percent is equal to 100 percent minus the applicable coinsurance amount.
- A separate payment limit is calculated for—

—Nonmultiple-source drugs and multiple-source drugs with restrictive prescriptions; and

—Multiple-source drugs without restrictive prescriptions.

These provisions are discussed in detail below as a part of our discussion of the provisions of this proposed rule, which set forth the methodology for determining payment for covered outpatient drugs. Coverage of outpatient drugs, including definitions, is discussed in a separate notice of proposed rulemaking. In addition, we are publishing other proposed rules to implement the new catastrophic drug benefit. These proposed rules include separate documents detailing coverage requirements for home IV drug therapy services, conditions of participation for qualified home IV drug therapy providers, catastrophic drug deductibles and coinsurance amounts, the fee schedule for home IV drug therapy services, requirements for participating pharmacies, and the list of covered home IV drugs.

III. Provisions of This Proposed Rule

A. General

This proposed rule sets forth the payment methodology for outpatient drugs that are covered under the new catastrophic drug benefit, including covered prescription drugs used in immunosuppressive therapy following an organ transplant and covered home IV drugs, effective January 1, 1990. Coverage and payment for all other covered outpatient drugs would begin January 1, 1991.

Immunosuppressive drugs were covered effective January 1, 1987 if furnished within 1 year after the beneficiary's date of discharge from an inpatient hospital stay during which a covered organ transplant was performed. Coverage was extended to all prescription drugs used in immunosuppressive therapy furnished after a covered transplant within 1 year after the beneficiary's date of hospital discharge beginning December 22, 1987. The provisions of section 1861(t) of the Act, as amended by section 202(a) of Public Law 100–360, effectively extend the coverage of drugs used in immunosuppressive therapy to include those drugs furnished in subsequent years after the first year following a covered transplant and those drugs furnished after a noncovered transplant irrespective of any time limitations. Thus, beginning in 1990, prescription drugs used in immunosuppressive therapy are considered part of the catastrophic drug benefit, rather than the original Medicare drug benefit. Therefore, drugs used in immunosuppressive therapy would no longer be subject to the provisions of the law pertaining to the current Medicare benefit for drugs, but, effective January 1, 1990, will be subject to the coverage and payment rules applicable to the catastrophic drug benefit.

The payment methodology described herein pertains to Medicare payments for all covered outpatient drugs after Medicare beneficiaries meet the drug deductible. The amount payable for a covered outpatient drug would be the applicable payment percent for the drug multiplied by the lesser of the actual charge for the drug or the applicable payment limit for the drug. The payment limit for multiple-source drugs without restrictive prescriptions and the payment limit to be used for both multiple-source drugs with restrictive prescriptions and nonmultiple-source drugs are determined under two separate calculations.

B. Payment Percent

Under section 1834(c)(2)(B) of the Act, the payment percent equals 100 percent minus the applicable percent. Under section 1834(c)(2)(C) of the Act, the coinsurance percents are as follows:

- For covered home IV drugs and drugs used in immunosuppressive drug therapy that are furnished during the first year after a covered organ transplant, 20 percent.
- For all other covered outpatient drugs—

—50 percent for drugs dispensed in 1990 or 1991;

—40 percent for drugs dispensed in 1992; and

—20 percent for drugs dispensed in 1993 or a subsequent year.

Because the payment percent equals 100 percent minus the applicable coinsurance percent, the payment percent is as follows:

- For covered home IV drugs and drugs used in immunosuppressive drug therapy that are furnished during the first year after a covered organ transplant, 80 percent.
- For all other covered outpatient drugs—

—50 percent for drugs dispensed in 1990 or 1991;

—60 percent for drugs dispensed in 1992; and

—80 percent for drugs dispensed in 1993 or a subsequent year.

C. Determination of Payment Limit

As stated above, the payment limit for multiple-source drugs without restrictive prescriptions would be determined under a different methodology than the methodology used for both multiple-source drugs with restrictive prescriptions and nonmultiple-source drugs. These payment limits would be determined for specific payment calculation periods. In addition, under section 1834(c)(3)(C)(iv) of the Act, the average price component of the payment limits is to be determined on a national basis except that the Secretary may make these determinations on a regional basis if it can be demonstrated that there are limitations on the availability of drug products and variations among different areas in the average wholesale or comparable direct price (referred to in this document as average price) for a drug product. We intend to determine the average price component of the payment limits on a national basis. We would consider exceptions to the national price if presented with documented information regarding limited availability and price variations. Such determinations would be made on a case-by-case basis. Explanations of these terms and the two methodologies that would be used in determining the payment limits are set forth below.

1. Definitions

a. Payment Calculation Period. As provided in section 1834(c)(9)(C) of the Act, the term "payment calculation period" means either the 6-month period beginning January 1st of each year or the 6-month period beginning July 1st of each year. Thus, a new payment limit would be calculated for all covered drugs every 6 months.

b. Multiple-Source Drug. In accordance with the provisions of section 1834(c)(9) of the Act, we would define a multiple-source drug as a covered outpatient drug for which, during a payment calculation period, there are two or more drug products that meet all of the following conditions:

- The drug products are rated as therapeutically equivalent by the Food and Drug Administration (FDA) in its most recent publication of "Approved Drug Products with Therapeutic Equivalence Evaluations."
- The drug products have been determined by the FDA to be pharmaceutically equivalent and bioequivalent as follows:

—As set forth in section 1834(c)(9)(A)(iii)(I) of the Act, pharmaceutically equivalent drug products are those drug products that contain identical amounts of the same active drug ingredient in the same dosage form and meet compendial or other applicable standards of strength, quality, purity, and identity.

—As defined in section 1834(c)(9)(A)(iii)(II) of the Act, drug products are bioequivalent if they do not present a known or potential bioequivalence problem or, if they do present such a problem, are shown to meet an appropriate standard of bioequivalence.

However, as provided in section 1834(c)(9)(A)(ii) of the Act, this requirement that drug products be pharmaceutically equivalent and bioequivalent does not apply if the FDA changes by regulation (after an opportunity for public comment of 90 days) the requirement that, for purposes of the FDA's most recent publication entitled "Approved Drug Products with Therapeutic Equivalence Evaluations," in order for drug products to be rated as therapeutically equivalent, they must be pharmaceutically equivalent and bioequivalent. In this case, the drug product would have to meet the revised FDA definition of therapeutic equivalence.

- The drug products are sold or marketed during the period. Under the provisions of section 1834(c)(9)(A)(iii)(III) of the Act, a drug is considered to be sold or marketed if it is listed in FDA's most recent publication of "Approved Drug Products with Therapeutic Equivalence Evaluations" (other than in the Discontinued Drug Product List in that publication) and we do not determine that the sale or marketing is not actually occurring.

c. Nonmultiple-Source Drug. Section 1834(c)(3)(A) of the Act refers to the case of a drug that "is not a multiple-source drug (as defined in paragraph (9)(A) (of section 1834(c) of the Act))." We would define a nonmultiple-source drug as any drug that does not meet the definition of a multiple-source drug. In general, this would mean a drug that is available for purchase under only one "brand name" or a drug that has several drug products that are not rated therapeutically equivalent.

d. Drug with a Restrictive Prescription. As provided in section 1834(c)(9)(B) of the Act, we would define a drug as having a restrictive prescription if either of the following conditions apply:

- In the case of a written prescription for a drug, the prescribing physician (or other legally authorized person who is prescribing the drug) includes on each prescription form in his or her own handwriting, the specific phrase "brand medically necessary," meaning that the particular drug must be dispensed.
- In the case of a prescription for a drug that is issued by telephone, the prescribing physician (or other legally authorized person who is prescribing the drug) states "brand medically necessary," meaning that the particular drug must be dispensed and, within 30 days of the date of the telephone call, sends a written confirmation (for example, a completed prescription form) to the pharmacy indicating that the particular drug was required. Each confirmation must also include the phrase "brand medically necessary" in the handwriting of the prescriber and the prescriber's signature.

In these cases where the pharmacist fills a prescription for a multiple-source drug with a brand-name product even though the prescriber has not restricted the prescription by indicating "brand medically necessary," the Medicare payment amount would be that for a multiple-source drug without a restrictive prescription.

We propose to limit acceptable phrases to those that include the phrase "brand medically necessary" although section 1834(c)(9)(B) of the Act permits the Secretary to accept other phrases if he determines that they are appropriate. We believe that any prescription for a brand name drug should be the result of a conscious decision concerning the medical necessity of the particular drug. Thus, alternatives such as dual-line prescription forms (in which the prescribing physician furnishes his or her signature above a statement that reads "dispense as written" or "product selection permitted"), notations and phrases such as "d.a.w. (dispense as written)" or "N/S (no substitution)," or check boxes, all of which may be acceptable for some State generic drug laws, would not be acceptable because they do not establish satisfactorily a conscious determination of the medical necessity to override generic substitution in order to obtain the more costly brand name drug for a particular patient.

We also believe that limiting acceptable phrases to "brand medically necessary" would be simpler for prescribers because they would have only one phrase to remember. We are interested in receiving public comment concerning whether there are any additional phrases that we could include as allowable that convey the concept of medical necessity.

Under section 1834(c)(9)(B)(ii) of the Act, if a prescription is issued by telephone, the written confirmation must be received within 30 days of the telephone call and must be "in the handwriting of the physician or other person prescribing the drug" and must indicate "with such appropriate phrase (as "brand medically necessary") that the particular drug was required to have been dispensed" in order to be considered a restrictive prescription. A prescription form prepared by the prescriber with "brand medically necessary" in the handwriting of the prescriber with his or her signature and forwarded by the prescriber to the pharmacy would meet the requirement for a written confirmation.

As noted above, under the requirements of section 1834(c)(9)(B)(ii)(II) of the Act, a prescriber is responsible for providing a written confirmation to a pharmacy within 30 days of a telephone prescription. However, if a written confirmation is not provided to the pharmacy by the prescriber, it is the pharmacy that could suffer any resulting payment reduction. That is, in the absence of a written confirmation that a brand name drug was medically necessary, the prescription would not meet the definition of a restrictive prescription as set forth in section 1834(c)(9)(B)(ii) of the Act. Thus, payment for the drug prescribed would be made using the payment methodology set forth in section 1834(c)(3)(B) of the Act for multiple-source drugs without a restrictive prescription, which is expected to result in a lower payment amount than the payment methodology set forth in section 1834(c)(3)(A) of the Act for multiple-source drugs with a restrictive prescription.

Since the statute places the obligation to confirm a telephone prescription for a brand name drug on the prescriber and at the same time imposes any penalty for not having that confirmation on the pharmacy, we would allow pharmacies to assist the prescribers in meeting their obligation. If a pharmacy chooses to, it would be permitted to complete a form for each restrictive prescription and send the form to the prescriber so that the prescriber could write in his or her own handwriting the phrase "brand medically necessary" on the form, sign it, and return it to the pharmacy. We believe that this approach would both satisfy the requirements of section 1834(c)(9)(B)(ii)(II) of the Act and assist the pharmacy in obtaining written confirmations from prescribers who do not fulfill their obligation to provide them. We are interested in receiving suggestions regarding other methods that could be used to assist pharmacies in obtaining written confirmations. We note that we would consider only methods that comply with the statute; that is, each restrictive telephone prescription must have a written confirmation with the phrase "brand medically necessary" in the prescriber's own handwriting.

We are also seeking comments on the appropriate designation of restrictive prescriptions transmitted to pharmacies by facsimile (FAX) machines. We are proposing that such prescriptions be considered telephone prescriptions because it is not always possible for the pharmacist to determine from a "faxed" prescription that the prescriber wrote "brand medically necessary" in his or her own handwriting on each prescription. Thus, the same requirements for a written confirmation that apply to telephone prescriptions would apply to prescriptions transmitted by a FAX machine.

2. General Methodology for Payment Limits

This section sets forth the methodologies that would be used in determining the two different payment limits. Explanations of the provisions that apply to both payment limits (that is, the administrative allowance and determination of dosage unit average price) are set forth in sections III.C.3 and III.C.4 of this preamble, below. Section III.C.5. of this preamble discusses the determination of the 90th percentile of actual charges, which would be used for determining the payment limit for nonmultiple-source drugs and multiple-source drugs with restrictive prescriptions only.

a. Payment Limit Methodology for Multiple-Source Drugs Without Restrictive Prescriptions. As provided in section 1834(c)(3)(B) of the Act, the payment limit for a multiple-source drug without a restrictive prescription is equal to the sum of—

- The amount of the administrative allowance (as set forth in section 1834(c)(4) of the Act); and
- The product of the number of tablets (or other dosage units) dispensed and the per dosage unit average price for the drug during the payment calculation period in which the drug is dispensed.

b. Payment Limit Methodology for Nonmultiple-Source Drugs and Multiple-Source Drugs With Restrictive Prescriptions. As provided in section 1834(c)(3)(A) of the Act, the payment limit for a nonmultiple-source drug and a multiple-source drug with a restrictive prescription is determined as follows:

- For drugs dispensed on or after January 1, 1990 and before January 1, 1992, the payment limit equals the sum of—

—The amount of the administrative allowance; and

—The product of the number of tablets or other dosage units dispensed and the per dosage unit average price for the drug during the payment calculation period in which the drug is dispensed

- For drugs dispensed on or after January 1, 1992, the payment limit is equal to the lesser of the following:

—The amount of the administrative allowance plus the product of the number of tablets or other dosage units dispensed and the per dosage unit average price for the drug during the payment calculation period in which the drug is dispensed.

—The 90th percentile of the actual charges for the drug for the second previous payment calculation period. (For example, if the current payment calculation period is January 1, 1992 through June 30, 1992, then the second previous payment calculation period would be January 1, 1991 through June 30, 1991.) The charge screens for actual charges would be computed on a per dosage unit basis, taking into consideration dosage form and strength.

3. Administrative Allowance

In this proposed rule, as provided in section 1834(c)(4)(A) of the Act, the amount of the administrative allowance, which is paid to a pharmacy for dispensing a covered outpatient drug, is determined as follows:

- For drugs dispensed in 1990 and 1991, the administrative allowance is equal to—

—$4.50 for a drug dispensed by a participating pharmacy; and

—$2.50 for a drug dispensed by a pharmacy that is not a participating pharmacy.

- In each year subsequent to 1991, the administrative allowance is equal to the allowance for the preceding year increased by the percentage increase (if any) in the implicit price deflator for gross national product (as pubished by the Department of Commerce in its "Survey of Current Business") over the 12-month period ending with August of that preceding year. In making this calculation, the amount of the new allowance is rounded to the nearest penny.

We are proposing that separate administrative allowance for pharmacy services would not be made for dispensing a drug to be used in home IV drug therapy because payment for pharmacy services, including the administrative cost connected with dispensing drugs for home IV drug therapy, would be made as part of a home IV drug therapy services per diem fee schedule for pharmacy services and supplies, nursing services and supplies, and other equipment necessary for home IV drug therapy. (As noted above, our proposed methodology for determining this per diem fee schedule will be published as a separate notice of proposed rulemaking.) Consequently, the charge reflected by the home IV drug therapy provider for the drug ingredient should not include any items that are paid for under the per diem fee schedule, that is, pharmacy services and supplies, nursing services and supplies, or other equipment.

We are also proposing to limit the payment of the administrative allowance for drugs dispensed on an "as needed" basis to residents of long-term care facilities. We are proposing to pay the administrative allowance each time a drug product is prescribed on an as-needed basis, that is, each time the prescriber makes a notation in the patient's chart. It should be noted that these prescriptions must meet the

requirements concerning the length of time or number of doses of a prescription set forth in our proposed rule on coverage of drugs under Public Law 100–360. A second administrative allowance would be paid for the same drug product only when it is prescribed a second time.

The purpose of this limitation is to preclude situations where an administrative allowance would be charged each time a dose of the "as needed" drug is dispensed. We invite comments regarding other approaches for the payment of an administrative allowance for drugs dispensed on an "as needed" basis to residents of a long-term care facility that would avoid excessive changes for dispensing these drugs.

In the case of insulin that is injected by the beneficiary subcutaneously and is available without a prescription, we would pay an administrative allowance each time a reasonable quantity of insulin is purchased. We consider a reasonable quantity of insulin to be a 30-day supply. If a beneficiary purchases two or more bottles of insulin at one time, we would pay one administrative allowance for the purchase.

We fully expect that most beneficiaries who purchase nonprescription insulin will purchase it in 30-day supplies. However, we also recognize that there are exceptional circumstances where purchases would need to be made more often and an administrative allowance would be paid in these circumstances; for example, there is a change in the type of insulin the beneficiary uses or the beneficiary's insulin regimen is otherwise modified, or if because of travel plans, the beneficiary needs to make smaller purchases or forgets to bring along enough insulin for duration of the trip.

We believe that paying an administrative allowance each time a 30-day supply of insulin is purchased would be reasonable because many diabetics purchase insulin in approximately a 30-day supply and because, if the Medicare program routinely pays for more frequent purchases, program costs and premiums may be higher than necessary with no corresponding benefit to the beneficiaries.

Under section 1842(o)(1) of the Act as added by section 202(c)(1)(C) of Public Law 100–360, a participating pharmacy means, with respect to covered outpatient drugs dispensed on or after January 1, 1991, an entity that is authorized under a State law to dispense covered outpatient drugs and that has entered into an agreement with the Secretary under which the pharmacy agrees to accept payment on an assignment-related basis for all covered outpatient drugs dispensed to a Medicare beneficiary after the pharmacy has been notified that the beneficiary has met the catastrophic drug deductible. (As noted above, we are preparing a separate notice of proposed rulemaking concerning the requirements for participating pharmacies.)

Although section 1834(c)(4)(A) of the Act provides for an administrative allowance in 1990 for participating pharmacies, section 1842(o)(1) of the Act, as noted above, defines participating pharmacies only in the context of dispensing covered drugs on or after January 1, 1991. Because under 1842(o)(1) of the Act an entity cannot be a participating pharmacy until January 1, 1991, the administrative allowance for drugs dispensed in 1990 (other than drugs to be used in home IV therapy, for which payment for pharmacy services would be made under a fee schedule) would have to be made at the nonparticipating pharmacy rate of $2.50. Because section 1861(t)(3)(B) of the Act limits covered outpatient drugs to be dispensed in 1990 to drugs used in immunosuppresive therapy and covered home IV drugs, an administrative allowance would be made in 1990 only for dispensing drugs used in immunosuppressive therapy.

Under section 1834(c)(4)(B) of the Act, after consultation with pharmacists, groups representing the elderly, and private insurers, the Secretary may, by regulation, reduce the administrative allowance for any drug dispensed by a mail-service pharmacy (as defined by the Secretary). Any reduction must be based on differences between mail service pharmacies and other pharmacies with respect to operating costs and other economies.

We are not proposing to make any reduction to the statutory administrative allowance for a drug dispensed by a mail-service pharmacy at this time. However, we will continue to pursue setting a reduced administrative allowance for drugs dispensed by a mail-service pharmacy based on a variety of factors, including operating costs, overall charge levels, and the extent of use of mail-service pharmacies by Medicare beneficiaries. In addition, we are specifically seeking public comment from pharmacists, groups representing the elderly, and private insurers concerning whether it would be appropriate to make a reduction in the administrative allowance for drugs dispensed by a mail-service pharmacy. If a commenter believes that some reductions are appropriate, we are interested in receiving data and suggestions concerning these adjustments.

4. Determination of Dosage Unit Average Price

Dosage unit average price would be based on dosage form and strength for each drug product. Dosage unit average price would be determined in one of two ways: Using published average wholesale or comparable direct prices for the drug or using survey prices. We intend to conduct a biannual survey of nonmultiple-source drugs that are most commonly used by beneficiaries. We are considering conducting a survey of the most commonly used multiple-source drugs. We would use commonly recognized comprehensive listings, discussed below, to determine the published average prices. If there is both a survey average price and a published average price, we would use the lower of the two prices. If a specific drug is not included in the survey, the determination of average price would be based on published average wholesale or comparable direct prices for the drug.

For both a survey and a published average price, the prices used would be those in effect on the first day of the previous payment calculation period as required by section 1834(c)(3)(C)(iii) of the Act. For example, for determining payment for a drug to be dispensed on or after January 1, 1992 and before July 1, 1992, the prices that would be used are those in effect on July 1, 1991.

Under section 1834(c)(3)(C)(iii) of the Act, we are required to use reasonable quantities, which we define as the most frequently purchased package size, as appropriate. In addition, under section 1834(c)(3)(C)(iv) of the Act, the determination is made on a national basis, except that we may make this determination on a regional basis if it can be demonstrated that there are limitations on the availability of drug products and variations among regions in the average prices for a drug product. As we stated above, we intend to make the determination of the average price component on a national basis.

a. Biannual Survey. Under section 1834(c)(3)(C)(ii)(I) of the Act, the Secretary must conduct a biannual survey of nonmultiple-source drugs to determine the per dosage unit average price for the drug. However, the Secretary need not conduct a survey if—

- During 1990, the Secretary determines that a survey is not appropriate for a specific covered outpatient drug; or
- After 1990, there is a low volume of sales for the drug or there are other

appropriate reasons not to conduct a survey.

Under section 1834(c)(3)(C)(ii)(II) of the Act, for multiple-source drugs, the Secretary may base the per dosage unit average price for the drug on either the published average price for the drug or on a biannual survey.

The biannual surveys must be based on prices in effect the first day of the previous payment calculation period. For example, for drugs dispensed on or after January 1, 1991 and before July 1, 1991, the survey must be based on prices in effect on July 1, 1990. In addition, the biannual surveys must be based on a representative sample of direct sellers, wholesalers, or pharmacies (as appropriate) of wholesale or comparable direct prices excluding discounts to pharmacies. That is, in determining the average price, the Secretary cannot take into account any discount provided to a pharmacy.

We are considering use of a survey for multiple-source drugs that are commonly prescribed to Medicare beneficiaries. We intend to conduct the survey on a selected basis because we believe that the survey results may give a more accurate reflection of prices (exclusive of discounts) of prescription drugs compared to the published average prices in the comprehensive listings. The extent of the survey would be determined on an on-going basis. As required by section 1834(c)(3)(B)(ii) of the Act, we would use the unweighted median of the surveyed prices. We also intend to limit the survey of nonmultiple-source drugs to those drugs that are more commonly prescribed to Medicare beneficiaries. In this case, we would use the median of the surveyed prices.

Any survey that we conduct would use statistically valid methods of sampling, estimation, and imputation in order to establish the drug prices in effect for the payment calculation period.

Section 1834(c)(3)(C)(ii) of the Act specifies that discounts to pharmacies should not be considered in determining the average price. There is a common billing practice of showing both suggested list price and the wholesaler's or manufacturer's actual selling price on invoices. For example, an invoice has one column marked "suggested list price," "list AWP," or a similar phrase. A second column is marked "actual cost" or "price." We would use the actual selling prices (before discounts) for purposes of the survey because the suggested list prices (or list AWP) are essentially comparative prices to demonstrate that when the purchaser pays the actual selling price, the purchaser pays less than the suggested list prices. The actual selling price is the price at which the drug product is generally available to pharmacies, either from a wholesaler or a manufacturer.

For determining survey prices, we would use the generally available selling price instead of the "list average wholesale price (AWP)" because we believe this is consistent with Congressional intent. The Conference Report states that the survey "is vital to ensuring the integrity of reimbursement limits" and, to that end, Congress gave the Secretary the authority to impose civil monetary penalties if a wholesaler or direct seller refuses to provide information to the Secretary or provide false information. (H.R. Rep. No. 661, 100th Cong., 2d Sess. 189 (1988).) Implicit in the statement that the survey is vital to the integrity of payment limits and in the provisions for civil monetary penalties is the assumption that the prices to be derived from the survey will be more accurate and, in all likelihood, lower than the prices in the nationally recognized comprehensive published price listings.

The "list AWP" on invoices sampled for the survey activity is the same as or similar to the average wholesale price in the published price listings. There would be no value in conducting a survey of this nature if it would be merely an exercise in gathering data already available in the published price listings. In addition, there would be no purpose in expending public funds to carry out the survey if it duplicates price information that is already publicly available. There would also seem to be no purpose in Congress giving the Secretary authority to impose civil monetary penalties for refusal to provide information or provision of false information if we would only be gathering price information that is already available. We are, however, specifically requesting comments on using the generally available selling price in determining survey prices.

b. Published Average Price. We intend to use the Red Book published by Medical Economics, the American Druggist Blue Book (Blue Book) published by the Hearst Corporation, and prices published by Medi-Span, Inc. (Medi-Span) for determinations of published average price. In developing the unweighted median of the published average prices for a multiple-source drug without a restrictive prescription, we would array the average prices from these three publications. If there is a difference in the published listings of a distributor's price, we would use the lowest price.

For nonmultiple-source drugs and multiple-source drugs with a restrictive prescription, we would use the lowest published price from the sources listed above, as stated in the Conference Report (H.R. Rep. No. 661, 100th Cong. 2nd Sess. 189 (1988)).

c. New Therapeutically Equivalent Drugs. If drugs are added to the FDA's publication, "Approved Drug Products with Therapeutic Equivalence Evaluations," during a 6-month payment calculation period, the following would apply:

- If addition of a drug changes the status of the drug from a nonmultiple-source drug to a multiple-source drug, we would recompute the dosage unit average price. The new dosage unit average price would be reflected in payments within 1 month of when the FDA published the addition of a therapeutically equivalent product in "Approval Drug Products with Therapeutic Equivalence Evaluations."
- If a drug was already a multiple-source drug at the beginning of the payment calculation period, we do not anticipate making any adjustment to the dosage unit average price. Of course, after the 6-month payment calculation period in which a drug is added to "Approved Drug Products with Therapeutic Equivalence Evaluations," we would consider the pricing information for the drug just as we consider pricing information for other drugs.

We believe that these decisions on how to handle additions to "Approved Drug Products with Therapeutic Equivalence Evaluations" would be reasonable. In the case of a drug that becomes a multiple-source drug during the payment calculation period, the price at which a therapeutically equivalent product is available is likely to be less. We believe that these potential price reductions should be incorporated into Medicare payments. For a drug that was already a multiple-source drug, we believe the addition of another drug product is less likely to modify the Medicare payment limits in a significant way.

5. Determining the 90th Percentile of Actual Charges

Under section 1834(c)(3)(A)(i) of the Act, the Secretary computes the 90th percentile of actual charges on any geographic basis that he determines to be appropriate, for example, carrierwide or statewide. The most administratively feasible bases for these computations would be carrierwide or national. We considered using a carrierwide basis, that is, calculating the 90th percentile in

each of the drug bill processor regions. However, we are proposing to use a national basis for determining the 90th percentile of actual charges because the other payment limit component (the administrative allowance plus the product of the number of tablets or other dosage units dispensed and the per dosage unit average price for the drug) would also be computed on a national basis. We believe that using two nationally based amounts would yield the most equitable comparison. We are, however, interested in receiving comments on the advisability of using a carrierwide basis instead of a national basis for these computations.

The determination of the 90th percentile of actual charges would be made on a per dosage unit basis taking into consideration the dosage form and strength.

D. Nontherapeutically Equivalent Drugs

In classifying generic drugs, the FDA uses two categories. The A category includes drug products that are considered to be therapeutically equivalent to other pharmaceutically equivalent products. The B category includes drug products that the FDA does not at this time consider to be therapeutically equivalent to other pharmaceutically equivalent products. Drugs in category B do not meet the definition of multiple-source drugs as set forth in section 1834(c)(9)(A) of the Act because category B drugs are not therapeutically equivalent. Thus, B category drugs may not be substituted for category A drugs or for "brand name" drugs.

We are proposing to pay for category B drugs but only as nonmultiple-source drugs and only if the prescription specifically identifies the category B drug. We are specifically seeking public comments about category B drugs and our proposal to pay for them only as nonmultiple-source drugs.

E. Changes to the Regulations

The regulations implementing the provisions of sections 1834(c) (2), (3), and (4) of the Act that provide for payment for drugs under the catastrophic drug benefit provisions would be located in Subpart I (Payment for Drugs Under the Catastrophic Drug Benefit) of a new Part 414 (Payment for Part B Medical and Other Health Services). We intend to issue a separate final rule to move the current sections on reasonable charges for Part B services from Part 405, Subpart E to Part 414. Other subparts will be added in separate documents as new provisions of the law are implemented through the usual rulemaking process.

IV. Regulatory Impact Statement

A. Executive Order 12291 and Regulatory Flexibility Analyses

Executive Order 12291 (E.O. 12291) requires us to prepare and publish a regulatory impact analysis for any proposed rule that meets one of the E.O. 12291 criteria for a "major rule"; that is, that would be likely to result in—

- An annual effect on the economy of $100 million or more;
- A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or
- Significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

We generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that a proposed rule would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, all pharmacists, most pharmacies, and some pharmaceutical manufacturers qualify as small entities.

Section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if a proposed rule may have a significant impact on the operations of a substantial number of small rural hospitals. Such an analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital with fewer than 50 beds located outside of a Metropolitan Statistical Area.

Readers may find the following discussion to be very similar to impact analyses in other regulations or notices implementing provisions of the Medicare catastrophic drug benefit. We have purposefully provided complete analyses in each document (even though they may be duplicative) to provide readers with complete discussions of the possible effects of the provisions being implemented without having to refer to other **Federal Register** documents.

This proposed rule would implement section 202(b) of Public Law 100–360, which provides Part B payment for covered drugs used in immunosuppressive therapy and covered home IV drugs effective January 1, 1990 and for all other covered drugs effective January 1, 1991. As envisioned by the statute and assuming adequate financing, we anticipate that Medicare payment for these drugs would result in the following costs:

TABLE I—PROJECTED COSTS AS A RESULT OF MEDICARE PAYMENT FOR OUTPATIENT PRESCRIPTION DRUGS

[In millions]*

Fiscal year—			
1990	1991	1992	1993
$130	$1,210	$3,600	$3,830

*Rounded to the nearest $10 million.

We believe that any effects of these provisions on the economy and public would primarily be the result of the statute and not this proposed rule. This is because we have proposed to implement the statute exercising administrative discretion in the following four areas only:

- Determining the 90th percentile of actual charges for nonmultiple-source drugs and multiple-source drugs with restrictive prescriptions on a national basis.
- For all covered drugs, the Secretary must calculate the average price component on a national basis. However, to take account of limitations on the availability of drug products and variations among different areas in the average price for a drug product, the Secretary may determine the average price component of the payment limits on a regional basis.
- For multiple-source drugs without restrictive prescriptions, the Secretary may base the per dosage unit average price for the drug on either the published average price for the drug or on a biannual survey. We are considering use of a survey for multiple-source drugs that are commonly prescribed to Medicare beneficiaries. The statute makes no mention of a survey for multiple-source drugs with restrictive prescriptions. Therefore, their price would be determined by the lowest published price.
- For nonmultiple-source drugs, the Secretary must base the per dosage unit average price for the drug on a biannual survey. However, the Secretary need not conduct a survey if, during 1990, the Secretary determines that a survey is not appropriate for a specific covered outpatient drug, or, after 1990, there is a low volume of sales for the drug or there are other appropriate reasons not to conduct a survey. In such cases, the per dosage unit average price is based on the published average price.

In section III of this preamble, we discuss our rationale for choosing specific provisions. As discussed below in the analyses in section IV.B. of this preamble, we do not believe these provisions would result in significant

---

effects under E.O. 12291, RFA, or rural

lower than the median. However, we do

discounts) of prescription drugs than by

---

catastrophic drug benefits provided

reached would increase from 50 percent

would result in an increase in the

effects under E.O. 12291, RFA, or rural hospital criteria.

The major provisions of this proposed rule are prescribed by the Act as amended by Pub. L. 100–360. This rule would conform the provisions of the Code of Federal Regulations to the changes made by the statute. However, we have prepared voluntary E.O. 12291 and regulatory flexibility analyses (at section IV.C. below) for this proposed rule because coverage of outpatient prescription drugs would represent a significant expansion of Medicare benefits and because of the large number of pharmacists, pharmacies, and pharmaceutical manufacturers who would be affected by the statute.

We are not preparing a rural hospital impact statement since we have determined, and the Secretary certifies, that this proposed rule would not have a significant economic impact on the operations of a substantial number of small rural hospitals.

B. Use of Administrative Discretion

Below is a discussion of those areas in which we have exercised administrative discretion and a discussion of why we believe the effects of our choices would be negligible.

Section 1834(c)(3)(A) of the Act sets forth the payment limit for nonmultiple-source drugs and multiple-source drugs with restrictive prescriptions. The payment limit for these drugs for a payment calculation period is equal to the lesser of the 90th percentile of the actual charges (computed on a statewide basis, carrierwide basis, or other appropriate geographic area basis, as specified by the Secretary) or the amount of the administrative allowance plus the product of the number of tablets and the per tablet or unit average price for such drug. We are given discretion in determining the appropriate geographic basis for calculating the 90th percentile of actual charges. As stated in section III. of this preamble, we propose to do this on a national basis.

We believe that the most administratively feasible basis for determining the 90th percentile of charges is either carrierwide or national. We propose to use a national basis because the other payment limit component (the administrative allowance plus the product of the number of tablets or other dosage units dispensed and the per dosage unit average price for the drug) is computed on a national basis. We believe using two nationally-based amounts would yield the most equitable comparison. We believe that use of a national basis could benefit those pharmacies that have overhead and operating costs lower than the median. However, we do not believe that this would have any significant effect on pharmacies.

Under section 1834(c)(3)(C)(iv) of the Act, the average price component of the payment limits for all covered drugs is to be determined on a national basis. However, the Secretary may make these determinations on a regional basis if it can be demonstrated that there are limitations on the availability of drug products and variations among different areas in the average price for a drug product.

We expect that the instances when we would use this authority would be unusual. That is, we believe it is unlikely that the availability or price of a drug would vary significantly in one area relative to others. The purpose of the authority to make these adjustments is to take account of such unusual situations regarding the availability and price of drugs. Since these adjustments should more accurately reflect pharmacy costs in unusual circumstances, we anticipate that their effect, while minimal, would not be adverse.

In accordance with section 1834(c)(3)(C)(ii)(I) of the Act, the Secretary is required to survey wholesalers, manufacturers, and other direct sellers of covered outpatient drugs to determine the average wholesale price of nonmultiple-source drugs. In 1990, the Secretary may exclude a drug from the survey if he determines there is good reason to do so. For surveys conducted after 1990, a drug may be excluded from the price survey either because of a low volume of sales for that drug or for some other appropriate reason.

As explained in section III.C.4. of this preamble, we intend to survey all commonly prescribed nonmultiple-source drugs to determine their average wholesale price. In order to determine which nonmultiple-source drugs are commonly prescribed for Medicare beneficiaries, we will collect data on the volume of Medicare sales of these drugs in addition to obtaining wholesale price information.

Under section 1834(c)(3)(C)(ii)(II) of the Act, for all multiple-source drugs without restrictive prescriptions, the Secretary may base the per dosage unit average price for the drug on either the published average price for the drug or on a biannual survey.

We are considering use of a survey for multiple-source drugs that are commonly prescribed to Medicare beneficiaries. We intend to conduct the survey on a selected basis because we believe that it may give a more accurate reflection of prices (exclusive of discounts) of prescription drugs than by using the published prices. We will also be collecting sales data so that we can determine which multiple-source drugs to include in constructing the payment limit. In this case, we would use the unweighted median of the surveyed prices.

After conducting a survey, we would pay the lesser of the survey price and the published price for all covered drugs because this would best reflect the true acquisition cost of the drug. By paying the lower price, we better serve the beneficiaries, who together pay premiums for 100 percent of this benefit, and we serve as prudent stewards of the Part B trust funds.

C. Voluntary Regulatory Flexibility Analysis

1. Effects on Beneficiaries

a. Benefits for Medicare Beneficiaries Beginning in 1990. In 1990, we estimate that about 9,500 beneficiaries will undergo an organ transplant that will be covered under the Medicare program. There may be an additional 7,600 beneficiaries who had undergone an organ transplant covered under the Medicare program sometime in 1989. Both groups would be covered under the catastrophic drug benefit for the drugs used in their immunosuppressive therapy beginning January 1, 1990, and would be exempt from the catastrophic drug deductible and subject only to a 20 percent catastrophic drug coinsurance rate for up to 1 year following their discharge from the hospital.

Also, beginning January 1, 1990, we expect that approximately 19,700 beneficiaries who had undergone a Medicare covered transplant before 1989 or had undergone or will undergo an organ transplant not covered under the Medicare program will be covered under the catastrophic drug benefit provisions. These beneficiaries, however, would be subject to the catastrophic drug deductible payment amount and to the 50 percent coinsurance rate that would be in effect for 1990.

We estimate that as many as 65,000 Medicare beneficiaries would use covered home IV drugs in 1990. Of these, we estimate that about 56,550 beneficiaries would begin their IV drug therapy while still in the hospital and thus be exempt from the catastrophic drug benefit deductible and subject only to a 20 percent coinsurance payment rate for home IV drugs furnished as part of home IV drug therapy.

b. Benefits for Medicare Beneficiaries, 1991 through 1993. Our actuaries project that, without the

catastrophic drug benefits provided under sections 1832 and 1861 (s) and (t) of the Act as amended by section 202 of Public Law 100–360, in 1991, total beneficiary expenditures for prescription drugs would have been $12.6 billion. By 1993, our actuaries project that this figure would have grown to $14.2 billion. By distributing total projected spending for outpatient drugs in 1991 over all Medicare beneficiaries, we expect the average expenditure per beneficiary would have been about $405 for an average 18.7 prescriptions. Similarly, in 1993, we expect that the average expenditure per beneficiary would have been $450 per beneficiary for an average of 19.4 prescriptions.

While we make these projections in terms of all beneficiaries, we estimate that only about 85 percent of all beneficiaries would purchase covered prescription drugs in any given year. Thus, the amount for each beneficiary who would actually purchase prescription drugs in 1991 (that is, the average expense for outpatient prescription drugs per Medicare user) is expected to be about $475. By 1993, the average expense per Medicare user would increase to about $540.

Although the level of the prescription drug deductible in 1991 is set by statute at $600 (a level that would permit an estimated 24 percent of all beneficiaries to receive covered outpatient drug benefits), the percentage of beneficiaries meeting this deductible would equal nearly 28 percent of those beneficiaries who actually would purchase covered outpatient drugs. In 1993, the level of the covered outpatient drug deductible would be set at a level that would permit 16.8 percent of all Medicare beneficiaries to qualify for the covered outpatient drug benefit. Yet in terms of those who are expected to actually purchase covered outpatient drugs, the percent of users meeting the deductible amount would be about 20 percent.

Beginning in 1991, those who meet the deductible would receive an average benefit of about $345 for the year. As envisioned by the statute, and assuming adequate financing, in 1993, the average benefit payment made on behalf of a beneficiary who had met the deductible amount would increase to about $700. The projected growth in benefit payments per beneficiary would be largely the result of the increased portion of prescription drug costs the Medicare program would be required to pay. In accordance with the statute, the proportion of drug costs covered by the program after the deductible amount is reached would increase from 50 percent in 1991 to 80 percent in 1993.

While the portion of drug costs covered by Medicare would increase from 1990 through 1993, the proportion of beneficiaries expected to meet the deductible amount would drop during this period. Section 1834(c)(1)(C) of the Act sets forth the catastrophic drug deductible amount for 1990, 1991, and 1992 and requires that the Secretary determine for 1993 a deductible amount that will result in 16.8 percent of beneficiaries incurring expenses for covered outpatient drugs sufficient to meet the catastrophic drug deductible. The deductible amount in 1991 would be set at $600, enabling about 24 percent of all beneficiaries to qualify for drug payment benefits (or about 28 percent of projected actual Medicare beneficiaries requiring covered outpatient drugs). In 1992, the deductible amount would increase to $652, which would enable 23 percent of all beneficiaries (almost 27 percent of those beneficiaries projected to actually use covered outpatient drugs) to qualify for the drug benefit. In 1993, as required by the statute, the deductible amount would be set at a level that would permit 16.8 percent of all beneficiaries to receive covered outpatient drug benefits. This would be the equivalent of about 20 percent of those beneficiaries who would require covered outpatient drugs during that period.

2. Effects on Pharmacists, Pharmacies, and Pharmaceutical Manufacturers

As of June 1988, there were 378 pharmaceutical firms licensed to manufacture prescription drug products in the United States. There are now about 9,700 different drug products meeting the statutory definition of a covered outpatient drug marketed in the United States. Of the total number of approved drug products, 1,975 products are manufactured by a single firm, and almost 7,795 products are manufactured by more than one firm. We estimate that we will process data from more than 55,000 pharmacies for outpatient prescription drug bills.

Sections 1834(c)(9)(B) (i) and (ii) of the Act requires that the prescribing physician or other legally authorized person who is prescribing the drug indicate with an appropriate phrase such as "brand medically necessary" in his or her handwriting if the prescriber wants to prohibit generic substitution by the pharmacist.

We believe that the provision cited above, along with section 1834(c)(3)(B) of the Act, which sets forth the payment limit methodology for multiple-source drugs without restrictive prescriptions, would result in an increase in the generic dispensing rate for all pharmacies. This is because it would be in a pharmacy's best economic interest in those instances when the phrase "brand medically necessary" was not used in the prescribing process to substitute a lower-cost generic equivalent for the original brand since to do otherwise would result in a lower profit on each prescription dispensed. We also believe that these provisions of the statute might adversely affect those pharmaceutical manufacturers who do not manufacture generic equivalents since we believe their market share might decrease.

Furthermore, we believe that pharmacies may see a decrease in their profit per dispensed prescription for Medicare beneficiaries to the extent that those prescription drugs would have been dispensed as a higher-priced brand name drug if Public Law 100–360 had not been enacted. This is because we believe there is currently more profit in dispensing higher-priced brand name prescriptions than there is in dispensing their generic equivalents. However, we believe the decrease in profit per dispensed prescription would be offset by an increase in the number of prescriptions dispensed. We address this issue as "induced" demand later in this section.

The administrative allowance for all drugs dispensed in 1990 would be at the nonparticipating pharmacy rate of $2.50 because there is no statutory provision for participating pharmacies in 1990. In 1990, this administrative allowance is only relevant to immunosuppressive drugs because the administrative allowance would not be applied in computing the payment for dispensing home IV drugs. Instead, as explained in section III.C.3. above, payment for dispensing drugs used in home IV drug therapy would be made as part of a home IV drug therapy services per diem fee schedule.

Each time a prescription is filled in 1991, the Medicare program would pay an administrative allowance of $4.50 for drugs dispensed by a participating pharmacy and $2.50 for drugs dispensed by a nonparticipating pharmacy, as required by section 1834(c)(4)(A)(i) of the Act. Section 1834(c)(4)(A)(ii) of the Act requires that after 1991 the allowances be adjusted annually based on changes in the implicit price deflator for the GNP. The implicit price deflator measures the rate of inflation for the entire U.S. economy and is the means by which the GNP is adjusted for inflation. We have no administrative discretion in setting either the amount of the administrative allowances or the rate of increase since both are set by statute.

The dosage unit average price would be updated every 6 months. For example, if a survey of drug prices were made on January 1, 1991, those prices would be used for prescription reimbursement from July 1 through December 31, 1991. Thus, the dosage unit average prices would be 6 months out of date at the beginning of each 6-month period and 12 months out of date before they would be updated.

In developing our estimates of benefit payments, we assumed that once a beneficiary reached the deductible amount, there would be an "induced" demand for prescription drugs that would increase the number of prescriptions written and, possibly, the cost of prescriptions as well. That is, prescribing health professionals may feel freer to prescribe both a larger quantity and more expensive drugs for a patient who has met the deductible amount than for one who has not met the deductible amount. Similarly, a patient who has met the deductible payment amount may feel less constrained to demand more medications or to have more prescriptions filled than a patient who has not met the deductible amount.

In attempting to predict the magnitude of the "induced" demand for covered outpatient drugs, we assumed that the effect would be directly related to the amount of program benefit payments. This amount, in turn, is a function of the deductible payment amount and the percentage of the beneficiary copayment. In 1991, we project that "induced" demand would account for about 23 percent of program benefit payments for covered outpatient prescription drugs. In 1992, the percent of "induced" benefits for prescription drugs is expected to grow to 28.5 percent, and by 1993, the percentage is expected to reach 32.4 percent. Since these "induced" benefits would apply to purchases of additional covered outpatient drugs that would not otherwise have been purchased, in addition to possibly benefiting Medicare beneficiaries through enabling them to have greater access to medications, the "induced" demand for covered outpatient drugs could also financially benefit every entity involved in the manufacturing and dispensing of prescription drugs.

It should be noted that the expected "induced" demand does not necessarily represent an abuse of the Medicare drug benefit. We believe that in many cases, the increased demand may represent a decision on the part of a health professional to treat a condition more aggressively than he or she might do if the catastrophic drug benefit were not available. Similarly, a beneficiary might forego having a prescription filled or avoid taking a drug at the prescribed time interval in order to conserve the available medication (and thus save money) were it not for the coverage of outpatient drugs now afforded by the Act. Thus, the "induced" demand may represent, in part, a medically appropriate demand for prescription drugs that currently is not being met.

Pharmaceutical manufacturers' benefits from the payment provisions of section 202(b) of Public Law 100–360 would be based on the benefits that would accrue to pharmacies. Assuming that pharmacies experience an increase in prescriptions written and prescription drugs sold, the pharmaceutical manufacturing industry would likewise experience a concomitant increase in the amount of pharmaceutical drugs sold for distribution to pharmacies and final distribution to Medicare beneficiaries.

D. Conclusion

We have summarized the most significant effects of the outpatient prescription drug payment provisions specified in section 1834 of the Act as amended by section 202(b) of Public Law 100–360. We do not believe that we are required to furnish this information under either E.O. 12291 or the RFA. Nevertheless, in the interest of providing the public with information regarding a major revision to the Medicare program, we have voluntarily offered an analysis of the major effects of the payment methodology for covered outpatient drugs.

V. Other Required Information

A. Paperwork Burden

Sections 414.508 (b) and (c) of this proposed rule contain information collection requirements that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3511). Section 414.508(b) requires, for a handwritten restrictive prescription, that the physician or the person prescribing the drug use specific language on the prescription and that this language must be in the prescribing person's handwriting. Section 414.508(c) requires, for a telephone restrictive prescription, that the prescriber provide a written and signed confirmation, in his or her own handwriting, to the pharmacy. We estimate that complying with the requirement in 414.508(b) to write "brand medically necessary" on handwritten prescriptions will require an additional 5 to 10 seconds per prescription. We estimate that completing a prescription form for a telephone prescription, as required in §414.508(c), would routinely require no more than 1 to 2 minutes per prescription.

A notice will be published in the **Federal Register** after OMB approval of these requirements is obtained. Organizations and individuals desiring to submit comments on the information collection and recordkeeping requirements should direct them to the OMB official whose name appears in the "ADDRESS" section of this preamble.

B. Public Comment

Because of the large number of pieces of correspondence we normally receive on a proposed rule, we are not able to acknowledge or respond to them individually. However, we will consider all comments that we receive by the date specified in the "Dates" section of this preamble, and we will respond to the comments in the preamble of the final rule.

List of Subjects in 42 CFR Part 414

Drugs, Medicare, Reporting and recordkeeping.

A new 42 CFR Part 414 would be added as set forth below:

PART 414—PAYMENT FOR PART B MEDICAL AND OTHER HEALTH SERVICES

Subpart A-H—[Reserved]

Subpart I—Payment for Outpatient Drugs Under the Catastrophic Drug Benefit

Sec.
414.500 Purpose.
414.502 Definitions.
414.504 Determination of amount payable.
414.506 Determination of the payment limit.
414.508 Determining whether a prescription is restrictive.
414.510 Determination of dosage unit average price.
414.512 Administrative allowance.
414.514 Amount of the payment percent.

Authority: Secs. 1102, 1834(c), and 1871 of the Social Security Act (42 U.S.C. 1302, 1395m(c), and 1395hh).

Subpart A-H—[Reserved]

Subpart I—Payment for Outpatient Drugs Under the Catastrophic Drug Benefit

§ 414.500 Purpose.

This subpart implements section 1834(c) of the Act in part by specifying how payments are made for covered outpatient drugs under the catastrophic drug benefit.

§ 414.502 Definitions.

For purposes of this subpart, the following definitions apply:

Average price means the price that is determined through the use of either published or survey data concerning amounts pharmacies pay for drug products.

Multiple source drug means a covered outpatient drug for which there are two or more drug products that meet all of the following conditions during a payment calculation period:

(a) *Therapeutically equivalent.* The drug products are rated as therapeutically equivalent by the Food and Drug Administration (FDA) in its most recent publication of "Approved Drug Products with Therapeutic Equivalence Evaluations."

(b) Pharmaceutically equivalent and bioequivalent. (1) Except as provided in paragraph (b)(2) of this section, the drug products have been determined by FDA to be pharmaceutically equivalent and bioequivalent.

(2) The drug products are not required to meet the condition concerning pharmaceutically equivalency and bioequivalency as set forth in paragraph (b)(1) of this section if FDA changes by regulation (after an opportunity for public comment of 90 days) the requirement that, for purposes of the "Approved Drug Products with Therapeutic Equivalence Evaluations," in order for drug products to be rated as therapeutically equivalent, they must be pharmaceutically equivalent and bioequivalent.

(c) *Available for sale or marketing.* The drug products are considered to be available for sale or marketing. Drug products meet this condition if they are listed by FDA in its most recent publication of "Approved Drug Products with Therapeutic Equivalence Evaluations" (other than in the Discontinued Drug Product List in that publication) unless HCFA determines that sale or marketing is not actually occurring.

Nonmultiple-source drug means a covered outpatient drug that does not meet the definition of a "multiple-source drug."

Payment calculation period means the 6-month period beginning January 1st of each year or the 6-month period beginning July 1st of each year.

§ 414.504 Determination of amount payable.

(a) *General.* The amount payable for a covered outpatient drug under the catastrophic drug benefit as described in § 410.29 of this chapter is the applicable payment percent for the drug as determined under § 414.514 multiplied by the lesser of—

(1) The actual charge; or

(2) The payment limit determined under § 414.506.

(b) *Effective date.* Payment is determined under the criteria described in paragraph (a) of this section for—

(1) Drugs dispensed for immunosuppressive therapy after a transplant or covered home IV drugs on or after January 1, 1990; and

(2) All other covered outpatient drugs dispensed on or after January 1, 1991.

§ 414.506 Determination of the payment limit.

(a) *General.* To determine the payment limit for a drug, HCFA uses the procedures set forth in paragraph (b) or (c) of this section.

(b) *Nonmultiple-source drug and multiple-source drug with a restrictive prescription.* For a nonmultiple-source drug and multiple-source drug with a restrictive prescription as described in § 414.508, the payment limit is determined as follows:

(1) For drugs dispensed on or after January 1, 1990 and before January 1, 1992, the payment limit is equal to the sum of—

(i) The amount of the administrative allowance as set forth in § 414.512; and

(ii) The product of the number of tablets or other dosage units dispensed and the dosage unit average price as determined in § 414.510 for the payment calculation period in which the drug is dispensed.

(2) For drugs dispensed on or after January 1, 1992, the payment limit is equal to the lesser of—

(i) The amount of the administrative allowance plus the product of the number of tablets or other dosage units dispensed and the average price per dosage unit determined under § 414.510 for the payment calculation period in which the drug is dispensed; or

(ii) The 90th percentile of actual charges for a drug for the second previous payment calculation period adjusted to reflect the number of tablets or other dosage units dispensed.

(c) *Multiple-source drug without a restrictive prescription.* For a multiple-source drug without a restrictive prescription, the payment limit is equal to the sum of—

(1) The administrative allowance; and

(2) The product of the number of tablets or other dosage units dispensed and the dosage unit average price based on the unweighted median determined under § 414.510 for the payment calculation period in which the drug is dispensed.

§ 414.508 Determining whether a prescription is restrictive.

(a) *General.* A drug has a restrictive prescription if it meets the conditions set forth in either paragraph (b) or paragraph (c) of this section.

(b) *Handwritten prescription.* In the case of a written prescription for a drug, only if the prescribing physician (or other person prescribing the drug) includes in his or her handwriting the phrase "brand medically necessary."

(c) *Telephoned prescription.* In the case of a prescription for a drug that is telephoned to the pharmacy, the prescribing physician (or other legally authorized person who is prescribing the drug) indicates that the particular drug must be dispensed by stating the phrase "brand medically necessary" both—

(1) During the telephone call; and

(2) Within 30 days after the telephone call, in a written and signed confirmation, in his or her handwriting, to the pharmacy.

§ 414.510 Determination of dosage unit average price.

(a) *General.* HCFA determines the average price on a per dosage unit basis for purchases in reasonable quantities, as appropriate, based on prices in effect on the first day of the previous payment calculation period. The average price is based on dosage form and strength for each drug product.

(b) *Sources for dosage unit average price.* HCFA obtains the information described in paragraph (a) of this section from the lower of—

(1) When available, a biannual survey of a representative sample of direct sellers, wholesalers, or pharmacies as appropriate; or

(2) Prices published in commonly recognized, comprehensive listings of drug prices.

(c) *Performance of surveys*—(1) *Nonmultiple-source drugs.* (i) HCFA performs the biannual survey described in paragraph (b)(1) of this section for those nonmultiple-source drugs that are commonly prescribed to Medicare beneficiaries except that this survey does not have to be performed in—

(A) Any year in which HCFA determines that a survey is not appropriate for a specific covered outpatient drug; or

(B) In years subsequent to 1990, any year in which HCFA determines that there is a low volume of sales for a drug.

(ii) The dosage unit average price is based on the median of the surveyed prices.

(2) *Multiple-source drugs.* HCFA performs the biannual survey described in paragraph (b)(1) of this section for

multiple-source drugs, but only if HCFA determines a survey to be appropriate. The dosage unit average price is based on the unweighted median of the surveyed prices.

(d) *Use of published prices—(1) Nonmultiple source drugs and multiple-source drugs with restrictive prescriptions.* The dosage unit average price for nonmultiple-source drugs and multiple-source drugs with restrictive prescriptions is based on the lowest published price.

(2) *Multiple-source drugs without restrictive prescriptions.* The dosage unit average price for multiple-source drugs without restrictive prescriptions is based on the unweighted median of published prices.

(e) *National determination.* The determination of the dosage unit average price is made on a national basis unless HCFA makes the determination on a regional basis to take into account limitations on the availability of drugs and variations on the prices among different areas.

(f) *Discounts.* In determining the dosage unit average price, HCFA does not consider discounts.

§ 414.512 Administrative allowance.

(a) *For 1990 and 1991.* For a drug dispensed on or after January 1, 1990 and before January 1, 1992, the administrative allowance for dispensing the drug is—

(1) $4.50 per prescription for a pharmacy that meets the requirements under subpart B of part 490 of this chapter for a participating pharmacy; or

(2) $2.50 per prescription for a pharmacy that is not a participating pharmacy.

(b) *For years subsequent to 1991.* For each year subsequent to 1991, the administrative allowance is the allowance applicable to the previous year increased by the percentage increase in the implicit price deflator for gross national product over the 12-month period ending with August of the preceding year as published by the Department of Commerce rounded to the nearest penny.

(c) *Limitation on administrative allowance for dispensing insulin—(1) Purchase of a 30-day supply.* For insulin that is available without a prescription, the administrative allowance is made for each purchase of a reasonable quantity, that is, a 30-day supply.

(2) *Exceptions.* An administrative allowance is made for a purchase of a supply of insulin for fewer than 30 days in the following circumstances (or if other extenuating conditions exist):

(i) There is a change in the type of insulin the beneficiary uses or the insulin regimen is otherwise modified; or

(ii) If, because of travel plans, the beneficiary needs to make smaller purchases or forgets to bring along enough insulin for duration of the trip.

(d) *Exception for drugs dispensed for home IV drug therapy.* No administrative allowance is paid for dispensing a drug that is to be used in home IV drug therapy. An allowance for dispensing IV drugs is made under the fee schedule for payment for services related to home IV drug therapy under subpart J of part 414.

§ 414.514 Amount of the payment percent.

(a) *Immunosuppressive and Home IV drugs.* For drugs related to immunosuppressive drug therapy dispensed during the first year after a covered organ transplant and for home IV drugs, the payment percent equals 80 percent.

(b) *Other drugs.*

The payment percent for covered outpatient drugs other than the drugs described in paragraph (a) of this section equals the following:

(1) In 1990 and 1991, 50 percent.

(2) In 1992, 60 percent.

(3) In 1993 and subsequent years, 80 percent.

RIN 0938–AE09

Medicare Program; Conditions of Participation for Home Intravenous Drug Therapy Providers

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: This proposed rule sets forth the conditions of participation that an entity would be required to meet in order to qualify as a home intravenous drug therapy provider. This proposal would implement the provisions of section 1861(jj)(3) of the Social Security Act, which was added by section 203(b) of the Medicare Catastrophic Coverage Act of 1988. An entity that meets these conditions of participation would be eligible for payment from Medicare for covered home IV drug therapy services furnished to Medicare beneficiaries.

DATE: To be considered, comments must be mailed or delivered to the appropriate address, as provided below, and must be received by 5:00 p.m. on November 6, 1989.

ADDRESSES: Mail comments to the following address:

Health Care Financing Administration, Department of Health and Human Services, Attention: BPD-617–P, P.O. Box 26676, Baltimore, Maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309 G, Hubert H. Humphrey Building, 200 Independence Ave., SW., Washington, DC.

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

Due to staffing and resource limitations, we cannot accept facsimile (FAX) copies of comments.

If comments concern information collection or recordkeeping requirements, please address a copy of the comments to:

Office of Management and Budget,
Office of Information and Regulatory Affairs, Room 3002, New Executive Office Building, Washington, DC 20503, Attention: Allison Herron.

In commenting, please refer to file code BPD–617–P. Comments received timely will be available for public inspection as they are received, beginning approximately three weeks after publication of this document, in Room 309–G of the Department's offices at 200 Independence Ave., SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (phone: 202–245–7890).

FOR FURTHER INFORMATION, CONTACT: Betty Burrier, (301) 966–4649.

SUPPLEMENTAL INFORMATION:

I. Background

Many individuals require intravenous (IV) drug therapy on an ongoing basis because the medication is not available in oral dosage form, the patient is unable to take the medication orally or by other less invasive means, or the medication is more effective if administered intravenously. Most of these individuals require hospitalization for the initiation of IV drug therapy and must remain hospitalized for the duration of the therapy. There is, however, an increasing number of individuals whose IV drug therapy care, in whole or in part, can be managed at home. Allowing these patients to receive drug therapy at home rather than in the hospital can improve the quality of their lives and potentially allow their return to normal activities.

Currently, under the Medicare Part A (Hospital Insurance) program coverage of drugs and biologicals is provided as follows:

- Under section 1861(b)(2) of the Social Security Act (the Act), we cover drugs and biologicals used in the hospital that are ordinarily furnished by the hospital for the care and treatment of patients.
- Under section 1861(h)(5) of the Act, we cover drugs and biologicals furnished for use in a skilled nursing facility that are ordinarily furnished by the facility for the care and treatment of inpatients.
- Under section 1861(dd)(1)(E) of the Act, we cover drugs and biologicals furnished to terminally ill individuals under a written plan as part of a hospice program.

The Medicare Part B (Supplementary Medical Insurance) program covers drugs as defined in the scope of benefits set forth in section 1832 of the Act. Certain sections of section 1861 of the Act define the coverage provisions specified in section 1832 of the Act.

Current Medicare Part B coverage of outpatient drugs and biologicals is, in part, provided for under section 1861 of the Act as follows:

- Under section 1861(s)(2) (A) and (B) of the Act, we cover drugs and biologicals that cannot be self-administered and that are furnished as incident to a physician's service.
- Under section 1861(s)(2)(C) of the Act, we cover diagnostic services furnished by a hospital to outpatients, including drugs and biologicals required in the performance of these services.
- Under section 1861(s)(2)(F) of the Act, we cover dialysis supplies, including drugs and biologicals.
- Under section 1861(s)(2)(G) of the Act, we cover antigens that are prepared by a physician for a particular patient and that are administered by or under the supervision of a physician.
- Under section 1861(s)(2)(I) of the Act, we cover blood clotting factors for hemophilia patients competent to use those factors to control bleeding, without medical or other supervision.
- Under section 1861(s)(2)(J) of the Act, we cover immunosuppressive drugs and drugs that are needed for effective immunosuppressive therapy furnished to an individual who receives an organ transplant for which payment is made under Medicare and that are furnished within 1 year after the date of the transplant procedure.
- Under section 1861(s)(2)(K)(ii) of the Act, we cover supplies that are incident to a physician assistant's services furnished under the supervision of a physician, including drugs and biologicals.
- Under section 1861(s)(10) of the Act, we cover pneumococcal, influenza, and hepatitis B vaccines.
- Under section 1861(cc)(1)(F) of the Act, we cover drugs and biologicals that cannot be self-administered and that are furnished to an individual who is an outpatient of a comprehensive outpatient rehabilitation facility.
- We cover drugs and biologicals furnished as part of or incident to the provision of the following covered services:

—Rural health clinic services (section 1861(aa)(1) of the Act).
—Partial hospitalization services (section 1861(ff)(2)(D) of the Act).
—Certified nurse-midwife services (section 1861(gg)(1) of the Act).
—Qualified psychologist services (section 1861(ii) of the Act).

- Payment has also been made for certain drugs and biologicals as part of the durable medical equipment (DME) benefit (section 1861(n) of the Act) and the prosthetic device benefit (section 1861(s)(8) of the Act).

Drugs and biologicals are also covered as part of or incident to services furnished in qualified ambulatory surgical centers as stated in section 1832(a)(2)(F)(i) of the Act.

Section 203(a) of the Medicare Catastrophic Coverage Act of 1988 (Public Law 100–360), enacted on July 1, 1988, amended section 1832(a)(2)(A) of the Act to establish coverage under Part B for home IV drug therapy services furnished on or after January 1, 1990. Section 203(b) of Public Law 100–360 added section 1861(jj) to the Act to define home IV drug therapy services. Under new 1861(jj)(2) of the Act, home IV drug therapy services means "nursing, pharmacy, and related items and services (including medical supplies, intravenous fluids, delivery, and equipment) as are necessary to conduct safely and effectively an intravenously administered drug regimen * * *." As stated in section 1861(jj)(1) of the Act, home IV drug therapy services are to be "furnished to an individual who is under the care of a physician—(A) in a place of residence used as such individual's home; (B) by a qualified home intravenous drug therapy provider or by others under arrangements with them made by such provider and (C) under a plan established and periodically reviewed by a physician."

A qualified home IV drug therapy provider (referred to below as home IV providers) is defined in section 1861(jj)(3) of the Act as an entity that the Secretary determines meets the following requirements:

- The entity is capable of providing or arranging for the items and services described in section 1861(jj)(2) of the Act (that is, the provision of nursing, pharmacy, and related services) as are necessary to conduct safely and effectively an intravenously administered drug regimen through use of a covered home IV drug, as defined in section 1861(t)(4) of the Act. Under the provision of the law, the entity must also be capable of providing covered home IV drug directly or under arrangements.
- The entity maintains clinical records on all patients.
- The entity adheres to written protocols and policies with respect to the provision of the covered items and services.
- The entity makes services available (as needed) seven days a week on a 24-hour basis.
- The entity coordinates all services with the patient's physician.
- The entity conducts a quality assessment and assurance program, including drug regimen review and coordination of patient care.
- The entity assures that only trained personnel furnish covered home IV drugs (and any other service for which training is required to furnish the service safely).
- The entity assumes responsibility for the quality of services furnished by others under arrangements with the agency or entity.
- In the case of an entity in any State in which State or applicable local law provides for the licensing of entities of this nature, the entity—

—Is licensed under that law; or
—Is approved by the agency of the State or locality responsible for licensing entities of this nature as meeting the standards established for that licensing.

- The entity meets such other requirements as the Secretary may determine are necessary to assure the safe and effective provision of home IV drug therapy services and the efficient administration of the home IV drug therapy benefit.

This proposed rule sets forth the conditions that a home IV drug therapy provider would have to meet to participate in the Medicare program.

BEST COPY AVAILABLE

That is, we would consider any entity that complies with the requirements of the Act and this proposed rule to meet the definition of home IV provider under the provisions of new section 1861(jj)(3) of the Act. (Our proposals concerning coverage of specific drugs for use in home IV drug therapy, coverage of the services connected with home IV drug therapy, payment rules for the drugs, and the fee schedule under which the services will be paid will be addressed in separate rulemaking documents.)

Under section 1861(jj)(3) of the Act, the Secretary is required to establish the conditions of participation under which entities may qualify as home IV providers. In addition, as mentioned above, under section 1861(jj)(3)(x) of the Act, the Secretary may determine the conditions necessary for the assurance of safe and effective provision of home IV drug therapy services and the efficient administration of the home IV drug therapy benefit.

In order to become familiar with the wide range of current practices and arrangements for furnishing home IV drug therapy, we received information from companies that currently furnish home IV drug therapy services, home health agencies (HHAs), pharmaceutical manufacturers, physicians, pharmacists, and various professional associations. In addition, we contacted two major professional organizations that currently have standards for the provision of home IV drug therapy services; that is, the Joint Commission for the Accreditation of Health Care Organizations (JCAHO), which has developed the "Standards for the Accreditation of Home Care," and the Intravenous Nursing Society (INS), which developed the "Intravenous Nursing Standards of Practice." We reviewed both the JCAHO and INS standards in detail along with existing HCFA standards for different types of providers of services.

The delivery of home IV drug therapy services under Medicare will involve the administration of potentially dangerous drugs, using sophisticated medical equipment and techniques, to a predominantly elderly population in their homes. Accordingly, we intend that the conditions of participation for home IV providers, once adopted, will assure the safe and effective delivery of home IV drug therapy services to these patients.

Thus, our main objective in establishing these conditions of participation is to minimize the risks for the Medicare beneficiaries while maximizing the benefits. Therefore, after reviewing both the materials furnished by the organizations and individuals we contacted and various medical journal articles about home IV drug therapy, we extracted the provisions that we believe would be most important to meet the requirements of the statute and our responsibilities in assuring that this new benefit will be furnished in the most safe and effective manner possible.

In general, we also want to state that, in setting forth the provisions of section 203 of Pub. L. 100–360, Congress established strong standards for the establishment of conditions of participation for home IV providers and made it clear that entities wishing to qualify as home IV providers must do so under these conditions of participation. For example, in the case of HHAs or DME suppliers, such entities may qualify as a home IV provider for purposes of furnishing home IV therapy services if they meet the requirements of these conditions of participation. (See H.R. Rep. No. 661, 100th Cong., 2nd Sess. 201 (1988).)

II. Provisions of the Proposed Regulations

Most of the conditions for home IV providers would be based on the specific requirements set forth in sections 1861(jj)(3) (i) through (ix) of the Act. The remaining conditions would be established under the general authority of section 1861(jj)(3)(x) of the Act concerning safety and effectiveness and the efficient administration of home IV therapy services.

We are proposing to add a new Subpart C to 42 CFR Part 485 (Conditions of Participation and Conditions for Coverage: Specialized Providers) in which we would set forth the proposed conditions that entities must meet to satisfy the definition of a home IV provider under section 1861(jj) of the Act and to be accepted for participation in Medicare in accordance with the provisions of Part 489 (Provider Agreements under Medicare). These conditions of participation would serve as the basis for survey activities on the part of the Medicare State survey agencies. (We note that once the conditions of participation are in place under a final rule, noncompliance with them could result in the application of sanctions including intermediate sanctions set forth in section 1846 of the Act, as amended by section 203(e) of Public Law 100–360. A separate rulemaking document that deals with intermediate sanctions and appeal rights for home IV drug therapy providers is being developed.)

We would make a conforming change to § 489.2 to include a home IV provider as one of the entities that must have a provider agreement in order to furnish and receive payment for services under Medicare.

In addition, we would amend § 400.202 to include a home IV provider in the definition of "provider" under Medicare. (We would also make a technical correction in that definition to delete the end of the effective date for hospice care. Although section 122(h)(1)(A) of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97–35) specified that hospice care would not be covered under Medicare after September 30, 1986, this sunset provision was repealed by section 9123 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (Pub. L. 99–272). We would also amend § 417.416 to add hospices and home IV providers to the list of providers that must meet the applicable conditions of participation in Medicare in order to furnish services to an HMO enrollee.)

A. Definition

In accordance with section 1861(jj)(3) of the Act, in § 485.101, we would define a "home IV drug therapy provider" as an entity that—

- Is capable of furnishing covered home IV drugs, nursing and pharmacy services, and other services necessary for the administration of home IV drug therapy; and
- Meets the conditions specified under proposed new §§ 485.105 through 485.165 and other applicable requirements of the statute and regulations.

B. Compliance With Federal, State, and Local Laws

In § 485.105, we would require that a home IV provider be in compliance with applicable Federal and State laws. Also, we would require that a home IV provider ensure that personnel who furnish services, including those who do so under arrangements with the provider, meet all applicable standards that are required by State and local laws. This condition would implement the provisions of section 1861(jj)(3)(ix) of the Act, which specify that an entity meet State and local licensing requirements. Our proposed language in § 485.105 is similar to that which we use in regulations governing conditions of participation for other providers, such as hospitals (§ 482.11) and comprehensive outpatient rehabilitation facilities (§ 485.54).

C. Governing Body and Administration

In accordance with sections 1833(jj)(3) (i) thru (vii) of the Act, which set forth the specific responsibilities of a home IV provider, we would require in § 485.110

that a home IV provider have either a governing body or designated individuals who are legally responsible for the conduct of the home IV provider in furnishing the required services. We believe that this condition is necessary for the purpose of centralization of authority and responsibility for overall operation of the provider.

1. Standard: Disclosure of ownership

We would require a home IV provider to disclose certain information about ownership and control. We would include this requirement because section 1124 of the Act requires a provider of services to disclose ownership information and because section 1834(d)(3) of the Act prohibits a home IV provider from furnishing services to a Medicare beneficiary based on a referral from a physician (or an immediate family member of the physician) who has an ownership interest in, or receives compensation from, the provider. The referring physician is the physician who prescribes the home IV drug or establishes the plan of care for this therapy, or both. Congress established several exceptions to this prohibition that are addressed in a separate proposed rulemaking document concerning coverage of home IV drug therapy services

2. Standard: Participation in reports and studies

New section 1861(jj)(3)(x) of the Act states that an entity wishing to qualify as a home IV provider must meet such "* * * requirements as the Secretary may determine are necessary to assure * * * the efficient administration of the home intravenous drug therapy benefit." Under this provision, we propose to require that home IV providers furnish information as requested by the Secretary concerning cost matters or other issues that may relate to the efficient administration of the home IV drug therapy benefit. We would expect providers to cooperate as needed in this regard and participate in any reports or studies that are conducted.

3. Standard: Chief executive officer

We would require that a home IV provider have a chief executive officer who is responsible for the day-to-day operations of the provider because we believe that it is necessary that there be one person who is accountable for the operation of the provider. The language we are proposing to use is similar to the language in § 482.12, which specifies that a participating hospital must have a chief executive officer who is responsible for managing the hospital.

4. Standard: Patient care policies

Under this proposed rule, a patient's referring physician would determine whether a particular patient would be a good candidate for home IV drug therapy and would determine the drug regimen for each patient. Section 1833(jj)(3)(iii) of the Act requires that a home IV provider adhere to the physician's directions for the provision of items and services. In implementing section 1833(jj)(3)(iii) of the Act, we would require that a home IV provider have written patient care policies to govern the services it furnishes. The patient care policies must include the following:

- A description of the services furnished by the home IV provider's employees and those furnished under arrangements.
- The criteria specifying by diagnoses the patient population for whom the services are designed. That is, the home IV provider would be required to design criteria under which it would admit only a patient whose needs can be met by the services it provides.
- Procedures for the acceptance of a referral, including the assignment of appropriate staff to conduct a timely assessment of the patient's medical and psychological readiness for home IV drug therapy services.
- Procedures for quickly notifying the referring physician if the patient does not meet the home IV provider's admission criteria.
- Procedures for notifying the referring physician of incidences of phelebitis, IV infiltration, or site infection once a course of home IV drug therapy has began.

5. Standard: Contracted services and professional management responsibility

Section 1861(jj)(3)(viii) of the Act provides that a qualified home IV provider must assume "responsibility for the quality of services provided by others under arrangements with the agency or entity." Thus, we believe that Congress did not intend that the home IV provider merely serve as a billing agency for the entity or individual who actually furnishes the services. Therefore, we are proposing that the home IV provider must retain professional and administrative responsibility for, and control and supervision of, contracted services and must ensure that they are furnished in a safe and effective manner by nurses and pharmacists in accordance with the patient's plan of care and other applicable requirements.

Under proposed § 485.110(e), the home IV provider must maintain a legally binding written agreement with each contractor who provides arranged services that includes at least the following provisions:

- Identification of the services to be provided.
- A requirement that contracted services are provided only if directly authorized by the home IV provider.
- A description of the manner in which the contracted services are coordinated, supervised, and evaluated by the home IV provider.
- Delineation of the roles of the home IV provider and the contractor in the patient care process.
- A requirement for the preparation of patient records including the prompt incorporation of progress notes and other observations by the physician, nurse, and pharmacist.
- A requirement that both the personnel and services provided under arrangements meet the same requirements that would be applicable if the personnel and services were furnished directly by the home IV provider.
- Specification of the financial arrangements with a contractor who furnishes home IV therapy services under arrangements. We would require that the financial arrangements provide that the contractor may not bill the patient or Medicare for covered services. This is because, under section 1861(w)(1) of the Act, covered services furnished under arrangements must be billed through the home IV provider exclusively and receipt of payment by the home IV provider for these services on behalf of an entitled individual discharges the individual's liability to pay for services. (Under Medicare, participating providers accept Medicare payment as payment in full except for any applicable deductible and coinsurance amounts, which are the responsibility of the beneficiary. There are no deductible or coinsurance amounts applicable to home IV drug therapy services.)

We are including these requirements because we believe that the professional supervision of the contracted services must include application of many of the same controls as would be applied to services furnished by employees of the home IV provider. This proposed delineation of the roles for the employees of the home IV provider and employees of a contractor is generally similar to the same standard concerning the provision of contracted services by individuals who are not employees of a hospice (§ 418.56).

D. Patient Selection

We propose in § 485.115 that the home IV provider must make a comprehensive assessment of each patient and the patient's needs at the time of patient selection. In order to assess patients, the home IV provider would need to assemble a multidisciplinary team of experts who are aware of both the problems that can occur at home with IV therapy and the criteria that must be met before a patient is accepted. In the case of a hospital inpatient, we would require that this assessment occur before the patient is discharged from the hospital.

The home IV provider would furnish services only to a patient whose needs can be met by these services. In the case of a hospital inpatient, the home IV provider must determine that the patient is medically suitable for their program of home IV therapy and services. We believe and emphasize that proper patient selection is necessary for a safe, effective program of home IV therapy. In considering the home care alternative, it is important for the home IV provider to assess the degree of self-care that is feasible, that is, whether the patient will actually be able to administer the medication, and if not, whether the patient would have available the aid that would be necessary from a caregiver. We believe that patient compliance with the necessary elements of successful home IV therapy is an important factor in allowing the patient to remain at home and not be readmitted to a hospital.

1. Standard: Medical Criteria

We are proposing that in order to be selected for home IV drug therapy, a patient must meet certain medical criteria. We would require that the patient—

- Be under the care of the referring physician who either prescribes the home IV drug or establishes the plan of care for the services, or both, and, therefore, monitors the progress of the home IV drug therapy;
- Have a clinical status that allows IV drugs to be safely administered at home;
- Have body sites available for peripheral IV catheter or needle placement or have a central venous catheter or other central venous access device; and
- For medical or therapeutic reasons, be unable to take the prescribed IV medication orally.

2. Standard: Nonmedical criteria

In addition to the medical criteria, we are proposing that the patient must meet certain nonmedical criteria. It is necessary to assess the patient's nonmedical condition because we believe that an uncooperative patient or one who lacks certain skills would not be able to comply with a home IV regimen successfully. Thus, we would require that the patient—

- Be capable of performing self-administration of drugs and self-care after adequate patient education (for example, be able to learn aseptic technique and heparin lock maintenance and be able to read the drug labeling) or have a primary caregiver who can perform these tasks;
- Be motivated to use home IV drug therapy services;
- Be psychologically stable (that is, the prospect for adherence to a disciplined medical regimen is realistic); and
- Have a home environment that is conducive to the provision of home IV drug therapy services (that is, a clean home with electricity, water, a telephone, refrigeration, and enough space to support home IV drug therapy services).

We are proposing these requirements under the authority of section 1861(jj)(3)(x) of the Act, which states that the Secretary may determine requirements for home IV providers that are necessary to assure the safe and effective provision of home IV drug therapy. We believe that home IV drug therapy could not safely and effectively be furnished to patients who do not meet the above nonmedical criteria.

E. Plan of Care and Physician Review

Section 1861(jj)(1)(C) of the Act requires that home IV drug therapy services be furnished under a plan established and periodically reviewed by a physician. Therefore, we propose that an individual plan of care be developed by the patient's referring physician for a patient to receive home IV drug therapy services. The patient's individual plan of care would be based on initial and ongoing individualized patient assessments by the patient's physician. The plan of care would be reassessed and updated when the patient's physician determines an update is necessary but, as stated below, at least once every 30 days. (We expect that generally the referring physician would also be the patient's physician while receiving home IV drug therapy. However, there may be situations in which this is not the case. For example, a patient may have been an inpatient in a specialty hospital in one city and then referred for home IV drug therapy in the patient's home that is in another city.)

1. Standard: Development of a plan of care

A requirement would be imposed that a plan of care be developed for each patient in accordance with the following provisions:

- The patient's referring physician develops the individual's plan of care.
- The home IV provider assesses the patient and, if the patient is accepted, implements the plan of care as written by the referring physician.
- The plan of care is based on the referring physician's initial and continued patient assessments.
- The plan of care is reassessed by the referring physician as needed but at least once every 30 days.
- The plan of care includes at least the following current information about the patient and the home IV drug therapy services to be provided:

—Name, gender, age, and lean body weight.
—A narrative description of the appropriate diagnoses.
—Drug allergies or sensitivities.
—Current drug therapy, including nonprescription drugs and home remedies.
—The goal of home IV drug therapy services for the patient including duration of IV drug therapy services.
—The drugs to be furnished and the method used to furnish the drugs by the home IV provider including the following:
  +Amount of dosage and timing of administration.
  +Route of administration, that is, either peripheral or central venous line. (A peripheral line is the usual form of administering IV drugs through a surface vein. The needle must be changed every few days. A central line is inserted semipermanently only by a physician in a vein feeding the heart.)
  +Frequency of IV site monitoring.
  +Type of IV equipment, related supplies, and other equipment, and fluids to be administered.
—Physician identifier, date, and signature.

2. Standard: Physician review of plan of care

Various Medicare benefits require a physician to develop and review a plan of care. Generally, how often a plan of care is reviewed varies depending on the type of provider. Under current regulations, the plan of care of a patient receiving services furnished by an HHA must be reviewed at least once every 60 days (§ 405.1223(b)); however, we require that the plan of care for a hospice patient be reviewed at intervals specified by the physician (§ 418.58(b)). The difference in these requirements is specifically related to the medical condition and medical problems of the type of patient served by those providers and the needs of those patients; that is, hospice care is continuous whereas we do not expect that services provided by an HHA would ordinarily be continuous.

In keeping with this concept, we believe that a review of the plan of care for home IV drug therapy patients every 30 days would not be unreasonable. In addition, in a separate proposed rulemaking document, we would require that prescriptions for covered home IV drugs be written for an amount that ordinarily does not exceed a 34-day supply. Thus, the referring physician would review the prescription on a monthly basis. We believe that the referring physician should review the plan of care at the same time that he or she reviews the need for continued drug therapy.

We are proposing that the review of the plan of care by the referring physician meet the following requirements:

—At least once every 30 days, the physician reviews the patient's progress in attaining the objectives of the plan of care.
—This review is based upon appropriate information provided by health professionals, including information furnished by the home IV provider's registered nurse and pharmacist.

F. Central Clinical Records

This condition would implement the provisions of section 1861(jj)(3)(ii) of the Act, which require that home IV providers maintain clinical records on all patients including those who are not entitled to Medicare. In accordance with accepted principles of medical record practice, we propose to require that the home IV provider establish and maintain a clinical record for every individual receiving care and services. We would require that each clinical record be completely, promptly, and accurately documented, readily accessible, and systematically organized to ease retrieval and compilation of information.

1. Standard: Content

We propose the following:

- Each clinical record be a comprehensive compilation of medical and other data that contains sufficient information to identify the patient clearly and to justify the diagnoses and treatment.
- Entries in the clinical record be made for all services provided directly or under arrangements.
- Entries be made for each treatment performed and signed by the individual who provides the services.
- Documentation on each patient be consolidated into one clinical record that is required to contain the following information:

—Patient identification data.
—The initial patient assessment and subsequent reassessments.
—Current plan of treatment.
—Consent and authorization forms.
—Past and present pertinent medical history.
—Complete documentation of all services provided.
—Upon completion of treatment, a summary that includes patient status relative to goal achievement, prognosis, and future treatment considerations.

2. Standard: Retention and preservation.

Generally, the home IV provider would be required to retain clinical records for the appropriate time period provided below beginning with the date of the patient's last treatment. If the requirements of State law concerning retention of records are used, they must be requirements of the law of the State in which the services were provided to the patient. More specifically, we would require the following:

- The home IV provider must maintain clinical records for the time period provided under the appropriate State law.
- In the absence of an appropriate State law, the home IV provider must maintain clinical records for the time period provided under the appropriate statute of limitations concerning medical malpractice in the State.
- If there is no appropriate State law or State statute of limitations concerning medical malpractice, the home IV provider must maintain clinical records for at least 5 years.
- In addition to all other requirements for maintaining clinical records, in the case of home IV drug therapy services furnished to a minor, the home IV provider must maintain clinical records for at least 3 years after the individual attains the age of majority under State law.

3. Standard: Protection of information

We are proposing that the home IV provider be required to safeguard the clinical record against loss, destruction, or unauthorized use. The home IV provider would be required to have procedures that govern the use and removal of records and the conditions for release of information to authorized individuals. The home IV provider would also have to ensure that unauthorized individuals cannot gain access to or alter patient records. The patient's written consent would have to be obtained before release of any information not required to be released by law. Original records would be released by the home IV provider only in accordance with Federal or State laws, court orders, or subpoenas.

4. Standard: Patient access

In § 485.125(d), we would specify that the home IV provider permit each patient (or his or her legal representative) to inspect or obtain copies of his or her clinical records within 48 working hours after the provider receives a written request.

G. Core Staff and Services

In complying with the authority of section 1861(jj)(3)(x) of the Act under which the Secretary may require such other requirements as are necessary to assure the safe and effective provision of home IV drug therapy services and the effective administration of the home IV drug therapy benefit, we carefully reviewed the available information on current home IV drug therapy practices. It is clear that home IV drug therapy services have become increasingly sophisticated during the approximately 10 years that home IV therapy has been available. However, because Medicare beneficiaries often have several concurrent medical problems, they are often in need of long term, interrelated therapies. In addition, beneficiaries frequently have suffered a loss of visual acuity and manual dexterity, making them less clinically eligible for a course of home IV therapy that involves self-administration of drugs and the use of sophisticated equipment. Also, in many cases, the available caregiver would also be an elderly person for whom the complexities of home IV drug therapy could be very difficult to confront.

It is also true that, although many home IV providers have established safeguards for home IV therapy administration, their experience with Medicare beneficiaries may have been limited because home IV drug therapy has not been a covered service. Accordingly, we believe that we have ample justification for establishing conditions of participation that will help to assure the safe and effective provision of home IV drug therapy services.

Existing entities that furnish home IV drug therapy currently provide different types of IV drug therapies such as antibiotics, analgesics, and hydration and electrolyte replacement. In addition, some entities offer heparin infusion (blood clotting care) and aminophylline therapy (asthma therapy). All of these IV drug therapies may cause one or more side effects such as rash, diarrhea, fever, kidney toxicity, blood coagulation problems, and phlebitis (inflammation of the vein). In addition, the provision of IV drug therapies may cause the possibly life threatening conditions of anaphylaxis (allergy reaction), IV infiltration (leaking of fluid into surrounding tissues), and site infection.

All home IV drug therapies involve the separate functions of mixing and administering potentially dangerous drugs. Each of these functions plays a critical role in the safe administration of home IV drug therapy. Thus, we do not consider the home IV drug therapy benefit as being either a nursing benefit or a pharmacy benefit but rather a benefit that requires a team effort involving safe and effective patient care. We believe that such an effort is necessary to maintain patient safety and is the key to successful home IV drug therapy.

To take into account patient safety, we had to consider both existing and potential complications for the beneficiary. Complications may be related to disease progression, combinations of disease processes and their therapies, and the aging process in general. Psychoses or neuroses of a patient can present an additional challenge in gaining appropriate patient involvement. In addition, patient safety might be barred by noncompliance with the drug therapy regimen, poor living conditions, or high stress levels of both a patient and the spouse or other caregiver, or a combination of these factors.

In reviewing the available literature, we had to identify potential side effects, complications, and risks of the therapy and determine the probability and severity of each of these harmful effects. For example, for each possible complication, we had to consider whether the complication could cause reversible damage, permanent damage, or threaten the life of the patient. In addition, we considered whether the onset of side effects or complications might be sudden or gradual. We also had to consider how the beneficiary or caregiver could obtain immediate help from the home IV provider if he or she has a problem with the infusion.

In reviewing various options under the provisions of the law, we had to consider whether it would be safe for one organization to deliver the drugs, another to provide nurses, and a third to provide equipment. We considered the difficulties that might arise if the beneficiary or the caregiver is required to call all three organizations to resolve a problem. We considered how long it might take to get a problem resolved if the beneficiary had an infusion problem at midnight and how the beneficiary would know whom to call in an emergency or for a routine question.

Once we collected factual information about home IV drug therapy, we examined factors that could either increase or decrease the level of safety. It appears to us that home IV drug therapy is potentially as dangerous as it is helpful. The potential side effects of the therapy are so great that we are sure, as we noted earlier, that Congress did not intend for a "store front operation" or a "billing operation" to qualify as a home IV provider. That is, we do not believe Congress intended that a business that acts strictly as an answering service and a billing agent while contracting out all the home IV drug therapy services should be a Medicare home IV provider.

Although some existing entities that furnish home IV drug therapy contract out one or more of the different services they provide, other entities furnish all of the services themselves. While we believe that having one entity furnishing all the drug therapy services would be the most safe and effective method and the easiest configuration with which our beneficiary population could work, we are precluded by sections 1861(jj) (1)(B) and (3)(i) of the Act from requiring that all services to beneficiaries be provided by individuals directly employed by the home IV provider.

As discussed earlier, in providing that an entity wishing to qualify as a home IV provider must be capable of providing or arranging for the provision of the nursing, pharmacy, and related services necessary to conduct an intravenously administered drug regimen in the home safely and effectively, section 1861(jj) (3)(i) of the Act specifically cross-refers to section 1861(jj)(2) of the Act. Section 1861(jj)(3) of the Act then goes on to list several functions that the entity itself must be able to perform or to assure their performance. Thus, we believe these provisions of the Act draw a distinction between the home IV drug therapy services that involve direct patient care and those that relate to oversight of patient care and supervision of the persons directly furnishing the patient care. Section 1861(jj)(2) of the Act defines home IV drug therapy services that are to be "furnished to an individual" in his or her home as "such nursing, pharmacy, and related services * * * as are necessary to conduct safely and effectively an intravenously administered drug regimen * * * ." It is these direct patient care services (for example, nursing visits and mixing and delivery of the IV drugs) that sections 1861(jj) (1)(B) and (3)(i) of the Act state may be furnished under arrangements. (We note that when covered services are furnished "under arrangements", Medicare payment to the provider discharges the beneficiary's obligation to pay for those services furnished by the outside source under contract with the provider. See section 1861(w)(1) of the Act.)

On the other hand, certain functions, some of which have already been discussed above, are not subject to the "under arrangements" language of the statute. These functions are set forth in section 1861(jj)(3) of the Act and pertain not to direct care services to beneficiaries but to administration, management, and quality control issues. We believe that the responsibility for these functions must rest with the home IV provider itself. That is, the provider must perform these functions rather than make arrangements with an outside source to perform them. These functions are the following:

- Maintenance of clinical records on all patients (section 1861(jj)(3)(ii) of the Act).
- Adherence to written protocols and policies concerning provision of items and services (section 1861(jj)(3)(iii) of the Act).
- Assurance of the availability of services, as needed, 7 days a week on a 24-hour basis (section 1861(jj)(3)(iv) of the Act).
- Coordination of all services (that is, nursing, pharmacy, and related services) with the patient's physician (section 1861(jj)(3)(v) of the Act).
- Performance of a quality assessment and assurance program, including drug regimen review and coordination of patient care (section 1861(jj)(3)(vi) of the Act).
- Assurance that only trained personnel provide covered home IV drugs, and any other service that necessarily entails training, to ensure safety (section 1861(jj)(3)(vii) of the Act).
- Assumption of responsibility for the quality of those services furnished to patients under arrangements (section 1861(jj)(3)(viii) of the Act).
- Licensure of the home IV provider to the extent required by States in local law (section 1861(jj)(3)(ix) of the Act).
- Compliance with other safety and effectiveness requirements as set forth by the Secretary (section 1861(jj)(3)(x) of the Act).

We note that by stating that coordination of services with the patient's physician is the function of the home IV provider, we do not intend to diminish the responsibility in this respect of an organization under contract with the home IV provider. For example, nurses employed by an organization that is furnishing nursing services under contract with a home IV provider would still be obligated, as they would under routine circumstances and prevailing standards of patient care, to coordinate the particulars of patient care with the attending physician. In this context, it is the oversight function of ensuring that such coordination is routinely and effectively conducted that would be the responsibility of the home IV provider.

In addition, the home IV provider would itself have a role in coordination of patient care with the physician in terms of consultation about the plan of care and its periodic review and updating. Similarly, an organization under contract with a home IV provider would normally be responsible for the training of its own personnel who, for example, deal with the drugs to be furnished to beneficiaries or conduct nursing visits, but it is the obligation of the home IV provider to verify and ensure that these personnel are adequately trained. In other words, the requirement that the home IV provider assure that only trained personnel furnish covered home IV drugs (section 1861(jj)(3)(vii) of the Act) applies to both its own employees and those of an organization under contract. The provider would also be required to maintain professional, financial, and administrative responsibility for services furnished under arrangements.

Accordingly, as we discuss in greater detail below, we believe that a home IV provider must directly employ core staff to perform administrative, quality assurance, and other oversight and supervisory functions necessary for the safe and effective provision of the home IV drug therapy benefit. In addition, the home IV provider must also either furnish directly (through its own facilities and employees) or through others under arrangements the patient care services and home IV drugs necessary for a safely and effectively administered home IV drug regimen.

We concluded that we should propose, under the authority of section 1861(jj)(3)(x) of the Act, which gives the Secretary broad discretion to add conditions necessary for safe and effective administration of the home IV benefit, that a home IV provider must, at a minimum, employ directly on a full-time basis core staff of either a nurse or a pharmacist.

In making this proposal, we draw a distinction between what we have identified as the core staff requirement and the core services requirements reflected in the law (that is, those functions that must be performed by the home IV provider). The key point is that the home IV provider would be responsible, through its directly employed nurse or pharmacist, for the oversight and supervisory functions discussed above. In addition, the home IV provider would be required to assure that the needs of patients, both routine and urgent, ranging from routine or emergency inquiries to the actual furnishing of patient care services, are met on a 24-hour-a-day, 7-day-a-week basis either through its own employees or those furnishing services under arrangements, or through a combination of professionals directly employed and under contract either on duty or on call.

For example, we view this approach working as follows. A home IV provider directly employs a pharmacist who participates, along with other provider employees, in the oversight functions of coordination of patient care, conducting a quality assurance program and drug regimen review for all patients, and other required core service tasks. The pharmacist also helps in addressing patient inquiries during the normal work day and is periodically on call for this purpose after the work day ends. The home IV provider also has arrangements with outside sources to furnish some or all of the necessary patient care related pharmacy and nursing services. In this case, the home IV provider would be responsible for ensuring the quality of the services furnished, making certain that the pharmacy under contract and the organization furnishing the nursing services comply with the requirements set forth in the condition of participation, and verifying that all pharmacists and nurses employed by the organizations working under arrangements meet the professional standards and qualifications established in the conditions of participation.

The home IV provider would also be responsible for ensuring that staff are available to furnish phone coverage to handle patient inquiries 24 hours a day, 7 days a week. Furthermore, as necessary, a nurse furnishing services under arrangements might contact the patient's physician for coordination of care, but the home IV provider would be responsible for keeping abreast of these contacts for overall coordination of patient care among the physician and the nurses and pharmacy working under arrangements, as well as for overall coordination of the patient's plan of care and its timely updating and review by the physician.

There are several alternatives to the core staff requirement of a nurse or pharmacist that we considered:

- One such alternative would be to specify that the home IV provider directly employ the number of full-time equivalent (FTE) nurses *and* pharmacists necessary to perform around the clock core service supervisory and consultative nursing *and* pharmacy functions. Our initial supposition was that this requirement could be met with as few as 2.5 FTE nurses and 2.5 FTE pharmacists.
- Second, we considered requiring that a home IV provider must directly employ at least one full-time nurse *and* one full-time pharmacist whose services could be supplemented as necessary by other directly employed nurses or pharmacists to ensure around the clock coverage.
- Third, we considered stating that each provider could determine the number of core staff it needs; that is, that the home IV provider would only be required to employ directly, as core staff, a sufficient number of nurses and pharmacists to be able to respond to patients at all times.

We are specifically interested in receiving suggestions and comments from the public about these or other alternatives to the single directly-employed nurse or pharmacist requirement. We emphasize that our interest in this regard is protecting the health of beneficiaries and providing for their safety to the greatest extent that is reasonably possible without putting undue staffing burdens on potential home IV providers.

1. Standard: Core Staffing Requirements

To reiterate, we propose that a home IV provider be required to employ directly, at a minimum, either a full-time nurse or a full-time pharmacist. The provider may also employ additional pharmacists and nursing staff as it chooses, either part-time or full-time.

As we have stated, we believe that Congress did not intend for a billing operation to qualify as a home IV provider, that is, an answering service or business office that contracts out all the work. Thus, we believe this core staff requirement is necessary.

2. Standard: Core Services Requirements

The home IV provider would be required to ensure that its employees perform the following functions:

- Developing, supervising, and coordinating all activities of nursing and pharmacy services including assuming responsibility for assuring that only qualified individuals administer home IV drugs.
- Consulting with pharmacists involved in patient care to coordinate the patient's plan of care with the patient's physician.
- Performing a quality assessment and assurance program including drug regimen review.

3. Standard: Twenty-Four-Hour Availability of Services

This standard would implement the provision of section 1861(jj)(3)(iv) of the Act that requires that home IV providers make needed services available, as needed, on a 24-hour-a-day, 7-day-a-week basis.

A home IV provider would be required to meet the following time requirements related to care of the patient:

- The home IV provider must make available routinely or urgently needed nursing, pharmacy, and related services and home IV drugs and supplies 24 hours every day.
- The home IV provider must be accessible to the patients at all times. If a patient or caregiver telephones the home IV provider with a problem relating to either the administration of a drug or the malfunctioning of equipment, the home IV provider must be able to make telephone contact with the patient or caregiver within 10 minutes, and the provider must be able to resolve the patient's problem expeditiously within periods of time contingent upon the nature of the problem (that is, mechanical or medical). For example, we believe that a period of 90 minutes should be adequate to resolve a problem and provide for the needs of a patient, but we specifically request comments about appropriate limits and preferred methods for establishing limits.

We believe that the relatively short time frames we are proposing to require for dealing with patient problems are reasonable given the medical necessity of administering completely an IV drug on a timely basis. Because of the burden that these requirements could place on a home IV provider, we are specifically interested in public comments concerning any reasonable alternatives that would ease the burden on the providers but at the same time, meet the needs of the patient.

- In an emergency, the home IV provider must be able to deliver IV drugs to the patient at least 30 minutes before the drugs are scheduled for use. We are proposing this requirement for several reasons. Elderly people (that is, individuals 65 years of age and older), when compared to other individuals, have decreased lean body mass, decreased total body water, decreased serum albumin and, in proportion, increased body fat. Because of these factors, the percentage of "free drug" circulating in their bodies is increased. Thus, the dose and the appropriate dose interval prescribed by the physician must be carefully followed to ensure effective use of a drug, as well as to decrease morbidity and additional cost from adverse reactions. Therefore, if a patient needs a drug on an emergency basis, we believe the provider must be capable of responding timely. Since it is common practice to keep IV medications either refrigerated or frozen, the drug would have to be kept at room temperature for a certain amount of time before infusion. We believe that 30 minutes is an appropriate amount of time, and that is why we are proposing that time requirement.
- The home IV provider must furnish services in a manner consistent with acceptable standards of practice.

H. Nursing Services

Under this proposed rule, the home IV provider would be responsible for furnishing nursing services using only registered nurses (except, as discussed below, with respect to those States in which physicians or physician assistants may furnish IV therapy related nursing services). In addition, the provider would also have to ensure the following:

- Nursing services are directly supervised by the home IV provider and are made available to ensure that the needs of the patients are met.
- Patient care responsibilities of the nurses are specified.
- All nurses employed directly by the home IV provider or whose services are obtained under arrangements with a contractor meet the following requirements concerning education, experience, and proficiency:

—Each nurse must have been educated in the principles and practices of infusion therapy and cardiopulmonary resuscitation.

—Each nurse must have at least 2 years experience in patient assessment and infusion therapy.

—Each nurse must be proficient in all clinical aspects of IV therapy with validated competency in clinical judgment and practice demonstrated by education credentials or job experience. For example, each nurse must be able to access peripheral veins and recognize medication and solution incompatibilities.

—Each nurse must be able to perform the following procedures:

+Interpret the physician's order for IV therapy and administer IV medications as ordered.

+Perform venipuncture and insertion of all types of needles and catheters commercially available (excluding the insertion of subclavian, jugular, and cut-down catheters).

+Prepare IV solutions with the addition of medications in the absence of admixture services.

+Initiate, monitor, and terminate IV solutions and additives.

+Set the flow rates, as established by the physician, for all IV solutions and medications.

+Maintain and replace sites, tubing, and dressings in accordance with established policy.

+Draw blood.

—Each nurse must have a thorough knowledge of and proficient technical ability in the use of the specific type of IV equipment to be used so that the nurse is able to evaluate the equipment and identify when maintenance would be necessary.

—Each nurse must be able to observe and assess all significant reactions related to IV therapy and initiate appropriate nursing interventions. All significant findings must be reported to the physician.

—Each nurse must follow established infection control and aseptic practices.

—Each nurse must document his or her actions associated with the preparation, administration, and termination of all aspects of IV therapy.

We are proposing this condition under section 1861(jj)(1)(B) of the Act under which the home IV provider furnishes directly, or arranges for the furnishing of, nursing, pharmacy, and related services as described in section 1861(jj)(2) of the Act and under section 1861(jj)(3)(x) of the Act under which the Secretary is authorized to make additional requirements as necessary to assure the safe and effective provision of home IV drug therapy services.

We would allow a registered nurse, a physician, or, in States in which State medical practice acts permit physicians and physician assistants to do so, a physician assistant under the supervision of a physician to furnish nursing services in connection with home IV drug therapy services. (In such States, the references found in this proposed rule to "registered nurse" or "nurse" are read to include physician assistants.) Services performed by a physician or physician assistant could not be billed for separately. (That is, as discussed below, the nursing services furnished in connection with home IV drug therapy by these individuals would be paid for under the fee schedule.)

We contacted the National Council of State Boards of Nursing to determine whether States allow licensed practical nurses or other allied health professionals (other than physician's assistants) to administer IV drug therapy. Based on information obtained from this organization, we learned that, except for some limited exceptions, State laws allow only registered nurses to administer IV drug therapy. There are currently approximately three States that allow a licensed practical nurse to disconnect an established IV line. Several States permit a licensed practical nurse to hang a clear IV bottle. However, even these States require the direct supervision of a registered nurse when these services are performed by a licensed practical nurse. In addition, none of the entities that we contacted that currently furnish home IV drug therapy allow anyone but a registered nurse to furnish nursing services connected with IV drug therapy. Therefore, our proposal not to allow licensed practical nurses or other allied health professionals other than physician's assistants to furnish the nursing services associated with home IV drug therapy is, in general, consistent with established State laws on the provision of IV drug therapy.

As mentioned above, as part of a separate rulemaking document, we are proposing that payment for nursing services under the home IV drug therapy benefit would be made as part of a fee schedule that would cover the provisions of all home IV drug therapy services. We reiterate that, if a physician or a physician's assistant does perform services, these services could not be billed for separately because they would be taken into account in the home IV drug therapy fee schedule.

I. Pharmacy Services

As with our proposals concerning nursing services, we are proposing the following condition concerning the provision of pharmacy services under section 1861(jj)(1)(B) of the Act, which states that the home IV provider directly provides or arranges for nursing, pharmacy, and related services, and section 1861(jj)(3)(x) of the Act, which gives the Secretary the authority to make additional requirements he or she deems necessary to assure the safe and effective provision of home IV drug therapy services. Under this condition, we would specify that the home IV provider must ensure that a registered pharmacist is responsible for the purchasing, preparation, safe administration, and clinical monitoring of drugs.

1. Standard: Pharmancy Services Management

The home IV provider would be required to manage its pharmacy services, or ensure that pharmacy services obtained under arrangements are furnished, in accordance with the following provisions:

- The policies and procedures of the home IV provider include provisions designed to ensure that pharmacy practice at all times is consistent with applicable law and regulations governing professional licensure and operation of pharmacies.
- The home IV provider maintains and makes available up-to-date pharmaceutical references that include a copy of HCFA's current list of covered home IV drugs (that is, HCFA's list of covered home IV drugs as published in the **Federal Register**) and official pharmaceutical compendia, periodicals, and current editions of texts and reference books covering pharmaceutical practice as it relates to patient care.
- The home IV provider maintains patient profiles that includes—

—The patient name, age, and lean body weight;

—The patient's diagnosis or diagnoses;

—Clinical information relating to the patient's initial and ongoing home IV drug therapy;

—Current drug therapy provided to the patient including nonprescription and home remedy products; and

—A description of the patient's drug allergies or sensitivities.

- A pharmacist reviews each prescription order before a drug is dispensed to ensure that the drug is a covered home IV drug and to ensure that the correct drug is dispensed to the patient.
- A pharmacist and the patient's physician determine the appropriate lab monitoring schedule for monitoring the patient through laboratory testing. This schedule must include a list of the laboratory tests that are to be performed, identification of the Medicare-approved laboratory that will perform the tests, the frequency of the tests, and the schedule to be followed for obtaining the results.
- A pharmacist supervises support personnel to ensure adequate quality of the drugs and pharmaceutical supplies.

2. Standard: Storage, Equipment, and Preparation Area

- The home IV provider would be required to ensure that drugs, supplies, and equipment are maintained either in its own pharmacy or in a pharmacy furnishing services under arrangements in accordance with the following procedures:

—Drugs must be stored separately from other materials under proper conditions of sanitation, temperature, light, moisture, ventilation, and security.

—Areas used in the preparation of sterile products must be constructed to minimize opportunities for particulate and microbial contaminations and must be separate from areas used in the preparation of nonsterile products.

—Work surfaces are kept free of equipment, supplies, records, and labels unrelated to the preparation of a given prescription.

—Work surfaces and equipment must be disinfected after preparation of each prescription.

—Clean benches or laminar flow hoods must be used in the preparation of IV drugs and must be inspected at least annually in accordance with standard inspection practice.

—Both ingredients and final products must be inspected for the presence of inappropriate particulate matter or signs of deterioration or microbial contamination. The equipment necessary for such an inspection must be maintained by the pharmacy.

—Drugs must be kept in a locked storage area.

—Each dosage unit of both a cytotoxic drug and a Schedule II controlled drug must be accounted for in a distribution log.

- Unless contraindicated, an appropriate air-eliminating filter is employed in the home for delivery of IV fluids. We are proposing that an appropriate air-eliminating filter be used to protect the patient from particulates, possible air emboli, pathogenic bacteria (micro-organisms), and the risks of IV-related complications and sepsis.
- Mislabeled or otherwise unusable drugs are not made available for patient use.
- Outdated drugs are destroyed using accepted methods of disposal.

We welcome public comment on the above standards. In particular, we are interested in receiving comments regarding the marginal effectiveness in preventing IV drug contamination of requiring laminar flow hoods over clean work benches. We would be interested in any data reflecting differences in: (a) Expected levels of drug contamination; and (b) Equipment acquisition costs.

3. Standard: Drug Labeling

We would specify that the label on any IV drug or solution that has been dispensed to a patient by the provider or by a pharmacy furnishing services under arrangements contain at least the following information:

- The name, address, and telephone number of the dispensing pharmacy and the telephone number of the home IV provider if the pharmacy services are furnished under arrangements.
- The dates of both preparation and expiration of the drug.
- The pharmacy's identifying serial number for the drug order or prescription.
- The full name of both the patient and prescribing physician.
- The name of the drug, its strength, and the amount dispensed.
- The directions for use including the scheduled date, time, and rate of administration and appropriate space for the patient or caregiver to add the date and time the IV is started. The directions must include information that the patient is to completely use or discard IV fluids within 24 hours of mixing or unfreezing a mixture.
- The directions for storage.
- Cautionary or accessory labels if appropriate.
- The lot number or control number of the batch from which the drug was obtained.

J. Patient and Caregiver Evaluations and Instructions

In general, home IV drug therapy programs are designed for patients whose referring physicians recommend home IV drug therapy. These patients may have started IV drug therapy in a hospital and are now ready to leave the hospital except for needing to continue a course of IV drug therapy. Although the referring physician may have recommended a patient for a course of home IV drug therapy, under proposed § 485.145 the home IV provider is responsible for accepting only those patients whose needs it can meet. Once it is determined that the patient meets all criteria for acceptance, the provider is responsible for assessing the adequacy of any training previously received and for furnishing any new or supplemental training the patient or caregiver may need. We believe that having a registered nurse teach the patient or caregiver or both individuals, IV therapy care helps to ensure safe provision of IV drug therapy for the patient at home. We are proposing these standards under the authority provided in section 1861(jj)(3)(x) of the Act under which the Secretary is authorized to make additional requirements to assure the safe and effective provision of home IV drug therapy services.

As discussed above, we believe the patient selection is critical in ensuring a successful outcome in home IV drug therapy. However, once the patient is selected, it is just as critical that the home IV provider's program for patient and caregiver education be comprehensive. A selected patient or caregiver must undergo a training program for the purpose of learning to administer potent drugs, generally antibiotics, intravenously. We believe that a patient or caregiver must be able to demonstrate proficiency in home IV drug therapy care before discharge from the hospital. Hospitals are currently doing this training and we expect them to continue. We are assuming continuity of this responsibility and are using it as a basis for our general approach to coverage and payment policies. This responsibility for patient training while in the hospital is required under § 482.21(b) of the hospital conditions of participation under which a "hospital must have an ongoing plan, consistent with available community and hospital resources, to provide or make available social work, psychological, and educational services to meet the medically-related needs of its patients."

We would require that the patient or caregiver be supervised at home for the first infusion of the IV drug to verify the ability of the patient or caregiver to transfer learning from the hospital setting to the home setting. Supervision of the first infusion at home would also allow the home IV provider staff to provide additional training in the home, as necessary. The IV therapy nurse would be required to provide instructions in heparin lock care and administration of the IV medication. A patient who requires a Hickman or Broviac catheter (that is, a central line) must be provided with instructions in catheter care and infusion care. If necessary, a second training session for a patient who started IV drug therapy in a hospital would be appropriate. We expect that a patient who starts IV drug therapy at home would need three or four training sessions.

We would specify that each patient receive a set of written and illustrated instructions along with a telephone number of the home IV provider, which must be staffed 24 hours each day, because, as provided in proposed § 485.130(a)(3), the patient or caregiver must be able to make contact with either a nurse or a pharmacist within 10 minutes of his or her initial telephone call.

K. Protocols and Policies

Section 1861(jj)(3)(iii) of the Act provides that a home IV provider must adhere to written protocols and policies concerning the provisions of home IV drug therapy services. We are proposing that the IV provider adhere to the following procedures and have written protocols and policies with respect to the provision of home IV drug therapy items and services.

1. Standard: First Dose

Based on our research, we believe that the first dose of any intravenous medication to be provided outside of an institutional setting should be given under direct physician or home IV provider's nurse supervision. For example, if a patient was receiving tetracycline intravenously and then the physician ordered the IV medication to be changed to ampicillin, we believe that the first dose of the ampicillin needs to be given under the direct supervision of a physician or nurse.

We are proposing that if this supervision is provided by a physician it could be furnished as a physician service in the physician's office, in the outpatient department of a hospital, or even in the patient's home. If the first dose is administered at home under the direct supervision of the home IV provider's nurse, the first dose would be considered a home IV drug therapy service. After the first dose is administered, we are proposing that the supervising nurse or physician remain in attendance with the patient for a length of time sufficient to make sure that the patient is stable. Under this proposed rule, resuscitation medication and equipment to treat anaphylaxis must be readily available.

Since we are concerned about creating a possibly unnecessary delay between the time a physician decides that an IV medication should be changed and the time at which the new IV medication can be administered, we are proposing that a first dose of a different IV medication could be administered by registered nurse. However, we are specifically seeking public comment about the safety of this proposal, that is, whether it is medically acceptable to allow the first dose of a different IV medication to be given without a physician in attendance. If a commenter believes that it is necessary for a physician to be present during the first dose of an IV medication furnished outside of an institution, we are

interested in receiving information about the specific IV medications that the commenter believes could not be started safely without a physician present.

2. Standard: Venipuncture and Catheter Care

We are proposing that a registered nurse rotate the peripheral injection site at least every 3 days to reduce the possibility of phelebitis. If applicable, the nurse must inspect the central line catheter site at least once each week. Aseptic techniques would be practiced during all venipuncture, dressing changes, catheter care, and assembly of IV infusion systems for both peripheral and central line patients.

For infection control purposes, we would require that the home IV drug provider make sure that the patient or the caregiver changes the IV administration set at least every 24 hours and the IV dressings at least every 48 hours or immediately if soiled or wet. (An administration set usually consists of a length of tubing that connects the source of the IV drug to the needle.) The air elimination filter would be routinely changed by the nurse.

3. Standard: Quality of the Air Elimination Filter and Sterility of the Catheter

For a sample of patients, the nurse would be required to package air elimination filters that have been removed from IV tubing and immediately send them to an independent laboratory for analysis of particulate matter and bacterial and fungal contamination. Also, on a sample basis, the nurse would package and send IV catheters that have been removed from patients to a laboratory for analysis of sterility.

In addition, we would specify that the home IV provider must keep copies of laboratory results on the testing of both the air elimination filter and the catheter that must be made available for review on request.

4. Standard: Drug Therapy Review

We are proposing that the pharmacist and nurse review the combination of drugs and equipment for appropriateness before drug therapy is initiated. In addition, the pharmacist would be required to conduct ongoing review (at least once every 3 days) to evaluate the effectiveness of the drug therapy. We would require that he or she then inform the physician of his or her findings as necessary. At a minimum, we would require that this review evaluate the following:

- The therapeutic appropriateness of the choice of drugs for the patient and the drug regimen (including therapeutic duplication of drugs).
- The effectiveness of the dosage, frequency, and route of administration.
- The patient's adherence to the drug regimen.

5. Standard: Patient Rights and Responsibilities

Because the patient's care is usually continuous in nature, we propose to require that the home IV provider ensure that the following conditions concerning the rights and responsibilities of patients are met.

- The home IV provider begins treatment of a patient only if the home IV provider is capable of furnishing needed care at the level of intensity required by the condition of the patient.
- Each patient receives care appropriate to his or her needs in a timely manner.
- The home IV provider informs the patient in a timely manner of the need for transfer to another medical entity or level of care and of any appropriate alternatives.
- If the home IV drug therapy is to end without transfer to another medical entity, the home IV provider informs the patient in a timely manner of the impending discharge, continuing care requirements, and other available services, if needed.
- The home IV provider honors a patient's rights and informs a patient of his or her responsibilities, if any, in the care process. The rights and responsibilities are clearly stated in materials or brochures distributed to a patient upon admission into the home IV drug therapy program.
- The home IV provider sets up procedures to deal with patient grievances and patient-recommended changes in policies and services without coercion, discrimination, reprisal, or interruption of services. The home IV provider informs the patient at the beginning of IV drug therapy about these procedures for making, reviewing, and resolving complaints.

L. Quality Assurance

Section 1861(jj)(3)(vi) of the Act provides that a home IV provider is required to conduct "* * * a quality assessment and assurance program, including drug regimen review and coordination of patient care." We are proposing that a home IV provider maintain an ongoing quality assurance program designed for monitoring patient care objectively and systematically, evaluating the quality and appropriateness of patient care, resolving identified problems, and pursuing other opportunities to improve patient care.

1. Standard: Program Objectives

We would require that, through an ongoing, planned, and systematic process, the home IV provider monitors and evaluates the quality and appropriateness of patient care, including the performance of employees and other personnel who furnish services under arrangements with the home IV provider.

We propose that the home IV provider include at least the following in a written plan:

- Scope and objectives of the quality assurance activities.
- Activities identified for monitoring and evaluation.
- Methods for implementing the monitoring and evaluation activities and for reporting the results.
- Mechanisms for taking follow-up action.
- The responsibility of staff for each activity in the quality assurance program.

2. Standard: Patient Care

We would require that the home IV provider monitor and evaluate the quality and appropriateness of patient care, including identification of important aspects of care or service that focus on high-risk, high-volume, or problem-prone activities. Thus, the home IV provider would be required to collect data on the following:

- Length of home IV drug therapy by diagnosis and treatment.
- Incidences of rehospitalization and the cause of rehospitalization.
- Incidences of—

—Phelebitis;
—Infiltration;
—Site infection; and
—Other infection.

- Hydration and nutritional status (including sudden or large weight loss, loss of appetite, or reduction in serum albumin level to a subnormal level).

We propose that the data collected by the home IV provider be reviewed and analyzed at least once annually to determine the frequency of negative outcomes, to ascertain whether corrective action was taken immediately in cases of negative outcomes, and whether negative outcomes were analyzed as soon as possible to evaluate the effectiveness of the chosen corrective action. We would expect that such analyses would result in necessary changes to recommended courses of action so that recurrences of negative outcomes would be reduced.

3. Standard: Patient Satisfaction

We would use patient satisfaction as an indicator of quality. The provider would be required to determine from the patient that—

- Drugs and IV equipment were delivered timely to the patient.
- The patient could read the preparation and expiration dates on the drug labels.
- A nurse visited any patient with a peripheral IV catheter placement every 3 days and rotated the peripheral IV injection site.
- A nurse visited any patient with a central line at appropriate intervals for monitoring.
- Procedures have been established to enable patients to make complaints for which the home IV provider finds acceptable solutions and keep a record of the complaints and solutions.

M. Infection Control

Under this proposed rule, we would require that a home IV provider develop infection control procedures to be used in connection with the provision of services. These procedures must concern at least personal hygiene, isolation precautions, aseptic procedures, staff health, including transmitted infections, and cleaning and sterilization of equipment.

Furthermore, we would specify that the home IV provider advise staff, patients, and caregivers of any necessary precautions, including infection control and personal hygiene and their responsibilities in the infection control program. Also required would be a system for evaluating, reporting, and maintaining records of infection related to the care or service provided among patients and, as appropriate, among staff.

III. Regulatory Impact Statement

Executive Order 12291 (E.O. 12291) requires us to prepare and publish an initial regulatory impact analysis for any proposed rule that meets one of the E.O. 12291 criteria for a "major rule"; that is, the proposed rule would likely result in—

- An annual effect on the economy of $100 million or more;
- A major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or
- Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

In addition, we generally prepare an initial regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that a proposed rule would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, we would treat all home IV therapy providers as small entities.

Also, section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis for any proposed rule that may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital with fewer than 50 beds located outside a metropolitan statistical area.

This proposed rule would implement the provisions of section 1861(jj) of the Act as enacted by section 203(b) of Public Law 100-360. Although we have made a concerted effort to estimate the effects of our proposal, we have found that we cannot estimate, with any degree of confidence, the incremental cost of this rule to entities that provide home IV drug therapy services. In light of the fact that many of the proposed requirements are both currently practiced and recommended by companies that currently provide home IV drug therapy services, we believe that this proposed rule would not have a significant economic impact on these companies. In addition, we believe that any effects that this proposed rule may have on small individual entities that furnish home IV drug therapy services, particularly those in rural areas would be minor.

For these reasons, we have determined that a regulatory impact analysis is not required. Further, we have determined, and the Secretary certifies, that this proposed rule would not have a significant economic impact on a substantial number of small entities and would not have a significant impact on the operations of a substantial number of small rural hospitals. Therefore, we have not prepared a regulatory flexibility analysis.

IV. Other Required Information

A. Paperwork Reduction Act

Proposed regulations at §§ 485.110, 485.120, 485.125, 485.135, 485.140, 485.145, 485.150, 485.155, and 485.16. contain information collection and recordkeeping requirements that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3511). Home IV drug therapy providers must provide documentation to assure compliance with the conditions of participation in order to receive Federal funds on behalf of Medicare beneficiaries. The total reporting burden for each home IV provider for this collection of information is estimated to be 3 hours per beneficiary treated during the first 12-month period that the rule would be in effect. A notice will be published in the Federal Register after OMB approval of these requirements is obtained. Organizations and individuals desiring to submit comments on the information collection and recordkeeping requirements should direct them to the OMB official whose name appears in the "ADDRESS" section of this preamble.

B. Public Comment

Because of the large number of items of correspondence we normally receive on a proposed rule, we are not able to acknowledge or respond to them individually. However, in preparing the final rule, we will consider all comments that we receive by the date and time specified in the "DATE" section of this preamble, and we will respond to the comments in the preamble of that rule.

List of Subjects

42 CFR Part 400

Grant programs-health, Health facilities, Health maintenance organizations (HMO), Medicaid, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 417

Administrative practice and procedure, Health maintenance organization (HMO), Medicare, Reporting and recordkeeping requirements.

42 CFR Part 485

Health facilities, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 489

Health facilities, Medicare.

42 CFR Chapter IV would be amended as set forth below:

CHAPTER IV—HEALTH CARE FINANCING ADMINISTRATION, DEPARTMENT OF HEALTH AND HUMAN SERVICES

I. Part 400 is amended as follows:

PART 400—INTRODUCTION; DEFINITIONS

A. The authority citation for Part 400 continues to read as follows:

Authority: Secs. 1102, 1871 of the Social Security Act (42 U.S.C. 1302, and 1395hh) and 44 U.S.C. Chapter 35.

Subpart B—Definitions

B. In § 400.202, the introductory text is republished and the definition of "Provider" is revised to read as follows:

§ 400.202 Definitions specific to Medicare.

As used in connection with the Medicare program, unless the context indicates otherwise—

* * * * *

"Provider" means a hospital, a skilled nursing facility, a comprehensive outpatient rehabilitation facility, a home health agency, a home IV drug therapy provider, or a hospice that has in effect an agreement to participate in Medicare, or a clinic, a rehabilitation agency, or a public health agency that has a similar agreement but only to furnish outpatient physical therapy or speech pathology services.

* * * * *

II. Part 417 is amended as follows:

PART 417—HEALTH MAINTENANCE ORGANIZATIONS, COMPETITIVE MEDICAL PLANS, AND HEALTH CARE PREPAYMENT PLANS

A. The authority citation for Part 417 continues to read as follows:

Authority: Secs. 1102, 1833(a)(1)(A), 1861(s)(2)(H), 1871, 1874, and 1876 of the Social Security Act (42 U.S.C. 1302, 1395l(a)(1)(A), 1395x(s)(2)(H), 1395hh, 1395kk, and 1395mm); sec. 114(c) of Pub. L. 97–248 (42 U.S.C. 1395mm note); 31 U.S.C. 9701; and secs. 215 and 1301 through 1318 of the Public Health Service Act, as amended (42 U.S.C. 216 and 300e through 300e–17), unless otherwise noted.

Subpart C—Health Maintenance Organizations and Competitive Medical Plans

B. Section 417.416 is amended by revising paragraph (b)(1) to read as follows:

§ 417.416 Qualifying condition: Furnishing of services.

* * * * *

(b) *Standard: Conformance with conditions of participation, conditions for coverage, and conditions for certification.* (1) Hospitals, SNFs, HHAs, comprehensive outpatient rehabilitation facilities, hospices, home IV drug therapy providers, and providers of outpatient physical therapy or speech pathology services must meet the applicable conditions of participation in Medicare, as set forth elsewhere in this chapter.

* * * * *

III. Part 485 is amended as follows:

PART 485—CONDITIONS OF PARTICIPATION AND CONDITIONS FOR COVERAGE: SPECIALIZED PROVIDERS

A. The authority citation for Part 485 is revised to read as follows:

Authority: Secs. 1102, 1124, 1136, 1154, 1861 (aa), (cc), and (jj), and 1871 of the Social Security Act (42 U.S.C. 1302, 1320a–3, 1320b–6, 1320c–3, 1395x (aa), (cc), and (jj), and 1395(hh).

B. A new Supart C is added to read as follows:

Subpart C—Conditions of Participation: Home IV Drug Therapy Providers

Sec.
485.100 Basis and scope.
485.101 Definition.
485.105 Condition of participation: Compliance with Federal, State, and local laws.
485.1110 Condition of participation: Governing body and administration.
485.1115 Condition of participation: Patient selection.
485.120 Condition of participation: Plan of care.
485.125 Condition of participation: Central clinical records.
485.130 Condition of participation: Core staff, core services, and full-time availability of patient care services.
485.135 Condition of participation: Nursing services.
485.140 Condition of participation: Pharmacy services.
485.145 Condition of participation: Patient and caregiver evaluations and instructions.
485.150 Condition of participation: Protocols and policies.
485.155 Condition of participation: Quality assurance.
485.160 Condition of participation: Infection control.

Subpart C—Conditions of Participation: Home IV Drug Therapy Providers

§ 485.100 Basis and scope.

This subpart sets forth the conditions that entities must meet to be approved for participation in Medicare as home IV drug therapy providers under section 1861(jj) of the Act and Part 489 of this chapter.

§ 485.101 Definition.

As used in this subpart, unless the context indicates otherwise, *"home intravenous (IV) drug therapy provider", "home IV provider"*, or *"provider"* means an entity that—

(a) Is capable of providing covered home IV drugs, nursing and pharmacy services, and other services as are necessary for the administration of home IV drug therapy; and

(b) Meets all the requirements of this subpart.

§ 485.105 Condition of participation: Compliance with Federal, State, and local laws.

The home IV provider and all personnel who furnish services must be in compliance with applicable Federal, State, and local laws and regulations.

(a) *Standard: Compliance with Federal laws.* The home IV provider must be in compliance with applicable Federal laws related to the health and safety of patients.

(b) *Standard: Licensure of home IV provider.* If State or local law requires licensing, the home IV provider must be currently licensed or approved as meeting the standards established for licensure.

(c) *Standard: Licensure of personnel.* Personnel who provide services, including individuals who provide services under arrangements with the home IV provider, must be licensed, registered, certified, or meet other applicable standards in accordance with applicable State and local laws.

§ 485.110 Condition of participation: Governing body and administration.

(a) *Standard: Governing body.*

A home IV provider must have either—

(1) A governing body that assumes full legal responsibility for determining, implementing, and monitoring policies governing all operations of the home IV provider; or

(2) Individuals who are legally responsible for the conduct of the home IV provider and who carry out the governing body functions that are specified in this section.

(b) *Standard: Disclosure of ownership.* The home IV provider must comply with the provisions of Subpart C of Part 420 of this chapter, which require health care providers and fiscal agents to disclose certain information about ownership and control.

(c) *Miscellaneous reporting.* The home IV provider must furnish information relevant to, and participate in, surveys and studies concerning cost-finding or other issues relating to the efficient administration of the home IV therapy benefit as requested by the Secretary under section 1861(jj)(3)(x) of the Act.

(d) *Standard: Chief executive officer.* The governing body must appoint a chief executive officer who meets the following conditions:

(1) Assumes responsibility for the overall management of the facility under the authority delegated by the governing body.

(2) Assumes responsibility for the day-to-day operation of the home IV provider.

(e) *Standard: Patient care policies.* The home IV provider must have written patient care policies that govern the services it furnishes. The patient care policies must include the following:

(1) A description of the services furnished by the home IV provider's employees and those furnished under arrangements.

(2) The diagnostic criteria that identify the patients for whom the services are designed.

(3) Provisions for accepting only those patients whose needs can be met by the services it furnishes.

(4) Procedures for the acceptance of a referral, including the assignment of appropriate staff to conduct a timely assessment of the patient's medical and psychological readiness for home IV drug therapy services.

(5) Procedures for quickly notifying the referring physician if the patient does not meet the home IV provider's admission criteria.

(6) Procedures for notifying the referring physician of incidences of phlebitis, IV infiltration, or site infection that occurs after the provider begins furnishing home IV drug therapy services.

(f) *Standard: Contracted services and professional management responsibility.* (1) The home IV provider must—

(i) Retain professional and administrative responsibility for and control and supervision of contracted services; and

(ii) Ensure that the services are furnished—

(A) In a safe and effective manner by nurses or pharmacists meeting the qualifications of this subpart; and

(B) In accordance with the patient's plan of care and other applicable requirements of this subpart.

(2) With each contractor that provides arranged services, the home IV provider must have a legally binding written agreement that meets at least the following requirements:

(i) Identifies the services to be provided.

(ii) Specifies that contracted services are provided only if directly authorized by the home IV provider.

(iii) Describes the manner in which the contracted services are coordinated, supervised, and evaluated by the home IV provider.

(iv) Delineates the roles of the home IV provider and the contractor in the patient care process.

(v) Provides for the preparation of patient records with progress notes and observations and for the prompt incorporation of the patient records into the clinical record of the home IV provider.

(vi) Provides that the requirements for the services furnished under arrangements and personnel who furnish them are the same as for the services furnished directly by the home IV provider and the personnel who furnish them.

(vii) Specifies the financial arrangements that provide for payment to the contractor by the home IV provider for the provision of covered services.

(viii) Specifies that a contractor that furnishes services under arrangements may not bill the patient or Medicare for covered services.

§ 485.115 Condition of participation: Patient selection.

After a patient's referring physician requests home IV drug therapy, the home provider makes an assessment of each patient and his or her needs. For hospital inpatients, the home IV provider must make this assessment prior to discharge. The home IV provider furnishes services only to patients whose needs can be met by its services.

(a) *Standard: Medical critieria.*

A patient must—

(1) Be under the care of a licensed referring physician who either prescribed the home IV drug or established the plan of care, or both, and who continually monitors the home IV drug therapy;

(2) Have a clinical status that allows IV drugs to be safely administered in the home;

(3) Have venous sites available for peripheral IV catheter or needle placement or have a central venous catheter or other central venous access device; and

(4) Be unable, for medical or therapeutic reasons, to take the provided medication orally or by other means less intrusive than IV.

(b) *Standard: Nonmedical criteria.*

A patient must—

(1) Be capable of performing safely self-administration of drugs and self-care after adequate patient education (for example, be able to learn aseptic technique and heparin lock maintenance and read and understand the labeling of the home IV drugs) or have a primary caregiver who can perform these tasks;

(2) Be motivated to use home IV drug therapy services;

(3) Be psychologically stable (that is, the prospect for adherence to a disciplined medical regimen is realistic); and

(4) Have a home environment that is conducive to the provision of home IV drug therapy services (that is, a clean home with electricity, a telephone, running water, refrigeration, and enough space to support home IV drug therapy services).

§ 485.120 Condition of participation: Plan of care.

For each patient, the referring physician must establish and periodically review a plan of care.

(a) *Standard: Development of the plan of care.* A plan of care must meet the following requirements:

(1) The plan of care is developed by the patient's referring physician.

(2) The plan of care is implemented by the home IV provider.

(3) The plan of care is based on the referring physician's initial and ongoing individual patient assessments.

(4) The plan of care is reviewed by the referring physician as necessary, but at least once every 30 days.

(5) The plan of care includes at least the following current information about the patient and the home IV drug therapy services to be provided:

(i) The patient's name, gender, age, and lean body weight.

(ii) A narrative description of the appropriate diagnoses.

(iii) The patient's drug allergies or sensitivities.

(iv) The patient's current drug therapy, including nonprescription drugs, and home remedies.

(v) The goal of the provision of home IV drug therapy services for the patient.

(vi) The drugs and method of drug therapy administration to be furnished by the home IV provider including—

(A) Amount of dosage and timing of administration;

(B) Route of administration, either peripheral or central venous line.

(C) Frequency of IV site monitoring; and

(D) Type of IV equipment, related supplies and other equipment, and fluids to be administered.

(vii) Identifying physician information, the physician's signature, and the date.

(b) *Standard: Referring physician review of plan of care.* The referring physician review of the plan of care must meet the following requirements:

(1) The referring physician reviews the patient's process in attaining the objectives of the plan of care at least every 30 days.

(2) The review is based upon appropriate information provided by health professionals, including information furnished by the registered nurse and pharmacist employed by the home IV provider.

§ 485.125 Condition of participation: Central clinical records.

In accordance with accepted principles of medical record practice, the home IV provider must establish and maintain a clinical record for all individuals receiving care and services including those who are not entitled to Medicare. Each clinical record must be completely, promptly, and accurately documented, readily accessible, and systematically organized to ease retrieval and compilation of information.

(a) *Standard: Content.* Each clinical record is a comprehensive compilation of information of medical and other data that must contain sufficient information to identify the patient clearly and to justify the diagnoses and treatment. Entries in the clinical record must be made for all services provided directly or under arrangements. Entries must be made for each treatment performed and must be signed by the individual who performs the services. Documentation on each patient must be consolidated into one clinical record that must contain the following information:

(1) Patient identification data.

(2) The initial patient assessment and subsequent reassessments.

(3) Current plan of treatment.

(4) Consent and authorization forms.

(5) Past and present pertinent medical history.

(6) Complete documentation of all services provided.

(7) Upon completion of treatment, a summary that includes a description of patient status relative to goal achievement, prognosis, and future treatment considerations.

(b) *Standard: Retention and preservation.* The home IV provider must retain clinical records for the appropriate time period as specified in this paragraph. If the requirements of State law are used to define the time period for maintaining clinical records, it must be the law of the State in which the services were provided to the patient.

(1) If the State where the services are furnished has a law that applies to the provider governing the maintenance of clinical records, the home IV provider must maintain its clinical records for the time required by that law.

(2) In the absence of an applicable State law, the home IV provider must maintain clinical records for the time periods provided under the appropriate statute of limitations concerning medical malpractice in the State.

(3) If there is no applicable State law or State statute of limitations concerning medical malpractice, the home IV provider must maintain clinical records for at least 5 years.

(4) In addition, for services furnished to a minor, the home IV provider must maintain clinical records for at least 3 years after the individual attains the age of majority under State law.

(c) *Standard: Protection of information.* The home IV provider must—

(1) Safeguard the clinical record against loss, destruction, or unauthorized use;

(2) Have procedures to govern the use and removal of records, to ensure release of information only to authorized individuals, and to ensure that unauthorized individuals cannot gain access to, or alter, patient records;

(3) Obtain the patient's written consent before releasing information not required to be released by law; and

(4) Release original records only in accordance with Federal or State laws, court orders, or subpoenas.

(d) *Standard: Patient access.* The home IV provider must permit each patient or his or her legal representative to inspect or obtain copies of his or her clinical records within 48 working hours after the provider receives a written request.

§ 485.130 Condition of participation: Core staff, core services, and full-time availability of patient care services.

A home IV provider must make all necessary nursing and pharmaceutical services available 24 hours a day, 7 days a week to meet the reasonable needs of its patients with respect to home IV drug therapy services.

(a) *Standard: Core staffing requirements.* A home IV provider must employ directly either a full-time registered nurse or a full-time registered pharmacist.

(b) *Core services.* A home IV provider must perform the following oversight and supervisory functions itself (that is, these functions may not be furnished under arrangements):

(1) Assurance that all patient care related nursing and pharmacy services, whether furnished directly or under arrangements, are available on a 24-hour-a-day, 7-day-a-week basis.

(2) Development and coordination of all activities of nurses and pharmacists including assuring that only qualified, properly trained individuals furnish these services.

(3) Necessary consultations and coordination concerning a patient's plan of care with the patient's physician and provision of all patient laboratory test results.

(4) Conducting a quality assessment and assurance program including drug regimen review.

(c) *Standard: Twenty-four-hour availability of patient care services.* (1) To meet the needs of patients, a home IV provider may contract for additional nursing or pharmacy services to supplement the services directly furnished by the home IV provider. If services directly furnished under arrangements, the provider must maintain professional, financial, and administrative responsibility for the services.

(2) A home IV provider must be able to meet the following time requirements related to care of a patient:

(i) The home IV provider must make routine or urgently needed nursing, pharmacy, and related services and home IV drugs and supplies available 24 hours a day, 7 days a week.

(ii) The home IV provider must be accessible to patients at all times. If a patient or caregiver telephones the home IV provider with a problem concerning the administration of a drug or malfunctioning equipment, the provider must be able to make telephone contact with the patient or caregiver within 10 minutes, and the provider must be able to resolve the problem as expeditiously as possible given the nature of the problem.

(iii) In an emergency, the provider must be able to deliver drugs to the patient at least 30 minutes before the drugs are scheduled for use.

(iv) The home IV provider must furnish services in a manner consistent with accepted standards of medical practice.

§ 485.135 Condition of participation: Nursing services.

(a) *General requirements.* The home IV provider is responsible for furnishing nursing services, directly or under arrangements, that are necessary for the provision of IV drug therapy services. Persons furnishing the nursing services either as employees of the home IV provider or of the organization under contract with the home provider must be either registered nurses, or in States that permit such practice, physicians or physician assistants under the supervision of a physician. (In such States, the references in this subpart to a "registered nurse" or "nurse" are read to include physician assistants.) In addition, the home IV provider must—

(1) Direct and staff nursing services to ensure that the needs of its patients are met;

(2) Specify the patient care responsibilities of the nurses; and

(3) Ensure that the requirements of paragraphs (b) through (d) of this section are met.

(b) *Education and experience.* (1) The home IV provider must ensure that each nurse who furnishes home IV drug therapy services meets the following requirements for education, experience, and proficiency:

(i) Education in the principles and practices of infusion therapy and cardiopulmonary resuscitation.

(ii) Experience in patient assessment and infusion therapy.

(iii) Proficiency in all clinical aspects of IV therapy with validated competency in clinical judgment and practice demonstrated by work experiences. For example, each nurse must be able to access peripheral veins and must be able to recognize medication and solution incompatibilities.

(iv) Ability to perform the following procedures:

(A) Interpret the physician's order for IV therapy and administer IV medications as ordered.

(B) Perform venipuncture and insertion of all types of needles and catheters commercially available (excluding the insertion of subclavian, jugular, and cut-down catheters).

(C) Prepare IV solutions with the addition of medications in the absence of admixture services.

(D) Initiate, monitor, and terminate IV solutions and additives.

(E) Evaluate the effectiveness of the dosage, frequency and route of administration of IV drugs and the patient's adherence to the drug regimen.

(F) Set the flow rates established by the physician for all IV solutions and medications.

(G) Maintain and replace sites, tubing, and dressings in accordance with established policy.

(H) Draw blood.

(v) Thorough knowledge of and proficient technical ability in the use of the specific type of IV equipment to be used by a particular patient so that the nurse is able to evaluate IV equipment and identify when maintenance would be necessary.

(vi) Ability to observe and assess all significant reactions related to IV therapy and initiate appropriate nursing interventions.

(c) *Aseptic practices.* Each nurse must follow established infection control and aseptic practices.

(d) *Physician notification.* All significant findings of the nurse in the course of delivering home IV services must be communicated to the physician.

(e) *Documentation.* Each nurse must document in the patient's clinical record his or her actions associated with the preparation, administration, and termination of all aspects of IV therapy.

§ 485.140 Condition of participation: Pharmacy services.

The home IV provider must ensure that a registered pharmacist is responsible for purchasing, preparation, safe administration, and clinical monitoring of drugs. The home IV provider may directly furnish necessary pharmacy services or it may enter into arrangements for the services.

(a) *Standard: Pharmacy services management.* The home IV provider must ensure that necessary pharmacy services, furnished directly or under arrangements, are furnished in accordance with the following requirements:

(1) The policies and procedures of the home IV provider must ensure that pharmacy practice at all times is consistent with applicable law and regulations governing professional licensure and operation of pharmacies.

(2) The home IV provider must maintain and make available an up-to-date copy of HCFA's list of covered home IV drugs and pharmaceutical references that include official pharmaceutical compendia, periodicals and current editions of texts and reference books covering pharmaceutical practice as it relates to patient care.

(3) The home IV provider must maintain patient profiles that include—

(i) The patient's name, age, and lean body weight;

(ii) The patient's diagnosis or diagnoses;

(iii) Clinical information relating to the patient's initial and ongoing home IV drug therapy;

(iv) Current drug therapy provided to the patient including nonprescription and home remedy products; and

(v) A description of the patient's drug allergies or sensitivities.

(4) A pharmacist reviews each prescription order before dispensing a drug to ensure that the drug is a covered home IV drug and that the correct drug is dispensed to the patient.

(5) A pharmacist assists the physician in determining the appropriate schedule for monitoring the patient through laboratory testing. This schedule must include identification of tests to be performed and the Medicare-approved laboratory that will perform the tests and the frequency of testing and obtaining the results.

(6) A pharmacist supervises support personnel to ensure adequate quality of the drugs and pharmaceutical supplies.

(b) *Standard: Storage, equipment, and preparation area.* (1) The IV provider must ensure that drugs, supplies, and equipment are maintained in the pharmacy in accordance with the following procedures:

(i) Drugs must be stored separately under proper conditions of sanitation, temperature, light, moisture, ventilation, and security.

(ii) Areas used in the preparation of sterile products must be constructed to minimize opportunities for particulate and microbial contaminations and must be separate from areas used in the preparation of nonsterile products.

(iii) Work surfaces are kept free of equipment, supplies, records, and labels unrelated to the preparation of a given prescription.

(iv) Work surfaces and equipment must be disinfected after the preparation of each prescription.

(v) Clean work benches or laminar flow hoods must be used in the preparation of IV drugs and must be inspected at least annually in accordance with standard inspection practice.

(vi) Both ingredients and final products must be inspected for the presence of inappropriate particulate matter or signs of deterioration or microbial contamination. The equipment necessary for such an inspection must be maintained by the pharmacy.

(vii) Drugs must be kept in a locked storage area.

(viii) Each dosage unit of both a cytotoxic drug and a Schedule II controlled drug must be accounted for in a distribution log.

(2) Unless contraindicated, an appropriate air-eliminating filter must be employed in the home for delivery of IV fluids.

(3) Mislabeled or otherwise unusable drugs must not be made available for patient use.

(4) Outdated drugs must be destroyed.

(c) *Standard: Drug labeling.* The label on any IV drug or solution that has been dispensed to a patient must contain at least the following information:

(1) The name, address, and telephone number of the pharmacy and the telephone number of the home IV provider if the pharmacy services are furnished under arrangements.

(2) The dates of both preparation and expiration of the drug.

(3) The pharmacy's identifying serial number for the drug order or prescription.

(4) The full name of both the patient and prescribing physician.

(5) The name of the drug, its strength, and the amount dispensed.

(6) The directions for use including the scheduled date, time, and rate of administration, and appropriate space for the patient or caregiver to add the date and time the solution is started. These directions must indicate that the IV fluids must be completely used or discarded within 24 hours of mixing or unfreezing a mixture.

(7) The directions for storage.

(8) Cautionary or accessory labels if appropriate.

(9) The lot number or control number of the batch from which the drug was obtained.

§ 485.145 Condition of participation: Patient and caregiver evaluations and instructions.

To ensure safe home IV therapy for the patient, a registered nurse who is proficient in the delivery of home IV drug therapy services evaluates the patient to determine suitability for the provision of home IV drug therapy services. If the nurse determines that the patient is suitable for this therapy and the home IV provider can furnish the necessary therapy, the nurse trains the patient or caregiver or both, as appropriate, in providing the therapy and in proper maintenance of the equipment.

(a) *Standard: Patient evaluation.* The registered nurse performs the following activities:

(1) Reviews the referring physician's medical orders before evaluating a patient for home IV drug therapy.

(2) Before accepting the patient for care, evaluates the patient or caregiver for general competency and specific comprehension of the particualr IV drug therapeutic procedures to be used. In making this evaluation, the nurse—

(i) Discusses possible complications of the treatment with the patient or caregiver or both, as appropriate;

(ii) Explains and demonstrates home IV drug therapy procedures to the patient or caregiver;

(iii) After the patient or caregiver demonstrates IV drug therapy procedures, including aseptic techniques, evaluates and documents the competency and proficiency of the patient or caregiver.

(3) May inspect the patient's home prior to hospital discharge to ascertain that there is an area in the home available for storage of drugs and supplies and an area available for use of sterile supplies.

(4) Supervises the patient or caregiver when either starts the first infusion therapy at home to verify his or her ability to transfer learning from the provider setting to the home setting.

(b) *Standard: Patient and caregiver education and instructions.* The nurse instructs the patient or caregiver, as appropriate, in home IV drug therapy procedures, including aseptic techniques and provides written and illustrated instructions.

(1) The written instructions that are prepared for each different drug class and administration route must include the following information:

(i) A step-by-step description of the procedures that the patient or caregiver must follow in administering an IV drug, including procedures for any probable emergency that might arise.

(ii) Storage procedures.

(iii) Procedures for disposal of drugs and IV equipment.

(iv) A telephone number that would enable a patient to receive assistance at any time.

(2) The nure must instruct the patient or caregiver about the following:

(i) Methods of detecting early signs and symptoms of IV-related sepsis and complications so that they may be reported immediately to the home IV provider's medical personnel.

(ii) When appropriate use of electronic controlling devices (for example, an infusion pump) in delivery of home IV drug therapy so that the patient or caregiver can recognize any malfunction that should be reported to the home IV provider.

(iii) Emergency interventions for possible IV complications that can be performed by the patient or caregiver.

(iv) Discarding IV needles in an appropriate receptacle (such as a Sharp's container) that is properly labeled and that is removed by the home IV provider staff or personnel at least every 3 days.

(v) Procedures for recording the administration of IV solutions and drugs so the information can be given to the home IV provider and attached to the patient's clinical record.

(3) The nurse must discuss the range of physical activity that is appropriate for the patient.

§ 485.150 Condition of participation: Protocols and policies.

The home IV provider adheres to the following procedures and has written protocols and policies consistent with respect to the provision of home IV drug therapy items and services.

(a) *Standard: First dose.* The first dose of any drug not previously administered intravenously is administered under the direct supervision of a physician or nurse who must—

(1) remain in attendance for a time period sufficient to make sure that the patient is stable; and

(2) Have resuscitation medication and equipment to treat anaphylaxis readily available.

(b) *Standard: Venipuncture and catheter care.* (1) The site of a peripheral catheter is rotated by the nurse at least every 3 days. A catheter whose tip lies in a central vessel must be rotated by a physician when appropriate.

(2) IV administration sets are changed at least every 24 hours by the patient or caregiver.

(3) IV dressings should be changed at least every 48 hours or immediately upon becoming soiled or wet.

(4) The air elimination filter is routinely changed.

(5) The central line catheter site is inspected by a nurse at least once each week.

(6) Aseptic techniques are practiced during all venipuncture, dressing changes, catheter care, and assembly of IV infusion systems.

(c) *Standard: Quality of the air elimination filter and sterility of the catheter.* (1) On a sample of patients, the nurse packages air elimination filters that have been removed by the nurse from the IV tubing and immediately sends them to an independent laboratory for analysis of particulate matter and bacterial and fungal contamination.

(2) On a sample basis, the home IV provider packages catheters that have been removed from patients and immediately sends them to an independent laboratory for analysis of sterility.

(3) The home IV provider keeps copies of laboratory results on the testing of both air elimination filters and catheters that are made available for review upon request.

(d) *Standard: Drug therapy review.* (1) The pharmacist and nurse must review the combination of IV drugs and equipment for appropriateness before drug therapy is initiated.

(2) The pharmacist must conduct ongoing review (at least once every 3 days) of the drug therapy and inform the physician of significant findings. At a minimum, this review must include the appropriateness of the drug regimen and any instances of therapeutic duplication of drugs.

(e) *Standard: Patient rights and responsibilities.* The home IV provider must ensure that the following requirements are met:

(1) Treatment of a patient begins only if the home IV provider is capable of furnishing needed care at the level of intensity required by the condition of the patient.

(2) Each patient receives care appropriate to his or her needs in a timely manner.

(3) The patient is informed in a timely manner of the need for transfer to

another medical entity or level of care and of any appropriate alternatives.

(4) If the home IV drug therapy is to end without transfer to another medical entity, the patient is informed in a timely manner of the impending discharge, continuing care requirements and other available services, if needed.

(5) Patients' rights as set forth in this paragraph are honored and patients are informed of their responsibilities, if any, in the care process. The rights and responsibilities are clearly stated in documents distributed to patients upon admission to the home IV drug therapy program.

(6) Procedures are established to deal with patient grievances and patient-recommended changes without coercion, discrimination, reprisal, or interruption of services. A patient is informed at the beginning of home IV drug therapy about these procedures for making, reviewing, and resolving complaints.

(f) *Standard: Written protocols and policies.* The home IV provider has written protocols and policies that are consistent with these procedures.

§ 485.155 Condition of participation: Quality assurance.

The home IV provider maintains an ongoing quality assurance program designed to monitor patient care objectively and systematically, evaluate the quality and appropriateness of patient care, resolve identified problems, and pursue other opportunities to improve patient care.

(a) *Standard: Program objectives.* Through an ongoing, planned, and systematic process, the home IV provider monitors and evaluates the quality and appropriateness of patient care, including the performance of employees and other personnel who furnish services under arrangements with the home IV provider.

The home IV provider includes at least the following in a written evaluation plan:

(1) Scope and objectives of the quality assurance activities.

(2) Activities identified for monitoring and evaluation.

(3) Methods for implementing the monitoring and evaluation activities and for reporting the results.

(4) Mechanisms for taking follow-up action.

(5) Staff responsibilities for each activity in the quality assurance program.

(b) *Standard: Patient care.* (1) The monitoring and evaluation of the quality and appropriateness of patient care by the home IV provider must include identification of important aspects of care or service and focus on high-risk, high-volume, or problem-prone activities.

(2) The home IV provider collects data about the following matters:

(i) Length of home IV drug therapy by diagnosis and treatment.

(ii) Incidences and causes of patient rehospitalization.

(iii) Incidences of—

(A) Phlebitis;

(B) Infiltration;

(C) Site infection; and

(D) Other infection.

(iv) Hydration and nutritional status.

(3) The home IV provider analyzes the data it collects at least annually to determine the frequency of negative outcomes and prescribes corrective action for negative outcomes.

(c) *Standard: Service delivery.* The provider determines the following:

(1) Drugs and IV equipment were delivered timely to the patient.

(2) The patient could read the preparation and expiration dates on the drug labels.

(3) A nurse visited any patient with a peripheral IV catheter placement every 3 days and rotated the peripheral IV injection site.

(4) A nurse visited any patient with a central line at appropriate intervals for monitoring.

(5) Procedures have been established to enable patients to make complaints.

(6) The provider found acceptable solutions for complaints and kept a record of both.

§ 485.160 Condition of participation: Infection control.

The home IV provider must develop infection control procedures. These procedures must address at least staff personal hygiene and health status, isolation precautions, aseptic procedures, cleaning and sterilization of equipment, and methods to avoid transmitting infections. The home IV provider—

(a) Advises staff, patients, and caregivers of any necessary precautions, including infection control and personal hygiene and their responsibilities in the infection control program; and

(b) Develops a system for evaluating, reporting, and maintaining records of infection related to the care or service provided among patients and as appropriate, among staff.

IV. Part 489 is amended as follows:

PART 489—PROVIDER AGREEMENTS UNDER MEDICARE

A. The authority citation for Part 489 continues to read as follows:

Authority: Secs. 1102, 1861, 1864, 1866, and 1871 of the Social Security Act (42 U.S.C. 1302, 1395x, 1395aa, 1395cc, and 1395hh).

Subpart A—General Provisions

B. In § 489.2, the introductory text of paragraph (b) is republished and a new paragraph (b)(7) is added to read as follows:

§ 489.2 Scope of part.

* * * * *

(b) The following providers are subject to the provisions of this part:

* * *

(7) Home IV drug therapy providers.

* * * * *

(Catalog of Federal Domestic Assistance Programs No. 13.774, Medicare—Supplementary Medical Insurance)

Dated: June 23, 1989.

Louis B. Hays,

Acting Administrator, Health Care Financing Administration.

Approved: August 10, 1989.

Louis W. Sullivan,

Secretary.

Health Care Financing Administration

[BPD-521-PN]

RIN: 0938-AE10

Medicare Program; Outpatient Prescription Drugs: List of Covered Home IV Drugs

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed notice.

SUMMARY: This notice sets forth a list of intravenous drugs that we propose to cover on the basis that they can be safely and effectively administered in the home. The notice would implement section 1861(t)(4) of the Social Security Act as added by section 202(a) of the Medicare Catastrophic Coverage Act of 1988.

DATE: Comments will be considered if we receive them at the appropriate address, as provided below, no later than 5:00 p.m. on November 6, 1989.

ADDRESS: Mail comments to the following address:

Health Care Financing Administration, Department of Health and Human Services, Attention: BPD-621-PN, P.O. Box 26676, Baltimore, MD 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309-G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC., or

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

Due to staffing and resource limitations, we cannot accept facsimile (FAX) copies of comments.

In commenting, please refer to file code BPD-621-PN. Comments received timely will be available for public inspection as they are received, generally beginning approximately three weeks after publication of a document, in Room 309-G of the Department's offices at 200 Independence Ave., SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (Phone 202-245-7890).

FOR FURTHER INFORMATION CONTACT: Holly McBryde, (301) 966-6731.

SUPPLEMENTARY INFORMATION:

I. Background

A. Current Program

Medicare (title XVIII of the Social Security Act (the Act)) consists of two separate but complementary insurance programs, the Hospital Insurance program (known as Part A) and the Supplementary Medical Insurance program (known as Part B). Under Part A, covered benefits generally include services furnished in hospitals, skilled nursing facilities (SNFs) or by home health agencies (HHAs) and hospices.

Part B covers a wide range of medical services and supplies such as those furnished by physicians or others in connection with physicians' services, outpatient hospital services, and outpatient physical and occupational therapy services. Part B also currently covers certain drugs and biologicals that cannot be self-administered.

More specifically, under Part B, outpatient drugs have been covered only for specific purposes and only under certain conditions. For example, we currently cover hepatitis B vaccine but not flu shots or other immunizations; injections by physicians but not drugs that can be self-administered; and injectable drugs administered in comprehensive outpatient rehabilitation facilities but not injectable drugs administered in the home by HHAs.

B. Current Coverage of IV Drugs

Generally, drugs administered by an intravenous (IV) route, if furnished in an inpatient setting, are covered under Part A. As noted above, drugs administered in certain outpatient settings, including IV drugs, also can be covered.

C. FDA Approval of Drugs as Safe and Effective for Marketing

With the exception of "grandfathered" or certain experimental cancer drugs described below, the Food and Drug Administration (FDA) must approve a drug or license a biological for marketing before Medicare will cover the product. Following is a brief summary of the FDA approval processes.

The FDA's current role as it relates to approval of drugs is controlled by the Federal Food, Drug and Cosmetic Act of 1938 (FFDCA) (Pub. L. 75-717, 21 U.S.C. 301, et seq.). Before enactment of FFDCA, drugs could be marketed in the United States as long as a drug's label did not present false information regarding the drug's strength and purity. The FFDCA first established the requirement that a manufacturer had to prove the safety of a drug before it could market it in the United States. In accordance with the FFDCA, drugs marketed before passage of the 1938 Act were "grandfathered" so that manufacturers, if they did not change the representations on the drugs' labels, were allowed to continue to market them unless evidence was developed to indicate that they were not safe. However, once a manufacturer changed the representation on a drug's label, that drug was considered a "new drug" and the manufacturer was required to prove that the drug was safe for its intended use.

In 1962, the FFDCA was amended to require that drugs sold in the United States be regulated more closely. Under the provisions of the Drug Amendments of 1962 (Pub. L. 87-781, enacted on October 10, 1962), all new drugs must be shown by adequate studies to be both safe and effective before they can be marketed. This legislation also applied retroactively to all drugs approved as safe from 1938 to 1962. These drugs were permitted to remain on the market while evidence of their effectiveness was reviewed. The program established to review the effectiveness of drugs approved between 1938 and 1962 was named the Drug Efficacy Study Implementation (DESI) program. The pre-1962 drugs that are subject to review under this program are referred to as the "DESI" drugs. If the FDA decides that a DESI drug lacks substantial evidence of effectiveness for the condition(s) it is intended to treat, it publishes a notice of opportunity for a hearing in the Federal Register concerning its proposal to withdraw approval for marketing. This process affords the manufacturer an opportunity for a hearing before a final determination is made. Drugs for which a notice of opportunity for hearing has been issued are considered by the FDA to be less than effective until the hearing has been completed.

Biologicals were first required to be licensed under the Biologics Control Act of 1902, which was recodified in 1944 as section 351 of the Public Health Service Act (PHS Act, 42 U.S.C. 262). To be licensed under section 351 of the PHS Act, a biological must be shown to be safe, pure, and potent. The majority of biological products also meet the drug definition in the FFDCA subject to the drug adulteration, misbranding, and registration provisions of the FFDCA.

When the Bureau of Biologics (currently the Center for Biologics Evaluation and Research) became a part of FDA in 1972, biologicals licensed before July 1972 were reviewed for efficacy by expert advisory review panels. Similar to the DESI program described above, manufacturers of biologicals with inadequate evidence of effectiveness are offered an opportunity for a hearing on proposals to revoke product licenses.

When a manufacturer submits an application for the approval of a new drug, it indicates on the application the proposed uses for the drug. The FDA requires the manufacturer to submit clinical data and scientific information to prove the safety and effectiveness of the drug for these proposed uses and determines for which of the proposed uses the manufacturer has proven that the drug is safe and effective. If a drug is approved, it may be labeled, promoted, and advertised by the manufacturer only for those specific proposed uses of the drug that have been approved by the FDA as safe and effective. The labeling includes a description of the drug, its action, clinical pharmacology, and indications and usage for the drug. In addition, sections with the headings, "contraindications", "warnings", "precautions", and "adverse reactions" are included when applicable. All labels conclude with sections on dosage and administration and how the drug is supplied.

After a drug is approved, additional medical and scientific information may be developed by the medical community that indicates there are other appropriate uses for the drug besides those specified on a drug's label. We may cover FDA-approved drugs for uses other than those specified on their labeling if the available medical and scientific information indicates that additional uses are appropriate and accepted in the medical community, unless the uses are contraindicated on a drug's label.

As a matter of current national Medicare policy, drugs or biologicals approved for marketing by the FDA are generally considered safe and effective for purposes of meeting the "reasonable" and "necessary" criteria of section 1862(a)(1)(A) of the Act when used for indications specified in their labeling. In addition, FDA-approved drugs also may be covered when used for indications other than those specified on their labeling as long as neither FDA nor HCFA has specified such use as nonapproved, and any additional relevant medical and scientific information indicates that the additional uses are appropriate and accepted in the medical community. As stated in the April 1982 (Volume 12, Number 1) *FDA Drug Bulletin*, the FFDCA "does not, however, limit the manner in which a physician may use an approved drug. Once a product has been approved for marketing, a physician may prescribe it for uses or in treatment regimens or patient populations that are not included in approved labeling. In addition, "accepted medical practice often includes drug use that is not reflected in approved drug labeling." Nevertheless, HCFA has specifically identified some indications as noncovered under Medicare, in the form of national coverage decisions published in the Coverage Issues Manual (HCFA Pub. 6). (For example, the use of (Ethylenedinitrilo)tetraacetic acid (EDTA, Edetic Acid) as a chelating agent to treat artherosclerosis, arteriosclerosis, calcinosis, or similar generalized conditions not listed by the FDA as an approved use is not covered. Any such use of EDTA is considered experimental.) Coverage of unlabeled uses of approved drugs is determined by HCFA contractors taking into consideration the generally accepted medical practice in the community.

As noted above, drugs that are considered by the FDA to be experimental or investigational are not covered except for certain cancer drugs distributed by the National Cancer Institute (NCI). Under its Cancer Therapy Evaluation, the Division of Cancer Treatment within NCI, in cooperation with FDA, approves and distributes certain drugs for use in treating terminally ill cancer patients. One group of these drugs, designated as Group C drugs, are unlike other drugs distributed by the NCI, in that they are not limited to use in clinical trials for the purpose of testing their efficacy. In view of NCI controls on their distribution and use, Group C drugs, which do not include Modified Group C drugs, are covered by Medicare under current rules if all other applicable coverage requirements are satisfied.

II. The Medicare Catastrophic Coverage Act of 1988

A. Overview

In the most significant expansion of the Medicare program since its inception in 1965, the Medicare Catastrophic Coverage Act of 1988 (Pub. L. 100–360) was enacted on July 1, 1988. Generally, this legislation provides for—

- Expanded hospital, SNF, and hospice care coverage under Part A of the program beginning January 1, 1989;
- A cap on the amount of a beneficiary's financial liability under Medicare Part B beginning January 1, 1990;
- Coverage of screening mammography and in-home respite care benefits, and improved home health benefits beginning January 1, 1990; and
- Coverage of drugs used in immunosuppressive therapy and home IV drugs and therapy services beginning January 1, 1990, and of other covered outpatient drugs, biologicals, and insulin beginning on January 1, 1991.

B. Home IV Coverage

Section 202(a) of Pub. L. 100–360 amended sections 1861(s)(2)(J) and (t) of the Act to provide general coverage for outpatient prescription drugs under Part B and to authorize Part B coverage of home IV drugs. In addition, section 203 of Pub. L. 100–360 added sections 1861(jj), 1834(d) and 1835(a)(2)(G) to the Act and amended other related sections to authorize coverage of home IV therapy services. For purposes of this new home IV benefit, under new section 1861(t)(4)(B) of the Act, we are required to publish, by January 1, 1990 and periodically thereafter, a list of covered home IV drugs, and their indications, that can be safely and effectively administered in the home.

It is this list of drugs that we are addressing in this proposed notice. Proposed rules setting forth regulations to implement the various other provisions of Pub. L. 100–360 dealing with the outpatient prescription and home IV drug benefits will be published in separate documents as follows:

- Overall coverage of outpatient prescription drugs (including drugs used in immunosuppressive therapy and home IV drugs).
- Payment methodology for covered outpatient prescription drugs (which will apply also to covered home IV drugs).
- Coverage of home IV drug therapy services.
- Conditions of participation for home IV drug therapy providers.
- Fee schedule for home IV drug therapy services.
- Deductible and coinsurance amounts and the Part B cap on out-of-pocket expenses.
- Participating pharmacies.
- Drug bill processors.
- Coverage of catastrophic Part B expenses, outpatient drug expenses, and respite care benefits for beneficiaries enrolled in pre-pay health plans, such as health maintenance organizations.

The statute provides specific definitions of "covered outpatient prescription drugs" and of what constitutes "covered home IV drugs". In order to be a covered home IV drug, the drug must first qualify as a covered outpatient prescription drug as described below.

Section 202(a) of Pub. L. 100–360 amended sections 1861(s)(2)(J) and (t) of the Act by establishing the following definition of a "covered outpatient drug", which includes drugs, biological products, and insulin.

- Drugs. A drug that may be dispensed only upon prescription and that meets one of the following requirements:

—The Drug is approved for safety and effectiveness as a prescription drug under sections 505 or 507 of the FFDCA, or approved under section 505(j) of the FFDCA.

—The drug was commercially used or sold in the United States before the date of enactment of the Drug Amendments of 1962 (October 10, 1962) or it is identical, similar or related to such a drug, as defined by 21 CFR 310.6(b)(1). Nevertheless, such a drug will not be covered if the Secretary has made a final determination that it is a "new drug" and has not been approved under sections 505 or 507 of the FFDCA, or if it is subject to certain actions brought by the Secretary to enforce provisions of sections 502(f), or 505(a) of the FFDCA (21 U.S.C. 352(f), or 355(a)).

—The drug is described in section 107(c)(3) of the Drug Amendments of 1962 and is one for which the Secretary has determined there is compelling justification for its medical need, or it is identical, similar, or related to such a drug. Also, the drug must be one for which the Secretary has not issued a notice to withdraw approval for marketing, because the Secretary has determined that the drug is less than effective for all conditions of use represented, recommended, or suggested on its labeling. These are the "DESI" drugs.

- Biological products. A biological product is considered a "covered outpatient drug" if it is one that may be dispensed only upon prescription, is licensed under section 351 of the PHS Act (42 U.S.C. 262), and is produced at an establishment licensed under that Act to produce that product.
- Insulin. Insulin is covered if it is certified under section 506 of the FFDCA (21 U.S.C. 356) for the strength, quality, and purity necessary to ensure adequate safety and efficacy of use. In accordance with section 1861(t)(2)(C) of the Act, as amended by Pub. L. 100–360, insulin would be considered a "covered outpatient drug" whether or not it is dispensed under a prescription.

In addition, section 202(a)(2)(C) of Pub. L. 100–360 added sections 1861(t)(4)(A) and (B) to the Act to define "covered home IV drugs" as covered outpatient drugs that are intravenously administered to individuals in places of residence that are used as the individuals' homes. The definition includes—

- Antibiotic drugs unless the Secretary has determined, for a specific drug or for the indication for which it is applied, that the drug cannot generally be administered safely and effectively in a home setting; and
- Drugs that are not antibiotics, but only if the Secretary has determined that for a specific drug and the indications for which the drug is being applied that it can generally be administered safely and effectively in a home setting.

III. Process Followed in Compiling the Drug List

A. Description of the Process

As noted above, section 202(a)(2)(C) of Pub. L. 100–360 added section 1861(t)(4)(B) to the Act to require us to develop a list of covered home IV drugs by January 1, 1990. These drugs must meet the definitions of a "covered outpatient drug" set forth in new sections 1861(t)(2) and (2) of the Act and of a "covered home IV drug" set forth in new section 1861(t)(4)(A) of the Act.

Our task with respect to putting together a proposed list of covered home IV drugs has been twofold. First, we had to compile a list of IV drugs (both antibiotics and non-antibiotics) and their indications. Second, in accordance with section 1861(t)(4) of the Act, we had to identify from that list those IV drugs that are safe and effective for use in the home. In accordance with section 1861(t)(4)(A)(ii) of the Act, our rules for including antibiotics and non-antibiotics differed. We obtained information about IV drugs based on the following categories:

- Antibiotic IV drugs, and indications for which each drug is applied, that can generally be safely and effectively administered in the home.
- Non-antibiotic IV drugs, and indications for which each drug is applied, that can generally be safely and effectively administered in the home. We separated this category into the following groups:

—Anti-infectives (other than antibiotics);

—Hydration therapy;

—Pain management drugs;

—Antineoplastic drugs; and

—Other drugs.

In determining which drugs may be administered intravenously, we obtained the following lists from the FDA:

- All IV drugs that are currently approved by the FDA for marketing.
- DESI drugs.
- "Compliance Report for DESI–2," also referred to as the "B List" of unapproved drugs that are currently marketed.

The drugs that we considered for our proposed list had to meet the statutory definition of "covered outpatient drug" and can be found on one of these FDA generated lists. Before we reviewed a specific drug for possible inclusion as a "covered home IV drug", the drug had to meet this initial requirement, as set forth in section 1861(t) of the Act.

In listing the drugs, we decided to place together in one list all those drugs, both antibiotics and non-antibiotics, that we initially propose as being covered. We believe setting forth a comprehensive list of covered drugs for purposes of rulemaking will make it easier for the public to direct their comments appropriately to a specifically named drug or indication, as opposed to our soliciting comments on those antibiotics and their indications that we propose not to cover. As discussed below, we encountered special problems with unlabeled indications for antibiotics in this regard. Therefore, Appendix I to this notice contains a list of drugs and indications that we propose to cover. Appendix II contains a list of antibiotics and indications that we propose not to cover.

We want to emphasize that we do not have the discretion under the home IV drug benefit to pay for a drug or an indication that is not on the final list. Section 1861(t)(4)(A) of the Act, as added by section 202(a) of Pub. L. 100–360, limits coverage of home IV drugs to those drugs that the Secretary has determined are safe and effective for use in the home. Any drug or indication not addressed on the final list to be published after we consider and evaluate public comments on the attached proposed list, or any drug or indication not included in a subsequent update, would not meet this requirement and payment would not be made for that drug or indication.

To obtain advice in determining whether an IV drug should be included in our proposed list of IV drugs as being safe and effective for use in the home, we contacted the following organizations:

- The U.S. Pharmacopeia (USP).
- The American Society of Hospital Pharmacists (ASHP).
- The American Medical Association (AMA).
- Various home IV providers (recognized in the field of home IV therapy).
- The Pharmaceutical Manufacturers Association.
- Various drug manufacturers.

We requested that these sources submit a list of IV drugs that, in their opinion, could generally be safely and effectively administered in the home, and, in addition, any other information they though pertinent. Although all of

BEST COPY AVAILABLE

the organizations we contacted did not respond with recommendations about drugs suitable for home use, we did receive specific recommendations based on reviews by advisory panels, medical and clinical evident to support inclusion of certain drugs, lists of IV drugs that are currently being administered in the home setting, and recommendations for exclusions.

In addition, we contacted the publishers of the following compendia:

- United States Pharmacopeia Dispensing Information, Volume 1 (Drug Information for the Health Care Professional) (USP DI);
- American Medical Association's Drug Evaluations (AMA DE); and
- American Hospital Formulary Service Drug Information (AHFS DI).

Based on the information we received from all of these sources, we constructed an initial list of IV drugs that we considered for inclusion on the proposed list as being safe and effective for home use. (At this point, the list included certain antineoplastic drugs but did not include 12 of the antibiotic drugs that were included on the master list of IV drugs submitted to us by the FDA. For reasons discussed below, neither of these groups of drugs is included in Appendix I.) We then obtained from the FDA the labeled indications for these drugs.

For the purpose of determining unlabeled uses of approved drugs, we relied on the information provided by the three compendia and the suggestions of the various home IV providers.

Having put together the list of IV drugs and indications, we then submitted it to health care professionals recommended to us by the Intravenous Nurses Society and the AMA. We requested that these individuals examine the list from a clinical perspective and we received several clinical recommendations.

As noted earlier, our rules for including antibiotic and non-antibiotic drugs on the proposed list have differed. The law requires the Secretary to cover all antibiotic drugs *unless* the Secretary makes the determination that a specific antibiotic *cannot* generally be administered safely and effectively in the home. The list of IV drugs we initially obtained from the FDA included identification of all IV antibiotic drugs that are currently available on the market. Of those antibiotic drugs, there were 12 antibiotics that we are proposing as not generally being safe and effective for use in the home.

It is our understanding that the following factors may prevent these 12 drugs that we propose for exclusion from being safe or effective when administered in the home setting:

- Potential serious or life-threatening side effects;
- Stringent monitoring requirements that could not effectively be performed in the home setting; and
- Stability limitations.

We list these 12 antibiotics below and specifically solicit comments and information about these drugs and their indications that might be relevant to a final determination about their suitability for use in the home. The drugs are:

- Chloramphenicol Sodium Succinate
- Colistimethate Sodium
- Doxycycline Hyclate
- Erythromycin Gluceptate
- Erythromycin Lactobionate
- Kanamycin Sulfate
- Lincomycin Hydrochloride
- Minocycline Hydrochloride
- Moxalactum Disodium
- Oxytetracycline Hydrochloride
- Polymyxin B Sulfate
- Tetracycline Hydrochloride

In addition, we want to note that, in our administrative process of assembling the list of antibiotic drugs (covered and noncovered), we believe that we have addressed all antibiotic drugs currently on the market. However, the introduction of new drugs into the marketplace is an ongoing occurrence. In addition, it is not inconceivable that in our process, we may have inadvertently missed an antibiotic drug. Therefore, we also invite public comment concerning antibiotics that do not appear in either appendix.

For non-antibiotic drugs, the Secretary has to make a determination that a drug *can* generally be safely and effectively administered in the home. Therefore, before an IV drug could be placed on Appendix I, we had to develop evidence from which that determination could be made. We derived this list based on consultations with the USP DI and the AHFS DI, providers of home IV therapy, and a review of available medical and scientific information.

With respect to the antineoplastic drug subcategory, we initially considered the following drugs for inclusion on the list:

- Bleomycin sulfate
- Cyclophosphamide
- Cytarabine
- Daunorubicin hydrochloride
- Diethylstilbestrol diphosphate
- Doxorubicin hydrochloride
- Etoposide
- Fluorouracil
- Methotrexate sodium
- Mitomycin
- Mitoxantrone hydrochloride
- Steptozocin
- Vinblastine sulfate
- Vincristine sulfate

Concerns were raised throughout the process of developing and clearing the list about the general safety of this group of drugs when administered intravenously in the home setting. A review of the drug labels revealed that of the 14 drugs in this category, 12 of them had warnings that specified that the drug should be administered by or under the supervision of a qualified physician who is experienced in cancer therapy. In addition, several drugs had additional warnings that patients should have access to or be treated in a facility with laboratory and supportive resources sufficient to monitor drug tolerance. We also reviewed the National Institutes of Health (NIH) recommended guidelines for the "Handling of Parenteral Antineoplastic Drugs" prepared in collaboration with oncologists, the clinical center pharmacy (within NIH), oncology nurses, and National Cancer Institute staff. With these factors to consider, and mindful also of the extensive safety requirements these factors could necessitate in the conditions of participation for home IV drug providers, we concluded that we are not able to propose, at this time, that these drugs could be safely and effectively administered intravenously in the home. In order to be consistent with the approved FDA labeling, we made the decision to remove these drugs from Appendix I. Because of the concern about whether antineoplastics are safe for use in the home, we have decided to seek further advice from the Public Health Service on this matter. Coverage of antineoplastic drugs under the home IV therapy benefit will accordingly be deferred pending receipt of such advice.

B. Use of Compendia

We selected the three compendia listed above as reliable sources for some of the advice and information we needed based on the rcommendations contained in the Conference Report accompanying Pub. L. 100–360 (H.R. Report No. 661, 100th Congress, 2d Session 192 (1988)). In the report, the three compendia are suggested for consideration as references for a related purpose under the new drug benefit, that is, for purposes of the establishment of standards for covered outpatient prescription drugs, as required under the new section 1834(c)(5)(B) of the Act (as added by section 202(b)(4) of Pub. L. 100–360). Since Congress recognized these compendia as authoritative for one purpose under the new drug benefit, we believe it is appropriate to rely on them for a related similar purpose under that benefit.

In addition, the USP DI is sponsored by the USP, an organization that includes members of schools of medicine and pharmacy, State medical and pharmacy associations, national medicine and pharmacy associations. Its listing of drugs includes virtually all drugs approved in the United States. The USP DI staff prepare monographs after a literature search and review of FDA approved labeling. (A monograph is an essay or treatise on the available data for a specified drug.) These monographs are reviewed by over 300 additional experts, plus many schools, associations, pharmaceutical companies, and government agencies. They are again reviewed by advisory panels until a consensus is developed. Proposed monographs are then published in the USP DI Review for general public comment before being published in the USP DI. The USP DI is republished annually with six supplements per year and contains individual monographs, most information from the FDA-approved label, and unlabeled uses of approved drugs.

The AHFS DI is sponsored by the American Society of Hospital Pharmacists, which represents 22,000 pharmacists. AHFS DI staff prepare monographs after a literature search and review of FDA labeling. These monographs are reviewed by over 300 specialists at the doctoral level, including physicians, pharmacologists, and biochemists selected from among experts in drug therapy. This review process continues until a consensus is developed. The AHFS DI includes individual drug monographs with some general category statements, full FDA label disclosure, and unlabeled uses of approved drugs. The AHFS DI is republished annually with three to four supplements per year.

The AMA DE is sponsored by the AMA, which represents over 293,000 physicians. The listed drugs include all drugs approved by the FDA for use in the United States. AMA staff prepare monographs after a literature search and review of FDA-approved labeling. These monographs are reviewed by about 400 consultants followed by approximately 100 designees or members of the American Society for Clinical Pharmacology and Therapeutics. The review process continues until a consensus is developed. The AMA DE includes mostly general statements with truncated drug monographs including unlabeled uses of approved drugs. The AMA DE has been published every 3 years with updates. However, beginning in late 1989, the AMA plans to publish this compendium annually with quarterly updates.

IV. Description of the List

Appendix I consists of IV drugs and their indications divided into three main categories. The categories are—biologicals, antibiotics and non-antibiotics (which is further broken down as indicated above into the four subcategories of drugs, excluding for reasons discussed above antineoplastic drugs). The list is based on our analysis and evaluation of the recommendations and information received from the various professional organizations that we contacted. Appendix II consists of the antibiotic drugs and indications not proposed for coverage.

We recognize that there is wide variation in both the type of drugs included in Appendix I as well as the indications for these drugs. This is due in part to the fact that the concept of home IV therapy has evolved to treat diverse types of patients:

- Patients who began a course of IV therapy in the hospital that has not been completed, but who are stable enough to no longer require hospitalization.
- Patients who are terminally ill and require IV therapy, but whose condition does not warrant hospitalization.
- Other types of patients who require IV therapy but do not require hospitalization.

We are proposing that all candidates for home IV therapy meet specific selection criteria as outlined in the regulations referred to earlier that deal with coverage of home IV drug therapy services and conditions of participation for home IV drug therapy providers.

While many of the drugs on the proposed list can be safely and effectively administered in the home setting and would be covered, such medications are sometimes taken orally. Payment may be denied if a more appropriate route of administration is available. When deciding that the route of administration is appropriate, the Peer Review Organization (PRO) will carefully review to determine if another route of administration would be effective (for example, oral, subcutaneous, etc.). If the PRO makes a determination that another route would be effective, the PRO would deny payment. (An example might be: a physician seeking prior approval for the administration of intravenous Aminophylline.) Payment is made for home IV therapy only when it is reasonable and necessary and there is medical justification for its use.

The proposed list includes some very toxic drugs while other less toxic drugs are excluded. We note, however, that in urging us to include virtually all IV drugs on the list, some organizations we contacted took the position that "a drug is a drug, and a cell is a cell". These organizations believe a drug that can be administered in a hospital setting can also be administered in the home setting. We take a different view. There are a variety of factors that we have considered that play a role in the determination of whether a drug is safe and effective for use in the home. These factors include, in addition to the obvious factor of potential serious or life threatening side effects, drug product stability and compatibility characteristics, and the need for close patient monitoring.

The variation of indications for each specific drug is a reflection of the varying degrees and stages of illnesses that will be treated in the home setting. We believe that we must allow flexibility to enable the physician to develop a plan of treatment appropriate for the specific medical condition of the patient. Nevertheless, we wish to make clear that the appearance of an indication for a covered drug on the listing is not intended to imply that the indication is approved under the provisions of the FFDCA.

With respect to the specific working of the indications, because there are different phrases to describe the same disease states and conditions, there may appear to be inconsistencies in our use of medical terminology when listing indications. According to medical professionals and medical texts, the following terms are examples of terms that may be used interchangeably:

- Genitourinary infections with gynecological infections; and
- Skin and soft-tissue infections with skin and skin structure infections.

Also, there may be times when a specific indication could be considered as a subset of a larger classification. Examples of these would include:

- Cystitis as part of urinary tract infections; and
- Gonorrhea as part of genitourinary infections.

Such indications may have been listed separately in Appendix I because that is the way they appeared in the recommendations that we received. In addition, because the practice of medicine is dynamic, it would not be feasible to list all indications, either labeled or unlabeled, that are not suitable for treatment in the home. For this reason, we have listed the indications for each drug that *can* generally be treated safely and effectively in the home. The following indications are proposed for exclusion for all intravenous antibiotics because it is our understanding that the seriousness of the condition requires hospitalization.

- Biliary tract infections.
- Central nervous system infections.
- Intra-abdominal infections.
- Respiratory tract infections.
- Septicemia.

Furthermore, specific labeled indications for certain drugs have been excluded because it is our understanding that they could not be safely and effectively treated intravenously in the home.

One of our proposed sub-categories is "hydration therapy." For our purposes and purposes of home IV therapy, the term is defined as the replacement of fluids or electrolytes, or both, in the human body when the physiologic and homeostatic mechanisms, which normally preserve their balance, fail as a result of illness or disease.

Most of the drugs that appear on the proposed list have specific dosages or dose ranges and are given at specific time intervals. For example, Cimetidine, used for hypersecretory conditions has a recommended dosing schedule of 300 mg administered intravenously every 6 to 8 hours. In comparison, for hydration therapy purposes, a physician can prescribe any of numerous available solutions used for this purpose, with the addition of one or more of the listed electrolytes, in a dose he or she has determined to be appropriate (for example, dextrose 5 percent in sodium chloride 0.45 percent, 1000 ml with 7 mEq of calcium as the chloride, gluconate or glucepate salt).

The magnitude of different combinations of ingredients in this sub-category requires our format for listing drugs in hydration therapy to differ from the other categories. This means that the options available to a physician prescribing a course of hydration therapy for a Medicare beneficiary would not be limited. The only restrictions on amounts of ingredients are those placed on solutions. These limitations have been determined to be the upper limits of commercially available products that would normally be used for hydration therapy (versus parenteral nutrition).

We are aware that our list will need periodic revision as new drugs are approved by FDA for entry in the market place. The FDA has informed us that 10 to 20 new IV drugs are approved over the course of each year that we would have to consider for entry on the list. In addition, if a drug already on the list is removed from the market or if a drug is no longer considered to be appropriate for home use, we would delete the drug from the list. We will update the list at least annually through a notice in the **Federal Register**. Updates may occur more frequently, possibly as often as semi-annually.

V. Regulatory Impact Statement

A. Executive Order 12291 and Regulatory Flexibility Act

Executive Order 12291 (E.O. 12291) requires us to prepare and publish a regulatory impact analysis for any proposed notice that meets one of the E.O. criteria for a "major rule"; that is, that would be likely to result in—

- An annual effect on the economy of $100 million or more;
- A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or
- Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Also, we generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that a proposed notice would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, pharmaceutical manufacturers and physicians are considered small entities.

As noted earlier in this preamble, this notice addresses the issues of: (1) Identifying IV drugs (both antibiotics and non-antibiotics) and their indications that are approved for marketing by FDA; and (2) identifying those IV drugs that are safe and effective for use in the home. There may be some economic or other effects of the proposed list of drugs that may touch upon other proposed rules implementing other home IV provisions of the catastrophic legislation, and some of these effects are addressed here as well as in the other rules. The purpose of this duplication is to ensure that the reader may determine the effects of each document without referring to the other proposed documents.

In addressing the first issue discussed above, all of the IV drugs listed in this notice may be covered under Medicare as covered outpatient drugs because they meet the criteria defined in section 1861(t)(2) of the Act. Thus, HCFA has exercised no administrative discretion in this area.

Administrative discretion, however, was required to identify those IV drugs that are safe and effective for use in the home. As discussed earlier in this preamble, we contacted the USP, ASHP, AMA, various home IV providers, the Pharmaceutical Manufacturers Association, various drug manufacturers and the Intravenous Nurses Society in making our initial determination as to whether a certain IV drug could be proposed as safe and effective for use in the home. We believe that the information solicited from the compendia along with the advice of the other organizations constitutes a valid basis on which to conclude with reasonable assurance that a particular drug can generally be administered safely and effectively in a home setting. Furthermore, we believe that the identification of IV drugs that are safe and effective for use in the home would not result in any significant effects on the economy or on small businesses. Our reasons follow:

1. Effects on drug manufacturers

Drug manufacturers producing IV drugs that are included in this proposed list would be advantaged in competing for the Medicare market because their drugs would be covered under Medicare as home IV drugs. We recognize that manufacturers producing IV drugs that are not included in our proposed list would be adversely affected in competing for the Medicare share of the IV drug market. Although we do not have data available that allow us to determine the degree to which drug manufacturers would be affected, we do not believe that will be significantly affected. This is because IV drugs (except antineoplastics) currently being prescribed for home use would likely be included on the proposed list based on the methodology used in developing this list.

2. Effects on beneficiaries

Medicare beneficiaries who are prescribed an IV drug for home use that is on the proposed list would benefit by being eligible for Medicare coverage of that drug. Conversely, beneficiaries for whom a drug has been prescribed that is not covered by Medicare for home IV use, may have to remain in the hospital to receive covered IV therapy or may have to incur expenses for home IV therapy themselves. Since we believe that most drugs currently prescribed for home IV use are included on the list, we

do not believe beneficiaries would be significantly affected adversely.

3. Effects on physicians

If drugs commonly prescribed by a physician for use in the home are not on the list, the physician could be influenced to change his or her prescribing patterns for Medicare patients to ensure that the patient is prescribed a Medicare covered home IV drug. However, given that we have consulted with various professional organizations and compendia in developing this list, we believe that the list, with the exception of antineoplastics, contains the most frequently prescribed home IV therapy drugs. Thus, we believe it unlikely that physicians' prescribing patterns would change significantly as a result of this list.

For the reasons discussed above, we believe that this notice would not meet the $100 million criterion nor do we believe that it meets the other E.O. 12291 criteria. Therefore, we have determined that this notice is not a major rulemaking document under E.O. 12291, and a regulatory impact analysis is not required. Also, for the reasons discussed, we have determined, and the Secretary certifies, that this notice would not have a significant economic impact on a substantial number of small entities. Therefore, a regulatory flexibility analysis would not be required under the RFA.

B. Rural Hospital Impact Statement

Section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if a proposed notice may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital with fewer than 50 beds located outside of a Metropolitan Statistical Area.

We are not preparing a rural impact statement since we have determined, and the Secretary certifies, that this proposed notice would not have a significant economic impact on the operations of a substantial number of small rural hospitals.

VI. Information Collection Requirements

This proposed notice does not impose information collection and recordkeeping requirements. Consequently, it need not be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.).

VII. Responses to Comments

In responding to this notice, we request that comments restrict their comments and suggestions to the suitability of the drugs listed in the Appendix for use in the home for the indications listed. We also request commenters about any IV drugs that are not included on the list, which commenters believe would be suitable for home use, and their indications.

Because of the large number of items of correspondence we normally receive on proposed notices, we are not able to acknowledge or respond to them individually. However, we will consider all comments that we receive by the date and time specified in the "Date" section of this notice, and, if we proceed with a final notice, we will respond to the comments in that notice.

(Secs. 1832(a)(2)(A)(i) and 1861(s)(2)(J) and (t) of the Social Security Act (42 U.S.C. 1395k(a)(2)(A)(i) and 1395x(s)(2)(J) and (t)))

(Catalog of Federal Domestic Assistance Program No. 13.774, Medicare—Supplementary Medical Insurance Program)

Dated: June 7, 1989.

Acting Administrator, Health Care Financing Administration.

Approved: August 19, 1989.

Louis W. Sullivan,

Secretary.

Appendix I.—Proposed List of Covered Home IV Drugs and Indications

I. Antibiotics

- Amdinocillin
  - Urinary tract infections, bacterial
- Amikacin Sulfate
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and soft-tissue infections
  - Urinary tract infections, bacterial
- Ampicillin Sodium
  - Arthritis, gonococcal
  - Bone and joint infections
  - Endocarditis, bacterial
  - Entercolitis, "Shigella"
  - Genitourinary tract infections
  - Gonorrhea
  - "Hemophilus" infections
  - Listeriosis
  - Paratyphoid fever
  - Skin and soft-tissue infections
  - Urethritis, gonococcal
- Ampicillin Sodium and Sulbactam Sodium
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and skin structure infections
- Azlocillin Sodium
  - Bone and joint infections
  - Endocarditis, bacterial
  - Skin and skin structure infections
  - Urinary tract infections, bacterial
- Aztreonam
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and skin structure infections
  - Urinary tract infections, bacterial
- Carbenicillin Disodium
  - Genitourinary tract infections
  - Skin and soft-tissue infections
  - Urinary tract infections, bacterial
- Cefamandole Nafate
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and skin structure infections
  - Urinary tract infections, bacterial
- Cefazolin Sodium
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and skin structure infections
  - Urinary tract infections, bacterial
- Cefonicid Sodium
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and skin structure infections
  - Urinary tract infections, bacterial
- Cefoperazone Sodium
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and skin structure infections
  - Urinary tract infections, bacterial
- Ceforanide
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and skin structure infections
  - Urinary tract infections, bacterial
- Cefotaxime Sodium
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and skin structure infections
  - Urinary tract infections, bacterial
- Cefotetan Disodium
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and skin structure infections
  - Urinary tract infections, bacterial
- Cefoxitin Sodium
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and skin structure infections
  - Urinary tract infections, bacterial
- Ceftazidime
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and skin structure infections
  - Urinary tract infections, bacterial
- Ceftizoxime Sodium
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and soft-tissue infections
  - Urinary tract infections, bacterial
- Ceftriaxone Sodium
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Lyme Disease, joint and CNS
  - Skin and skin structure infections
  - Urinary tract infections, bacterial

- Cefuroxime Sodium
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Gonorrhea
  - Skin and skin structure infections
  - Urinary tract infections, bacterial
- Cephalothin Sodium
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and soft-tissue infections
  - Urinary tract infections, bacterial
- Cephapirin Sodium
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and skin structure infections
  - Urinary tract infections, bacterial
- Cephradine
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and skin structure infections
  - Urinary tract infections, bacterial
- Clindamycin Phosphate
  - Bone and joint infections
  - Genitourinary tract infections
  - Skin and soft-tissue infections
- Gentamicin Sulfate
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Listeriosis
  - Skin and soft-tissue infections
  - Urinary tract infections, bacterial
- Imipenem and Cilastatin Sodium
  - Bone and joint infections
  - Genitourinary tract infections
  - Skin and skin structure infections
  - Urinary tract infections, bacterial
- Methicillin Sodium
  - Endocarditis, bacterial
  - Skin and soft-tissue infections
- Mezlocillin Sodium
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and skin structure infections
  - Urinary tract infections, bacterial
- Miconazole
  - Candidiasis, disseminated
  - Candidiasis, mucocutaneous, chronic
  - Petriellidiosis
  - Urinary bladder infections, fungal
- Nafcillin Sodium
  - Endocarditis, bacterial
  - Skin and soft-tissue infections
- Netilmicin Sulfate
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and skin structure infections
  - Urinary tract infections, bacterial
- Oxacillin Sodium
  - Endocarditis, bacterial
  - Skin and soft-tissue infections
- Penicillin G Potassium
  - Arthritis, gonococcal
  - Diphtheria, prophylaxis
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Gingivostomatitis, necrotizing ulcerative
  - Listeriosis
  - Lyme disease, joint and CNS
  - Syphilis
- Penicillin G Sodium
  - Arthristis, gonococcal
  - Diphtheria, prophylaxis
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Gingivostomatitis, necrotizing ulcerative
  - Listeriosis
  - Lyme disease, joint and CNS
  - Syphilis
- Piperacillin Sodium
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and skin structure infections
  - Urethritis, gonococcal
  - Urinary tract infections, bacterial
- Ticarcillin Disodium
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and soft-tissue infections
  - Urinary tract infections, bacterial
- Ticarcillin Disodium and Clavulanate Potassium
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Skin and skin structure infections
  - Urinary tract infections, bacterial
- Tobramycin Sulfate
  - Bone and joint infections
  - Endocarditis, bacterial
  - Genitourinary tract infections
  - Listeriosis
  - Skin and skin structure infections
  - Urinary tract infections,
- Vancomycin Hydrochloride
  - Bone and joint infections
  - Endocarditis, bacterial

II. Non-Antibiotic Drugs

A. Anti-infectives (other then antibiotics)

- Acyclovir Sodium
  - Herpes zoster
  - Herpes simplex
- Pentamidine Isethionate
  - Pneumonia, "Pneumocystis carinii"
  - Leishmaniasis, visceral
  - Trypanosomiasis, African
- Sulfamethoxazole and Trimethoprim
  - Bone and joint infections
  - Chancroid
  - Chlamydial infections
  - Enterocolitis "Shigella"
  - Genitourinary tract infections
  - Gonorrhea
  - "Hemophilus" infections
  - Lymphogranuloma venereum
  - Paratyphoid fever
  - Pneumonia, "Pneumocystis carinii"
  - Rheumatic fever
  - Urinary tract infections, bacterial

B. Hydration Therapy

Intravenous Solutions

1. dextrose in water solutions
2. sodium chloride solutions
3. dextrose/sodium chloride solutions
4. premixed potassium chloride solutions up to concentrations of 40mEq/L

The following limitations apply fot all of the above solutions:

a. concentration of dextrose in any solution is not to exceed 10%.

b. concentration of sodium chloride in any solution is not to exceed 0.9%.

5. premixed electrolyte solutions, containing any combination of the following electrolytes in their various salt forms, which are not intended for parenteral nutrition:
   - sodium
   - potassium
   - calcium
   - magnesium
   - chloride
   - phosphate

The caloric content of these solutions is limited to 340 calories.

Electrolytes

- calcium chloride
- calcium gluconate
- calcium glucepate
- magnesium chloride
- magnesium sulfate
- potassium acetate
- potassium chloride
- potassium phosphate
- sodium acetate
- sodium bicarbonate
- sodium chloride
- sodium phosphate

The indications for drugs in this category are less specific than for other drugs. After referring to various clinical texts, we have determined that water depletion, and combined water and electrolyte depletion, can be the result of many disease and non-disease states, including but not limited to the following:

Extrarenal losses

1. Gastrointestinal (vomiting, diarrhea, ostomy drainage)
2. Skin losses (sweating, burns)
3. Lung losses (bronchorrhea)

Renal losses

1. Renal disease (chronic renal failure, diuretic phase of acute renal failure)
2. Diuretic excess
3. Osmotic diuresis (diabetic glycosuria)
4. Mineralcorticoid deficiency (Addison's disease, hypoaldosteronism)

There may be other instances when a patient needs hydration therapy. Patients taking antineoplastic drugs must often be hydrated to increase urine output to insure the timely excretion of the drug because of its toxic side effects.

C. Pain Management Drugs

Indication: For treatment of chronic intractable pain.

- Butorphanol Tartrate
- Hydromorphone Hydrochloride
- Meperidine Hydrochloride
- Morphine Sulfate

D. Other

- Aminophylline
  - Asthma, bronchial
- Bumetanide
  - Edema
- Cimetidine Hydrochloride
  - Adenoma, multiple endocrine
  - Bleeding, upper gastrointestinal
  - Hypersecretory conditions, gastric
  - Mastocytosis, systemic
  - Pancreatic insufficiency
  - Reflux, gastroesophageal
  - Stress-related mucosal damage

  - Ulcer, duodenal
  - Ulcer, gastric
  - Zollinger-Ellison syndrome
- Deferoxamine Mesylate
  - Toxicity, iron chronic
  - Toxicity, aluminum
- Dexamethasone Sodium Phosphate
  - Adrenocortical insufficiency, chronic primary (Addison's)
  - Adrenocortical insufficiency, secondary
  - Adrenogenital syndrome (adrenal hyperplasia, congenital)
  - Anemia, hemolytic, acquired (autoimmune)
  - Anemia, hypoplastic, congenital (erythroid)
  - Anemia, red blood cell (erythroblastopenia)
  - Arthritis, psoriatic
  - Arthritis, rheumatoid
  - Bowel disease, inflammatory, including colitis, ulcerative
  - Bronchitis, asthmatic, acute or chornic
  - Calcium pyrophosphate deposition disease, acute (pseudogout, chondrocalcinosis articularis, synovitis, crystal-induced)
  - Carcinoma, breast
  - Carcinoma, prostatic
  - Connective tissue disease, mixed
  - Dermatitis, exfoliative
  - Dermititis herpetiformis bullous
  - Dermatitis, seborrheic, severe
  - Dermatomyositis, systemic
  - Dermatoses, inflammatory, severe Enteritis, regional (Crohn's disease)
  - Erythema multiforme, severe (Stevens-Johnson syndrome)
  - Fever, due to malignancy
  - Gouty arthritis, acute
  - Hemolysis
  - Hypercalcemia associated with neoplasms (or sarcoidosis)
  - Increased cranial pressure due to malignancy
  - Leukemia, acute or chronic
  - Lupus erythematosus, systemic
  - Lymphomas, Hodgkins, or non-Hodgkins
  - Multiple myeloma
  - Mycosis fungoides
  - Nausea and vomiting, cancer-chemotherapy induced
  - Pemphigoid
  - Pemphigus
  - Polychondritis, relapsing
  - Polymyalgia, rheumatica
  - Polyps, nasal
  - Pulmonary disease, chronic obstructive (not controlled with theophylline and beta-adrenergic agonists)
  - Reiter's disease
  - Rheumatic fever
  - Rhinitis, allergic, perennial, or seasonal, severe
  - Thrombocytopenia, secondary, in adults
  - Thrombocytopenia purpura, idiopathic, in adults
  - Trichinosis
- Diphenhydramine Hydrochloride
  - Nausea and vomiting
- Famotidine
  - Adenoma, multiple endocrine
  - Bleeding, upper gastrointestinal
  - Hypersecretory conditions, gastric
  - Mastocytosis, systemic
  - Pancreatic insufficiency
  - Reflux, gastroesophageal
  - Stress-related mucosal damage
  - Ulcer, duodenal
  - Ulcer, gastric
  - Zollinger-Ellison syndrome
- Furosemide
  - Edema
- Heparin Calcium
- Heparin Sodium
  - Thromboembolism
- Hydrocortisone Sodium Phosphate
- Hydrocortisone Sodium Succinate
  - Adrenocortical insufficiency, chronic primary (Addison's)
  - Adrenocortical insufficiency, secondary
  - Adrenogenital syndrome (adrenal hyperplasia, congenital)
  - Anemia, hemolytic, acquired (autoimmune)
  - Anemia, hypoplastic, congenital (erythroid)
  - Anemia, red blood cell (erythroblastopenia)
  - Arthritis, psoriatic
  - Arthritis, rheumatoid
  - Bowel disease, inflammatory, including colitis, ulcerative
  - Bronchitis, asthmatic, acute or chronic
  - Calcium pyrophosphate deposition disease, acute (pseudogout, chondrocalcinosis articularis, synovitis, crystal-induced)
  - Carcinoma, breast
  - Carcinoma, prostatic
  - Connective tissue disease, mixed
  - Dermatitis, exfoliative
  - Dermatitis herpetiformus, bullous
  - Dermatitis, seborrheic, severe
  - Dermatomyositis, systemic
  - Dermatoses, inflammatory, severe
  - Enteritis, regional (Crohn's disease)
  - Erythema multiforme, severe
  - Fever, due to malignancy
  - Gouty arthritis, acute
  - Hemolysis
  - Hypercalcemia associated with neoplasms (or sarcoidosis)
  - Increased cranial pressure, due to malignancy
  - Leukemia, acute or chronic
  - Lupus erythematosus, systemic
  - Lymphomas, Hodgkin's or non-Hodgkin's
  - Multiple myeloma
  - Mycosis fungoides
  - Nausea and vomiting, cancer-chemotherapy induced
  - Pemphigoid
  - Pemphigus
  - Polychondritis, relapsing
  - Polymyalgia, rheumatica
  - Polyps, nasal
  - Pulmonary disease, chronic obstructive (not controlled with Theophylline and beta-adrenergic agonists)
  - Reiter's disease
  - Rheumatic fever
  - Rhinitis, allergic, perennial or seasonal, severe
  - Thrombocytopenia, secondary, in adults
  - Thrombocytopenia purpura, idiopathic, in adults
  - Trichinosis
- Iron Dextran
  - Iron deficiency anemia
- Leucovorin Calcium
  - Methotrexate toxicity (antidote to folic acid antagonist)
- Mannitol
  - Premedication, cancer chemotherapy
- Methylprednisolone Sodium Succinate
  - Adrenocortical insufficiency, chronic primary (Addison's)
  - Adrenocortical insufficiency, secondary
  - Adrenogenital syndrome (adrenal hyperplasia, congenital)
  - Anemia, hemolytic, acquired (autoimmune)
  - Anemia, hypoplastic, congenital (erythroid)
  - Anemia, red blood cell (erythroblastopenia)
  - Arthritis, psoriatic
  - Arthritis, rheumatoid
  - Bowel disease, inflammatory, including colitis, ulcerative
  - Bronchitis, asthmatic, acute or chronic
  - Calcium pyrophosphate deposition disease, acute (pseudogout; chondrocalcinosis articularis; synovitis, crystal-induced)
  - Carcinoma, breast
  - Carcinoma, prostatic
  - Connective tissue disease, mixed
  - Dermatitis, exfoliative
  - Dermatitis, herpetiformis, bullous
  - Dermatitis, seborrheic, severe
  - Dermatomyositis, systemic
  - Dermatoses, inflammatory, severe
  - Enteritis, regional (Crohn's disease)
  - Erythema multiforme, severe (Stevens-Johnson syndrome)
  - Fever, due to malignancy
  - Gouty arthritis, acute
  - Hemolysis
  - Hepatitis, chronic active
  - Hepatitis, nonalcoholic, in women
  - Hypercalcemia associated with neoplasms (or sarcoidosis)
  - Increased cranial pressure, due to malignancy
  - Leukemia, acute or chronic
  - Lupus erythmatosus, systemic
  - Lymphomas, Hodgkins or non-Hodgkins
  - Multiple myeloma
  - Mycosis fungoides
  - Necrosis, hepatic, subacute
  - Pemphigoid
  - Pemphigus
  - Polychondritis, relapsing
  - Polymyalgia, rheumatica
  - Polyps, nasal
  - Pulmonary disease, chronic obstructive (not controlled with Theophylline and beta-adrenergic agonists)
  - Reiter's disease
  - Rheumatic fever
  - Rhinitis, allergic, perennial or seasonal, severe
  - Thrombocytopenia, secondary, in adults
  - Thrombocytopenic purpura, idiopathic, in adults
  - Trichinosis
- Metoclopramide
  - Gastroparesis
  - Nausea and vomiting, cancer chemotherapy induced
- Phenytoin Sodium
  - Epilepsy
- Prochlorperazine Edisylate
  - Nausea and vomiting
- Ranitidine Hydrochloride
  - Adenoma, multiple endocrine
  - Bleeding, upper gastrointestinal
  - Hypersecretory conditions, gastric
  - Mastocytosis, systemic
  - Pancreatic insufficiency
  - Reflux, gastroesophageal
  - Stress-related mucosal damage
  - Ulcer, duodenal
  - Ulcer, gastric

Zollinger-Ellison syndrome

III. IV Biologicals and Indications

A. Anti-Infectives

NONE

B. Fluid Replacement

NONE

C. Pain Management

NONE

D. Anit-Cancer Chemotherapeutic

NONE

E. Other

Immune Globulin
  Immunodeficiency Syndrome
  Thrombocytopenic purpura, idiopathic
Alpha-proteinase Inhibitor, Human
  Emphysema, panacinar, due to alpha-antitrypsin
  deficiency

Appendix B—Proposed List of Non-Covered Home IV Antibiotic Drugs and Indications

I. Antibiotic Drugs not Proposed for Coverage

Chloramphenicol Sodium Succinate
Colistimethate Sodium
Doxycycline Hyclate
Erythromycin Gluceptate
Erythromycin Lactobionate
Kanamycin Sulfate
Lincomycin Hydrochloride
Minocycline Hydrochloride
Moxalactum Disodium
Oxytetracycline Hydrochloride
Polymyxin B Sulfate
Tetracycline Hydrochloride

II. Indications for Antibiotic Drugs not Proposed for Coverage

Biliary tract infections
Central nervous system infections
Intra-abdominal infections
Respiratory tract infections
Septicemia

Part III

Department of Education

Office of Elementary and Secondary Education

34 CFR Part 222

Assistance for Local Educational Agencies in Areas Affected by Federal Activities and Arrangements for Education of Children Where Local Educational Agencies Cannot Provide Suitable Free Public Education; Final Rule

DEPARTMENT OF EDUCATION

Office of Elementary and Secondary Education

34 CFR Part 222

RIN 1810–AA49

Assistance for Local Educational Agencies in Areas Affected by Federal Activities and Arrangements for Education of Children Where Local Educational Agencies Cannot Provide Suitable Free Public Education

AGENCY: Department of Education.

ACTION: Final rule.

SUMMARY: The Secretary amends the regulations governing eligibility, entitlement, and payment determinations under section 3(d)(2)(B) of the Impact Aid Program. Changes in a number of other regulatory provisions relating to payments under sections 2, 3, and 4 of this program also are made. These regulations are intended to provide guidance to local educational agencies (LEAs) applying for maintenance and operations assistance under Public Law 81–874 (the Act), and may affect the Department's calculation of assistance amounts.

EFFECTIVE DATE: These regulations take effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments with the exception of §§ 222.3, 222.9 through 222.11, 222.14 through 222.17, 222.20, 222.22, 222.25, 222.33, 222.34, 222.36, 222.40, 222.72, 222.74, and 222.125 through 222.129. Sections 222.3, 222.9 through 222.11, 222.14 through 222.17, 222.20, 222.22, 222.25, 222.33, 222.34, 222.36, 222.40, 222.72, 222.74, and 222.125 through 222.129 will become effective after the information collection requirements contained in those sections have been submitted by the Department of Education and approved by the Office of Management and Budget under the Paperwork Reduction Act of 1980. If you want to know the effective date of these regulations, call or write the Department of Education contact person. A document announcing the effective date will be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Charles E. Hansen, Acting Director, Impact Aid Program, U.S. Department of Education, 400 Maryland Avenue SW., Room 2079, Washington, DC 20202–6244. Telephone: (202) 732–3637.

SUPPLEMENTARY INFORMATION:

A. General

Public Law 81–874, as amended, 20 U.S.C. 236 through 241–1 and 242 through 244, known as the Impact Aid maintenance and operations assistance program, authorizes assistance to LEAs that are financially burdened by a reduced tax base resulting from the Federal acquisition of real property, an increased student population due to Federal activities, or both. Section 3 of the Act addresses both types of burdens by authorizing payments to LEAs that are required to provide free public education to children who live on, and/or whose parents are employed on, tax-exempt, federally owned or leased real property ("federally connected children"). These payments supplement local revenues and assist the LEAs in meeting their maintenance and operations costs.

Section 3(d)(2)(B) of the Act, 20 U.S.C. 238(d)(2)(B), provides financial assistance in addition to regular payments under section 3 of the Act, to certain heavily impacted LEAs that demonstrate eligibility for that assistance. For an applicant eligible to receive assistance under section 3(d)(2)(B), the statute provides that the Secretary will supplement the eligible LEA's section 3 payment to enable it to provide a level of education equivalent to that provided by the school districts determined to be generally comparable to it. A payment provided under section 3(d)(2)(B), however, is subject to a maximum entitlement amount.

In order to inform applicants about the operation of section 3(d)(2)(B) of the Act, the Secretary believes it is desirable to describe in regulations how the Department determines eligibility, entitlements, and payments for all LEAs applying for section 3(d)(2)(B) assistance. In addition to establishing a new subpart K, which relates specifically to section 3(d)(2)(B), a number of existing regulatory provisions are amended. Also, subpart H, containing provisions related to handicapped children and children with specific learning disabilities, is revised to clarify language and specify requirements for fiscal accountability for the use of section 3(d)(2)(C) funds.

These regulations are based upon the requirements in the Act as revised by the Hawkins-Stafford Elementary and Secondary School Improvement Amendments of 1988 (Pub. L. 100–297, April 28, 1988) (Hereinafter "the Hawkins-Stafford Amendments") and Public Law 101–26, enacted on May 11, 1989. Unless otherwise indicated, the provisions in these regulations reflect the current policy and practice of the Department. The final regulations become effective starting with FY 1990.

B. Information Contained in the Notice of Proposed Rulemaking

On March 23, 1989, the Secretary published a notice of proposed rulemaking (NPRM) for the Impact Aid maintenance and operations assistance program in the **Federal Register**, 54 FR 12104–12120. Most of the explanatory statements in the NPRM remain relevant. For the sake of brevity, those statements are not being reprinted here. Readers are referred to the **Federal Register** of March 23, 1989. (54 FR 12104–12120).

C. Significant Changes

Significant changes in the final regulations from the NPRM are described below. The NPRM noted that examples concerning subpart K would not be shown in the Code of Federal Regulations. Accordingly, those examples are not included in the final regulations. Except for minor editorial and technical revisions, there are no other differences between the NPRM and these final regulations.

1. *Section 222.74.* The fiscal accountability requirements in § 222.74(d) are modified in response to public comment. The manner in which the Department tests whether section 3(d)(2)(C) funds were spent for their authorized purpose has been amended so that all expenditures on handicapped programs, including those from all Federal, State, and local funds will be factored into the average per pupil handicapped expenditure formula rather than just general State and local expenditures, as described in the NPRM. To the extent that this amendment may alter current procedure, the Department intends this modification to apply.

2. *Sections 222.124, 222.129, and 222.132.* Public Law 101–26, which became effective on May 11, 1989, made several technical amendments to the Impact Aid statute. One of the amendments changed the tax effort requirement for section 3(d)(2)(B), from 80 percent to 95 percent of the applicant's comparable LEAs' effort. As a result of this recent legislation, references to tax effort in §§ 222.124, 222.129, and 222.132 have been changed from 80 percent to 95 percent.

Analysis of Comments and Changes

In response to the Secretary's invitation in the NPRM, several parties submitted comments on the proposed regulations. An analysis of the comments and of the changes in the regulations since publication of the NPRM follows.

Substantive issues are discussed under the section of the regulations to

which they pertain. Technical and other minor changes—and suggested changes the Secretary is not legally authorized to make under the applicable statutory authority—are not addressed.

Sections 222.9 and 222.10

Comment: One commenter stated that §§ 222.9 and 222.10 appear to be inconsistent. Section 222.9 indicates that applications are to be transmitted through State educational agencies (SEAs) while § 222.10 specifies that applications are to be simultaneously submitted to the Department and the SEA. Section 222.10 also states that SEAs must notify the Secretary by February 15 if they have any problems with an LEA's application. The commenter recommended that this review period be extended to allow SEAs 30 days to review applications.

Discussion: Section 222.10 accurately reflects the Department's proposed new practice for the submission of applications. The changes proposed are expected to reduce the incidents of applications filed too late to qualify for finding and to expedite payments.

The Secretary believes that SEAs will have sufficient time to review applications and notify the Secretary by February 15 of any concerns they have with individual applications. The Department traditionally receives applications throughout the month of January. Presumably, LEAs will maintain their usual schedules for preparing and submitting applications in the future. As a result, SEAs should have the same amount of time to review applications as in the past. In some cases, this will be more than 30 days.

Changes: The language of § 222.9 has been revised to make it consistent with § 222.10.

Section 222.33

Comment: Several commenters stated that they believe the change in the statute to allow applicants for funding under section 3(d)(2)(B) to have their payment based on three comparable LEA's should be incorporated in the regulations by revising § 222.33. They recommended that § 222.33 require groups of comparables to contain a minimum of three LEAs instead of the current minimum of ten.

Discussion: Section 222.33 describes the identification of generally comparable LEAs for all section 3 applicants, not just those seeking assistance under section 3(d)(2)(B). The statutory provision allowing the use of three comparable LEAs applies only to determinations of section 3(d)(2)(B) eligibility and payments.

Changes: None.

Section 222.36

Comment: Four commenters objected to the method proposed by the Department for identification of three comparable LEAs for section 3(d)(2)(B) purposes. One commenter complained that the statute refers to "three or more" comparables while the regulations refer to "three" comparables. This commenter recommended that section 3(d)(2)(B) applicants be allowed to select from three to nine comparables under § 222.36 using the method described in § 222.33(c)(3)(i)(A). Three commenters proposed that the regulations state that the same comparable LEAs will be used for computing local contribution rates for section 3 purposes and for computing payments under section 3(d)(2)(B).

Discussion: In one place, the statute refers to "three" comparable LEAs and in another to "three or more" comparable LEAs. The bill report from the Senate, which proposed this change, refers to three comparable LEAs. The Department uses the more specific reference in these regulations and believes this results in a distinct new option for the identification of comparable LEAs, in addition to the methods currently contained in § 222.33, including that in § 222.33(c)(3)(i)(A). Further, the apparent intention of the statutory provision is to identify the LEAs in a section 3(d)(2)(B) applicant's State that are most comparable to the applicant. The Department believes that this can best be accomplished by applying all of the objective factors incorporated in § 222.33 and then selecting three of the LEAs that most nearly match the applicant on these factors.

The Department does not believe it would be appropriate to adopt the commenter's suggestion to base a section 3(d)(2)(B) applicant's local contribution rate (for its regular section 3 payment) on the three comparable LEAs selected under the new method. The statute indicates that these three comparables may be used to determine an LEA's eligibility for a payment under section 3(d)(2)(B) but does not say they are to be used for section 3 purposes. Using different comparable LEAs for these two payment calculations would not adversely affect a district's total Impact Aid payment, because section 3(d)(2)(B) funds are added to whatever an applicant receives for a regular section 3 payment to allow the district to match the expenditures of its comparables.

Change: None.

Section 222.37

Comment: One commenter objected to applying the tax effort requirements referred to in § 222.37 to applicants for assistance under section 3(d)(3)(B)(ii), which compensates LEAs for increased expenditures resulting from unusual geographic factors. The commenter stated that this requirement should apply only to applicants under section 3(d)(2)(B) since a tax effort requirement is specifically incorporated in that provision of the statute but not in section 3(d)(3)(B)(ii).

Discussion: The Secretary believes it is appropriate to apply the tax effort requirements to both of these special assistance provisions because they are both based on financial need. A tax effort requirement under section 3(d)(3)(B)(ii) emphasizes that financial need for funds under this section must be demonstrated and helps to verify that an applicant cannot maintain a level of education equivalent to that of its comparables because of increased expenditures and not because of reduced revenues. The legislative history specifically states that "[t]he amount of the increase (in a section 3(d)(3)(B)(ii) applicant's local contribution rate) will be the amount necessary to enable it to maintain a level of education equivalent to that maintained in the school districts determined by the (Secretary) to be (generally) comparable." *See* H. Rept. 2287, 81st Cong., 2d Sess. 14 (1950). The Secretary does not believe that an LEA should be allowed to make a minimal tax effort or decrease its tax effort and expect the Impact Aid program to make up the difference by increasing the applicant's section (3)(d)(3)(B)(ii) payment.

Changes: None.

Section 222.74(b)

Comment: One commenter stated that the methods of obligation and expenditure of funds outlined in § 222.74(b) impose a significant limitation on LEAs for the expenditure of section 3(d)(2)(C) funds because the districts receive these funds late in the fiscal year. He recommends that this section be revised to allow an LEA to obligate or expend section 3(d)(2)(C) funds for the fiscal year for which the funds were appropriated or for any succeeding fiscal year provided that the LEA can demonstrate that the funds were spent on programs or projects for federally connected, handicapped children. In support of his recommendation, the commenter pointed out language in the NPRM that discussed the rationale for removing the Tydings amendment requirement (20 U.S.C. 1225b). This requirement stated that section 3(d)(2)(C) funds must be obligated or expended by the end of the fiscal year following the fiscal year for which the funds were obligated.

Discussion: Section 222.74(b) requires that a district obligate or expend section 3(d)(2)(C) funds for, but not necessarily in, the fiscal year for which the funds were apppropriated, or reimburse itself for obligations or expenditures of local funds already made. Because districts generally receive their section 3(d)(2)(C) funds in the fiscal year for which the funds are appropriated, the Secretary believes that it is reasonable to tie the funds to that fiscal year. In addition, it is not administratively feasible to track the funds if they are not tied to a specific fiscal year.

Changes: None.

Section 222.74(b)(2)

Comment: One commenter stated that § 222.74(b)(2), which provides that an LEA may reimburse itself for obligations or expenditures of local funds, precludes LEAs in highly equalized States from utilizing the provision. He recommends that the wording be revised to include State expenditures as well as local expenditures made.

Discussion: The reference to local expenditures in this provision encompasses expenditures from local funds and general State aid. The Secretary is unable to include specific State funds in this provision because it would conflict with section 5 of the Act and § 222.75, which require that section 3(d)(2)(C) funds not supplant State funds that were or would have been available to the LEA for the free public education of children counted under section 3(d)(2)(C). However, the Secretary believes that a clarification can be added to the term "local funds."

Changes: The phrase "and general State aid" is added to the portion of § 222.74(b)(2) that refers to local funds.

Section 222.74(d)

Comment: Three commenters objected to the fiscal accountability provisions in § 222.74(d) that apply to additional payments under section 3(d)(2)(C) to LEAs that provide free appropriate public education to federally connected, handicapped children. One commenter stated he believes that the accountability provisions in § 222.74(d) make State aid for handicapped children categorical even when some State laws do not apparently specify that all State aid for handicapped children must actually be spent for such children. Two commenters indicated they feel that the fiscal accountability requirements in the NPRM do a disservice to equalized States and States that heavily compensate their LEAs for expenditures for handicapped children by focusing only on the amount of local expenditures that were made for special services for the handicapped. One commenter also believes that the effect of this test is to make Federal funds received under section 3(d)(2)(C) the "last" dollars spent on federally connected, handicapped children, and he doe snot believe there is Federal authority to compell that result. One commenter recommended that in lieu of the fiscal accountability requirements proposed, which he feels penalize LEAs in equalized States, the Department require an LEA in an equalized State to subject a budget to their SEA delineating the specific services to be provided with the 3(d)(2)(C) funds.

Discussion: The Secretary agrees that the accountability test has the potential for penalizing LEAs that have low expenditures from local sources for special education purposes but are highly compensated for these expenditures by their States either through equalization or other means. The Secretary believes that the accountability test would be strengthened by taking into consideration all funds, including Federal, State, and local, expended by the LEA for handicapped programs. The Secretary also recognizes that the test contained in the NPRM may have the effect of making State handicapped aid categorical. The Secretary does not generally believe that it is good public policy for States to provide extra money for handicapped students without specifying that the money must be spent for those students. The Secretary believes, however, that the Act does not require LEAs to spend State dollars before section 3(d)(2)(C) funds are spent. The Secretary cautions that while State funds may not necessarily be categorical, States need to be aware that they are, nevertheless, clearly prohibited from using section 3(d)(2)(C) funds to supplant State funds that would have been otherwise available to LEAs.

Changes: The Secretary has modified § 222.74(d) by deleting the provisions that separate expenditures from State funds and Federal Education of the Handicapped Act (EHA) funds from expenditures from local funds for programs or projects serving federally connected, handicapped children. The fiscal accountability test in this section has been expanded to look at the total amount of expenditures made, from all Federal, State, and local funds for handicapped programs and projects that serve federally connected, handicapped students in an LEA.

Section 222.128

Comment: Three commenters proposed that § 222.128 apply to fiscally independent districts as well as fiscally dependent school districts. This section allows, subject to the approval of the Secretary, the use of local tax sources other than real property taxes in the determination of reasonable tax effort.

Discussion: As stated in § 222.124 of the NPRM, the provisions of §§ 222.126–22.128 apply to fiscally independent school districts. Also, § 222.129 notes that applicable provisions of §§ 222.126–222.128 may be used for fiscally dependent school districts. Therefore, no change is needed in the final regulations.

Changes: None.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

List of Subjects in 34 CFR Part 222

Education, Education of the handicapped, Elementary and secondary education, Federally affected area, Grant programs-education, Public housing, Reports and recordkeeping requirements.

Dated: August 1, 1989.

Lauro F. Cavazos,

Secretary of Education.

(Catalog of Federal Domestic Assistance No. 84.041, School Assistance in Federally Affected Areas—Maintenance and Operation)

The Secretary amends Part 222 of Title 34 of the Code of Federal Regulations as follows:

PART 222—ASSISTANCE FOR LOCAL EDUCATIONAL AGENCIES IN AREAS AFFECTED BY FEDERAL ACTIVITIES AND ARRANGEMENTS FOR EDUCATION OF CHILDREN WHERE LOCAL EDUCATIONAL AGENCIES CANNOT PROVIDE SUITABLE FREE PUBLIC EDUCATION

1. The authority for part 222 is revised to read as follows:

Authority: 20 U.S.C. 236–241–1 and 242–244, unless otherwise noted.

2. The Table of Contents for part 222 is amended by revising subpart H and by adding a new subpart K to read as follows:

* * * * *

Subpart H—Provisions Related to Handicapped Children and Children With Specific Learning Disabilities

222.70 What are the scope and purpose of these regulations?
222.71 What definitions apply to this subpart?
222.72 What requirements must an LEA meet in order to count a handicapped child for purposes of section 3(d)(2)(C)?
222.73 What assurances and certifications regarding handicapped children must an LEA provide in its application?
222.74 What restrictions and requirements apply to the use of the additional payments under section 3(d)(2)(C)?
222.75 How does section 3(d)(2)(C) relate to State aid programs?
222.76 When may an LEA count children in private schools or residential programs for the purposes of section 3(d)(2)(C)?
222.77 What other statutory and regulatory requirements are relevant to section 3(d)(2)(C)?

* * * * *

Subpart K—Provisions for Section 3(d)(2)(B)

222.120 What are the scope and purpose of these regulations?
222.121 What financial data from LEAs are used to determine eligibility, entitlement, and payment under section 3(d)(2)(B)?
222.122 What LEAs are eligible for financial assistance under section 3(d)(2)(B)?
222.123 How does a State's equalization program affect an LEA's eligibility for section 3(d)(2)(B) assistance?
222.124 How does the Secretary determine whether a fiscally independent LEA is making a reasonable tax effort?
222.125 What information must be provided by the State educational agency?
222.126 What tax rates does the Secretary use if real property is assessed at different percentages of true value?
222.127 What tax rates does the Secretary use if two or more different classifications of real property are taxed at different rates?
222.128 What tax rates may the Secretary use if substantial local revenues are derived from local tax sources other than real property taxes?
222.129 How does the Secretary determine whether a fiscally dependent LEA is making a reasonable tax effort?
222.130 How does the Secretary determine whether an LEA lacks sufficient funds to enable it to provide a level of education equivalent to that provided by its generally comparable LEAs?
222.131 How does the Secretary determine an LEA's maximum entitlement under section 3(d)(2)(B)?
222.132 How does the Secretary determine an LEA's payment under section 3(d)(2)(B)?

* * * * *

3. Section 222.3 is amended by removing the definition of "working on Federal property," revising the definitions of "applicant" (and its authority citation), "application," and "uniformed services" (and its authority citation), and by adding new definitions for "federally connected children," "local educational agency," "membership," and "parent employed on Federal property" to read as follows:

§ 222.3 Definitions.

* * * * *

Applicant means any local educational agency that files an application for financial assistance under section 2, 3, or 4 of the Act and the regulations in this part. For purposes of sections 3 and 4, a State educational agency may be an applicant only if the State agency directly operates and maintains facilities for providing free public education for the children it claims in its application.

(Authority: 20 U.S.C. 240(a) and 244(6))

Application means a properly completed and executed "Application for School Assistance in Federally Affected Areas" filed by an applicant requesting financial assistance under section 2, 3, or 4 of the Act and the regulations in this part, including amendments to the application and any supporting documents indicated by the applicant.

* * * * *

Federally connected children refers to children described in subsection 3(a) or 3(b) of the Act.

(Authority: 20 U.S.C. 238)

* * * * *

Local educational agency means a board of education or other legally constituted local school authority having administrative control and direction of free public elementary or secondary education through grade 12 in a county, township, independent, or other school district located within a State. This term includes a State educational agency so long as it also directly operates and maintains facilities for providing free public education for the children it claims in its application. Children claimed by a State educational agency must actually be attending State-operated facilities, and the State educational agency may not, through a tuition arrangement, contract, or any other means, pay another entity to operate and maintain facilities for those children.

(Authority: 20 U.S.C. 244(6))

Membership means—

(1)(i) The definition given to the term by State law; or

(ii) If State law does not define the term, the number of children listed on a local educational agency's current enrollment records on its survey date. The membership of children for whom the applicant is responsible for providing a free public education but who are attending schools other than those operated by the applicant, under a tuition arrangement described in § 222.81(d), must be included in the applicant's membership count.

(2) This term does not include children who—

(i) Have never attended classes in schools of the local educational agency or of another educational entity that the local educational agency has a tuition arrangement with;

(ii) Have permanently left the school district;

(iii) Otherwise have become ineligible to attend classes there; or

(iv) Attend the schools of the applicant under a tuition arrangement with another local educational agency that is responsible for providing them a free public education.

(Authority: 20 U.S.C. 238, 242(b), 244(10))

Parent employed on Federal property includes—

(1)(i) An employee of the Federal Government who reports to work on or whose place of work is located on Federal property;

(ii) A person not employed by the Federal Government but who spends more than 50 percent of his working time on Federal property (whether an employee or self-employed) when engaged in farming, grazing, lumbering, mining, or other operations that are authorized by the Federal Government, through a lease or other arrangement, to be carried out entirely or partly on Federal property; and

(iii) A portion, to be determined by the Secretary, of persons working on commingled Federal and non-Federal properties other than those persons covered under paragraph (a)(ii) of this definition.

(2) This term does not include a person who reports to work at a work station not on Federal property but spends more than 50 percent of his working time on Federal property providing services to operations or activities authorized to be carried out on Federal property.

(Authority: 20 U.S.C. 236, 238, 242(b))

* * * * *

Uniformed services means the United States Army, Navy, Air Force, Marine Corps, Coast Guard, National Oceanic and Atmospheric Administration, and Public Health Service.

(Authority: 20 U.S.C. 238 and 37 U.S.C. 101)

4. Section 222.9 is revised to read as follows:

§ 222.9 Application form.

Any local educational agency (LEA) seeking financial assistance under section 2, 3, or 4 of the Act shall, as a condition of entitlement, file with the Secretary an "Application for School Assistance in Federally Affected Areas." A copy of the application must be filed with the State educational agency (SEA) in accordance with the applicable filing dates established in §§ 222.10 and 222.11 and must contain information necessary to establish the LEA's entitlement under the Act and regulations. Copies of the application form may be obtained from the SEA.

(Authority: 20 U.S.C. 240(a))

5. Section 222.10 is revised to read as follows:

§ 222.10 Application filing requirements.

Beginning with fiscal year (FY) 1990, to be considered for financial assistance under section 2, 3, or 4 of the Act, an LEA must meet the following requirements:

(a) Except as provided in paragraphs (c) and (e) of this section, an LEA must—

(1) File its application for financial assistance under section 2, 3, or 4 with the Secretary on or before January 31 of the fiscal year for which assistance is sought; and

(2) Certify that it will file, and file, a copy of the application referred to in paragraph (a)(1) of this section with its SEA on or before January 31 of the fiscal year for which assistance is sought.

(b)(1) Except as provided in paragraphs (c) and (e) of this section, an SEA must notify the Secretary of any inconsistencies or other concerns it has with an LEA's application on or before February 15 of the fiscal year for which assistance is sought. If the Secretary does not receive any notification from an LEA's SEA by February 15, the Secretary assumes that the data and statements in the application are, to the best of the SEA's knowledge, true, complete, and correct.

(2) An application that is timely filed under paragraph (a)(1) of this section is not processed for payment until any concerns raised by the SEA are resolved.

(c)(1) If any of the following events, giving rise to eligibility or entitlement, occurs within the fiscal year for which assistance is sought, an LEA seeking assistance shall file an application within the time limits required by paragraph (c)(2) of this section:

(i) The United States Government initiates or reactivates a Federal activity, or acquires real property.

(ii) The United States Congress enacts new legislation.

(iii) A reorganization of school districts takes place.

(iv) Property, previously determined in writing by the Secretary not to be Federal property, is determined to be Federal property.

(2) Except as provided in paragraph (e) of this section, an LEA shall file an application as permitted by paragraph (c)(1) of this section as follows:

(i) The LEA shall file the application on or before January 31 of the fiscal year for which assistance is sought or within 60 days after the applicable event occurs, whichever date is later, but not later than September 30, the end of the Federal fiscal year.

(ii) The LEA shall also certify that it will file, and file, a copy of the application referred to in paragraph (c)(2)(i) of this section with its SEA on or before September 30 of the fiscal year for which assistance is sought.

(d)(1) Except as provided in paragraph (e) of this section, an SEA must notify the Secretary of any inconsistencies or other concerns with an LEA's application within fifteen days of the applicable filing date. If the Secretary does not receive any notification from the SEA, the Secretary assumes that the data and statements in the application are, to the best of the SEA's knowledge, true, complete, and correct.

(2) An application that is timely filed under paragraph (c)(2)(i) of this section is not processed for payment until any concerns raised by the SEA are resolved.

(e) If a filing date set forth in this section falls on a Saturday, Sunday, or Federal holiday, the deadline for filing an application is the next succeeding business day.

(f) To be timely filed under this section, an application must be—

(1) Received by the Secretary on or before the applicable filing date; or

(2) Bear a U.S. Postal Service postmark dated on or before that filing date.

(Authority: 20 U.S.C. 240(a))

Note to paragraph (f)(2): The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

6. Section 222.11 is amended by revising paragraph (a) and the introductory text of paragraph (b) to read as follows:

§ 222.11 Amendments to applications: Filing dates.

(a) An LEA may amend its application following any of the events described in § 222.10(c) by submitting a written request to the Secretary and a copy to its SEA within 60 days after the applicable event occurs, or by the end of the Federal fiscal year for which assistance is sought, whichever is earlier.

(b) The LEA may also amend its application no later than the end of the Federal fiscal year for which assistance is sought—

* * * * *

7. Section 222.12 is revised to read as follows:

§ 222.12 Applications under sections 2, 3, and 4 received after deadlines.

The Secretary does not process for payment applications for assistance under sections 2, 3, and 4 of the Act that are not timely filed with the Secretary in accordance with the applicable filing dates established by §§ 222.10 and 222.11.

(Authority: 20 U.S.C. 240(a))

8. Section 222.14 is amended by revising the heading to read as follows:

§ 222.14 Membership data: General.

* * * * *

9. Section 222.17 is amended by revising the heading, introductory text, and paragraph (a) to read as follows:

§ 222.17 Alternative methods for counting federally connected children.

An applicant may use one of the two following methods to count federally connected children and to obtain the information described in the definition of "parent-pupil survey" in § 222.3:

(a) The applicant may determine federally connected membership by conducting a parent-pupil survey.

* * * * *

10. Section 222.22 is revised to read as follows:

§ 222.22 Calculation of ADA for an LEA's federally connected children for purposes of computing entitlements and payments under section 3.

(a) This section describes the manner in which the Secretary computes the average daily attendance (ADA) of federally connected children for each category in sections 3 and 4 of the Act—for the current fiscal year—in order to determine an applicant's entitlements under those sections.

(b) If an LEA is in a State that collects actual ADA data for purposes of distributing State aid for education, the Secretary calculates the ADA of that LEA's federally connected children for the current fiscal year by—

(1) Except as provided in paragraph (b)(2) of this section—

(i) Dividing the ADA of all the LEA's children for the prior fiscal year by the LEA's total membership on its survey date for the prior fiscal year (or, in the case of an LEA that conducted two membership counts in the prior fiscal year, by the average of the LEA's total membership on the two survey dates); and

(ii) Multiplying the figure determined in paragraph (b)(1)(i) of this section by the LEA's total membership of federally connected children in each subcategory described in section 3 of the Act on the LEA's survey date for the current fiscal year (or, in the case of an LEA that conducts two membership counts in the current fiscal year, by the average of the LEA's total membership of federally connected children in each subcategory on the two survey dates).

(2)(i) For purposes of this section, "actual ADA" means raw ADA data that have not been weighted or adjusted to reflect higher costs for specific types of students for purposes of distributing State aid for education.

(ii) If an LEA provides a program of free public summer school, attendance data for the summer session are included in the LEA's ADA figure in accordance with State law or practice.

(iii) An LEA's ADA count includes attendance data for children for whom it makes tuition arrangements with other educational entities.

(3) Applicants may not count attendance data for—

(i) Any child who is not physically present at school for the daily minimum time period required by the State, unless the child is participating via telecommunication or correspondence course programs that meet State standards or is being served by a State-approved homebound instruction program for the daily minimum time period appropriate for the child; or

(ii) Any child attending the schools of the applicant under a tuition arrangement with another LEA.

(c) If an LEA is in a State that does not collect ADA data for purposes of distributing State aid for education, the LEA or SEA shall submit data necessary for the Secretary to calculate the ADA of the LEA's federally connected children as follows:

(1) If an LEA is in a State that formerly collected ADA data for purposes of distributing State aid for education, the SEA may submit the total ADA and total membership data for the State for each of the last three fiscal years that ADA data were collected. The Secretary uses these data to calculate the ADA of the LEA's federally connected children by—

(i) Dividing the total ADA data by the total membership data for each of the three fiscal years and averaging the results; and

(ii) Multiplying the average determined in paragraph (c)(1)(i) of this section by the LEA's total membership of federally connected children in the current fiscal year as described in paragraph (b)(1)(ii) of this section.

(2) An LEA may collect and submit attendance data based on sampling during the prior fiscal year. The sampling must include attendance data for all children for at least 30 school days. The data must be collected during at least three periods evenly distributed throughout the school year. Each collection period must consist of at least five consecutive school days. The Secretary uses these data to calculate the ADA of the LEA's federally connected children by—

(i) Determining the ADA of all children in the sample;

(ii) Dividing the figure obtained in paragraph (c)(2)(i) of this section by the LEA's total membership for the prior fiscal year; and

(iii) Multiplying the figure determined in paragraph (c)(2)(ii) of this section by the LEA's total membership of federally connected children for the current fiscal year, as described in paragraph (b)(1)(ii) of this section.

(3) If an LEA is in a State that distributes State aid for education based on data similar to attendance data, the SEA may request that the Secretary use those data to calculate the ADA of the LEA's federally connected children. The Secretary determines whether those data are, in effect, equivalent to attendance data and, if so, allows use of the requested data and determines the method by which the ADA of the LEA's federally connected children will be calculated.

(Authority: 20 U.S.C. 238, 239, 240(a), 244(10))

11. Section 222.30 is amended by revising paragraph (a) and the introductory text of paragraph (c) to read as follows:

§ 222.30 Determination of local contribution rates: General.

(a) In order to compute the amount to be paid to an applicant local educational agency (LEA) under section 3 of the Impact Aid program, the Secretary—after consultation with the LEA and its State educational agency (SEA)—determines the LEA's local contribution rate.

* * * * *

(c) Except for § 222.32, the provisions in §§ 222.31 through 222.37 do not apply to applicant LEA's located in—

* * * * *

§ 222.31 [Amended]

12. In § 222.31, paragraph (a)(2) is removed and paragraph (a)(3) is redesignated as paragraph (a)(2).

13. Section 222.32 is amended by revising the introductory text of paragraph (a) and the authority citation and by adding a new paragraph (c) to read as follows:

§ 222.32 Local contribution rate guaranteed by the Act.

(a) Except as provided in paragraphs (b) and (c) of this section, the local contribution rate guaranteed by the Act is the greater of—

* * * * *

(c)(1) For FY 1988 and each fiscal year thereafter, the Act guarantees a special local contribution rate, as described in paragraph (c)(3) of this section, for certain LEA's whose boundaries are coterminous with the boundaries of a military installation ("coterminous LEA's").

(2) LEA's that qualify for the special guaranteed rate under paragraph (c)(3) of this section include all coterminous LEA's except—

(i) Any coterminous LEA located in a State in which the State equalization law would prohibit the LEA from retaining the additional funds resulting from a rate described in paragraph (c)(3) or (c)(4) of this section; and

(ii) Any coterminous LEA located in a State in which the State law would require that State aid to the LEA for free public education be reduced in proportion to the additional funds resulting from a rate described in paragraph (c)(3) or (c)(4) of this section.

(3) For any coterminous LEA that qualifies under paragraph (c)(2) of this section, the Act guarantees a local contribution rate that is 70 percent of the average per pupil expenditure in all of the 50 States and the District of Columbia during the second fiscal year preceding the fiscal year for which the local contribution rate is being computed unless that rate would raise the LEA's per pupil expenditure for the second preceding fiscal year above the State average per pupil expenditure for the second preceding fiscal year, in which case the LEA's rate is determined under paragraph (c)(4) of this section.

(4) If the rate described in paragraph (c)(3) of this section would raise the LEA's per pupil expenditure for the second preceding fiscal year above the State average per pupil expenditure for

the second preceding fiscal year, then the LEA receives the greater of—

(i) The rate necessary to raise the per pupil expenditure for that LEA for the second preceding fiscal year to the average per pupil expenditure in the LEA's State for the second preceding fiscal year; or

(ii) The rate described in paragraph (a)(2) of this section.

(Authority: 20 U.S.C. 238(d)(3) (B) and (b))

14. Section 222.33 is amended by revising the introductory text of paragraph (a) and paragraphs (a)(2)(i) and (b)(2) to read as follows:

§ 222.33 Identification of generally comparable LEA's.

(a) If an LEA wishes to recommend to the Secretary a rate based on appropriate data from generally comparable LEA's within its State, the SEA for that State shall, except as provided in § 222.36, use data from the second fiscal year preceding the fiscal year for which the local contribution rate is being computed to group all of its LEA's, including all applicant LEA's, as follows:

* * * * *

(2) *Grouping by Grade Span/Legal Classification and Size.* (i) Divide all LEA's into groups by grade span (or the alternative grade-span groups described in paragraph (a)(1) of this section) and legal classification, if relevant and sufficiently different from grade span and size.

* * * * *

(b) * * *

(2) Except as provided in § 222.36, the SEA may not compute a local contribution rate for any group that contains fewer than 10 LEA's.

* * * * *

§ 222.35 [Amended]

15. The undesignated, introductory language of § 222.35 is amended by inserting after the word "Act" and before the comma, the phrase "and in § 222.36".

16. Section 222.36 is revised to read as follows:

§ 222.36 Determination of additional assistance.

(a) The provisions of this section govern an LEA that applies to the Secretary for assistance under section (3)(d)(2)(B) of the Act, in addition to its application for a regular payment under section 3.

(b) An LEA that applies for funds under section 3(d)(2)(B) may have its 3(d)(2)(B) eligibility and payment based on three comparable LEAs in its State. These three comparable LEAs are identified as follows:

(1) Using data from the prior fiscal year, the SEA first follows the directions in § 222.33(a)(4). The SEA then removes from the resulting list any LEAs that are heavily impacted, as described in § 222.33(b)(1), except the applicant LEA.

(2) If the remaining LEAs are not in rank order by ADA, the SEA shall list them in that order.

(3) The LEA may then select as its generally comparable LEAs for purposes of section 3(d)(2)(B) three LEAs that are adjacent to it in size (e.g., the next three larger LEAs, the next three smaller, the next two larger and the next one smaller, or the next one larger and the next two smaller).

(4) The Secretary uses the financial data of these three LEAs and the procedures in §§ 222.130–222.132 to determine whether the applicant LEA is eligible for funding under section 3(d)(2)(B) and, if so, the amount of that funding.

(c) If an LEA does not choose to exercise the option offered by paragraph (b) of this section and if it is applying for a regular payment under section 3 based on a local contribution rate guaranteed by the Act, the Secretary—

(1) In determining the applicant LEA's eligibility for, and the amount of, any additional assistance, considers the LEA comparable to all LEAs in its State; and

(2) Uses prior year data and the procedures in §§ 222.130–222.132 to determine whether the applicant LEA is eligible for funding under section 3(d)(2)(B) and, if so, the amount of that funding.

(d) If an LEA does not choose to exercise the option offered by paragraph (b) of this section and if, in applying for a regular payment under section 3, it recommends a local contribution rate based on generally comparable LEAs in its State, the Secretary—

(1) In determining the applicant LEA's eligibility for, and the amount of, any additional assistance, considers as comparable LEAs the same LEAs that the applicant identifies as comparable in its application for a regular payment under section 3; and

(2) Uses prior year data and the procedures in §§ 222.130–222.132 to determine whether the applicant LEA is eligible for funding under section 3(d)(2)(B) and, if so, the amount of that funding.

(e) If an LEA does not choose to exercise the option offered by paragraph (b) of this section and if, in applying for a regular payment under section 3, it recommends the "hold-harmless" rate described in § 222.31(d), the Secretary—

(1) In determining the applicant LEA's eligibility for, and the amount of, any additional assistance, considers as comparable LEAs the group of LEAs that produces the highest regular section 3 rate under the generally comparable LEA method, as described in § 222.33; and

(2) Uses prior year data and the procedures in §§ 222.130–222.132 to determine whether the applicant LEA is eligible for funding under section 3(d)(2)(B) and, if so, the amount of that funding.

(Authority: 20 U.S.C. 238(d)(2)(B), 242(b))

17. Section 222.37 is amended by adding a new paragraph (e) to read as follows:

§ 222.37 Determination of compensation for unusual geographical factors.

* * * * *

(e) The Secretary does not provide compensation under section 3(d)(3)(B)(ii) unless an applicant is determined to be making a reasonable tax effort in accordance with §§ 222.124–222.129.

* * * * *

18. Section 222.42 is amended by revising paragraph (b) to read as follows:

§ 222.42 Adjustment for or recovery of overpayment.

* * * * *

(b)(1) If the LEA is not entitled to subsequent payments under the Act, the LEA shall promptly refund the amount of the overpayment to the Secretary.

(2) If the LEA does not promptly repay the amount of the overpayment or promptly enter into a repayment agreement with the Secretary, the Secretary may use the procedures set forth in the regulations contained in 34 CFR Part 30 to offset that amount against other Department programs or, under the circumstances permitted in Part 30, to request that another agency offset the debt.

* * * * *

19. Section 222.61 is amended by removing paragraph (a)(4) and by adding paragraphs (b) (4) and (5) to read as follows:

§ 222.61 Treatment of State aid programs in general.

* * * * *

(b) * * *

(4) No State, whether or not it has an equalization program that qualifies under § 222.62, may, in allocating State aid, take into consideration a local educational agency's eligibility or entitlement for payments under the Act if that local educational agency does not apply for and receive those payments.

(5) Any State that takes into consideration payments under the Act in accordance with the provisions of section 5(d)(2) in allocating State aid to local educational agencies must reimburse any local educational agency for any amounts taken into consideration for any fiscal year to the extent that the local educational agency did not in fact receive payments in those amounts during that fiscal year.

(Authority: 20 U.S.C. 240(d) (1) and (2))

§ 222.63 [Amended]

20. Section 222.63(a) is revised by removing "§ 222.62(a)(4)", in the first sentence, and inserting in lieu thereof "§ 222.62(d)".

§ 222.67 [Amended]

21. Section 222.67 is amended by removing paragraph (c) and by redesignating paragraph (d) as paragraph (c)

22. Subpart H (currently consisting of §§ 222.70 through 222.79) is revised to consist of new §§ 222.70 through 222.77 to read as follows:

Subpart H—Provisions Related to Handicapped Children and Children With Specific Learning Disabilities

§ 222.70 What are the scope and purpose of these regulations?

(a) The regulations in this subpart govern the provision of additional payments under section 3(d)(2)(C) of the Act to local educational agencies (LEAs) that provide free appropriate public education to federally connected, handicapped children who are counted under section 3(d)(2)(C) of the Act. See § 222.77 for other statutes and regulations that may be relevant.

(b) These regulations set forth the requirements, interpretations, and guidance necessary to implement section 3(d)(2)(C).

(Authority: 20 U.S.C. 238(d)(2)(C), 242(b))

§ 222.71 What definitions apply to this subpart?

In addition to the terms defined in § 222.3, the following definitions, which are generally the same as the definitions used in the Education of the Handicapped Act (20 U.S.C. 1401 *et seq.*) and in 34 CFR part 300, apply to this subpart:

Free appropriate public education means special education and related services that—

(1) Are provided at public expense, without charge, and, except for services provided to children placed in or referred to private schools or facilities by their LEAs in accordance with § 222.76, under public supervision and direction;

(2) Meet the Standards of the State educational agency (SEA), including the requirements of this part;

(3) Include preschool, elementary school, or secondary school education in the State involved; and

(4) Are provided in confirmity with an individualized education program that meets the requirements under 34 CFR 300.340–300.349.

Handicapped children is defined in 34 CFR 300.5.

Preschool program means an educational or related program encompassing the educational level from a child's birth to the time at which elementary education is provided as determined under State law, provided that this program is recognized as free public education under State law.

Related needs means those needs related to a handicap or specific learning disability for which related services, in addition to direct instructional services, are deemed necessary so that the child may effectively participate in the instructional program of the LEA.

Related services means transportation and such developmental, corrective, and supportive services (including speech pathology and audiology, psychological services, physical and occupational therapy, recreation, counseling services, and medical services for diagnostic and evaluation purposes only) required to assist a handicapped child to benefit from special education, and includes the early identification and assessment of handicapping conditions in children. (See 34 CFR 300.13 for additional information.)

(Authority: 20 U.S.C. 238(d)(2)(C), 244(10); H. Rept. 1137, 95th Cong., Sess. 2d 104–105 (1978))

§ 222.72 What requirements must an LEA meet in order to count a handicapped child for purposes of section 3(d)(2)(C)?

(a) In order that a handicapped child may be counted for the purpose of an additional payment under section 3(d)(2)(C), a child must—

(1) Have a parent on active duty in the uniformed services, as defined in § 222.3, or reside on Indian lands, as described in section 403(1)(A) of the Act;

(2) Be receiving services suited to the child's special educational and related needs; and

(3) Be enrolled in a program (including a preschool program if appropriate) that is of sufficient size, scope, and quality to give reasonable promise of substantial progress toward meeting the child's special educational and related needs and is provided as part of free public education in the LEA.

(b) An LEA shall—

(1) State in its application the number of federally connected, handicapped children it claims for an increased payment under section 3(d)(2)(C); and

(2) Meet the regular eligibility requirements of section 3(c) of the Act in order to receive an additional payment under section 3(d)(2)(C). (There is no minimum number of federally connected, handicapped children who must be served in order for the LEA to receive the additional payment under section 3(d)(2)(C).)

(c) An LEA shall provide the assurances and certifications required under § 222.73.

(d) An LEA shall have in effect a written individualized educational program for each federally connected, handicapped child claimed for an increased payment under section 3(d)(2)(C). An LEA that satisfies the requirements of 34 CFR 300.340–300.348 for children counted under section 3(d)(2)(C) has satisfied the requirements of this paragraph.

(e) The program provided for the handicapped children counted under section 3(d)(2)(C) must conform to State standards for programs for handicapped children and must encompass the specific educational and related needs of the children counted.

(Authority: 20 U.S.C. 238 (a), (b), and (d)(2)(C), 240(f), 242; S. Rept. 1028, 93d Cong., 2d Sess. 159 (1974); *Chinle Common School District v. Mathews*, Civil No. 76–1273 (D.D.C. 1976))

§ 222.73 What assurances and certifications regarding handicapped children must an LEA provide in its application?

(a) *Size, scope, and quality of programs.* (1) An LEA shall provide an assurance that federally connected, handicapped children claimed for an increased payment under section 3(d)(2)(C) are receiving services in programs (including preschool programs) that are of sufficient size, scope, and quality to give reasonable promise of substantial progress toward meeting the special educational and related needs of these children. The Secretary considers any special education program serving the special educational needs of these children that conforms to the requirements for special education programs under part B of the Education of the Handicapped Act as satisfying this assurance.

(2) The LEA shall also certify that its programs conform to State standards for

programs for the types of children served.

(b) *Education of the Handicapped Act requirements.* (1) An LEA shall provide an assurance that its programs conform to the policies, procedures, and requirements of sections 612 and 613 of the Education of the Handicapped Act.

(2) The Secretary may consult with persons in charge of special education programs for handicapped children and children with specific learning disabilities in the SEA to determine whether State standards and programs conform to the policies and procedures required under sections 612 and 613 of the Education of the Handicapped Act.

(c) *Additional information.* The Secretary may require information in addition to that contained in the application in order to substantiate compliance with these assurances.

(Authority: 20 U.S.C. 238(d)(2)(C); H. Rept. 805, 93d Cong., 2d Sess. 43–46 (1974); S. Rept. 1028, 93d Cong., 2d Sess. 45 (1974); Cong. Record, daily ed., H7396, July 31, 1974)

§ 222.74 What restrictions and requirements apply to the use of the additional payments under section 3(d)(2)(C)?

(a) *General.* The additional payment to an LEA that is related to the increase in entitlement under section 3(d)(2)(C) (hereinafter "section 3(d)(2)(C) funds") must be used for programs and projects designed to meet the special educational and related needs of the handicapped children counted under that section.

(Authority: 20 U.S.C. 240(f))

(b) *Methods of obligation and expenditure of funds.* Obligations and expenditures of section 3(d)(2)(C) funds may be incurred in either of two ways:

(1) An LEA may obligate or expend the section 3(d)(2)(C) funds for the fiscal year for which the funds were appropriated.

(2) An LEA may reimburse itself for obligations or expenditures of local and general State aid funds already made for the fiscal year for which the section 3(d)(2)(C) funds were appropriated.

(Authority: 20 U.S.C. 238(d)(2)(C), 240(f), 242(b))

(c) *Allowable expenditures.* An LEA shall use its section 3(d)(2)(C) funds for the following types of expenditures:

(1) Expenditures that are reasonably related to the conduct of programs or projects for the education of handicapped children. These expenditures may include program planning and evaluation but may not include the construction of school facilities.

(2) Acquisition cost (net invoice price) of equipment to meet the special educational and related needs of handicapped children. If section 3(d)(2)(C) funds are used for the acquisition of equipment and any financial advantage is realized through rebates, discounts, bonuses, free pieces of equipment not used in a program or project for the education of handicapped children, or other circumstances, the fair market value of that financial advantage is not an allowable expenditure and may not be credited as an expenditure of those funds. In no case may the section 3(d)(2)(C) funds be used to acquire equipment if the title to that equipment would be in a private school and not in the applicant agency.

(d) *Fiscal accountability requirements.* An LEA shall account for the use of the section 3(d)(2)(C) funds as follows:

(1) By recording, for each fiscal year, the receipt (or credit) of section 3(d)(2)(C) funds separately from other funds received under the Act, *i.e.*, on a line item basis in the general fund account or in a separate account.

(2) By demonstrating that, for each fiscal year, the total amount of expenditures for programs or projects serving federally connected, handicapped children is at least equal to the amount of section 3(d)(2)(C) funds received or credited for that fiscal year. This is done as follows:

(i) For each fiscal year, the amount of an LEA's total expenditures for programs or projects serving handicapped children is determined.

(ii) The amount determined in paragraph (d)(2)(i) of this section is divided by the ADA of the total number of handicapped children the LEA served during that fiscal year.

(iii) The amount determined in paragraph (d)(2)(ii) of this section is then multiplied by the total ADA of the LEA's federally connected, handicapped children claimed by the LEA for that fiscal year.

(3) If the amount of section 3(d)(2)(C) funds the LEA received (or was credited) for the fiscal year exceeds the amount obtained in paragraph (d)(2)(iii) of this section, an overpayment equal to the excess section 3(d)(2)(C) funds is established. This overpayment may be reduced or eliminated to the extent that the LEA chooses to and can demonstrate that the average per pupil costs for serving federally connected, handicapped children exceeded its average per pupil costs for serving non-federally connected, handicapped children.

(Authority: 20 U.S.C. 238(d)(2)(C), 240(f), 242(b); H. Rept. No. 805, 93d Cong., 2d Sess. 45 (1974))

§ 222.75 How does section 3(d)(2)(C) relate to State aid programs?

Section 3(d)(2)(C) funds may not supplant any State funds that were or would have been available to the LEA for the free public education of children counted under section 3(d)(2)(C).

(a) No section 3(d)(2)(C) funds may be paid to an LEA whose per pupil State aid for federally connected, handicapped children, either general State aid or special education State aid, has been or would be reduced as a result of eligibility for or receipt of section 3(d)(2)(C) funds, whether or not a State has a program of State aid that meets the requirements of section 5(d)(2) of the Act and subpart G of this part.

(1) A reduction in the per pupil amount of State aid for handicapped children, including children counted under section 3(d)(2)(C), from that received in a previous year raises a presumption that supplanting has occurred.

(2) The LEA may rebut this presumption by demonstrating that the reduction was unrelated to the receipt of section 3(d)(2)(C) funds.

(b) In any State in which there is only one LEA, all funds for handicapped programs other than funds from Federal sources are considered by the Secretary to be local funds.

(Authority: 20 U.S.C. 238(d)(2)(C), 240 (d) and (f), 242(b))

§ 222.76 When may an LEA count children in private schools or residential programs for the purposes of section 3(d)(2)(C)?

(a) An LEA must have placed a handicapped child in, or referred a handicapped child to, a private school or facility under the policies and procedures required by section 613 of the Education of the Handicapped Act in order to count that child under section 3(d)(2)(C). Regulations implementing those policies and procedures are set forth in 34 CFR part 300, subpart D.

(Authority: 20 U.S.C. 244(10), 1413(a)(4)(B))

(b) If placement in a public or private residential program is necessary to provide special education and related services to a handicapped child, the LEA may count that child under section 3(d)(2)(C). Regulations describing these placements are set forth in 34 CFR part 300, subpart C.

(Authority: 20 U.S.C. 244(10), 1401 (9), (10), and (18), 1413(a)(4)(B))

(c) Children who have been placed in private schools by their parents may not be counted under section 3(d)(2)(C) but may participate in public school programs that use section 3(d)(2)(C) funds.

(Authority: 20 U.S.C. 238(d)(2)(C), 240(f); H. Rept. 805, 93d Cong., 2d Sess. 45 (1974))

§ 222.77 What other statutory and regulatory requirements are relevant to section 3(d)(2)(C)?

(a) *Applicability of the Education of the Handicapped Act and related regulations.* LEAs receiving section 3(d)(2)(C) funds are generally subject to the requirements of the Education of the Handicapped Act, as amended, and related regulations (20 U.S.C. 1401 *et seq.* and 34 CFR part 300).

(b) *Applicability of general provisions regulations.* Relevant provisions contained in 34 CFR parts 75, 77, and 80 are applicable to programs conducted with section 3(d)(2)(C) funds.

(Authority: 20 U.S.C. 242(b))

23. Section 222.81 is amended by revising paragraph (a)(4) and the authority citation to read as follows:

§ 222.81 Free public education.

(a) * * *

(4) Under public supervision and direction, except with respect to—

(i) Handicapped children; and

(ii) Children who are attending schools funded under section 1128 of Public Law 95–561 (the Indian School Equalization Program operated by the Bureau of Indian Affairs, Department of the Interior) but who are not eligible for funding under that section.

* * * * *

(Authority: 20 U.S.C. 238(d)(2)(D), 244(4))

24. A new subpart K (§§ 222.120 through 222.132) is added to read as follows:

Subpart K—Provisions for Section 3(d)(2)(B)

§ 222.120 What are the scope and purpose of these regulations?

(a) The regulations in this subpart implement section 3(d)(2)(B) of the Act. Sections 222.124–222.129 also implement section 3(d)(3)(B)(ii) of the Act.

(b) The program authorized by section 3(d)(2)(B) provides financial assistance, in addition to regular payments under section 3 of the Act, to certain heavily impacted local educational agencies (LEAs) that demonstrate eligibility for that assistance.

(Authority: 20 U.S.C. 238(d)(2)(B))

§ 222.121 What financial data from LEAs are used to determine eligibility, entitlement, and payment under section 3(d)(2)(B)?

Final computations and determinations made with regard to an LEA's eligibility (§§ 222.122–222.130), maximum entitlement (§ 222.131), and payment (§ 222.132) under section 3(d)(2)(B) are based on final financial data for the LEA's current fiscal year and final financial data for the prior fiscal year of the LEAs determined under § 222.36 to be generally comparable to the applicant LEA (referred to in this part as "generally comparable LEAs").

(Authority: 20 U.S.C. 238(d)(2)(B))

§ 222.122 What LEAs are eligible for financial assistance under section 3(d)(2)(B)?

Subject to § 222.123, an LEA is eligible for financial assistance under section 3(d)(2)(B) of the Act if the LEA is eligible for a regular section 3 payment, applies for assistance under section 3(d)(2)(B), and the Secretary determines that the LEA meets all of the following requirements:

(a) As determined under § 222.130, the LEA does not have sufficient funds to enable it to provide a level of education equivalent to that provided by its generally comparable LEAs. For the purpose of this subpart, "level of education" means average per pupil expenditure amount. (See § 222.131(a).)

(b) The LEA is making a reasonable tax effort in accordance with the requirements of §§ 222.124–222.129 and exercising due diligence in availing itself of revenues derived from State and other sources.

(c) At least 50 percent of the total number of children in average daily attendance (ADA) for whom the LEA provides free public education during its current fiscal year are federally connected children.

(d) The eligibility of the LEA for State aid and the amount of State aid are determined on a basis no less favorable than that for other LEAs in the State.

(Authority: 20 U.S.C. 238(d)(2)(B))

§ 222.123 How does a State's equalization program affect an LEA's eligibility for section 3(d)(2)(B) assistance?

The Secretary determines that an LEA is not eligible for financial assistance under section 3(d)(2)(B) if—

(a) The LEA is in a State that has an equalized program of State aid that meets the requirements of section 5(d)(2) of the Act; and

(b) The State, in determining the LEA's eligibility for or amount of State aid, takes into consideration the LEA's payments under section 3(d)(2)(B).

(Authority: 20 U.S.C. 238(d)(2)(B), 240(d)(2))

§ 222.124 How does the Secretary determine whether a fiscally independent LEA is making a reasonable tax effort?

(a) To determine whether a fiscally independent LEA, as defined in § 222.3, is making a reasonable tax effort as required by § 222.122, the Secretary compares the LEA's local real property tax rates for school purposes (referred to in this part as "tax rates"), as defined in § 222.3, with the tax rates of its generally comparable LEAs.

(b) For purposes of this section, the Secretary uses—

(1) Actual tax rates if all the real property in the LEA and its generally comparable LEAs is assessed at the same percentage of true value; or

(2) Tax rates computed under §§ 222.126–222.128.

(c) The Secretary determines that an LEA is making a reasonable tax effort if—

(1) The LEA's tax rate is equal to at least 95 percent of the average tax rate of its generally comparable LEAs;

(2) Each of the LEA's tax rates for each classification of real property is equal to at least 95 percent of each of the average tax rates of its generally comparable LEAs for the same classification of property;

(3) The LEA taxes all of its real property at the maximum rates allowed by the State, if those maximum rates apply uniformly to all LEAs in the State; or

(4) The LEA has no taxable real property.

(Authority: 20 U.S.C. 238(d)(2)(B))

§ 222.125 What information must be provided by the State educational agency?

The State educational agency (SEA) of any State with an LEA applying for assistance under section 3(d)(2)(B) shall provide the Secretary with relevant information necessary to determine whether the LEA is making a reasonable tax effort under §§ 222.126–222.129, whichever is applicable.

(Authority: 20 U.S.C. 238(d)(2)(B), 242(b))

§ 222.126 What tax rates does the Secretary use if real property is assessed at different percentages of true value?

If the real property of an LEA and its generally comparable LEAs consists of one classification of property but the property is assessed at different percentages of true value in the different LEAs, the Secretary determines whether the LEA is making a reasonable tax effort under § 222.124(c)(1) by using tax rates computed by—

(a) Multiplying the LEA's actual tax rate for real property by the percentage of true value assigned to that property for tax purposes; and

(b) Performing the computation in paragraph (a) of this section for each of its generally comparable LEAs and determining the average of those computed tax rates.

(Authority: 20 U.S.C. 238(d)(2)(B))

§ 222.127 What tax rates does the Secretary use if two or more different classifications of real property are taxed at different rates?

If the real property of an LEA and its generally comparable LEAs consists of two or more classifications of real property taxed at different rates, the Secretary determines whether the LEA is making a reasonable tax effort under § 222.124(c) (1) or (2) by using one of the following:

(a) Actual tax rates for each of the classifications of real property.

(b) Tax rates computed in accordance with § 222.126 for each of the classifications of real property.

(c) Tax rates computed by—

(1) Determining the total true value of all real property in the LEA by dividing the assessed value of each classification of real property in the LEA by the percentage, of true value assigned to that property for tax purposes and aggregating the results;

(2) Determining the LEA's total revenues derived from local real property taxes for school purposes;

(3) Dividing the amount determined in paragraph (c)(2) of this section by the amount determined in paragraph (c)(1) of this section; and

(4) Performing the computations in paragraphs (c) (1), (2), and (3) of this section for each of the generally comparable LEAs and determining the average of their computed tax rates.

(Authority: 20 U.S.C. 238(d)(2)(B))

§ 222.128 What tax rates may the Secretary uses if substantial local revenues are derived from local tax sources other than real property taxes?

(a) In a State in which a substantial portion of revenues for current expenditures for educational purposes is derived from local tax sources other than real property taxes, the SEA may request that the Secretary take those revenues into account in determining whether an LEA in that State is making a reasonable tax effort under § 222.124.

(b) If, based upon the request of an SEA, the Secretary determines that it is appropriate to take the revenues described in paragraph (a) of this section into account in determining whether an LEA in that State is making a reasonable tax effort under § 222.124, the Secretary uses tax rates computed by—

(1) Dividing the assessed value of each classification of real property in the LEA by the percentage of true value assigned to that property for tax purposes and aggregating the results;

(2) Determining the LEA's total revenues derived from local tax sources for school purposes;

(3) Dividing the amount determined in paragraph (b)(2) of this section by the amount determined in paragraph (b)(1) of this section; and

(4) Performing the computations in paragraphs (b) (1), (2), and (3) of this section for each of the generally comparable LEAs and determining the average of those computed tax rates.

(Authority: 20 U.S.C. 238(d)(2)(B))

§ 222.129 How does the Secretary determine whether a fiscally dependent LEA is making a reasonable tax effort?

(a) If an LEA is fiscally dependent, as defined in § 222.3, the Secretary compares the LEA's imputed local tax rate, calculated under paragraph (b) of this section, with the average tax rate of its generally comparable LEAs, calculated under paragraph (c) of this section, to determine whether the LEA is making a reasonable tax effort.

(b) The Secretary imputes a local tax rate for a fiscally dependent LEA by—

(1) Dividing the assessed value of each classification of real property within the boundaries of the general government by the percentage of true value assigned to that property for tax purposes and aggregating the results;

(2) Determining the amount of locally derived revenues made available by the general government for the LEA's current expenditures for school purposes; and

(3) Dividing the amount determined in paragraph (b)(2) of this section by the amount determined in paragraph (b)(1) of this section.

(c) The Secretary performs the computations in paragraph (b) of this section for each of the fiscally dependent generally comparable LEAs and the computations in §§ 222.126–222.128, whichever is applicable, for each of the fiscally independent generally comparable LEAs and determines the average of all those tax rates.

(d) The Secretary determines that a fiscally dependent LEA is making a reasonable tax effort if its imputed local tax rate is equal to at least 95 percent of the average tax rate of its generally comparable LEAs.

(Authority: 20 U.S.C. 238(d)(2)(B))

§ 222.130 How does the Secretary determine whether an LEA lacks sufficient funds to enable it to provide a level of education equivalent to that provided by its generally comparable LEAs?

(a) The Secretary determines whether an LEA lacks sufficient funds to enable it to provide a level of education equivalent to that provided by its generally comparable LEAs, in accordance with § 222.122, as follows:

(1) First, the Secretary establishes the level of education equivalent to that provided by the LEA's generally comparable LEAs by—

(i) Computing the average per pupil expenditure (APPE) of the generally comparable LEAs by dividing the sum of the total current expenditures of those LEAs for their prior fiscal year by the sum of the total ADA of those LEAs for that prior fiscal year;

(ii) Increasing or decreasing the amount obtained in paragraph (a)(1)(i) of this section by the percentage the APPE of the generally comparable LEAs increased or decreased from their second preceding fiscal year to their prior fiscal year; and

(iii) Multiplying the amount determined in paragraph (a)(1)(ii) of this section by the LEA's total ADA for its current fiscal year.

(2) The Secretary next identifies the funds available to the LEA for current expenditures for its current fiscal year by—

(i) Adding the LEA's section 3 payment for the current fiscal year and all other funds available to the LEA for current expenditures for that current fiscal year; and

(ii) Subtracting from the amount obtained in paragraph (a)(2)(i) of this section the LEA's allowable carryover amount, which is that portion of the LEA's opening cash balance for the current fiscal year that does not exceed—

(A) The maximum amount of funds for current expenditures that the LEA was allowed by State law to carry over from the prior fiscal year to the current fiscal year, provided that State restrictions on carryover amounts were applied uniformly to all LEAs in the State; or

(B) If no State law governing cash balances exists, 30 percent of the LEA's "operating costs" for the prior fiscal year.

(3) The Secretary then subtracts the amount obtained in paragraph (a)(2)(ii) of this section from the figure computed in paragraph (a)(1)(iii) of this section.

(b) The Secretary determines that an LEA lacks sufficient funds to enable it to provide a level of education equivalent to that provided by its generally comparable LEAs if the amount determined in paragraph (a)(3) of this section is greater than 0.

(c) The following definitions apply to this subpart:

All other funds available to the LEA for current expenditures means—

(1) All funds received by the LEA for current expenditures from local sources (or, in the case of a fiscally dependent LEA, all funds budgeted for or made available to the LEA, whichever is greater, by the general government) and from State and Federal sources, except any payments under section 3 or section 3(d)(2)(B) of the Act received during the current fiscal year and funds granted for the purpose of Chapter 1 or Chapter 2 of Title 1 of the Elementary and Secondary Education Act of 1965; and

(2) Funds on hand for current expenditures at the beginning of the current fiscal year ("opening cash balance").

Operating costs is given the same meaning as the term "current expenditures," which is defined in § 222.3.

Section 3 payment means the total payment based on the LEA's entitlements under sections 3(d)(1), (3)(d)(2)(C)(i), and 3(d)(2)(D) of the Act.

(Authority: 20 U.S.C. 238(d)(2)(B), (C)(i), and (D), 244(5))

§ 222.131 How does the Secretary determine an LEA's maximum entitlement under section 3(d)(2)(B)?

To determine the maximum entitlement under section 3(d)(2)(B) for an LEA that meets the requirements of § 222.122, the Secretary—

(a) Computes the average per pupil expenditure of the generally comparable LEAs in accordance with § 222.130(a)(1) (i) and (ii);

(b) Multiplies the amount determined in paragraph (a) of this section by the total ADA of the LEA's federally connected children; and

(c) Subtracts from the amount computed in paragraph (b) of this section the total amount of State aid received by the LEA for its federally connected children.

(Authority: 20 U.S.C. 238(d)(2)(B))

§ 222.132 How does the Secretary determine an LEA's payment under section 3(d)(2)(B)?

(a) Except as provided in paragraph (b) of this section, an LEA that meets the requirements of § 222.122 receives a payment under section 3(d)(2)(B) in an amount equal to the lesser of—

(1) The amount determined in § 222.130(a)(3); or

(2) The LEA's maximum entitlement determined under § 222.131 minus the amount of the LEA's section 3 payment for the current fiscal year.

(b) In the case of an LEA whose tax rate is at least 95 percent but less than 100 percent of the average tax rate of its generally comparable LEAs, the Secretary reduces the LEA's payment under section 3(d)(2)(B), as determined in paragraph (a) of this section, by the percentage that the average tax rate of the generally comparable LEAs exceeds the tax rate of the LEA.

2. On page 24114, in the first column, last paragraph, after (d), insert "(insofar as paragraph (d) operates to require a school to provide the information described in §§ 668.44(c)(1)(ii) through (iv))".

3. On page 24114, in the first column, last paragraph, the phrase "loans certified for" is corrected to read "students enrolled for".

4. On page 24115, in the first column, lines 24 and 31, the word "graduates" is corrected to read "students".

§ 668.15 [Corrected]

5. On page 24116, in the third column, in § 668.15(a)(3)(i), Line 1, insert the word "has" after the word "that".

6. On page 24116, in the third column, in § 668.15(b), remove "after fiscal year 1988".

7. On page 24117, in the first column, in § 668.15(b)(2)(ii)(A), the word "graduates" is corrected to read "students".

8. On page 24117, in the first column, in § 668.15(b)(2)(ii)(B), "§ 668.44(c)(3)" is corrected to read "§ 668.44(c)(1)(iii)".

9. On page 24117, in the first column, in § 668.15(b)(2)(ii)(C), "§ 668.44(c)(4)" is corrected to read "§ 668.44(c)(1)(iv)".

§ 668.44 [Corrected]

10. On page 24117, in the third column, in § 668.44(c)(1)(ii), the phrase "graduates of the program" is corrected to read "students in the program".

11. On page 24118, in the first column, in § 668.44(c)(1)(iii), the word "graduate" is corrected to read "student" each time it appears.

12. On page 24118, in the first column, in § 668.44(c)(1)(iii), Line 7, before the word "any", remove the word "for".

13. On page 24118, in the first column, in § 668.44(c)(l)(iii), Line 9, the word "graduate's" is corrected to read "student's".

14. On page 24118, in the second column, in (f)(2), after "of", "such graduates" is corrected to read "students scheduled to graduate in that year", and, after "address of the", the word "graduate" is corrected to read "student".

Appendix A to Part 34 [Corrected]

15. On page 24118, in the third column, in Appendix A introductory text, "668.44(c)(2) through (4)" is corrected to read "668.44(c)(1)(ii) through (iv)".

16. On page 24119, in the second column, before the period at the end of number 6, add "and (c)".

17. On page 24121, in the third column, in § 668.606(c)(1), Line 10, the word "upward" is corrected to read "downward".

18. On page 24121, in the third column, in § 682.606(c)(1), Line 14, the word "plus" is corrected to read "and less."

Dated: August 30, 1989.

James B. Williams,

Acting Assistant Secretary for Postsecondary Education.

Medicare Program; Swing-Bed Program Changes: Interim Final Rule With Comment Period

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Parts 413, 424, 482, and 483

[BERC–493–IFC]

RIN 0938–AD83

Medicare Program; Swing-Bed Program Changes

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Interim final rule with comment period.

SUMMARY: These interim rules revise the current Medicare rules relating to approved swing-bed hospitals. They expand the allowable rural hospital bed size from 49 beds to 99 beds. They require approved swing-bed hospitals with more than 49 beds to—

- Transfer extended care hospital patients within 5 days to an available skilled nursing facility (SNF) bed in the geographic region, unless the patient's physician certifies within the 5 day period that transfer is not medically appropriate;
- Have availability agreements with SNFs in their geographic region, concerning the availability of extended care beds and the transfer of extended care patients; and
- Not seek Medicare payment for those patient days of extended care services (in a cost reporting period) that exceed 15 percent of the product of the number of days in the period and the average number of licensed beds at the hospital. An exception to this provision is that Medicare payment will continue to be made for those patients who are receiving extended care services at the time the hospital reaches the above-mentioned limit.

These regulations also require that SNFs in the geographic region of an approved swing-bed hospital must provide notice to the hospital of the availability of SNF beds.

These provisions conform our regulations with changes made by section 4005(b) of the Omnibus Budget Reconciliation Act of 1987 (Pub. L. 100–203) and section 411(b)(4)(D) of the Medicare Catastrophic Coverage Act of 1988 (Pub. L. 100–360).

DATES: *Effective date:* These regulations are effective on October 10, 1989. They are being issued in as an interim rule with comment for reasons explained in the Interim Rule with Comment section under Supplementary Information below.

Comment period: Comments will be considered if we receive them at the appropriate address, as provided below, no later than 5 p.m. on November 6, 1989.

ADDRESSES: Mail comments to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: BERC–493–IFC, P.O. Box 26676, Baltimore Maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309–G, Huber H. Humphrey Building, 200 Independence Ave., SW., Washington, DC, or
Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

In commenting, please refer to file code BERC–493–IFC. Comments received timely will be available for public inspection as they are received, beginning approximately three weeks after publication of this document, in Room 309–G of the Department's offices at 200 Indepndence Ave., SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (phone: 202–245–7890).

Please address a copy of comments on information collection requirements to: Office of Management and Budget, Office of Information and Regulatory Affairs, Room 3208, New Executive Office Building, Washington, DC 20503, Attention: Allison Herron.

Linda McKenna, (301) 966–4530, (Reimbursement Issues)

SUPPLEMENTARY INFORMATION:

I. Background

The Medicare and Medicaid programs cover inpatient health care services at both a hospital level of care and a skilled nursing facility (SNF) level of care. Under certain conditions and at a State's option, the Medicaid program also covers care in an intermediate care facility (ICF) for patients whose medical conditions require institutional care that is above the level of room and board, but less intensive than care provided in a hospital or SNF.

Hospitals participating in Medicare and Medicaid, in addition to providing an inpatient hospital level of care, may also provide SNF or ICF levels of care through the establishment of a separately participating "distinct part" unit. Among health, safety and other requirements, a distinct part SNF or ICF must be an entire separately identifiable unit consisting of all the beds within that unit (such as, a separate building, floor, wing, or corridor). A distinct part SNF or ICF unit is paid as an entity separate from the rest of the institution.

Small rural hospitals had difficulty in establishing identifiable units for SNF or ICF levels of care because of limitations in their physical plant and accounting capabilities. Thus, these hospitals often had an excess of hospital beds and their communities had a scarcity of SNF beds in Medicare and Medicaid participating facilities. To alleviate some of these problems, Congress enacted section 904 (the swing-bed provision) of the Omnibus Reconciliation Act of 1980 (OBRA), Pub. L. 96–499. Section 904 enacted section 1883 of the Social Security Act (the Act), under which rural hospitals with fewer than 50 beds may use their inpatient facilities to furnish SNF services to Medicare and Medicaid beneficiaries, and ICF services to Medicaid beneficiaries. These hospitals with approved swing-bed programs are paid at rates that are appropriate for those services and are generally lower than hospital rates. On July 20, 1982, we published an interim final rule in the **Federal Register** (47 FR 31518) that implemented section 1883 of the Act. The requirements contained in this section were considered in the amendments to the conditions proposed in the hospital regulations published January 4, 1983 (48 FR 299). These requirements were made final June 17, 1986 (51 FR 22010). The requirements for swing-bed hospitals are located at 42 CFR 482.66.

II. Summary of New Legislation

On December 22, 1987, the Omnibus Budget Reconciliation Act of 1987 (Pub. L. 100–203) was enacted. Section 4005(b) of Pub. L. 100–203 amends section 1883(b)(1) of the Act by expanding the swing-bed program to rural hospitals with fewer than 100 beds.

Section 4005(b)(2)(B) of Pub. L. 100–203 amends section 1883(d) of the Act by adding the following requirements and definitions:

- Payment for extended care services furnished by hospitals with more than 49 beds but fewer than 100 beds, approved as swing-bed hospitals by Medicare after March 31, 1988, may not be made for extended care services furnished to a swing-bed hospital extended care patient more than 5 days (excluding weekends and holidays) after a bed in a SNF becomes available in the geographic region, unless the patient's physician certifies within the 5 day period, that the transfer of the patient is not medically appropriate.

- The term "extended care patient" means an individual being furnished extended care services at a swing-bed hospital under an agreement with the Secretary.
- The term "availability date" means, with respect to an extended care patient at a swing-bed hospital, any date on which a bed is available for the patient in a SNF located within the geographic region in which the hospital is located.
- The Secretary must promulgate regulations to provide for notice by SNFs of availability dates to hospitals with swing-bed agreements located within the same geographic region.
- In the case of a hospital which has more than 49 beds and a swing-bed agreement after March 31, 1988, the hospital will not seek payment in a cost reporting period for patient days of extended care services that exceed 15 percent of the product of the number of days in the period and the average number of licensed beds in the hospital in the period.

These swing-bed amendments do not affect providers operating under section 1883 agreements entered into before March 31, 1988.

On July 1, 1988, the Medicare Catastrophic Coverage Act of 1988 (Pub. L. 100–360) was enacted. Section 411(b)(4)(D) of Pub. L. 100–360 adds a technical amendment to the 15 percent payment limitation by providing continued payment for those patients in the swing-bed hospital receiving extended care services at the time the limit is reached.

III. Provisions of this Interim Rule

In developing these regulations, we have essentially relied on the language of the statute, as amended by section 4005(b) of Pub. L. 100–203, and section 411(b)(4)(D) of Pub. L. 100–360.

A. Requirements Relating to Payment for Extended Care Services in a Swing-Bed Hospital

Current regulations at § 413.114 explain the reimbursement methodology for those rural hospitals that participate in the swing-bed program. In § 413.114, we are defining the terms "geographic region" and "availability date".

We define "geographic region" to mean an area that includes the SNFs with which a hospital has traditionally arranged transfers and all other SNFs within the same proximity to the hospital. In the case of a hospital without existing transfer practices upon which to base a determination, the geographic region is an area that includes all the SNFs within 50 miles of the hospital unless the hospital can demonstrate that the SNFs are inaccessible to its patients. In the event of a dispute as to whether a SNF is within a hospital's geographic region, or the SNF is inaccessible to hospital patients, the HCFA Regional Office will make a determination.

We define "availability date" to mean with respect to an extended care patient in a swing-bed hospital, the later of—

- The date on which a bed is available for the patient in a SNF located within the hospital's geographic region;
- The date that a hospital learns that a SNF bed is available; or
- If the notice is prospective, the date that a SNF bed will become available.

In § 413.114, we are adding a new subsection that describes certain payment requirements for rural hospitals with more than 49 beds (but fewer than 100) that wish to participate as a swing-bed hospital. The first requirement states that if there is an available SNF bed in the geographic region, the extended care patient must be transferred within a 5 day period (excluding weekends and holidays) beginning on the availability date of the SNF bed unless the patient's physician certifies within that 5 day period that transfer is not medically appropriate.

Under the second requirement in order to receive Medicare payments, hospitals must not exceed 15 percent of the product of the number of days in the period and the average number of licensed beds in the hospital in the same period. It is necessary for these hospitals to monitor the number of Medicare extended care days in order to prevent the hospital's exceeding this 15 percent payment limitation. In those States that do not license hospital beds, the hospitals must use the total average of hospital beds reported on their most recent Certificate of Need (CON) (excluding bassinets). If during the cost reporting period, there is an increase or decrease in the number of "licensed" beds, the number of "licensed" beds for each part of the period is to be multiplied by the number of days for which that number of "licensed" beds was available. After totalling the results, compute 15 percent of the total available "licensed" bed days to determine the payment limitation.

This new subsection of § 413.114 will also specify the payment restrictions that are applicable to swing-bed hospitals with more than 49 beds. The first restriction states that hospitals must not seek payment for extended care services after the end of the 5 day period (excluding weekends and holidays) beginning on the availability date of a SNF bed unless the patient's physician has certified, within that 5 day period, that the transfer of the patient to the SNF was not medically appropriate.

The second payment restriction states that swing-bed hospitals with more than 49 beds must not seek payment for extended care services in a cost reporting period to the extent that they exceed 15 percent of the product of the number of days in the period and the average number of licensed beds in the hospital in the period. In those States that do not license hospital beds, the hospital must use the average number of hospital beds reported on its most recent CON, excluding bassinets.

We also are adding a new § 413.114(d)(4) that describes the exception to the payment limitation. This exception states that Medicare payment will be continued for those patients who are receiving extended care services in the swing-bed hospital at the time the 15 percent limit is reached.

B. Requirements for Posthospital SNF Care

Current regulations at 42 CFR 424.20 (formerly 42 CFR 405.1632) specify the requirements for Medicare payment of posthospital SNF care. The regulations currently provide that a physician must certify that SNF care is or was needed for continued treatment of a medical condition that an individual had as an inpatient. This section also states that the certification for SNF care must be obtained at the time of admission to the SNF or as soon thereafter as is reasonable and practicable. We are revising § 424.20(a), to add the certification requirements set forth in section 1883(d) of the Act. These requirements will make it clear that if the swing-bed hospital does not timely transfer the patient to the SNF, the extended care patient's physician must certify that the transfer of the patient within 5 days of the availability date as defined in § 413.114(d), was not medically appropriate.

In addition, we are revising paragraph (b) of § 424.20, by adding a new (b)(2) concerning the timing of the physician certification. Section 424.20(b)(2) will require the physician of an extended care patient to certify within 5 days (excluding weekends and holidays) of the availability date, that transfer of the patient is not medically appropriate.

C. Special Requirements for Hospital Providers of Long Term Care Services

Current regulations at § 482.66 contain the special requirements that hospital providers of long-term care services (swing-beds) must meet in order to be approved to provide post-hospital extended care services. Section 482.66(a)(1) requires the facility to have fewer than 50 hospital beds, excluding beds for newborns and beds in intensive care type inpatient units. We are revising this section to expand the swing-bed program to hospitals with fewer than 100 beds, excluding beds for newborns and beds in intensive care type inpatient units or distinct parts.

We are making minor technical revisions to the section title, the introductory paragraph, paragraphs (a)(1), (4) and (5) and are adding a new paragraph (a)(6) to § 482.66 to specify the requirements of the availability agreement between hospitals and SNFs with more than 49 beds (but fewer than 100) approved after March 31, 1988.

In the title, the term "Conditions of Participation" has been dropped. Section 482.66 has been retitled as "Special Requirements" because the requirements found in this section are not traditional conditions of health and safety. Rather, they are requirements relating to approval of hospitals wishing to have swing-bed approvals.

In a new paragraph (a)(6)(i), we specify that hospitals must have an availability agreement with SNFs in their geographic region that ensures that the SNF will notify the hospital when an extended care bed becomes available.

In a new paragraph (a)(6)(ii), we specify that once the hospital learns of the availability date of a SNF bed, it must transfer the swing-bed extended care patient within 5 days (excluding weekends and holidays) of that date, unless the patient's physician certifies that the transfer is not medically appropriate. Hospitals with under 50 beds are not subject to the 5 day transfer agreement.

In a new paragraph (a)(7), we specify that we will determine the number of beds a hospital has for purposes of this section. In paragraph (a)(7)(i), we specify that a hospital bed count is calculated by excluding from the count, beds that, because of their special nature, such as newborn and intensive care beds, would not be available for swing-bed use. Also excluded from the bed count are beds in a separately certified "distinct part" as SNFs and ICFs.

At paragraph (a)(7)(ii) we specify that a hospital licensed for more than 49 or 99 beds, as the case may be, will be considered to have the number of beds that it consistently utilizes and staffs. Hospitals, at a minimum, document their count by staffing schedules and census information for the previous 12 months before application to be a swing-bed hospital. The hospital must provide written assurance to HCFA that they will not operate over 49 or over 99 beds, excluding newborn and intensive or coronary care beds, except in connection with a catastrophic event.

D. Requirements for Long Term Care Facilities

We are adding a new § 483.80 that describes the special requirements that SNFs must have with swing-bed hospitals in their geographic region. We are stating that a SNF that has an availability agreement to accept extended care patients from swing-bed hospitals with more than 49 beds, in their geographic region must provide notice of when the beds are available. In this interim regulation we have also replaced the cross references to current SNF regulations that appear in § 482.66 with references to the SNF regulations we published on February 2, 1989 (54 FR 5316). We have not changed the scope of the SNF requirements that a swing-bed hospital must meet.

E. Certification Effective Date

The statute authorizes payment for these swing-bed services, effective April 1, 1988. Therefore, hospitals that have been providing these services may request retroactive approval. This retroactive approval can be granted back to the date the hospital began providing the service but not prior to April 1, 1988, the effective date of the statutory provision. Future approvals will be not earlier than the date of the survey.

To be approved retroactively, the hospital must be found in compliance with all the swing-bed requirements at the time of the State agency survey and a review of records must provide reasonable assurance that the hospital has been continuously complying with these requirements from the date for which retroactive approval is requested.

F. Optional Reimbursement Method

Under current regulations at § 413.24(d)(5), an optional reimbursement method is available to small, rural hospitals with Medicare-participating distinct part SNFs. To qualify for this method, a hospital-SNF complex must be located in a rural area and the hospital and SNF must have a combined bed count of fewer than 50 beds. Under this method, the general routine service costs of the hospital component and SNF component are combined into a single cost center for purposes of computing the average cost per diem for hospital and SNF services. However, the two components remain as separate providers for certification and coverage purposes.

We considered extending the optional reimbursement method to those rural hospital-SNF complexes that have a combined bed count of more than 49 (but fewer than 100) beds. However, we do not believe that allowing these facilities to use the optional reimbursement method is appropriate or necessary. The optional reimbursement method was intended for use by those very small hospital-SNF complexes that, because of their size and locality, had limited resources for maintaining the distinct part components for reimbursement purposes. Because of the difficulties and the excessive strain on the resources of these hospitals, we provided for the optional reimbursement method. However, we do not believe the same problems exist to the same degree with respect to hospitals having more than 49 beds and therefore are not proposing any extension of this reimbursement method.

G. Identifying Eligible Hospitals

In administering the original swing-bed provision, HCFA considered hospitals with 49 or fewer beds in general use as eligible to participate. In other words, hospitals with 50 beds or more whose staffing and usual census showed that they routinely operated with fewer than 50 beds were considered appropriate for swing-bed approval as long as they met the other statutory and regulatory requirements for participating. We had also excluded newborn beds, intensive and coronary care beds and those associated with distinct parts and those associated with a catastrophic event. We understand that the Congress was aware of this administrative choice and that it assumed we would continue to exercise it when we implemented the new provision. Accordingly, we will look at the number of beds a hospital actually is operating to determine if it (1) is eligible for participation as a swing-bed hospital, and (2) should be considered to fall under the rules applicable to hospitals of under or over 50 beds.

H. Beneficiary Impact

Approval of swing-bed hospitals with more than 49 beds but fewer than 100 could provide beneficiaries with a new source of SNF care in rural areas. However, the statutory payment limitations on these hospitals create instances where Medicare payment may not be made and the beneficiary could be liable for the provider services. These include the following—

- A hospital that has exceeded the 15 percent payment limitation for swing-bed services will not receive Medicare

---

payment for any new patients admitted to a SNF swing-bed while the limitation is in effect. Therefore, a hospital, in conducting its daily census should separately account for beneficiaries receiving Medicare covered extended care services. A patient's liability for payment for extended care services in a swing-bed hospital when the hospital has reached the 15 percent payment limitation for these services is dependent upon the hospital's giving proper notice to the beneficiary of this liability. If the beneficiary is admitted directly to the swing bed hospital for extended care services after the 15 percent payment limitation has been reached, the hospital must give the beneficiary notice under section 1879 of the Act and § 405.336(d) of the regulations that the beneficiary does not require inpatient hospital care. If the hospital converts the beneficiary's status from hospital patient to long-term care patient, the hospital must give the beneficiary notice under section 1154(e) of the Act and § 412.42(c) of the regulations that the beneficiary no longer requires inpatient hospital care. ("Inpatient hospital care" can include cases in which a beneficiary needs a SNF level of care, but under Medicare criteria, a SNF level bed is not available.) These notices, which must be given prior to a change in the beneficiary's status within the hospital, or prior to admission to a swing-bed hospital for long term care, must include language indicating that the beneficiary will be liable for payment of SNF type services because the 15 percent payment limitation has been reached. This notice must point out that the beneficiary is liable only in that particular facility and that the beneficiary has the option to remain in the facility and pay for those days or request a transfer to another facility. Also included in the notice is the date Medicare would again start to pay for extended care services in that hospital (the beginning date of a hospital's new cost reporting period). The 2 day delay in the beneficiary's liability that usually applies under § 412.42(c) does not apply in connection with such changes in swing-bed status because hospital payment rules do not apply when a patient is in a swing-bed. Instead, the patient is considered for payment purposes to be a patient of a SNF and care provided is subject to SNF rules.

- Medicare payment for SNF swing-bed services ceases 5 days after a SNF bed becomes available in the geographic region, unless the beneficiary's physician certifies within that 5 day period that the beneficiary's transfer to the SNF would not be medically appropriate. The beneficiary's liability for payment for extended care services after the 5 day period has expired is dependent upon the hospital's giving prior notice to the beneficiary of this liability. These notices, which may be given at the time of admission for long term care or change of status, as appropriate, must include language indicating that the patient will be liable for payment after the expiration of the 5 days if an SNF bed is available in the geographic region and the beneficiary's physician has not certified that a transfer to that facility would be medically inappropriate.

IV. Regulatory Impact Statement

A. Executive Order 12291

Executive Order 12291 (E.O. 12291) requires us to prepare and publish a regulatory impact analysis for any interim rule that meets one of the E.O. criteria for a "major rule"; that is, that would be likely to result in—

- An annual effect on the economy of $100 million or more;
- A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or
- Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

We anticipate that this interim rule will result in the following costs to the Medicare and Medicaid programs.

TABLE 1.—PROJECTED MEDICARE AND MEDICAID COSTS AS A RESULT OF SWING-BED PROGRAM CHANGES[1]

	FY 1989	FY 1990	FY 1991	FY 1992	FY 1993
Medicare	$25	$25	$30	$35	$35
Medicaid	0	5	5	5	5

[1] Rounded to the nearest $5 million.

Section 1913 of the Act permits States to amend their State plans in order to make payment to Medicare swing-bed hospitals for SNF and ICF services. Medicaid payments may rise to the extent that this regulation increases the number of swing-bed hospitals in States that have adopted this Medicaid option. In conclusion, this iterim rule is not a major rule under E.O. 12291 criteria, and a regulatory impact analysis is not required.

B. Regulatory Flexibility Act

We generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that an interim rule will not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, all hospitals are treated as small entities.

Section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if an interim rule may have a significant impact on the operations of a substantial number of small rural hospitals. Such an analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital with fewer than 50 beds located outside of a Metropolitan Statistical Area.

The provisions of this interim rule generally conform our regulations to changes made by section 4005(b) of Pub. L. 100–203 and section 411(b)(4)(D) of Pub. L. 100–360. However, we are exercising some discretion in implementing these provisions as discussed below.

First, section 4005(b) of Pub. L. 100–203 allows the Secretary to define the term "geographic region", and we have defined it as an area that includes the SNFs with which a hospital has traditionally arranged transfers and all other SNFs within the same proximity to the hospital. In the case of a hospital without existing transfer practices upon which to base a determination, the geographic region is an area that includes all the SNFs within 50 miles of the hospital unless the hospital can demonstrate that the SNFs are inaccessible to its patients.

Second, we are adding to the definition of "availability date" found in section 4005(b) of Pub. L. 100–203 in order to clarify it. We have defined it to mean the date that a hospital learns that a SNF bed is available or if the notice is prospective, the date that a SNF bed will become available. The 5 day period begins either on the date that the hospital learns the bed is available or the date the bed becomes available, whichever is later.

We do not believe that these definitions will result in a significant impact. Because this interim rule, with few exceptions, merely conforms our policy to the statute, we have determined that a regulatory flexibility analysis and rural impact statement are not necessary.

V. Other Required Information

A. Interim Final Rule With Comment Period

Section 4039(g) of Pub. L. 100–203 provides that, if necessary, we may issue regulations to implement certain provisions of that law, including the swing bed expansion and other Medicare reforms, on an interim final basis. Congress, in Public Law 100–203, charged the agency with developing and implementing several significant and complex payment reforms. Congress recognized, however, that the agency may not be able both to develop the regulations necessary to implement these reforms and to engage in the time- and resource-consuming process entailed by the usual notice and comment procedure before the effective dates which it prescribed. Indeed, in the case of the modifications to the swing bed program contained in section 4005(b) of Pub. L. 100–203 (enacted December 22, 1987), Congress clearly intended for the Secretary to make use of interim final rules by imposing, in section 4005(b)(4), a March 31, 1988 effective date on the swing bed modifications. The usual notice and comment procedures could not have been completed in the time allowed.

The Secretary believes it necessary to exercise his option, under section 4039(g), to issue these swing bed provisions as an interim final rule in order to provide hospitals with the guidelines needed to participate in the expanded swing bed program, which statutorily became effective on March 31, 1988. The urgency contemplated by Congress in enacting section 4039(g) has not been reduced by the fact that we have been unable to develop and publish these regulations until now. Were we to go through the usual notice and comment process now, we would have to leave the current swing bed guidelines in place. Further, § 1883(d)(2)(A) of the Act, as added by section 4005(b)(2) of Public Law 100–203, requires certain criteria applicable to the expanded swing bed program to be issued by regulation. Therefore, those hospitals most affected by the expanded program (hospitals with between 50 and 100 beds) would be left with no guidelines, particularly with respect to the SNF/hospital availability agreements, to utilize in applying for swing bed participation.

Although this rule is being issued as an interim final rule, we are interested in comments and advice regarding changes that should be made to this issuance. Therefore, we are providing a 60-day comment period for public comment.

B. Response to Comments

Because of the large numbers of items of correspondence we normally receive concerning regulations, we are not able to acknowledge or respond to the comments individually. However, in preparing the final rule, we will consider all comments that we receive by the date and time specified in the "Date" section of this preamble, and we will respond to the comments in the preamble of that rule.

VI. Information Collection Requirements

Sections 413.114(d)(1)(ii), 482.66(a)(6)(ii), 482.66(a)(7) and 483.80 of this rule contain information collection and reporting requirements that are subject to the Office of Management and Budget review under the Paperwork Reduction Act of 1980. An affected hospital must identify and then make an "availability agreement" with SNFs in its area; these SNFs must report availability of SNF beds to hospitals. The hospital must also track swing-bed days as a proportion of "licensed" bed days to prevent improper payment for or transfer of patients to swing-beds. Public reporting burden for this collection of information is estimated to be 1 hour per response. Other organizations and individuals desiring to submit comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden should direct them to the office identified in the **ADDRESS** section of this preamble.

VII. List of Subjects

42 CFR Part 413

Health facilities, Kidney diseases, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 424

Emergency medical services, Health facilities, Health professions, Medicare.

42 CFR Part 482

Grant programs—health, Hospitals, Medicaid, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 483

Grant programs—health, Health facilities, Health professions, Health records, Medicaid, Medicare Nursing homes, Nutrition, Reporting and recordkeeping requirements, Safety.

For the reasons set out in the preamble, 42 CFR Chapter IV is amended as set forth below:

CHAPTER IV—HEALTH CARE FINANCING ADMINISTRATION, DEPARTMENT OF HEALTH AND HUMAN SERVICES

PART 413—PRINCIPLES OF REASONABLE COST REIMBURSEMENT; PAYMENT FOR END-STAGE RENAL DISEASE SERVICES

Subpart F—Specific Categories of Costs

B. Part 413, Subpart F is amended as follows:

1. The authority citation for Part 413 is revised to read as follows:

Authority: Secs. 1102, 1122, 1814(b), 1815, 1833(a), 1861(v), 1871, 1881, 1883, and 1886 of the Social Security Act as amended (42 U.S.C. 1302, 1320a–1, 1395f(b), 1395g, 1395l(a), 1395x(v), 1395hh, 1395rr, 1395tt, and 1395ww).

2. In § 413.114, the title and paragraphs (a) and (b) are revised; and a new paragraph (d) is added to read as follows:

§ 413.114 Payment for extended care services furnished by a swing-bed hospital.

(a) *Purpose and basis.* This section implements section 1883 of the Act, which provides for payment for extended care services furnished by rural hospitals having a swing-bed approval. Payments to these hospitals for extended care services furnished in general routine inpatient beds are based on the reasonable cost of extended care services, in accordance with paragraph (c) of this section. Swing-bed hospitals approved after March 31, 1988 with more than 49 beds must meet additional payment requirements as set forth in paragraph (d) of this section.

b. *Definitions.* For purposes of this section—"Availability date" means with respect to an extended care patient in a swing-bed hospital, the later of—

(1) Any date on which a bed is available for the patient in a SNF located within the hospital's geographic region;

(2) The date that a hospital learns that a SNF bed is available; or

(3) If the notice is prospective, the date that a SNF bed will become available.

"Geographic region" means an area that includes the SNFs with which a hospital has traditionally arranged transfers and all other SNFs within the same proximity to the hospital. In the case of a hospital without existing transfer practices upon which to base a determination, the geographic region is an area that includes all the SNFs within 50 miles of the hospital unless the hospital can demonstrate that the SNFs are inaccessible to its patients. In the event of a dispute as to whether a SNF is within a hospital's geographic region or the SNF is inaccessible to hospital patients, the HCFA Regional Office makes a determination.

"Swing-bed hospital" means a hospital participating in Medicare that has an approval from HCFA to provide extended care services as defined in § 409.20 of this chapter, and meets the requirements specified in § 482.66 of this chapter.

* * * * *

(d) *Additional requirements*—(1) *General rule.* Prior to Medicare payment being made to a swing-bed hospital with more than 49 beds (but fewer than 100) the following payment requirements must be met:

(i) If there is an available SNF bed in the geographic region, the extended care patient must be transferred within 5 days (excluding weekends and holidays) of the availability date, unless the patient's physician certifies within the 5-day period that transfer is not medically appropriate.

(ii) The number of patient days for extended care services in a cost reporting period does not exceed 15 percent of the product of the number of days in the period and the average number of licensed beds in the hospital in the period. In those States that do not license their hospital beds, the hospitals must use the total number of hospital beds reported on their most recent Certificate of Need (CON), excluding bassinets. If during the cost reporting period, there is an increase or decease in the number of "licensed" beds, the number of "licensed" beds for each part of the period is to be multiplied by the number of days for which that number of "licensed" beds was available. After totalling the results, compute 15 percent of the total available "licensed" bed days to determine the payment limitation.

(2) *Payment restrictions.*

(i) The hospital must not seek payment for extended care services after the end of the 5 day period (excluding weekends and holidays) beginning on the availability date of a SNF bed unless the patient's physician has certified, within that 5 day period, that the transfer of the patient to the SNF was not medically appropriate.

(ii) The hospital must not seek payment for extended care services in a cost reporting period to the extent that they exceed 15 percent of the product of the number of days in the period and the average number of licensed beds in the period. In those States that do not license hospital beds, the hospital must use the average number of hospital beds reported on its most recent CON, excluding bassinets.

(3) *Payment exception.* Payment will continue to be made during the cost reporting period in which the 15 percent limit specified in paragraph (d)(1)(ii) of this section is reached for those patients who are receiving extended care services at the time the hospital reaches the limit.

PART 424—CONDITIONS FOR MEDICARE PAYMENT

Subpart B—Physician Certification and Plan of Treatment Requirements

C. Part 424, Subpart B is amended as follows:

1. The authority citation for Part 424 is revised to read as follows:

Authority: Secs. 216(j), 1102, 1814, 1815(c), 1835, 1842(b), 1861, 1866(d), 1870 (e) and (f), 1871, 1872, and 1883(d) of the Social Security Act (42 U.S.C. 416(j), 1302, 1395f, 1395g(c), 1395n, 1395u(b), 1395x, 1395cc(d), 1395gg, 1395gg(e), 1395gg(f), 1395hh, 1395ii, and 1395tt(d)).

2. In § 424.20 paragraphs (a) and (b) are revised to read as follows:

§ 424.20 Requirements for posthospital SNF care.

* * * * *

(a) *Content of certification.*—(1) *General requirements.* (i) Posthospital SNF care is or was required because the individual needs or needed on a daily basis skilled nursing care (furnished directly by or requiring the supervision of skilled nursing personnel) or other skilled rehabilitation services that, as a practical matter, can only be provided in a SNF or a swing-bed hospital on an inpatient basis; and (ii) The SNF care is or was needed for a condition for which the individual received inpatient care in a participating hospital or a qualified hospital, as defined in § 409.3 of this chapter.

(2) *Special requirement: A swing-bed hospital with more than 49 beds (but fewer than 100) that does not transfer a swing-bed patient to a SNF within 5 days of the availability date.* Transfer of the extended care patient to the SNF is not medically appropriate.

(b) *Timing of certification.*—(1) *General rule.* The certification must be obtained at the time of admission or as soon thereafter as is reasonable and practicable.

(2) *Special rules for certain swing-bed hospitals.* For swing-bed hospitals with more than 49 beds that are approved after March 31, 1988, the extended care patient's physician has 5 days (excluding weekends and holidays) beginning on the availability date as defined in § 413.114(b), to certify that the transfer of the extended care patient is not medically appropriate.

* * * * *

PART 482—CONDITIONS OF PARTICIPATION FOR HOSPITALS

Subpart E—Requirements for Specialty Hospitals

D. Part 482, Subpart E is amended as follows:

1. The authority citation for Part 482 continues to read as follows:

Authority: Secs. 1102, 1138, 1814(a)(6), 1861(e), (f), (k), (r), (v)(1)(G), (z), and (ee), 1864, 1871, 1883, 1886, 1902(a)(30), and 1905(a) of the Social Security Act (42 U.S.C. 1302, 1338, 1395f(a)(6), 1395x(e), (f), (k), (r), (v)(1)(G), (z), and (ee), 1395aa, 1395hh, 1395tt, 1395ww, 1396a(a)(30), and 1396d(a)).

2. In § 482.66, the section heading is revised; the introductory text is revised; the introductory text for paragraph (a) is revised; paragraph (a)(1) is revised; the semicolons at the end of paragraphs (a)(2) and (a)(3) are removed and periods are added in their place; paragraph (a)(4) is revised; new paragraphs (a)(6) and (a)(7) are added; and paragraph (b) is revised to read as follows:

§ 482.66 Special requirements for hospital providers of long-term care services ("swing-beds").

A hospital that has a Medicare provider agreement must meet the following requirements in order to be granted an approval from HCFA to provide post-hospital extended care services, as specified in § 409.30 of this chapter, and be reimbursed as a swing-bed hospital, as specified in § 413.114 of this chapter:

(a) *Eligibility.* A hospital must meet the following eligibility requirements:

(1) The facility has fewer than 100 hospital beds, excluding beds for newborns and beds in intensive care type inpatient units (for eligibility of hospitals with distinct parts electing the

optional reimbursement method, see § 413.24(d)(5) of this chapter).

* * * * *

(4) The hospital does not have in effect a 24-hour nursing waiver granted under § 405.1910(c).

(5) The hospital has not had a swing-bed approval terminated within the two years previous to application.

(6) A hospital with more than 49 beds (but fewer than 100) approved under this section after March 31, 1988, must—

(i) Have an availability agreement with SNFs in its geographic region that requires the SNFs to notify the hospital of the availability of extended care beds and the dates when those beds will be available; and

(ii) Transfer the extended care patient within 5 days (excluding weekends and holidays) after learning that a SNF bed is available or in the case of prospective notification by the SNF, within 5 days of the date the bed becomes available, unless the patient's physician certifies, as required under § 424.20, that the transfer is not medically appropriate.

(7) The hospital must provide written assurance to HCFA that the hospital will not operate over 49 or over 99 beds except in connection with a catastrophic event. The hospital bed count is determined as follows:

(i) A hospital bed count is calculated by excluding from the count, beds that because of their special nature such as, newborn and intensive care beds, would not be available for swing-bed use. Also excluded from the bed count are beds in separately certified "distinct part" SNFs and ICFs.

(ii) A hospital licensed for more than 49 or 99 beds, is considered to have the number of beds that it consistently utilizes and staffs. Hospitals, at a minimum, document their count by staffing schedules and census information for the previous 12 months before application to be a swing-bed hospital.

(b) *Skilled nursing facility services.* The facility is substantially in compliance with the following skilled nursing facility requirements contained in Subpart D of Part 483 of this chapter.

(1) Patients' rights (§ 483.10(a)(1) and (a)(2), Notice of Rights and Services, § 483.10(b)(1), (b)(3), (b)(4), (b)(5), (b)(6), (b)(7), (b)(9), and (b)(10));

(2) Specialized rehabilitative services (§ 483.45);

(3) Dental services (§ 483.55);

(4) Social services (§ 483.15(g));

(5) Patient activities (§ 483.15(f)); and

(6) Discharge planning (§ 483.20(e)).

PART 483—REQUIREMENTS FOR LONG TERM CARE FACILITIES

Subpart B—Provider Agreements

E. Part 483, Subpart B is amended as follows:

1. The authority citation for Part 483 continues to read as follows:

Authority: Sec. 1102, 1861 (j) and (l), 1863, 1871, 1902(a)(28), and 1905 (a) and (c) of the Social Security Act (42 U.S.C. 1302, 1395x (j) and (l), 1395hh, 1396a(a)(28), and 1396d(c)), unless otherwise noted.

2. A new § 483.80 is added to read as follows:

§ 483.80 Special requirements for skilled nursing facility agreements with swing-bed hospitals.

SNFs must enter, as appropriate, into availability agreements as specified in § 482.66(a)(6) with swing-bed hospitals of more that 49 beds to provide notice that they have available beds and the dates these beds will become available. These agreements are only required for hospitals that are swing-bed hospitals and fall within the SNFs geographic region as defined by § 413.114.

(Catalog of Federal Domestic Assistance Program—Medicare Program: Hospital Insurance—No. 13.744.)

Dated: January 30, 1989.

William L. Roper,

Administrator, Health Care Financing Administration.

Approved: April 10, 1989.

Louis W. Sullivan,

Secretary.

Environmental Protection Agency

40 CFR Parts 180, 185, and 186

Daminozide; Revocation and Amendment of Tolerances and Food Additive Regulations; Proposed Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 180, 185 and 186

[OPP-300202; FRL-3643-1]

Daminozide; Revocation and Amendment of Tolerances and Food Additive Regulations

AGENCY: Environmental Protection Agency ("EPA"; "the Agency").

ACTION: Proposed rule.

SUMMARY: This document proposes (1) the reduction or revocation of all tolerances for combined residues of the plant growth regulatory daminozide, trade name Alar®, Kylar®, B-Nine®, in or on all raw agricultural commodities; (2) the revocation of daminozide food/feed additive regulations for processed foods and animal feed; and (3) the establishment of expiration dates for all tolerances not revoked as of the date this rule becomes final. These proposed actions are being initiated because the Agency has determined that long term dietary exposure to daminozide and unsymmetrical dimethyl hydrazine (UDMH), a degradate and metabolite of daminozide, poses unacceptable risks to the general population.

The proposed effective dates of the tolerance revocation will vary by crop with several tolerances being revoked as of about November 30, 1989, and other tolerances being reduced as of that date and revoked by May 31, 1991. The proposed effective date of the revocation of the food/feed additive regulations is November 30, 1989, the date this proposed action is expected to be issued as a final action.

DATES: Written comments, identified by the document control number OPP-300202, must be received on or before October 23, 1989.

ADDRESS: By mail, submit comments to:

Public Docket and Freedom of Information Section, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

In person, deliver comments to: Rm. 246, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 246 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT:

By mail: Lisa Engstrom, Special Review and Reregistration Division (H7508C), Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Office location and telephone number: Special Review Branch, Room 1020, CM #2, 1921 Jefferson Davis Highway, Arlington, VA, (703)-557-7400.

SUPPLEMENTARY INFORMATION:

I. Introduction

EPA is proposing to revoke all tolerances and food additive regulations under sections 408 and 409 of the Federal Food, Drug, and Cosmetic Act (FFDCA) for the plant growth regulator daminozide (butanedioic acid mono (2,2-dimethylhydrazide)). For several food uses of daminozide, the tolerance will be reduced for an interim period prior to the date of final revocation.

II. Legal Background

The Federal Food, Drug, and Cosmetic Act (FFDCA), (21 U.S.C. 301 *et seq.*), authorizes the establishment of tolerances and exemptions from tolerances for residues of pesticide chemicals in or on raw agricultural commodities pursuant to section 408, and the promulgation of food additive regulations for pesticide residues in processed food under section 409 of that Act (21 U.S.C. 346(a), 348). Under the Reorganization Plan, No. 3 of 1970, 4 Stat. 3086, which established EPA, the authority to set tolerances for pesticide chemicals in raw agricultural commodities and processed food under sections 408 and 409 of the FFDCA was transferred from the Food and Drug Administration (FDA) to EPA. The FDA retains the authority to enforce the tolerance and food additive provisions under this Plan.

Without such tolerances, exemptions from tolerances, or food additive regulations (sometimes also referred to as "tolerances"), a food containing pesticide residues is "adulterated" under section 402 of the FFDCA, and hence may not legally be moved in interstate commerce (21 U.S.C. 346a(a), 348(a)). Pursuant to section 402(a)(2)(C) of the FFDCA, a food additive regulation must be established for processed food if the pesticide residue in the processed food is greater than the tolerance prescribed for the raw agricultural commodity. Where, however, the pesticide residues in the processed food resulting from treatment of the raw agricultural commodity do not exceed the tolerance level established for the raw agricultural commodity, a separate food additive regulation is not necessary (21 U.S.C. 342(a)(2)(C)).

To establish a tolerance or an exemption under section 408 of FFDCA, the Agency must make a finding that the promulgation of the rule would "protect the public health" (21 U.S.C. 346a(b)). In reaching this determination, the Agency is directed to consider, among other relevant factors: (a) The necessity for the production of an adequate, wholesome and economical food supply; (b) other ways in which the consumer may be affected by the pesticide; and (c) the usefulness of the pesticide for which a tolerance is sought. Thus, in essence, section 408 of the FFDCA gives the Agency the authority to balance risks against benefits in determining appropriate tolerance levels. The Agency is permitted to set a tolerance at zero "if the scientific data before the Administrator does not justify the establishment of a greater tolerance" (21 U.S.C. 346a(b)).

The establishment of a food additive regulation under section 409 requires a finding that use of the pesticide will be "safe" (21 U.S.C. 348(c)(3)). Relevant factors in this safety determination include: (1) the probable consumption of the pesticide or its metabolites; (2) the cumulative effect of the pesticide in the diet of man or animals, taking into account any related substances in the diet; and (3) appropriate safety factors to relate the animal data to the human risk evaluation. Section 409 contains the Delaney Clause, which specifically provides that, with very limited exceptions, no additive is deemed safe if it induces cancer when ingested by man or animals. *Id.*

Under sections 408 and 409 of the FFDCA, the proponent of a tolerance or a food additive regulation has the burden of providing data establishing the safety of the pesticide for which a tolerance (or food additive regulation) is sought (21 U.S.C. 346a(d)(1), 348(b)(2)). As noted by both the House and Senate reports:

> Before any pesticide-chemical residue may remain in or on a raw agricultural commodity, scientific data must be presented to show that the pesticide chemical is safe from the standpoint of the consumer. The burden is on the person proposing the tolerance or exemption to establish the safety of such pesticide-chemical residue.

H.R. Rep. No. 1385, 83d Cong., 2d Sess. at 5 (1954); S. Rep. No. 1635, 83d Cong., 2d Sess. at 4 (1954). Once a tolerance (or food additive regulation) has been established, the burden of justifying the continued safety of the pesticide residues authorized by the rule remains with the proponent of such rule (*Environmental Defense Fund* v. *Department of Health, Education and Welfare*, 428 F.2d 1083, 1092 n. 27 (DC Cir. 1970)).

For a pesticide to be sold and used in the production of a crop or an animal, the pesticide must not only have appropriate tolerances under the FFDCA but must be registered under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA, 7 U.S.C. 136 *et seq.*). FIFRA requires the registration of all pesticides which are sold and distributed in the United States. The statutory standard for registration is that, among other things, the pesticide performs its intended function without causing "unreasonable adverse effects on the environment (including people)" (7 U.S.C. 136a(c)(5)). Under section 6 of FIFRA, EPA may cancel the registration for a use of a pesticide or modify the terms and conditions of registration whenever it determines that the use of the pesticide no longer satisfies the statutory standard for registration (7 U.S.C. 136d(b)).

III. Regulatory Background

Daminozide is the accepted common name for butanedioic acid mono (2,2-dimethylhydrazide). It was first registered as a pesticide under FIFRA in 1963 by the Uniroyal Chemical Company. Uniroyal registered daminozide under the trade name Alar. Daminozide is currently registered for use on a variety of crops as a plant growth regulator to control vegetative and reproductive growth of orchard crops such as apples, cherries, nectarines, peaches and pears. Daminozide affects flower bud initiation, fruit set and maturity, fruit firmness and coloring, preharvest fruit drop and the market quality of fruit at harvest and during storage, while delaying the onset of water core. Daminozide is also used to encourage shorter and more erect peanut vines, to retard stem growth in tomato transplants, and to modify the stem length and shape of ornamental plants.

All daminozide tolerances for raw agricultural commodities issued under section 408 are listed in the following Table 1:

TABLE 1—DAMINOZIDE TOLERANCES

Commodity	CFR Sec.	ppm
Apples	180.246	20.0
Cattle, Fat	180.246	0.2
Cattle, Meat Byproducts	180.246	0.2
Cattle, Meat	180.246	0.2

Tomatoes, Concentrated Products.	185.1550	3.0
Tomatoes, Pomace (Dried).	186.1550	10.0

On July 18, 1984, EPA issued a Notice of Special Review of daminozide (49 FR 29186) based on carcinogenic concerns for both daminozide and UDMH. In September 1985 EPA submitted a Draft Preliminary/Final Determination (PD 2/3/4) and a Draft Cancellation Notice to the FIFRA Scientific Advisory Panel (SAP) and U.S. Department of Agriculture, as required by FIFRA. The SAP believed that the animal cancer studies relied upon by EPA in its risk determination were insufficient to allow a quantitative risk assessment for either daminozide or UDMH. Although EPA is not bound by the SAP's opinion, EPA concluded that, in this case, it should not proceed with the cancellation but should instead require more data and take steps to reduce daminozide/UDMH exposure in the interim.

At that time, the Agency lowered the daminozide tolerance for apples from 30 parts per million (ppm) to 20 ppm. EPA set the tolerance to expire on July 31, 1987, in the belief that some of the residue and market basket survey data to be generated would be available by then, and that a further evaluation of the tolerance could be undertaken at that time. Data available in July 1987 showed that the apple tolerance could not be lowered without potentially making some legally treated apples over tolerance and subject to seizure. Thus, the 20 ppm tolerance was extended to January 31, 1989, at which time the tolerance was to be reevaluated in light of new cancer data on daminozide and UDMH.

In January 1989, the Agency estimated the risk of daminozide use based on interim results from a 2-year mouse study using UDMH. Although the Agency found that the interim results were sufficient for a quantitative risk assessment, the Agency noted that there were limitations in the data base. Those limitations included the fact that the study results were interim and thus actual tumor response over a lifetime was not known; a carcinogenic response had only been identified in a single species; and that mice in the study were dying early at the highest dose tested which was the only dose at which a statistically significant response was observed. The quantitative risk assessment estimated the theoretical upper bound lifetime risk for the general population at 4.5×10^{-5}.

The Agency believed this lifetime risk to be unreasonable, and therefore, made plans to cancel the registration of daminozide. In light of the time required to carry out cancellation procedures, on February 10, 1989, EPA extended the 20 ppm apple tolerance for an additional 18 months (hereinafter referred to as the "February 1989 tolerance extension", 54 FR 6392). The extension was granted because EPA found that the available data indicated the risk posed by the extension was acceptable. Nonetheless, the Agency noted that the risk was of sufficient concern that it would move quickly toward cancellation under FIFRA of daminozide's registration.

On May 24, 1989, EPA issued a Preliminary Determination and Draft Cancellation Notice that proposed the cancellation of the food crop use registrations of daminozide under FIFRA (54 FR 22558). The cancellation proposal relied on the same mouse study cited in the February tolerance extension document in estimating the risk posed by daminozide. The lifetime risk for the general population was estimated to be 4.9×10^{-5}. The Agency concluded that this risk exceeds the benefits of daminozide and thus cancellation under FIFRA was appropriate.

The risk numbers calculated in the cancellation notice varied from the February 1989 tolerance extension document (4.9×10^{-5} compared to 4.5×10^{-5}) because of two factors. First, the risk was decreased by a correction of the exposure values; exposure values had been slightly overestimated for processed foods. Second, the risk was increased on the basis of metabolism studies showing that daminozide is converted to UDMH in the digestive system. The earlier risk calculations had not taken this factor into account.

In May 1989, the Agency also received new data concerning daminozide. First, Uniroyal provided preliminary information on oncogenicity from a recently completed 2-year UDMH drinking water study in rats. In that study, significant dose-related trends were seen for hepatocellular carcinomas and combined hepatocellular carcinomas/adenomas. Second, the Agency also received monitoring data for fresh apples and processed apple commodities from several private and State organizations. Only levels of daminozide residues were reported; samples were not generally tested for UDMH residues. In general, the results of the monitoring data indicate that average daminozide residues are currently found at levels equal to or less than 1 ppm in fresh apples. Average levels of daminozide residues in processed apple commodities were found to be considerably less than 1 ppm. Although the methods of analysis used for determining the levels of residues differed in sensitivity, the Agency believes these data corroborate the applicable data sets in the 1986 market basket survey as well as EPA's estimate that usage has dropped since the time of the survey. This survey provided much of the exposure data used to estimate risks in the Agency's risk assessments.

IV. Current Proposal

A. Timing of the Current Proposal

It is generally EPA policy not to revoke pesticide tolerances under the FFDCA prior to cancellation of the registration under FIFRA (47 FR 42956; Sept. 29, 1982). The Agency's policy attempts to coordinate action under the two statutory authorities in a logical manner by ensuring that pesticides which may be legally sold, distributed, and used under FIFRA do not result in crops which are adulterated under FFDCA. The Agency believes that coordinating action under the two statutes is important for providing fair notice to growers on what pesticides they may use without the possibility of incurring legal sanctions.

In the February 1989 tolerance extension, EPA indicated that it would not take immediate action under the FFDCA citing its above-mentioned policy. Since the tolerance extension was published, however, a number of events have occurred which when considered in combination, suggest that continuing to adhere to the policy for the daminozide tolerances is unnecessary to fulfill the policy's goal of fair notice to growers. First, early in June, Uniroyal Chemical Co., Inc. of Bethany, Connecticut, the sole manufacturer of daminozide products registered for food uses, signed a formal agreement with EPA to immediately stop sales and recall all stocks of food use daminozide products including those held by users. Second, an apple industry trade association has publicly recommended that growers cease use of daminozide. Finally, EPA has provided notice at apple grower and trade association meetings that EPA would be proposing to significantly lower tolerances this summer.

Accordingly, because growers have been advised by both private and public sources not to use daminozide, and of their potential jeopardy if they do use it, as well as provided with the opportunity to return any purchased daminozide for a full refund, the Agency considers the present situation sufficiently analogous to a final cancellation action that consideration of the revocation of the daminozide tolerances at the present time is appropriate.

The Agency also believes it is important to consider revocation at this point because of the confirmatory data received recently regarding the carcinogenic risks of UDMH. First, EPA has received preliminary (unaudited) tumor data on the final results of the 2-year rat study which shows that UDMH is associated with an increased number of liver tumors at levels which do not appear to have excessive toxicity. With submission of the preliminary rat data, EPA now has evidence in two species of tumor response in studies that meet the current protocols. The results of the rat study are an important factor in the Agency's weight-of-the-evidence test for assessing the carcinogenicity of UDMH. Second, in mid-July, the Agency also received preliminary unaudited results of the 2-year "low dose" UDMH cancer study in mice. The report showed an increase in combined lung adenomas and carcinomas in female mice. Although this report adds to the qualitative evidence supporting UDMH's carcinogenicity, its usefulness in quantitatively characterizing UDMH risk can be determined only after the full report is received in September 1989.

B. Revocation

There are currently tolerances for daminozide under both section 408 and section 409. Under section 408, a pesticide tolerance may be approved if it "protects the public health." The statute requires consideration of a number of factors including the "necessity for the production of an adequate, wholesome, and economical food supply" (Section 408(b)). Thus, EPA must balance risks and benefits in assessing whether a tolerance "protects the public health." Under section 409, a pesticide tolerance may only be approved if use of the pesticide is "safe" (21 U.S.C. 348(c)).

In applying these standards, the Agency is relying on the analysis contained in the Preliminary Determination and Draft Cancellation Notice on Daminozide (54 FR 22558) and the Daminozide Special Review Technical Support Document. Copies of the Technical Support Document are available from the contact person listed under "FOR FURTHER INFORMATION CONTACT" above. A summary of the risk/benefit analysis from those documents is provided below.

1. *Risk considerations*. The Agency evaluated the Uniroyal data submitted in the last year in conjunction with the previously considered data on daminozide and UDMH in a weight-of-the-evidence determination. Based on this evaluation both daminozide and UDMH were classified as B2 chemicals, probable human carcinogens. In both the earlier studies and the new Uniroyal studies, daminozide produced vascular and lung tumors in mice. In the more recent Uniroyal mouse study, daminozide showed a statistically significant increase in hemangiomas/hemangiosarcomas with increasing dose (Cochran Armitage trend analysis), but not by pairwise comparison (Fischer's exact test—a statistical comparison of control and treated animals). A dose-related trend for lung tumors was also seen in male mice. The Agency believes the new data, supported by the occurrence of similar tumors in the earlier daminozide studies, are sufficient to classify daminozide as a probable human carcinogen. However, the Agency also believes the oncogenic response seen in the daminozide studies

is likely caused by the presence of UDMH in the test material and/or metabolic conversion to UDMH.

Vascular and lung tumors seen in the historical UDMH data were also seen in the 1-year interim sacrifice in mice from the new Uniroyal study at 80 and 40 ppm. The increase in vascular tumors at 80 ppm was statistically significant by pairwise comparison and trend analysis. UDMH has produced a clear oncogenic response in mice at the highest dose tested and the Agency anticipates that an increase in vascular tumors will also be seen at the lower dose at terminal sacrifice (the 40 ppm dose showed one hemangioma in both a male and female mouse at the 1-year interim sacrifice).

The Agency used data from a 1986 market basket survey, recent crop field trial data, and recently conducted animal feeding studies to estimate exposure for both daminozide and UDMH. From the interim sacrifice report of the UDMH mouse cancer study, the Agency calculated an interim carcinogenic potency factor based on the incidence of hemangiosarcomas (malignant vascular tumors) and combined hemangiomas/hemangiosarcomas of the liver. Based upon this information, the Agency estimated the lifetime risk of cancer for the general population due to dietary exposure to UDMH to be 4.9×10^{-5}. The agency is particularly concerned that a disproportionate share of the lifetime risk occurs from childhood exposure because of the high ratio of food intake per unit bodyweight and the relatively high proportion of a child's diet that is composed of foods which may contain daminozide and UDMH residues. The lifetime risk to non-nursing infants (0 to 1 year of age), the highest exposure group, from one year exposure to UDMH is estimated to be approximately 6×10^{-6}. The estimates for children are based on the same potency factor as used for adults.

Because UDMH as well as daminozide residues are considered in this document for assessing risk, it is important to note that the analytical method used to test for daminozide residues converts the parent daminozide compound to UDMH for quantitation. Thus, both daminozide and UDMH residues are determined and reported as daminozide residues.

2. *Benefits summary*. The benefits from daminozide use have been assessed in terms of economic impacts which would result if the registered uses of daminozide were cancelled. In assessing benefits, the Agency considered usage information from 1985 and 1988. The Agency concluded the overall impacts from cancellation of daminozide on food uses would be insignificant to minor. Although there are alternatives for some of daminozide's uses, no one alternative chemical provides all the benefits of daminozide. For food uses, the greatest anticipated annual impacts would be in apple production. Estimates of the economic impact on the apple industry are based on 10 percent (range of 5 to 15 percent) of the crop treated. Earlier estimates made in conjunction with the apple tolerance extension document of January 31, 1989, used a 4 to 8 percent annual crop treatment. The higher estimate (5 to 15 percent) in the PD 2/3 is a result of additional and more in-depth information gathered since the February tolerance document.

Based on 1988 usage data, impacts on the apple use, in terms of net social cost for the whole of society, could range from $18 to $81 million with the most likely impact approaching the lower end of this range. Growers of Stayman and McIntosh varieties would suffer the greatest individual impact. For other food uses, the annual impacts are anticipated to be approximately $1.5 to $5.5 million for peaches, approximately $200,000 for peanuts, and negligible impacts for nectarines, cherries, grapes, and pears.

3. *New information*. As discussed above, Uniroyal has recently submitted preliminary oncogenicity findings of a 2-year UDMH drinking water study in rats. In this study, male and female Fischer 344 rats were fed drinking water containing 0, 1, 50, and 100 ppm UDMH for 2 years. The data submitted showed that UDMH caused increased incidence of combined hepatocellular carcinomas and adenomas (malignant and benign liver tumors, respectively) and hepatocellular carcinomas in female rats at 50 and 100 ppm. Although the tumor increases were not significant by Fischer's exact test (pairwise comparison of control and treated animals), significant dose-related trends were seen for hepatocellular carcinomas and combined hepatocellular carcinomas/adenomas by Cochran Armitage trend analysis. The Agency believes these conclusions are important because the historical incidence of hepatocellular cancer in female Fischer rats at the contract laboratory which conducted the study is extremely low (2 hepatocellular adenomas out of 370 total control female Fischer rats or 0.5 percent). The incidence of liver tumors in treated males were similar to that of the control groups and are not considered to be statistically significant.

The recently received preliminary report on the results of the 2-year "low dose" (highest dose tested was 20 ppm in female mice, 10 ppm in male mice) UDMH cancer study in mice showed an increase in combined lung adenomas and carcinomas in female mice. Although these results are too preliminary for use in quantitative analysis, the results do provide further quantitative evidence supporting UDMH's carcinogenicity.

4. *Conclusion*. Based on all the data and information considered by the Agency, EPA has concluded that the daminozide tolerances do not protect the public health, taking into account, among other things, the necessity for the production of an adequate, wholesome, and economical food supply. As to the food/feed additive regulations, the Agency has concluded that these regulations do not meet the statutory standard for safe use.

C. Timing of Revocation

Although revocation of the daminozide tolerances will not be delayed until cancellation under FIFRA is final, EPA believes it is appropriate under the FFDCA to implement the revocation in a manner which minimizes disruption in the food market place to the extent that such a manner of implementation is not outweighted by the risks.

The Agency considered two options regarding the timing of the revocation.

1. Revocation of all tolerances effective immediately upon issuance of the final rule with no provision for residues from prior use. (EPA estimates that today's proposal will be made final November 30, 1989, and that date is used throughout as the projected effective date for estimating the risk posed by both of the options.)

2. A phased approach which reduces and eventually revokes tolerances as residues resulting from legal applications prior to this Summer clear the market.

The risks posed by both of these options, as well as a more detailed description of Option Two, are set forth below.

The risks posed by each option are calculated on the Agency's best estimates of the actual daminozide/UDMH exposure based on data from the Uniroyal market basket survey conducted in 1986 and crop residue studies. The Agency believes it is appropriate to calculate risk based on actual and estimated average residue levels rather than the tolerance amount for a number of reasons. First, EPA has an unusually complete data base on residue levels that reflect market basket residues. Basing risk computations on the tolerance level would thus overstate

BEST COPY AVAILABLE

the risk. Second, the residue levels estimated for the tolerance reduction period which this proposal would cover are for relatively short windows in time during which average residues of daminozide are unlikely to increase and in fact will probably decline further. Moreover, a number of external events (media attention to the risks of daminozide use, the apple industry trade association's recommendations against further use of daminozide, and Uniroyal's June 1989 agreement to halt sales of daminozide and recall existing stocks), while not assuring decreased exposure, probably dictate that average residues will not increase. It is unlikely, therefore, that use of actual levels will understate the risk. In fact, given EPA's current usage estimates, using actual residue levels from 1986 may overstate risk.

The Agency estimated daminozide/UDMH dietary exposure and risk for the duration of the reduced tolerance levels for the general population and the highest exposure group, non-nursing infants. The Agency estimated the lifetime dietary risks on the interim results seen in the UDMH cancer study in mice. Risks were calculated by multiplying the UDMH dietary exposure by the interim cancer potency factor (Q^*_1) for UDMH, 0.88 $(mg/kg/day)^{-1}$, and then multiplying by the period of time the tolerance would be in effect.

1. *Option One.* Option One is immediate revocation upon the date this proposed rule becomes final (estimated to be November 30, 1989). Immediate revocation should reduce exposure to daminozide to below the level of detection because all commodities above that level would be subject to seizure. Thus, all measurable risk would be eliminated. On the other hand, immediate revocation could result in a major disruption of the food market by making large numbers of legally-treated crops, particularly apples, subject to seizure. Even growers who stopped using daminozide after the 1988 season could have crops subject to seizure since daminozide's persistence may result in a significant number of commodities (and therefore processed apple products) containing detectable amounts of daminozide from previous years' treatments. The possibility for significant disruption is reflected in the results of the market basket survey conducted by Uniroyal. That study found that 56 percent of the apples and 83 percent of the processed apple products (juice and sauce) sampled contained detectable levels of daminozide. (Technical Support Document II–23 (Table 5)).

2. *Option Two.* Option Two is a phased approach which attempts to minimize making crops which were legally treated with daminozide prior to this summer subject to seizure. The timing of the reduction and revocation for each of the daminozide tolerances under this approach is discussed below. EPA has established these dates listed below based on information available to the agency on the periods of time treated crops remain in commerce either as fresh or processed commodities. EPA specifically requests comments on whether these dates are appropriate.

a. *Apples.* The Agency is proposing to lower the tolerance on apples from the current 20 ppm to 5 ppm for the period November 30, 1989 to November 30, 1990. For the following 6 months, from November 30, 1990 to May 31, 1991, the tolerance would be lowered to 1 ppm. On May 31, 1991, the tolerance would be revoked.

Treatment of apple trees with daminozide usually occurs in the Spring and Summer of the growing season. Fresh apples, harvested in the Fall, may be available for up to a year. Residues in processed apple products (juice and sauce) may be present for longer periods as such products work their way through channels of trade.

Residue data on apples from crop field trials show that most apples treated in the Spring will have residues at harvest of 5 ppm or below. Available data for most apples treated in the Summer show that residues at harvest are 10 ppm or below. EPA believes ample notice has been given to users by Agency officials at apple grower and trade association meetings that EPA would be proposing to significantly lower tolerances this summer, and that growers who did apply this summer may have crops at harvest which could be over impending lower tolerance levels. In addition, there has been informal broad-based support from growers and processors to take action on lowering the tolerance as soon as possible.

Under this Option, EPA would amend the current 20 ppm tolerance, which expires on July 31, 1990, by reducing it to 5 ppm effective November 30, 1989. The 5 ppm apple tolerance would then be lowered to 1 ppm on November 30, 1990. The 1 ppm tolerance would be in effect until May 31, 1991, and would provide tolerance coverage for fresh apple residues found in the 1990 harvest resulting from residue carryover in trees treated in the Spring of 1989. The Agency also believes any processed apple juice and sauce commodities (which should include few treated apples) made from the 1989 harvest will have cleared the marketplace by May 31, 1991 and thus will be covered by the 1 ppm tolerance.

Dietary exposure to UDMH through the consumption of apples and apple products was estimated based on the results of the 1986 market basket survey. In order to estimate the impact of the proposed 5 ppm and 1 ppm tolerances on UDMH exposure, the Agency first found the average daminozide and UDMH levels in all of the samples for the survey. The Agency then estimated UDMH exposures based on sub-samples that reflect the levels of daminozide and UDMH in the market place if the proposed tolerances are assumed. Average daminozide residues for all fresh apples found in the market basket study was 1 ppm. The average UDMH residue in these same fresh apples was 2.6 part per billion (ppb). The Agency next considered the average level of daminozide only for those samples in the survey that were less than 5 ppm to estimate the average level of daminozide if the proposed 5 ppm tolerance were in effect. The average daminozide value in the market basket survey, excluding all samples greater than 5 ppm, was 0.8 ppm. The percentage of this decline in average residue values for daminozide (20 percent), was used to estimate UDMH residues for apples as well as all apple products (adult and baby sauce and juice, dried and cooked apples) under a 5 ppm tolerance. The resultant UDMH values were used to calculate dietary exposure for the period November 30, 1989 to November 30, 1990. For the next 6 months, November 30, 1990 to May 31, 1991, a similar process for estimating UDMH residues was used. The average daminozide residues for fresh apples, excluding all values greater than 1 ppm was 0.2 ppm. The percentage of the decline in daminozide levels (80 percent) was then used to estimate the UDMH residues for all fresh apple and apple products for the 6-month period from November 30, 1990 to May 31, 1991.

A summary of average daminozide residue values used to calculate exposure for apple and apple products is presented in the following Table 3:

TABLE 3—ESTIMATES OF AVERAGE DAMINOZIDE LEVELS (IN PPM) AT THE 5 PPM AND 1 PPM TOLERANCE LEVELS

Commodity	MBS[1]	5 ppm	1ppm
apples, fresh	1.0	0.8	0.2
apple juice, baby	0.5	0.4	0.1
apple juice, adult	0.4	0.3	0.1
apple sauce, baby	0.5	0.4	0.1
apple sauce, adult	0.4	0.3	0.1
dried raw apples[2]	1.0	0.8	0.2
dried cooked apples[2]	0.5	0.4	0.1

[1] = market basket survey

[2] = dried apple products were then multiplied by an 8-fold concentration factor to determine residue for exposure estimates.

A summary of the estimated average UDMH residue levels used to calculate exposure for apple and apple products is presented in the following Table 4:

TABLE 4—ESTIMATES OF AVERAGE UDMH LEVELS (IN PPB) AT THE 5 PPM AND 1 PPM DAMINOZIDE TOLERANCE LEVELS

Commodity	MBS[1]	Daminozide levels	
		5 ppm	1 ppm
apples, fresh	2.6	2.1	0.5
apple juice, baby	33.3	26.6	6.7
apple juice, adult	14.0	11.2	2.8
apple sauce, baby	44.0	35.2	8.8
apple sauce, adult	23.9	19.1	4.8
dried raw apples[2]	20.8	16.6	4.2
dried cooked apples[2]	352.0	282.0	70.4

[1] = market basket survey

[2] = dried apple products include an 8-fold concentration factor.

Carcinogenic risk from dietary exposure to UDMH was then estimated for the 18-months' exposure under these reduced tolerances to the general population and non-nursing infants, the highest exposure group, utilizing food consumption patterns from a nationwide survey conducted by the U.S. Department of Agriculture (USDA) (White et al., *Interim Report # 1: The Construction of a Raw Agricultural Commodity Consumption Data Base,* Research Triangle Institute, 1983). The average exposure to UDMH for the general population under these reduced tolerances for 18 months is 0.009199 micrograms(μg)/ kilograms(kg)/day and the lifetime risk (i.e., any cancer response could occur at any point in the person's lifetime) is 1.7×10^{-7}. For non-nursing infants, the exposure to UDMH under these reduced tolerances for 18 months is 0.158046 μg/kg/day and the lifetime risk is 3.0×10^{-6}.

EPA's best estimate of the percent of crop treated (5 to 15 percent) is less that at the time of the market basket survey (24 percent). This estimated reduced use would result in about 40 to 80 percent lower exposure. Since usage and exposure today is probably less than the market basket survey, the risk estimation for the phaseout, based on the market basket survey probably overstates current risk. Reduced usage tends to be corroborated by some recent independent surveys, such as the one by Consumer's Union, which showed a range of daminozide values in apples of 0.1 to 2.3 ppm and average daminozide values in juice of 0.11 ppm. These estimates are significantly less than the average residues from the market basket survey (0.1 to 12.0 ppm for apples and 0.5 ppm for juice). However, in one survey average daminozide residues in apples were slightly greater than the 1.0 ppm average residue found in the market basket survey.

Unlike the market basket survey, none of the recent studies was statistically designed. Many of the surveys contained just a few samples and the limit of detection varied from study to study. Furthermore, none of the independent surveys measured for UDMH, the degradate on which the Agency's assessment is based. For these reasons, EPA has used the market basket survey acknowledging that it is a likely overestimate of interim risk.

b. *Peanuts.* The Agency is proposing to lower the tolerance on peanuts to 4 ppm until May 31, 1991. The feed additive regulation on peanut meal and the tolerances on peanut hull and hay will be revoked effective November 30, 1989.

Peanut plants are generally treated with daminozide in July and August of the growing season, although wetter than normal conditions in the Eastern United States this year may have resulted in some earlier treatments. Following harvest, roasted peanuts and peanut products may remain in channels of trade for more than a year. However, the major brands of peanut butter, the primary processed product, sold at major grocery stores usually clear the market in a month or two. The market basket survey data showed residues in roasted peanuts ranging from 0.01 to 4.43 ppm daminozide. Even though there may have been some treatments prior to this Notice, the Agency believes the market basket survey data for roasted peanuts could be used to set a level of raw peanuts. Thus, under option Two the tolerance for daminozide residues on peanuts would be reduced to 4 ppm and remain in place until May 31, 1991. The 4 ppm tolerance will cover any raw peanuts treated early in 1989 and any processed product that may remain in channels of trade.

A feed additive regulation for peanut meal (90 ppm), and tolerances for peanut hulls (10 ppm), and peanut hay (20 ppm) have also been established. Although it is not clear how long these food and feed items remain in the channels of trade, the Agency believes they should clear the market rather quickly. Therefore, the Agency is proposing that the feed additive regulation for peanut meal, and the tolerances for peanut hay, and peanut hulls be revoked effective November 30, 1989.

For purposes of estimating dietary exposure during the pendency of the peanut tolerance, the Agency did not adjust the peanut, peanut butter or peanut oil residue levels downward based on the reduced tolerance levels as was done for apples. The Agency did not make these adjustments because the risk from peanut commodities is very small. The Agency utilized the same UDMH residue levels (24.9 ppb for each) used in the Technical Support Document; these consequently are likely to represent overestimates of exposure. Total UDMH exposure from peanut and peanut products to the general population for the 18-month period under Option Two was estimated to be 0.001862 μg/kg/day with a risk of 3.5×10^{-8}. Non-nursing infants would have an estimated exposure of 0.000730 μg/kg/day with a resultant risk of 1.4×10^{-8} for the 18-month period.

c. *Sweet and sour cherries.* The Agency is proposing to lower the tolerance for sweet cherries from 30 ppm to 15 ppm; for sour cherries, the tolerance would be lowered from 55 ppm to 15 ppm. Both of these tolerances would be effective from November 30, 1989 to May 31, 1991.

Both sweet and sour cherries are treated with daminozide in the Spring of the growing season. Sweet cherries are usually consumed within a short time after harvest, although small amounts may be processed. Field trial data support reducing the sweet cherry tolerance to 15 ppm from 30 ppm on November 30, 1989. Thus, under Option Two a 15 ppm tolerance for sweet cherries would be effective from November 30, 1989 to May 31, 1991. This would allow cherries legally treated this Spring to be marketed without threat of seizure and would cover any processed sweet cherry products.

Although sour cherries are used primarily for processing and, therefore, remain in channels of trade for some time, the Agency believes the tolerance could be reduced to 15 ppm from 55 ppm (based on market basket survey results) without making any legally treated cherries subject to seizure. Under this Option, the Agency would propose that the tolerance for daminozide residues on sour cherries be reduced to 15 ppm and remain in place until May 31, 1991, in order to cover any residues in processed items such as cherry pie filling.

Most of the UDMH dietary contribution from cherries comes from cherry filling and juice (more than 90

MI

percent based on market basket survey data). Although reduced levels of UDMH residue could be expected from the lower tolerances, the Agency relied on the values used in the Technical Support Document for processed cherries to calculate dietary risk. The Agency did not make downward adjustments based on the reduced tolerances for reduced residue levels (as was done for residues in apple commodities) because the risk from sweet and sour cherry commodities is likely to be very small. The risk from 18-months' dietary exposure to UDMH residues in cherry products was estimated assuming no exposure to raw cherries. Total UDMH dietary exposure from cherries to the general population for the 18-month period was estimated to be 0.002847 μg/kg/day with a resultant risk of 5.4×10^{-8}. Non-nursing infants will have an estimated exposure of 0.008627 μg/kg/day with a resultant risk of 1.6×10^{-7} for the 18-month period.

d. *Grapes, peaches, pears and nectarines.* The Agency has only field trial data for the commodities grapes, peaches, pears and nectarines on which to base proposed tolerance reductions. Usage information indicates that historically very little daminozide has been used on these commodities and use in the last year has been almost nil. Crop field trial data indicate that daminozide tolerances can be reduced in November 1989 by approximately 75 percent without posing the risk of seizure to any crop treated in the Spring of 1989. To allow for the minimal use that may have occurred in 1989, the Agency is proposing that the tolerances for these commodities be reduced to the following levels with an expiration date of May 31, 1991:

Grapes—2.5 ppm
Pears—5 ppm
Peaches—7.5 ppm
Nectarines—7.5 ppm.

In estimating the dietary risk associated with these reduced tolerances, the Agency assumed that there will be no dietary exposure to UDMH residues in domestic fresh commodities after November 1989 since no treated fresh fruit would remain in commerce after that date and no carryover residue from prior years' treatment are expected. Because of a lack of data, the Agency did not reduce in its risk calculation the expected UDMH residue levels in the processed forms of these commodities and the values used (canned pears (11.9 ppb), canned peaches (21.3 ppb), grapes juice and preserves (0.2 ppb)) are the same as those in the Daminozide Technical Support Document. Thus, the actual dietary exposure and risk is likely to be lower. Combined dietary risk from exposure to processed products containing these four commodities for the duration of the reduced tolerance would be 10^{-7} to 10^{-8} for the general population and non-nursing infants.

e. *Tomatoes.* The Agency is proposing to revoke the tolerance for fresh tomatoes, which is 0.5 ppm, effective November 30, 1989. In addition, the food and feed additive regulations which currently exist for processed tomato products and dried tomato pomace (3.0 ppm and 10 ppm, respectively) will be revoked at the same time.

Daminozide is registered for use only on tomato transplants. The Agency's usage information indicates that only tomato transplants which are intended for the homeowner market are treated. Thus, it is very unlikely that there will be daminozide-UDMH exposure from tomato pomace used as animal feed. Although there may be exposure to homeowners who can or process their own tomatoes, a tolerance or food additive regulation is not necessary after the 1989 growing season is completed. Therefore, under Option Two the existing tolerance for raw tomatoes as well as the food additive regulation for processed tomato products and feed additive regulation for tomato pomace would be revoked effective November 30, 1989.

No dietary exposure or carcinogenic risk related to UDMH residues in tomatoes, tomato products, or tomato pomace was estimated since under Option Two the tolerance would be revoked in November.

f. *Meat, milk, eggs and meat by-products.* Under Option Two, the Agency is proposing to revoke the tolerances for meat, milk, eggs and meat by-products on November 30, 1989.

Animal feeding studies show that residues from treated crops used as animal feed do transfer to meat, milk and eggs, but EPA believes that any residues would be extremely small because of the anticipated reduction in treated apples this year and the correspondingly lower number of treated apples that may be processed and used as apple pomace to feed livestock. Similar reduced residues in peanut by-products used as animal feed is also anticipated. Theoretical residues for meat, meat by-products, milk and eggs accounted for more than half of the calculated risk in the Preliminary Determination to Cancel the Food Uses of Daminozide. Under Option Two the tolerance for meat, milk, eggs and meat by-products would be revoked effective November 30, 1989.

A list of the proposed tolerance levels for daminozide under Option Two, the estimated risks from these levels and their corresponding dates of expiration are presented in the following Table 5:

TABLE 5—COMPARISON OF THE CURRENT AND PROPOSED DAMINOZIDE TOLERANCES

Commodity	Current tolerance	Proposed tolerance	Effective date	Expiration date	Est. risk general pop.	Est. risk non-nursing
1. Apples	20 ppm	5 ppm	11/89	11/90	1.5×10^{-7}	2.6×10^{-6}
	(expires 7/90)	1 ppm	11/90	5/91	1.9×10^{-8}	3.3×10^{-7}
2. Peanuts	30 ppm	4 ppm	11/89	5/91	3.5×10^{-8}	1.4×10^{-6}
Peanut meal	90 ppm	none *	11/89			
Peanuts, hay	20 ppm	none *	11/89			
Peanuts, hulls	10 ppm	none *	11/89			
3. Cherries, sweet	30 ppm	15 ppm	11/89	5/91	5.4×10^{-8}	1.6×10^{-7}
Cherries, sour	55 ppm					
4. Grapes	10 ppm	2.5 ppm	11/89	5/91	(*)	(*)
5. Peaches	30 ppm	7.5 ppm	11/89	5/91	(*)	(*)
6. Pears	20 ppm	5 ppm	11/89	5/91	(*)	(*)
7. Nectarines	30 ppm	7.5 ppm	11/89	5/91	(*)	(*)
8. Tomatoes	0.5 ppm	none *	11/89			
Processed tomatoes	3.0 ppm	none *	11/89			
Tomato pomace	10 ppm	none *	11/89			
9. Meat, milk and eggs	0.02–2.0 ppm	none *	11/89			

* = revocation effective November 30, 1989.
* = combined risk of exposure to grapes, peaches, pears and nectarines ranges from 10^{-7} to 10^{-8} for the general population and non-nursing infants.

The aggregate dietary exposure from all treated commodities to the general population for the duration of the 18-month reduced tolerance period is 0.014268 ug/kg/day with a resultant risk of 2.7×10^{-7}. The aggregate dietary exposure from all treated commodities to non-nursing infants is 0.169471 ug/kg/day with a resultant risk of 3.2×10^{-6} for this period.

D. Risk Comparison Between the Two Options

To compare fully the risk of each of the Options it is necessary to consider the period of time from February 1, 1989, the day the apple tolerance was extended, until November 30, 1989. On February 1, 1989, when the Agency extended the apple tolerance to July 31, 1990, it was estimated that the excess lifetime risk for the tolerance extension period (18 months) would be 9.6×10^{-7} for the general population and 9×10^{-6} lifetime risk for non-nursing infants. Ten of the estimated 18 months (February–November 1989) will have passed by the time the reduced tolerances are effective. Risk for this 10-month period will be 5.0×10^{-7} for the general population and 5.0×10^{-6} for non-nursing infants.

Further, the risk estimates for the period from November 30, 1989 to May 31, 1991 must be adjusted to take into account the metabolic conversion of daminozide to UDMH in the digestive system. Based on the metabolism studies discussed in the Daminozide Technical Support Document, resultant risk from metabolic formation of UDMH was increased approximately 25 percent. Without considering metabolic conversion, risk as cited in the Technical Support Document was estimated to be 4.1×10^{-6}. The consideration of metabolic conversion increased the risk to 4.9×10^{-6}. The estimated risk in the 1989 February tolerance extension did not consider metabolic conversion. However, in that document exposure was slightly over-estimated. When reduced exposure and metabolic conversion are considered, the risk numbers are about the same as shown in the tolerance extension document.

Under Option One, the cumulative risk is simply the risk for the period from February 1, 1989 to November 30, 1989, including risk from metabolic conversion. Thus, the cumulative risk under Option One for the general population is 5.0×10^{-7} and the cumulative risk for non-nursing infants is 5.0×10^{-6}.

Under Option Two, the cumulative risk for the general population is calculated as follows: from February 1, 1989 to November 30, 1989 the risk would be 5.0×10^{-7}, including metabolic conversion. From November 30, 1989 to May 31, 1991 the risk based on the reduced tolerance would be 2.7×10^{-7} and the risk from metabolic conversion in this period would be 6.8×10^{-8} to give a total risk of 8.4×10^{-7}. The cumulative risk to non-nursing infants from February 1, 1989 to November 30, 1989 (5.0×10^{-6} including metabolic conversion), and from November 30, 1989 to May 31, 1991 (3.2×10^{-6}), including risk from metabolic conversion (8.0×10^{-7}), is 9.0×10^{-6}. Table 6 compares the risks between the two options:

TABLE 6.—COMPARISON OF RISK BETWEEN OPTION I AND OPTION II

	Risk
Option I (No tolerance after Nov. 30, 1989)	
General Population	5.0×10^{-7}
Non-Nursing Infants	5.0×10^{-6}
Option II (Phased approach)	
General Population	8.4×10^{-7}
Non-Nursing Infants	9.0×10^{-6}

V. Option Selection

Based on the available information and data, EPA believes that only Option Two (phased reduction) is a preferred approach. EPA does not view the differences in risk reduction between the two options as significant. On the other hand, Option One (immediate revocation) would have a significantly greater market disruption effect than Option Two. For these reasons, EPA is proposing Option Two, but is soliciting comment on both options.

VI. Public Comment Procedures

Any person who has registered or submitted an application for the registration of a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, which contains daminozide may request within 30 days after publication of this document in the **Federal Register** that this proposal to amend the daminozide tolerances listed at 40 CFR 180.246 be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act (FFDCA). No such procedure for an advisory committee is available under the FFDCA for the food and feed additive regulations listed at 40 CFR 185.1550 and 186.1550, respectively, which this document proposes to revoke.

Interested persons are invited to submit written comments on this proposal to amend all daminozide tolerances and food/feed additive regulations listed at 40 CFR 180.246, 185.1550, and 186.1550 for residues of daminozide. Comments must bear a notation indicating the document control number, (OPP–300202). Three copies of the comments should be submitted to facilitate the work of the Agency in reviewing the comments. All written comments filed pursuant to this notice will be available for public inspection in Rm. 246, CM #2, 1921 Jefferson Davis Highway, Arlington, VA, between 8 a.m. and 4 p.m., Monday through Friday, except legal holidays.

In order to satisfy requirements for analysis as specified by Executive Order 12291 and the Regulatory Flexibility Act, the Agency has analyzed the costs and benefits of this proposal. This analysis is set forth in the Preliminary Determination and Draft Cancellation Notice on daminozide (54 FR 22558), the Daminozide Technical Support Document, and this Notice.

VII. Other Regulatory Requirements

A. Executive Order 12291

Under Executive Order 12291, the Agency must determine whether a proposed regulatory action is "major" and, therefore, subject to the requirements of a Regulatory Impact Analysis. The Agency has determined that this proposed rule is not a major regulatory action, i.e., it will not have an annual effect on the economy of at least $100 million, will not cause a major increase in prices, and will not have a significant adverse effect on competition or the ability of U.S. enterprises to compete with foreign enterprises.

This proposed rule has been reviewed by the Office of Management and Budget as required by E.O. 12291.

B. Regulatory Flexibility Act

This proposed rule has been reviewed under the Regulatory Flexibility Act of 1980 (Pub. L. 96–354; 94 Stat. 1164, 5 U.S.C. 601 et seq.), and it has been determined that it will not have a significant economic impact on a substantial number of small businesses, small governments, or small organizations.

Because EPA anticipates that it will issue a notice of cancellation for the registrations of daminozide with food uses in the Spring of 1990, and few treated foodstuffs will contain levels of daminozide in violation of the reduced tolerance levels, the Agency anticipates that little or no economic impact would occur at any level of business enterprise if these tolerances were revoked.

Accordingly, I certify that this

PART 180—[AMENDED]

Parts

Reader Aids

Federal Register

Accordingly, I certify that this regulatory action does not require a separate regulatory flexibility analysis under the Regulatory Flexibility Act.

C. Paperwork Reduction Act

This proposed regulatory action does not contain any information collection requirements subject to review by the Office of Management and Budget under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq. (Section 408(m) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346(m))).

List of Subjects in 40 CFR Parts 180, 185 and 186

Administrative practice and procedure, Agricultural commodities, Animal feeds, Food additives, Pesticides and pests, Reporting and recordkeeping requirements.

Date: September 1, 1989.

Victor J. Kimm,

Assistant Administrator for Pesticides and Toxic Substances.

Therefore, it is proposed that 40 CFR parts 180, 185 and 186 be amended as follows:

1. In part 180:

PART 180—[AMENDED]

a. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

b. Section 180.246 is revised to read as follows:

§ 180.246 Daminozide; tolerances for residues.

Interim tolerances reflecting both daminozide and UDMH residues are established for residues of the plant growth regulator daminozide (butanedioic acid mono (2,2-dimethylhydrazide) in or on the following raw agricultural commodities and processed commodities:

Commodities	Parts per million	Expiration date
Apples	5.0	Nov. 30, 1990.
	1.0	May 31, 1991.
Cherries, sour	15.0	Do.
Cherries, sweet	15.0	Do.
Grapes	2.5	Do.
Nectarines	7.5	Do.
Peaches	7.5	Do.
Peanuts	4.0	Do.
Pears	5.0	Do.

2. In part 185:

PART 185—[AMENDED]

a. The authority citation for part 185 continues to read as follows:

Authority: 21 U.S.C. 348.

§ 185.1550 [Removed]

b. By removing § 185.1550.

3. In part 186:

PART 186—[AMENDED]

a. The authority citation for part 186 continues to read as follows:

Authority: 21 U.S.C. 348.

§ 186.1550 [Removed]

b. By removing § 186.1550.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC, and Atlanta, GA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 54 FR 12345.

SUBSCRIPTIONS AND COPIES

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

ATLANTA, GA

WHEN: September 20; at 9:00 a.m.
WHERE: Room 808, 75 Spring Street, SW.
Richard B. Russell Federal Building
Atlanta, GA
RESERVATIONS: Call the Federal Information Center

Presidential Documents

Title 3—

The President

Proclamation 6015 of September 5, 1989

National Check-Up Week, 1989

By the President of the United States of America

A Proclamation

Many of the leading causes of death and disability in the United States are diseases that could be treated effectively—if detected early. That is why periodic medical examinations are important for all Americans.

Heart disease, which claims the lives of more than 500,000 Americans each year and represents the leading cause of death in our country, can be reduced in severity or even prevented through such measures as the control of high blood pressure and the maintenance of a healthy diet. In fact, improved treatment for high blood pressure has reduced the frequency of strokes in the United States to one-half the rate recorded during the early 1970's. The first step in identifying and treating such a health risk as high blood pressure is often a routine medical check-up.

Similarly, medical science has shown that the early detection of some forms of cancer—long before symptoms develop—can save lives. For example, deaths in this country from cancer of the cervix have fallen dramatically since 1950, due, in part, to routine screening tests performed by doctors. The prognosis for victims of other forms of cancer, such as breast cancer, can also be improved when the disease is detected early through periodic medical check-ups.

In addition to the early detection of illness, regular medical check-ups play an important role in disease prevention. For example, highly effective vaccines administered to young children have led to the virtual elimination of certain childhood diseases, such as polio, that were common afflictions only one generation ago.

In recent years, it has become increasingly clear that many diseases and other health problems can be prevented simply through changes in personal behavior. Refraining from smoking, improving one's diet, safe sexual practices, and avoidance of drug and alcohol abuse are some of the many measures that can help reduce one's risk of illness and injury. The medical check-up provides an important opportunity for the doctor and patient to discuss these behaviors. It is an ideal setting for the physician to assess the individual risk profile of each patient and to provide him or her with useful health care information. It also allows the physician and patient to work together in developing an effective health care regimen that can be applied at home and at work, long after the visit is over. Periodic check-ups strengthen the doctor-patient relationship and allow physicians to monitor carefully their patients' health.

To recognize the importance of periodic medical check-ups, the Congress, by Senate Joint Resolution 95, has designated the week beginning September 10, 1989, as "National Check-Up Week," and has authorized and requested the President to issue a proclamation in observance of this occasion.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim the week of September 10, 1989, as "National Check-Up Week." I call upon the people of the United States to observe this week with appropriate programs, ceremonies, and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this fifth day of September, in the year of our Lord nineteen hundred and eighty-nine, and of the Independence of the United States of America the two hundred and fourteenth.

G Bush

Rules and Regulations

Federal Register
Vol. 54, No. 173
Friday, September 8, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 59

[Docket No. PY-89-004]

Office of Management and Budget Information Collection Control Numbers; Miscellaneous Corrections

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule revises the mandatory regulations for the inspection of eggs and egg products. Its primary purpose is to update the information collection requirements and the control numbers assigned by the Office of Management and Budget (OMB). In addition, this amendment also corrects a typographical error.

EFFECTIVE DATE: September 8, 1989.

FOR FURTHER INFORMATION CONTACT: Janice L. Lockard, Chief, Standardization Branch, Poultry Division, Agricultural Marketing Service, U.S. Department of Agriculture, Room 3944, South Building, P.O. Box 96456, Washington, DC 20090-6456 (202/447-3506).

SUPPLEMENTARY INFORMATION:

Executive Order 12291

The Agency has determined that this amendment is merely administrative and is not subject to the requirements of Executive Order 12291. It involves only the identification of information collection requirements and display of OMB control numbers pursuant to 5 CFR part 1320 and the correction of a typographical error.

Administrative Procedure Act

Because of its technical non-substantive nature, this amendment is not subject to the notice and comment requirements of the Administrative Procedure Act (5 U.S.C. 553) nor do the provisions of section 553(d) of that Act apply. Therefore, the Department finds that notice and opportunity for comment are unnecessary and that, upon good cause, this amendment should be effective on the date of publication of this rule in the **Federal Register**.

Regulatory Flexibility Act

For these same reasons, an analysis or certification under the Regulatory Flexibility Act is not required.

Paperwork Reduction Act

This rulemaking does not require an additional collection of information from the public under the Paperwork Reduction Act of 1980.

Background

The Paperwork Reduction Act of 1980 was designed both "to minimize the Federal paperwork burden for individuals, small businesses, State and local governments, and other persons" and "to maximize the usefulness of information collected by the Federal government." On March 31, 1983, OMB issued a final rule, 5 CFR part 1320, implementing the provisions of the Paperwork Reduction Act of 1980.

Among other provisions, the rule requires the display of OMB control numbers assigned to information collection requirements contained in Agency rules. The control numbers provide a simple and effective way for the public to tell whether a paperwork burden an agency seeks to impose has been cleared as required.

Each information collection requirement in the regulations is reviewed and evaluated periodically. In addition, every 3 years the Agency submits such requirements to OMB for review and extension of approval. Current OMB approval of the information collection requirements would have expired March 31, 1989. Prior to that, the Agency submitted a revised clearance docket to OMB. A notice of the OMB review was published February 2, 1989 (54 FR 5255), and, subsequently, the clearance docket for 7 CFR part 59 was approved by OMB. Therefore, § 59.18 of 7 CFR part 59 is updated by adding section numbers not previously displayed to the list of sections with information collection requirements and deleting one section number inadvertently displayed as containing an information collection requirement.

During a previous redesignation of some of the paragraphs in § 59.5, the wrong letter designation was inadvertently referred to in one of the paragraphs. Therefore, § 59.5(b)(4) of 7 CFR part 59 is updated by correcting the designation in the text from (a)(2), (3), or (4), to (b)(2), (3), or (4).

The Agency has determined that this amendment is not substantive. It merely provides a convenient and current listing of the information collection requirements and OMB control numbers in accordance with 5 CFR part 1320 and corrects a typographical error.

List of Subjects in 7 CFR Part 59

Egg products, Mandatory inspection service, Shell eggs.

For reasons set out in the preamble and under authority contained in the Egg Products Inspection Act (21 U.S.C. 1031-1056), title 7, part 59 of the Code of Federal Regulations, is amended as follows:

PART 59—INSPECTION OF EGGS AND EGG PRODUCTS

1. The authority citation for Part 59 continues to read as follows:

Authority: Secs. 2-28 of the Egg Products Inspection Act (84 Stat. 1620-1635; 21 U.S.C. 1031-1056).

2. Section 59.5 is amended by revising paragraph (b)(4) of the term "Adulterated" to read as follows:

§ 59.5 Terms defined.

* * * * *

Adulterated * * *

(4) If it bears or contains any color additive which is unsafe within the meaning of section 706 of the Federal Food, Drug, and Cosmetic Act: Provided, that an article which is not otherwise deemed adulterated under paragraph (b)(2), (3), or (4) of this definition shall nevertheless be deemed adulterated if use of the pesticide chemical, food additive, or color additive, in or on such article, is prohibited by regulations of the Secretary in official plants;

* * * * *

3. Section 59.18 is amended by revising paragraph (b) to read as follows:

§ 59.18 OMB control numbers assigned pursuant to the Paperwork Reduction Act

* * * * *

(b) *Display.*

7 CFR Part 905

[Docket No. AO-85-A9; FV-88-102]

Oranges, Grapefruit, Tangerines and Tangelos Grown in Florida; Order Amending the Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule amends the Federal marketing agreement and order for Florida citrus. The amendments: (1) Classify Canada and Mexico as export markets rather than domestic markets as they are now; (2) define the Interior District and the Indian River District in the marketing order; (3) authorize changing eligibility requirements for grower members on the Citrus Administrative Committee; (4) authorize the committee to borrow money to fund committee operations in emergency situations; and (5) provide for the conduct of periodic referenda on continuance of the order every six years. These changes are intended to improve the administration and functioning of the marketing agreement and order.

EFFECTIVE DATE: September 8, 1989.

FOR FURTHER INFORMATION CONTACT: Gary D. Rasmussen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525-S, Washington, DC 20090-6456; telephone: 202-475-3918, or John R. Toth, Officer-in-Charge, Southeast Marketing Field Office, Florida Citrus Building, 500 3rd Street, NW., P.O. Box 2276, Winter Haven, Florida 33883-2276, telephone: 813-299-4770.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding: Notice of Hearing issued January 7, 1988, and published in the **Federal Register** (53 FR 898, January 14, 1988); Recommended Decision issued February 3, 1989, and published in the **Federal Register** (54 FR 6136, February 8, 1989); and Secretary's Decision and Referendum Order issued on June 1, 1989, and published in the **Federal Register** (54 FR 24558, June 8, 1989).

This administrative action is governed by the provisions of sections 556 and 557 of title 5 of the United States Code and therefore is excluded from the requirements of Executive Order 12291.

Preliminary Statement

This final rule was formulated on the record of a public hearing held at Lakeland, Florida on February 17, 1988, to consider the proposed further amendment of Marketing Agreement and Order No. 905 (7 CFR part 905) regulating the handling of oranges, grapefruits, tangerines and tangelos grown in Florida, hereinafter referred to collectively as the order. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), hereinafter referred to as the Act, and the applicable rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders (7 CFR part 900).

The Notice of Hearing contained several amendment proposals submitted by the Citrus Administrative Committee (committee), which locally administers the order. The notice also included a proposal by the Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture (Department), to make any necessary conforming changes.

Upon the basis of evidence introduced at the hearing and the record thereof, the Administrator of the Agricultural Marketing Service (AMS), on February 3, 1989, filed with the Hearing Clerk, U.S. Department of Agriculture, a recommended decision containing a notice of the opportunity to file written exceptions thereto by March 10, 1989. Five exceptions were filed and were discussed and ruled upon in the Secretary's decision.

The Secretary's decision was issued on June 1, 1989, directing that a referendum be conducted during the period June 26 through July 10, 1989, among growers of Florida oranges, grapefruits, tangerines and tangelos to determine whether they favored the proposed amendments to the order. This final order includes these amendments,

all of which received the requisite approval of two-thirds by number of the growers who voted in the referendum or growers representing two-thirds of the volume of citrus fruit voted in the referendum. These amendments: (1) Classify Canada and Mexico as export markets rather than domestic markets as they are now; (2) define the Interior District and the Indian River District in the marketing order; (3) authorize changes in eligibility requirements for grower members on the committee; (4) authorize the committee to borrow money to fund committee operations in emergency situations; and (5) provide for the conduct of periodic referenda on continuance of the order every six years. The Department made necessary conforming changes in the order. The marketing agreement was signed by handlers who, during the representative period, handled not less than 50 percent of the volume of citrus fruit covered by the marketing order.

Small Business Considerations

Pursuant to the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities. As stated in the Notice of Hearing, interested persons were invited to present evidence at the hearing on the probable impact of the regulatory and informational requirements of the amendment proposals on small businesses for the purposes of the RFA. In that regard, such evidence was considered in arriving at the findings and conclusions contained in the Recommended Decision and in the Secretary's Decision. Those findings and conclusions are incorporated herein.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders and rules issued thereunder are unique in that they are normally brought about through group action of essentially small entities acting on their own behalf. Thus, both the RFA and the Act are compatible with respect to small entities.

Small agricultural growers have been defined by the Small Business Administration (13 CFR 121.2) as those having average gross annual revenues for the last three years of less than $500,000. Small agricultural service firms, which include shippers under the marketing agreement and order, are defined as those with gross annual revenues of less than $3,500,000.

There are about 100 shippers subject to regulation under the order for oranges, grapefruits, tangerines, and tangelos grown in Florida. A minority of these shippers may be classified as small entities. In addition, there are about 13,000 orange, grapefruit, tangerine and tangelo growers in Florida. The majority of these growers may be classified as small entities.

The amendments to the marketing order include classifying Canada and Mexico as export markets rather than domestic markets as currently provided. Such a change is expected to result in expanded Florida citrus sales by permitting shipment of the grades and sizes of fruit more consistent with the demand and preferences of the consumers in those markets, thereby benefitting Florida citrus growers and shippers. This change will not adversely affect small entities.

The amendment to make the Interior District synonymous with Regulation Area I and the Indian River District synonymous with Regulation Area II will facilitate the marketing of citrus through the use of commonly used terms, thus benefitting growers and shippers. This change will not adversely affect small entities.

The amendment, which authorizes the committee with the approval of the Secretary, to change eligibility requirements for grower members and grower alternate members to serve on the committee, provides a means to increase the number of qualified growers who could serve on the committee. This change has no adverse affect on small entities.

The amendment to permit the committee to borrow money in emergency situations provides the committee with additional flexibility in financing committee operations during such emergency situations, and thereby will benefit growers and shippers who operate under the order. There will be no adverse effect on small entities due to the change.

The amendment to require a continuance referendum every six years provides growers the opportunity to periodically vote on whether the order should be continued. This change does not adversely affect small entities.

All of the amendments set forth in this document are designed to enhance the administration, operation and functioning of the order and should result in an overall positive economic impact on small businesses.

The amendments to the order have no significant impact on the recordkeeping and reporting burdens of the affected industry. Moreover, the amendments (including referenda every six years) do not change the reporting and recordkeeping requirements under the Paperwork Reduction Act of 1980, which have been previously approved by the Office of Management and Budget (OMB) (Approval No. 0581-0094).

Order Amending The Order, As Amended, Regulating The Handling Of Oranges, Grapefruit, Tangerines, And Tangelos Grown In Florida

Findings and Determinations

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) Findings Upon the Basis of the Hearing Record

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR part 900), a public hearing was held upon proposed further amendment of the marketing agreement, as amended, and Order No. 905, as amended (7 CFR part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida.

Upon the Basis of the Record it is Found That

(1) The order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The order, as amended, and as hereby further amended, regulates the handling of fresh oranges, grapefruit, tangerines, and tangelos grown in the production area in the same manner as, and is applicable only to persons in the respective classes of commercial and industrial activity specified in the marketing agreement and order upon which hearings have been held;

(3) The order, as amended, and as hereby further amended, is limited in its application to the smallest regional production area which is practicable, consistent with carrying out the declared policy of the Act, and the issuance of several orders applicable to

subdivisions of the production area would not effectively carry out the declared policy of the Act;

(4) The order, as amended, and as hereby further amended, prescribes, so far as practicable, such different terms applicable to different parts of the production area as are necessary to give due recognition to the difference in the production and marketing of fresh oranges, grapefruit, tangerines, and tangelos grown in the production area; and

(5) All handling of fresh oranges, grapefruit, tangerines, and tangelos grown in the production area defined in the order is in the current of interstate of foreign commerce or directly burdens, obstructs, or affects such commerce.

(b) Additional Findings

It is necessary and in the public interest to make this final order amending the order effective on the date of publication in the Federal Register. Any delay beyond that date would interfere with the effective functioning and administration of the order. This final order authorizes changes in the functioning of the order, which need to be made effective as soon as possible. The specified effective date is necessary to meet this objective. This final order classifies Canada and Mexico as export markets for the purpose of issuing handling regulations under the order for citrus fruit. The 1989–90 Florida citrus shipping season begins in early September and this final order should be in effect as soon as possible, so that the handling regulations effective under the order can be changed to reflect the applicable amendatory changes.

In view of the foregoing, it is found and determined that good cause exists for making this amendatory order effective upon publication in the Federal Register, and that it would be contrary to the public interest to delay the effective date of this order for 30 days after publication in the Federal Register (Sec. 553(d), Administrative Procedure Act, 5 U.S.C. 551–559).

(c) Determinations

It is hereby determined that:

(1) The "Marketing Agreement, As Further Amended, Regulating The Handling Of Oranges, Grapefruit, Tangerines, And Tangelos Grown In Florida" upon which the aforesaid public hearing was held has been signed by shippers (excluding cooperative associations of growers who are not engaged in processing, distributing, or shipping covered by the said order, as amended, and as hereby further amended) who, during the period May 1, 1988, through April 30, 1989, handled not less than 50 percent of the volume of such oranges, grapefruit, tangerines, and tangelos covered by the said order, as amended, and as hereby further amended; and

(2) The issuance of this amendatory order, amending the aforesaid order, as amended, is favored or approved by at least two-thirds of the growers who participated in a referendum on the question of its approval and who, during the period May 1, 1988, through April 30, 1989, (which has been deemed to be a representative period), have been engaged within the in the production area in the State of Florida in the production of oranges, grapefruit, tangerines, and tangelos for market, such growers having also produced for market at least two-thirds of the volume of such commodity represented in the referendum.

Order Relative to Handling

It is therefore ordered, That, on and after the effective date hereof, the handling of oranges, grapefruit, tangerines, and tangelos produced in the production area in the State of Florida shall be in conformity to and in compliance with the terms and conditions of the said order, as hereby amended, as follows:

The provisions of the proposed marketing agreement and order, amending the order, contained in the Recommended Decision issued by the Administrator on February 3, 1989, and published in the Federal Register (54 FR 6136, February 8, 1989); and Secretary's Decision and Referendum Order issued on June 1, 1989, and published in the Federal Register (54 FR 24558, June 8, 1989) shall be and are the terms and provisions of this order, amending the order, and are set forth in full herein.

List of Subjects in 7 CFR Part 905

Florida, Grapefruit, Marketing agreements and orders, Oranges, Tangelos, Tangerines.

PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

1. The authority citation for 7 CFR part 905 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

Note: These sections will appear in the annual Code of Federal Regulations.

2. Section 905.9 is revised, and § 905.52 is amended by revising paragraphs (a)(3), (a)(4), (a)(5), and (d) to read as follows:

§ 905.9 Handle or ship.

Handle or ship means:

(a) To sell, consign, deliver, or transport fruit, or in any other way to place fruit in the current of commerce between the production area and any point outside thereof in the 48 contiguous States and the District of Columbia of the United States; and

(b) To export fruit from any point in the 48 contiguous States and the District of Columbia of the United States to any destination.

§ 905.52 Issuance of regulations.

(a) * * *

(3) Limit the shipment of the total quantity of any variety by prohibiting the shipment thereof: Provided, that no such prohibition shall apply to exports or be effective during any fiscal period with respect to any variety other than for one period not exceeding five days during the week in which Thanksgiving Day occurs, and for not more than two periods not exceeding a total of 14 days during the period December 20 to January 20, both dates inclusive.

(4) Provide that exports of any variety shall be limited to grades and sizes different from the grade and size limitations applicable to shipments of such variety in the 48 contiguous States and the District of Columbia of the United States, and specify condition requirements for such variety; and

(5) Fix the size, capacity, weight, dimensions, marking, or pack of the container or containers which may be used in the shipment of fruit for export: Provided, that such regulation shall not authorize the use of any container which is prohibited for use for fruit under the provisions of Chapter 601 of the Florida Statutes and regulations effective thereunder.

* * * * *

(d) Whenever any variety is regulated pursuant to paragraph (a)(3) of this section, no such regulation shall be deemed to limit the right of any person to sell, contract to sell, or export such variety but no handler shall otherwise ship any fruit of such variety which was prepared for market during the effective period of such regulation.

3. Section 905.15 is revised and § 905.16 is amended by revising the introductory text to read as follows:

§ 905.15 Regulation Area I.

Regulation Area I is defined as the "Interior District", and shall include all that part of the production area not included in Regulation Area II.

§ 905.16 Regulation Area II.

Regulation Area II is defined as the "Indian River District", and shall include that part of the State of Florida particularly described as follows:

* * * * *

4. Section 905.19 is revised to read as follows:

§ 905.19 Establishment and membership.

(a) There is hereby established a Citrus Administrative Committee consisting of at least eight but not more than nine grower members, and eight shipper members. Grower members shall be persons who are not shippers or employees of shippers: Provided, that the committee, with the approval of the Secretary, may establish alternative qualifications for such grower members. Shipper members shall be shippers or employees of shippers. The committee may be increased by one non-industry member nominated by the committee and selected by the Secretary. The committee, with approval of the Secretary, shall prescribe qualifications, term of office, and the procedure for nominating the non-industry member.

(b) Each member shall have an alternate who shall have the same qualifications as the member for whom this person is an alternate.

5. Section 905.41 is amended by adding a new paragraph (c) to read as follows:

§ 905.41 Assessments.

* * * * *

(c) In the case of an extreme emergency, the committee may borrow money on a short term basis to provide funds for the administration of this part. Any such borrowed money shall only be used to meet the committee's current financial obligations, and the committee shall repay all such borrowed money by the end of the next fiscal period from assessment income.

6. Section 905.83 is amended by redesignating paragraph (c) as paragraph (d) and adding a new paragraph (c) to read as follows:

§ 905.83 Termination.

* * * * *

(c) The Secretary shall conduct a referendum six years after the effective date of this paragraph and every sixth year thereafter to ascertain whether continuance of this part is favored by producers. The Secretary may terminate the provisions of this part at the end of any fiscal period in which the Secretary has found that continuance of this part is not favored by producers who during a representative period, determined by the Secretary, have been engaged in the production for market of the fruit in the production area. Such termination shall be announced on or before July 31 of the fiscal period.

7 CFR Part 922

[Docket No. FV-89-059FR]

Apricots Grown in Designated Counties in Washington; Temporary Suspension of the Minimum Grade Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department is adopting without modification as a final rule an interim final rule which suspended, for the 1989 season only, the minimum grade requirement (Washington No. 1) for fresh shipments of apricots grown in Washington. That action was designed to enable handlers to ship more fruit in fresh market channels, taking into consideration the abnormal growing conditions experienced by the Washington apricot industry this season. That action was also designed to improve returns to producers.

EFFECTIVE DATE: September 8, 1989.

FOR FURTHER INFORMATION CONTACT: Gary D. Rasmussen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456; telephone: (202) 475–3918.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Agreement and Marketing Order No. 922, both as amended (7 CFR part 922), regulating the handling of apricots grown in designated counties in Washington. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C 601–674), hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are about 62 apricot handlers subject to regulation under the Washington apricot marketing order. In addition, there are about 190 apricot producers in Washington. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. A majority of these handlers and producers may be classified as small entities.

The Washington Apricot Marketing Committee (committee), which locally administers this marketing order, met on May 24, 1989, and unanimously recommended suspending the minimum grade requirement (Washington No. 1) for fresh shipments of apricots grown in Washington. The committee reported that the 1989 season apricot crop was severely damaged by a freeze last winter and later by hail storms. The committee estimated that only 1,100 tons of apricots would be shipped fresh during the 1989 season, even with the grade requirements suspended as requested. This amount is less than 25 percent of last season's fresh shipments of 4,405 tons. Only an estimated 700 tons of apricots would grade Washington No. 1 this season, since much of the fruit is misshapen and scarred from the hail.

The committee meets prior to and during each season to review the handling requirements for Washington apricots, which are in effect on a continuous basis. Committee meetings are open to the public, and interested persons may express their views at these meetings. The U.S. Department of Agriculture (Department) reviews committee recommendations and information submitted by the committee and other available information and determines whether modification, suspension, or termination of the handling requirements would tend to effectuate the declared policy of the Act.

An interim final rule amending paragraph (a)(1) of § 922.321 (7 CFR 922.321) was issued June 19, 1989, and published in the Federal Register (54 FR 26185, June 22, 1989). The interim final rule temporarily suspended the minimum grade requirement (Washington No. 1) for fresh shipments of apricots for the 1989 season only. That rule provided that interested persons could file written comments through July 24, 1989. No comments were received.

The suspension enables handlers to ship a larger portion of their crop to the fresh market this season, taking into account the abnormal growing and crop conditions. This is increasing fresh shipments to meet consumer needs and improve returns to producers.

The grade requirement of Washington No. 1 will resume on April 1, 1990, for the 1990 and future seasons, based upon the grade and quality characteristics of Washington apricots during normal growing and shipping seasons.

The color and minimum size requirements for all varieties of apricots and the maturity requirements for the Moorpark variety specified in § 922.321 were not changed by the interim final rule. That section provided that, with the exception of exempt shipments, all apricots shipped must be reasonably uniform in color and be at least 1⅝ inches in diameter, except for the Blenheim, Blenril, and Tilton varieties which must be at least 1¼ inches in diameter. That section provides that the Moorpark variety in open containers must be generally well matured.

The Department's view is that the impact of the suspension upon producers and handlers is beneficial because it enables handlers to ship fresh apricots consistent with 1989 season growing conditions.

Based on the above, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, the information and recommendations submitted by the committee, and other available information, it is found that this finalization of the interim final rule, as published in the Federal Register (54 FR 26185, June 22, 1989), will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined that good cause exists for not postponing the effective date of this action until 30 days after publication in the Federal Register because: (1) This action maintains suspended grade requirements for Washington apricots; (2) Washington apricot handlers are aware of the suspension, which was unanimously recommended by the committee at a public meeting; (3) shipment of the 1989 season Washington apricot crop is currently underway; (4) the interim final rule provided a 30-day comment period, and no comments were received; and (5) no useful purpose would be served by delaying the effective date until 30 days after publication.

List of Subjects in 7 CFR Part 922

[FV-89-077 FR]

Expenses and Assessment Rate for Cranberries Grown in Massachusetts, et al.

AGENCY: Agricultural Marketing Service.

ACTION: Final Rule.

SUMMARY: This final rule authorizes expenditures and establishes an assessment rate under Marketing Order No. 929 for the 1989–90 fiscal year established under the cranberry marketing order. This action is needed for the Cranberry Marketing Committee (Committee), the agency responsible for the local administration of the order, to incur operating expenses during the 1989–90 fiscal year and to collect funds during that year to pay those expenses. This would facilitate program operations. Funds to administer this program are derived from assessments on handlers.

EFFECTIVE DATE: September 1, 1989, through August 31, 1990.

FOR FURTHER INFORMATION CONTACT: Jacquelyn R. Schlatter, Marketing Specialist, Marketing Order Administration Branch, F&V, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090-6456; telephone: (202) 447–5120.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement and Order No. 929 (7 CFR part 929), regulating the handling of cranberries grown in Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York. The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this final rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 20 handlers of cranberries grown in Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York, and approximately 950 producers in the regulated area. Small agricultural producers have been defined by the Small Business Administation (13 CFR 121.2) as those having average gross annual revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of cranberry handlers and producers may be classified as small entities.

The cranberry marketing order requires that an assessment rate for a particular fiscal year shall apply to all assessable cranberries handled from the beginning of such year. An annual budget of expenses is prepared by the Committee and submitted to the Department for approval. The members of the Committee are handlers and producers of cranberries. They are familiar with the Committee's needs and with the costs for goods, services, and personnel in their local areas and are thus in a position to formulate appropriate budgets.

The assessment rate recommended by the Committee is derived by dividing anticipated expenses by expected shipments of cranberries. Because that rate is applied to actual shipments, it must be established at a rate which will produce sufficient income to pay the Committee's expected expenses. The recommended budget and rate of assessment are usually acted upon by the Committee before a season starts, and expenses are incurred on a continuous basis. Therefore, the budget and assessment rate approval must be expedited so that the Committee will have funds to pay its expenses for the 1989–90 fiscal year which begins on September 1, 1989.

The Committee conducted a mail vote and recommended 1989–90 marketing order expenditures of $172,602 and an assessment rate of $0.037 per 100-pound barrel of cranberries shipped. In comparison, 1988–89 marketing year budgeted expenditures were $198,000, and the assessment rate was $0.055 per 100-pound barrel of cranberries shipped. Assessment income for 1989–90 is estimated at $148,555 based on a crop of 4,015,000 barrels of cranberries. Interest income expected to be received is estimated at $4,047, bringing total income to $152,602. Adequate reserve funds are available to meet the expected deficit in assessment income.

While this final action will impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs will be significantly offset by the benefits derived from the operation of the marketing order. Therefore, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

This action adds a new § 929.230 and is based on Committee recommendations and other information. A proposed rule was published in the August 2, 1989, issue of the Federal Register (54 FR 31844). Comments on the proposed rule were invited from interested persons until August 14, 1989. No comments were received.

After consideration of the information and recommendations submitted by the Committee and other available information, it is found that this final rule will tend to effectuate the declared policy of the Act.

This budget and assessment rate should be expedited because the Committee needs to have sufficient funds to pay its expenses, which are incurred on a continuous basis. In addition, handlers are aware of this action. Therefore, it is found that good cause exists for not postponing the effective date of this action until 30 days after publication in the Federal Register (5 U.S.C. 553).

List of Subjects in 7 CFR Part 929

Connecticut, Cranberries, Long Island in the State of New York, Marketing agreements and orders, Massachusetts, Michigan, Minnesota, New Jersey, Oregon, Rhode Island, Washington, and Wisconsin.

For the reasons set forth in the preamble, 7 CFR part 929 is revised as follows:

PART 929—CRANBERRIES GROWN IN MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW JERSEY, WISCONSIN, MICHIGAN, MINNESOTA, OREGON, WASHINGTON, AND LONG ISLAND IN THE STATE OF NEW YORK

1. The authority citation for 7 CFR Part 929 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 929.230 is added to read as follows:

Note: This section will not appear in the annual Code of Federal Regulations.

§ 929.230 Expenses and assessment rate.

Expenses of $172,602 by the Cranberry Marketing Committee are authorized, and an assessment rate of $0.037 per 100 pound barrel of assessable cranberries is established for the fiscal year ending August 31, 1990. Unexpended funds may be carried over as a reserve.

Dated: September 1, 1989.

William J. Doyle,

Acting Deputy Director, Fruit and Vegetable Division.

7 CFR Part 998

[Docket No. FV-89-040]

Marketing Agreement 146 Regulating the Quality of Domestically Produced Peanuts; Relaxation of Outgoing Quality Regulations and Changes in the Terms and Conditions of Indemnification for 1989 Crop Peanuts

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department is adopting as a final rule the provisions of an interim final rule which changed the terms and conditions of indemnification and relaxed outgoing quality regulations for 1989 crop peanuts regulated under Marketing Agreement No. 146. Two changes were made in the outgoing quality regulations in effect last season. The screen sizes applicable to whole kernels in lots of split peanuts were changed to those in effect for 1987 crop peanuts and the tolerances for sound whole kernels and split and broken kernels falling through specified screens in lots of No. 2 Virginia peanuts were increased. These changes were intended to lessen the loss of sound edible splits and whole kernels and reduce handler milling costs. No adverse impact on product quality is expected as a result of these relaxations. In addition to these changes, the printed outgoing quality regulations for the numerous types and grade categories of shelled peanuts were changed from a narrative to a tabular format to make the requirements easier to read and understand. With regard to the change in the terms and conditions of indemnification, the cut-off date for weekly price calculations used to determine indemnification values was changed to make the cut-off date for calculations consistent with the deadline for filing indemnification claims.

EFFECTIVE DATE: September 8, 1989.

FOR FURTHER INFORMATION CONTACT: Patrick Packnett, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456, telephone 202–475–3862.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Agreement 146 (7 CFR part 998; 53 FR 20291, June 3, 1988), regulating the quality of domestically produced peanuts, hereinafter referred to as the agreement. This agreement is effective under the Agricultural Marketing

PART 998—MARKETING AGREEMENT

Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this final rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened.

There are approximately 67 handlers of peanuts subject to regulation under the agreement and there are about 46,950 peanut growers in the 16 States covered under the agreement. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. Some of the handlers signatory to the agreement are small entities, and a majority of the growers may be classified as small entities.

There are three major peanut production areas in the United States: (1) Virginia-Carolina, (2) Southeast, and (3) Southwest, covered under the agreement. These areas encompass the 16 States covered under the agreement. The Virginia-Carolina area (primarily Virginia and North Carolina) usually produces about 16 percent of the total U.S. crop. The Southeast area (primarily Georgia, Florida and Alabama) usually produces about two-thirds of the crop. The Southwest area (primarily Texas, Oklahoma, and New Mexico) produces about 15 percent of the crop. Based upon the most current information, U.S. peanut production in 1988 totalled 3.98 billion pounds, a 10 percent increase from 1987, and 8 percent more than in 1986. The 1988 crop value is $1.07 billion, and the 1987 crop is valued at $1.02 billion.

The objective of the agreement is to insure that only wholesome peanuts enter edible market channels. Since aflatoxin was found in peanuts in the mid-1960's, the domestic peanut industry has sought to minimize aflatoxin contamination in peanuts and peanut products.

The agreement plays a very important role in the industry's quality control efforts. It has been in place since 1965 with over 90 percent of U.S. shellers (handlers) participating. The participating shellers handle about 95 percent of the crop. Requirements established pursuant to the agreement require farmers' stock peanuts with visible *Aspergillus Flavus* mold (the principal producer of aflatoxin) to be diverted to non-edible uses. Each lot of shelled peanuts for edible use must be officially sampled and chemically tested for aflatoxin by the U.S. Department of Agriculture (Department) or in laboratories approved by the Peanut Administrative Committee (committee). The committee works with the Department in administering the marketing agreement program. The sampling and chemical analysis inspection programs are administered by the Department. Having complied with these requirements, provision is made for indemnification of sheller losses if the committee or the Food and Drug Administration (FDA) deems the peanuts unsuitable for consumption because of aflatoxin. All indemnification and administration costs are paid by assessments levied on shellers signatory to the agreement.

The incoming quality regulations specify the quality of farmers' stock peanuts which handlers may purchase from producers. Handlers are required to purchase only good quality, wholesome peanuts for edible products. The outgoing quality regulations require shellers to mill peanuts to meet certain quality specifications and have them inspected before such peanuts can be sold to edible outlets. Foreign material and damaged and immature peanuts are removed in the milling operation. Each lot of shelled peanuts also must be sampled and the samples chemically analyzed for aflatoxin. If the chemical assay shows the lot to be positive as to aflatoxin, the lot is not allowed to go to edible channels. Lower quality peanuts are crushed for oil and meal. The end result is that only good quality peanuts end up in human consumption outlets.

The committee unanimously recommended changes in the outgoing quality regulations and terms and conditions of indemnification for 1989 crop peanuts at its March 28–29, 1989, meeting. An interim final rule was issued on June 9, 1989, adopting the committee's recommendations. That rule was published in the **Federal Register** on June 15, 1989 (54 FR 25439), and a minor correction was published on June 28, 1989 (54 FR 27271). Interested persons were invited to submit written comments through July 17, 1989. One comment was received from the Southeastern Peanut Association in support of the changes.

In paragraph (a) of § 998.200 *Outgoing quality regulation*, the screen sizes used in determining fall-through of whole kernels in lots of split peanuts were changed to those in effect for 1987 crop peanuts. This change relaxed the minimum size requirements for whole kernels in lots of split peanuts. Paragraph (a) was also changed to increase the fall-through tolerances for No. 2 Virginia type peanuts. Under the agreement, the term "fall-through" means sound split and broken kernels and whole kernels which pass through specified sizes of screens. These changes make more peanuts available for edible outlets.

Lots of split peanuts of the Runner type and the Spanish and Valencia types cannot contain more than four percent whole kernels. Lots of split peanuts of the Virginia type cannot contain more than ten percent whole kernels. Prior to issuance of the interim final rule, paragraph (a) specified slotted screen openings used in determining fall-through of whole kernels of $\frac{17}{64} \times \frac{3}{4}$ inch for Runner type peanuts, $\frac{16}{64} \times \frac{3}{4}$ inch for Spanish and Valencia type peanuts and $\frac{18}{64} \times 1$ inch for Virginia type peanuts. Those screen sizes, which are larger than those used in prior years, were implemented in 1988 to remove small whole kernels from edible channels. Smaller kernels tend to be immature, less flavorful and have a higher incidence of aflatoxin contamination. The increased size requirements also were applicable to lots of split peanuts and No. 2 Virginia peanuts. No. 2 Virginia type peanuts are a mixture of whole and split kernels and generally are marketed with 20 percent or 30 percent whole kernels. However, during 1988 crop operations, handlers experienced difficulties in milling lots of split peanuts to meet outgoing grade specifications. In milling this grade category of peanuts in 1988 to meet the minimum fall-through requirements, handlers experienced substantial edible product loss and higher than usual milling costs. Such losses occurred when attempting to remove the lower quality small whole kernels (which fall through the larger screens implemented in 1988) from lots of splits. Handlers of No. 2 Virginia type peanuts also experienced milling losses due to excessive fall-through caused by the new screen sizes.

In recognition of the unforeseen problems in the processing lots of split peanuts, the committee unanimously recommended that the slotted screen sizes applicable to whole kernels in lots of splits be changed to those in effect for

1987 crop peanuts. The new slotted screen sizes applicable only to lots of splits are as follows: Runner type—$\frac{16}{64} \times \frac{3}{4}$ inch; Virginia type—$\frac{17}{64} \times 1$ inch; and Spanish and Valencia type—$\frac{15}{64} \times \frac{3}{4}$ inch.

Because No. 2 Virginia peanuts are generally marketed with 20 or 30 percent whole kernels, the committee determined that a change in the screen sizes to that being made for lots of Virginia split peanuts would not correct the problem of excessive milling losses. Instead, it recommended that the tolerances for fall through of sound split and broken kernels and sound whole kernels in No. 2 Virginia type peanuts be increased from 3.00 percent to 6.00 percent. These tolerances are similar to those prescribed for U.S. No. 2 Virginia grade peanuts in the U.S. Standards for Grades of Shelled Virginia Type Peanuts (7 CFR 2851.2750–2851.2763).

These changes in the outgoing quality regulations are intended to lessen the loss of sound edible whole kernels and splits and to reduce handler milling costs. The relaxations are not expected to have an adverse impact on the quality of peanuts entering edible channels because the volume of peanuts that will be affected by the change is minimal. These changes do not increase the likelihood of aflatoxin contamination in lots of split peanuts because of the relatively low number of small whole kernels in these lots. Further, with regard to the increased tolerances in No. 2 Virginia type peanuts, the climate in the area where production of these peanuts is prevalent is not conducive to the growth of *Aspergillus flavus* mold. Thus, there is no increased risk of aflatoxin contamination with allowing more fall-through in No. 2 Virginia type peanuts. In view of this, these changes should be continued in effect.

In addition to these changes, in the regulations the outgoing quality requirements for the numerous types and grade categories of shelled peanuts were changed from a narrative to a tabular format to make the requirements easier to read and understand. With the exception of the two changes mentioned above, which have been incorporated, the tables specify the same requirements that were in effect for 1988 crop peanuts.

The committee also recommended that paragraph (u) of the terms and conditions of indemnification (§ 998.300) be changed to extend the cutoff date for making weekly price calculations used to determine indemnification values. These weekly calculations involve averaging the domestic market price of each category of indemnifiable peanuts during the most recent four week period. The cut-off date was extended from May 31 to November 1, the deadline for filing indemnification claims. Making the cut-off date for calculations consistent with the deadline for filing indemnification claims will ensure that indemnification values at the time claims are filed or settled do not exceed the market value of the peanuts for which indemnification is requested. This has been a committee goal since the inception of the agreement in 1965.

The incoming quality regulations applicable to 1989 crop peanuts were not changed from those in effect for 1988 crop peanuts. No changes were deemed necessary. In recognition of this, the heading of § 998.100 was changed from "Incoming quality regulation—1988 crop peanuts" to "Incoming quality regulation—1989 crop peanuts".

Based on available information, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant information presented, the committee's recommendation, and other information, it is found that the interim rule, as published in the **Federal Register** (54 FR 25439) on June 15, 1989, and corrected (54 FR 27271) on June 28, 1989, should be made a final rule and will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) This action adopts relaxed outgoing quality requirements currently being applied under an interim rule and leaves in effect terms and conditions of indemnification which conform with current industry practice; (2) peanut handlers are aware of the relaxations, which were recommended by the committee at public meetings and they are prepared to continue complying with the changed requirements; (3) the interim final rule provided a 30 day comment period; (4) no useful purpose would be served by delaying the effective date until 30 days after publication.

List of Subjects in 7 CFR Part 998

Marketing agreement, Peanuts.

For the reasons set forth in the preamble, 7 CFR part 998 is amended as follows:

Note: These sections will be published in the Code of Federal Regulations.

PART 998—MARKETING AGREEMENT REGULATING THE QUALITY OF DOMESTICALLY PRODUCED PEANUTS

1. The authority citation for 7 CFR part 998 (53 FR 20291, June 3, 1988) continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Accordingly, the interim final rule amending the provisions of 7 CFR part 998, published in the Federal Register on June 15, 1989, (54 FR 25441), and corrected on June 28, 1989, (54 FR 27271), is adopted as a final rule.

Dated: September 1, 1989.

William J. Doyle,

Acting Deputy Director, Fruit and Vegetable Division.

FEDERAL RESERVE SYSTEM

12 CFR Part 225

[Regulation Y; Docket No. R-0614]

RIN: 7100–AA89

Bank Holding Companies and Change in Bank Control; Acquisition and Operation of Savings Associations by Bank Holding Companies

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: In light of changed economic and regulatory circumstances, and pursuant to discretionary authority granted under the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (Pub. L. No. 101–73), the Board is amending Regulation Y to reflect its determination that the acquisition and operation of savings associations by bank holding companies is, as a general matter, so closely related to banking as to be a proper incident thereto for purposes of section 4(c)(8) of the Bank Holding Company Act ("BHC Act") (12 USC 1843(c)(8)). The Board's determination is subject to the condition that the savings association engage only in activities that bank holding companies are otherwise permitted to conduct under section 4 of the BHC Act. Specific proposals by bank holding companies to acquire savings associations would require prior Board approval under section 4(c)(8) of the Act.

EFFECTIVE DATE: October 10, 1989.

SUPPLEMENTARY INFORMATION:

1. Background

Under the BHC Act, a savings association is expressly excluded from the definition of "bank" and is treated as a nonbank company. Its acquisition by a bank holding company is therefore governed by the nonbanking provisions of section 4(c)(8) of the Act. Section 4(c)(8) permits bank holding companies to acquire a nonbank company if it is engaged only in activities the Board has determined to be "so closely related to banking . . . as to be a proper incident thereto." In order to meet the standards of section 4(c)(8), the Board must make two findings. First, the Board must find that the activity is closely related to banking. Second, the Board must find that the proposed activity is a proper incident to banking, that is, that the expected public benefits outweigh the potential adverse effects associated with the proposed activity.[1]

In 1977, in *D.H. Baldwin & Company* ("*Baldwin*"), the Board determined that the operation of a savings association by a bank holding company is closely related to banking, but, as a general matter, is not a proper incident to banking.[2] The Board stated at that time that the public benefits associated with the affiliation of a bank and a thrift were not sufficient to outweigh the adverse effects of such an affiliation. In particular, the Board expressed concern regarding:

(1) The conflicting regulatory framework created by Congress for thrifts and banks;

(2) The possibility that cross-industry acquisitions would undermine the perceived rivalry between the two industries; and

(3) The perception that such acquisitions would undermine the interstate banking restrictions of the Douglas Amendment to the BHC Act.

In view of these adverse considerations, the Board declined to add the operation of a savings association to the Regulation Y list of permissible activities, stating that "the judgment to permit [the affiliation of a bank and a savings association] on a broad scale should be left to Congress." [3]

In 1982, Congress passed the Garn-St Germain Act, which authorized the acquisition by bank holding companies of failed or failing savings associations under the BHC Act. Since 1982, the Board has approved a number of such acquisitions.[4]

On September 21, 1987, in light of the significant changes in the financial services industry since the *Baldwin* decision, the Board invited public comment on whether it should add to the list of permissible activities in Regulation Y the acquisition and operation of savings associations in general regardless of their financial condition.[5] The Board also requested comment on what terms or conditions, if any, should be imposed in connection with such acquisitions. The Board refrained from acting on this rulemaking pending completion of Congressional consideration of banking and thrift reform legislation.

On August 9, 1989, Congress enacted the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (the "FIRREA"). Section 601 of that Act amends the Bank Holding Company Act specifically to authorize the Board to permit a bank holding company to acquire any savings association under section 4(c)(8) of the BHC Act.[6] The legislative history of FIRREA indicates that, in enacting this specific authorization, Congress intended to authorize the Board to permit acquisitions of healthy as well as failed or failing thrifts.

2. Public comments

The Board received 214 public comments in response to its request for comments regarding this proposal. Over 70 percent of these comments favored allowing bank holding companies to acquire any savings association, including non-troubled savings associations.

Commenters in favor of the proposal argued that a number of circumstances have changed since 1977 that justify revision of the Board of its decision in *Baldwin* that the adverse effects of the acquisition of a thrift by a bank holding company outweigh the public benefits. In particular, these commenters stated that thrift subsidiaries could derive numerous strengths from parent bank holding companies, such as: access to bank holding company management; increased sources of capital; the ability to offer more services and branches; and better protection for depositors. Some of these commenters also argued that once a bank holding company is able to become familiar with the operation of a thrift by acquiring a healthy one, it would be more likely to acquire a failing institution.

Virtually all of the commenters who favored allowing bank holding companies to acquire healthy thrifts opposed limiting the acquired thrifts' powers to those permissible for bank holding companies. These commenters contended that limiting acquired thrifts' powers would reduce their attractiveness as acquisition targets and would unnecessarily interject the Board into thrift regulation.

Other commenters favored limiting the activities of savings associations acquired by bank holding companies to those permissible for bank holding companies in order to prevent bank holding companies from circumventing the activities restrictions of the BHC Act through the acquisition of savings associations. These commenters also contended that allowing bank holding companies to engage in otherwise impermissible activities through a savings association could compromise the financial integrity of the holding companies.

Commenters who opposed allowing bank holding companies to acquire

---

[1] Section 4(c)(8) provides that in determining whether a particular activity is a proper incident to banking, the Board shall consider: whether its performance by an affiliate of a holding company can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices. 12 U.S.C. 1843(c)(8).

(First Federal Savings and Loan Association of Columbus)*, 75 Federal Reserve Bulletin 60 (1989); *Citicorp (National Permanent Bank, FSB)*, 72 Federal Reserve Bulletin 724 (1986); *Citicorp (Fidelity Federal Savings & Loan Association)*, 68 Federal Reserve Bulletin 656 (1982).

[5] 52 FR 36,041 (1987).

[6] Pub. L. No. 101–73, section 601, 103 Stat. 183, 408 (1989). This section amends section 4 of the BHC to state that, "Beginning on the date of the enactment of [FIRREA], the Board may approve an application by any bank holding company under subsection (c)(8) to acquire any savings association in accordance with the requirements and limitations of this section." FIRREA defines "savings association" to include: any federally-chartered savings and loan association or savings bank; any building and loan, savings and loan, or homestead association, or cooperative bank which is a member of the Savings Association Insurance Fund; and any savings bank or cooperative bank that has been certified by the Director of the Office of Thrift Supervision as having met the requirements of the Qualified Thrift Lender test. *Id.* at section 320.

healthy thrift institutions contended that the acquisition of thrifts continues to raise the concerns expressed by the Board in *Baldwin*, as well as safety and soundness concerns for bank holding companies. These commenters argued that bank holding companies would be able to circumvent the interstate banking prohibitions of the Douglas Amendment as well as state branching laws through the acquisition of savings associations. A number of commenters also argued that permitting savings associations to be acquired by bank holding companies would lead to a de-emphasis of housing finance by these savings associations, undue concentration of the financial services industry by bank holding companies, and unfair competition. Many commenters argued that the decision as to whether bank holding companies should be able to acquire healthy thrifts should be left to Congress.

3. Acquisition of savings associations as a general matter

A. FIRREA

As noted, section 601 of FIRREA amends section 4 of the BHC Act specifically to authorize the Board to approve applications by bank holding companies to acquire any savings association. The legislative history of FIRREA suggests that Congress expected the Board to exercise this authority and did not intend the Board to restrict its approval to proposals involving the acquisition of failed or failing savings associations, as the Board has in the past.

For example, FIRREA as originally adopted by the Senate contained provisions that would have limited for two years the Board's authority to authorize the acquisition of thrifts only to those that were under-capitalized. This provision was not adopted in the final legislation in favor of a general and immediate authorization to permit the acquisition of any savings association.

FIRREA requires the Board to apply the standards of section 4(c)(8) of the BHC Act to proposals by bank holding companies to acquire savings associations. The Board has already determined in *Baldwin* that the ownership and operation of a savings association is closely related to banking for purposes of section 4(c)(8) of the Act.[7]

B. Proper Incident to Banking

With respect to the proper incident to banking test, there have been a number of significant changes in the regulatory framework governing banks and thrifts since the *Baldwin* decision, including the expansion of the powers of thrifts and the emergence of interstate banking. As the Board suggested in its request for public comment, and for the reasons discussed below, these developments have diminished the concerns about the affiliation of banks and savings associations noted by the Board in *Baldwin*. Ther authorization in FIRREA to permit affiliation of banks and healthy thrifts indicates Congressional support for this view.

Interstate Banking

A major concern expressed by the Board in *Baldwin* was that the acquisition of thrifts by bank holding companies might undermine the interstate banking restrictions of the Douglas Amendment. Since the Board's decision in *Baldwin*, however, Congress has specifically excluded savings associations from the definition of "bank" in the BHC Act, and, as a result, from the restrictions on interstate banking contained in the Douglas Amendment.[8] Thus, the BHC Act contains no express provision limiting holding company acquisitions of thrifts to those states in which the holding company may own a bank.

In FIRREA, Congress focused again on the acquisition of savings associations by bank holding companies, and, in authorizing such acquisitions, did not impose any geographic limitations. In addition, nothing in the legislative history of this provision indicates that Congress intended the Board to impose geographic restrictions on these acquisitions. On the contrary, the only geographic restriction imposed by FIRREA on affiliations of savings associations and banks applies in the event the savings association seeks to merge or convert into a bank. In that situation only, the transaction must be consistent with the Douglas Amendment.[9]

Concern regarding the erosion of interstate banking restrictions has also been reduced by the significant increase in state initiatives permitting interstate banking. In this regard, twenty-two states already authorize bank acquisitions on a nationwide basis, and an additional eight states will permit nationwide entry by January 1, 1991. In addition, a total of forty-six states and the District of Columbia have enacted some type of interstate banking statutes,[10] with most of these statutes being enacted during the past 5 years.

In seeking public comment regarding this proposal, the Board asked for comment on an option to permit the acquisition of savings associations by bank holding companies only in those states where the holding company could operate a bank. For the reasons explained above, the Board has not adopted this option.

Institutional Rivalry

The Board's concern that authorizing the acquisition of savings associations by bank holding companies would undermine the institutional rivalry between banks and thrifts has also been reduced. Since 1977, the statutory interest-rate has also been reduced. Since 1977, the statutory interest-rate differential on deposits taken by savings associations have been expanded to include deposit-taking and commercial lending powers previously reserved for commercial banks. These actions have reduced the institutional differences between savings associations and banks.

To the extent that Congress was concerned about preserving this institutional distinction, it has done so by requiring savings associations to continue to meet a statutory qualified thrift lender ("QTL") test. Under this test, the thrift is required to devote a substantial amount of its resources to activities related to the provision of residential housing credit. These statutory provisions are applicable to savings associations regardless of whether or not the savings association is acquired by a bank holding company, and would not appear to be undermined by the affiliation of a savings association with a bank.

Regulatory Conflict

The Board's experience with the acquisition of failed and failing thrifts by bank holding companies also indicates that the potential for conflicts arising from the different regulatory framework for banks and savings associations does not present

---

[7] In reaching this conclusion, the Board noted that banks and savings associations are both financial intermediaries whose liability structures are dominated by deposits and whose asset structures are dominated by loans. The Board also noted that the trend toward convergence of the powers authorized for banks and savings associations, particularly in the areas of commercial and consumer lending, and deposit-taking. *See American Fletcher Corporation*, 60 Federal Reserve Bulletin 868, 869 (1974); *Baldwin*, 63 Federal Reserve Bulletin 280, 281 (1977).

[8] *See* 12 U.S.C. § 1842(d); and 12 U.S.C. §§ 1841(c) and (i).

insurmountable problems for bank holding companies. In this regard, various provisions of FIRREA further take account of, and reduce, this potential regulatory overlap.[11]

Conclusion

For the foregoing reasons, and in light of the changed circumstances in the financial services industry since the *Baldwin* decision, the Board finds that the operation of a savings association by a bank holding company would not result in adverse effects that would, as a general matter, require prohibiting their affiliation under the proper incident to banking standard of section 4(c)(8) of the BHC Act. On this basis and in view of the Board's earlier finding that the ownership, control and operation of a savings association by a bank holding company is closely related to banking, the Board has determined to amend Regulation Y to add this activity to the Board's list of permissible nonbanking activities for bank holding companies. As required by the BHC Act and the Board's regulations, each specific proposal by a bank holding company to acquire a savings association would require prior review by the Board to determine whether the particular acquisition would result in public benefits that outweigh adverse effects.

4. Conditions on the Operation of Savings Associations by Bank Holding Companies

In its notice of rulemaking, the Board requested comments regarding what, if any, conditions or restrictions should be imposed if affiliations of banks and savings associations were to be allowed as a general matter. In its previous decisions involving the acquisition of failed and failing thrifts, the Board had imposed a number of conditions, including a requirement that the savings association continue to operate primarily as a residential housing lender, not change its name to one suggesting it is a bank, not convert to a bank without prior approval, limit its activities to those permissible for bank holding companies, and establish new branches only at locations permissible for national banks in that state. The Board also required that the savings association not be operated in tandem with any holding company affiliate and limited transactions between the savings association and its bank affiliates (the so-called "tandem operations conditions"). These conditions were imposed in order to address concerns that the acquisition by a bank holding company of a savings association might potentially result in unfair competition, conflicts of interest, or other adverse effects.

For the reasons discussed below, the Board has not adopted these conditions as part of the amendment to Regulation Y except for the requirement that the savings association conform its activities to those permissible for a bank holding company under section 4(c)(8) of the BHC Act.

Activities of savings associations

The Board has required bank holding companies that acquire failed or failing savings associations to conform their activities to those permissible under section 4(c)(8) of the BHC Act.[12] A number of commenters have urged the Board to remove this condition and to consider that a savings association is engaged in a cluster of activities, all of which should be authorized when the bank holding company acquires the savings association.

In its prior thrift decisions, the Board noted that the nonbanking provisions of the BHC Act require that all nonbank subsidiaries of a bank holding company engage only in activities that are permissible under the provisions of section 4 of the BHC Act. The Board stated that an activity that is otherwise impermissible for a bank holding company is not rendered permissible simply because that activity is performed by a direct or an indirect nonbanking subsidiary of a holding company.[13]

The legislative history of FIRREA indicates that this is the correct interpretation of the BHC Act and should be continued. For example, the Senate Report states that the section of FIRREA authorizing the acquisition of savings associations by bank holding companies "does not authorize a thrift institution acquired by a bank holding company to engage in any activity that would otherwise be impermissible under section 4(c)(8)." [14] Similarly, the Conference Report states that "all nonbanking restrictions and other criteria under [Section 4] will continue to apply [to thrifts acquired by bank holding companies]." [15] For these reasons, the Board continues to believe that bank holding companies that acquire savings associations must conform the activities of the savings association to those permissible for bank holding companies under the provisions of section 4 of the BHC Act, including the provisions of section 4(c)(8) of the Act.

The Board has also required that the savings association continue to have as its primary purpose the provision of residential housing credit. FIRREA has modified the provisions of current law to require all savings associations to devote at least 70 percent of their assets to housing related financing and consumer lending activities. A savings association that fails to meet these so-called Qualified Thrift Lender requirements must, within certain periods, become a bank or conform its operations to those of a bank. Any company that owns such a savings association must conform to the requirements of the BHC Act, including the Douglas Amendment. In light of these statutory requirements, the Board has not adopted a condition to its regulation requiring savings associations acquired by bank holding companies to operate with the primary purpose of providing housing related credit.

Restrictions on Tandem Operations

FIRREA specifically provides that, in approving acquisitions of savings associations, the Board shall not impose any restrictions on transactions between the savings association and its bank holding company affiliates except as required under sections 23A and 23B of the Federal Reserve Act or any other applicable law.[16] The legislative history of FIRREA indicates that this provision was directed specifically at the tandem limitations in the Board's prior decisions.

On August 21, 1989, in accordance with the new statute, the Board removed the tandem conditions as they applied to bank holding companies that currently own savings associations.

Consistent with the provisions of FIRREA and its legislative history, and in light of the continued applicability of sections 23A and 23B and the anti-tying provisions of the BHC Act, the Board has determined not to include the tandem operations conditions in the regulation.[17]

---

[11] *See, e.g.,* Pub. L. No. 101–73, 103 Stat. 183 § 301 (1989). (This section exempts bank holding companies that acquire savings associations from certain requirements contained in the Savings and Loan Holding Company Act).

[12] The Board has generally granted a two-year period for thrifts to conform their activities.

[13] *Central Pacific Corporation,* 68 Federal Reserve Bulletin 362 (1982).

[14] S. Rep. No. 19, 101st Cong., 1st Sess. 44 (1989).

[15] H.R. Conf. Rep. No. 209, 101st Cong., 1st Sess. 827 (1989).

[16] *See also* H.R. Conf. Rep. No. 209, 101st Cong., 1st Sess. 427 (1989).

[17] Previous Board orders have included a requirement that a savings association acquired by a bank holding company not convert its charter to a bank charter without the Board's prior approval. This requirement is a restatement of existing law, which would require the bank holding company to seek authority under section 3 of the BHC Act and comply with the interstate banking provisions of the Douglas Amendment before converting its savings association to a bank. Under the provisions of FIRREA, bank holding companies that seek to merge an existing savings association subsidiary into a bank subsidiary must also seek Board approval and comply with the requirements of the Douglas Amendment. Pub. L. No. 101–73, § 206, 103 Stat. 183 (1989). Because this condition restates existing law, the Board has not included this requirement as an express condition in the regulation.

Continued

Restrictions on Branching

In approving thrift acquisition under the Garn-St Germain Act, the Board provided, in accordance with the Act, that the thrift could establish new branches only at locations at which a national bank located in the same state was permitted to establish branches.[18] Section 217 of FIRREA amends the Garn-St Germain Act to provide that a failed or failing savings association acquired by a bank holding company may, so long as it remains a savings association, establish and operate new branches in its home state to the same extent as any other savings association that maintains its home office in that state.[19]

In FIRREA's general authorization for bank/thrift affiliations, Congress did not restrict the branching authority of savings associations acquired by bank holding companies so long as the association meets the QTL test.[20] Moreover, the legislative history of this provision does not indicate any intent by Congress that the Board limit the branching rights of acquired thrifts.

In light of this, the Board has not adopted in the regulation the branching limit contained in its previous orders. Accordingly, savings associations acquired by bank holding companies will be permitted to branch to the extent permitted other savings associations located in the same home state.[21] This approach permits both troubled and healthy savings associations acquired by bank holding companies the same branching rights.

Use of "bank" in Acquired Thrift's Name

The Board's previous orders authorizing bank holding companies to acquire savings associations prohibited the savings association from changing its name to include the term "bank." This condition was intended to prevent public confusion regarding the association's status as a nonbank thrift institution.[22] While the provisions of FIRREA do not address this issue, the legislative history of that Act suggests that savings associations acquired by bank holding companies should be permitted to use the term "bank" in their name so long as the name is not misleading to the public.[23] In this regard, the regulations applicable to federally chartered savings associations permit these institutions to use the term "bank" in their name under certain conditions, and provided that the name does not misrepresent the nature of the institution or the services that it offers.[24]

In view of these existing regulatory requirements, and the Congressional direction that the Board eliminate the restrictions on tandem operations between banks and their affiliate thrifts, the Board has not included in the regulation a specific condition governing the use of the word "bank" in the name of savings associations acquired by bank holding companies.

Definition of Savings Association

The Board is also amending the definition of savings association in Regulation Y to conform to certain technical changes to that definition made by FIRREA. FIRREA amended the BHC Act to list specifically the types of institutions that would qualify as savings associations. Prior to FIRREA, the BHC Act referred to the definition of that term in the Home Owners Loan Act.

Final Regulatory Flexibility Act Analysis

Pursuant to section 605(b) of the Regulatory Flexibility Act (Pub. L. 96–354; 5 U.S.C. 601 *et seq.*), the Board of Governors of the Federal Reserve System certifies that the amendment will not have a significant economic impact on a substantial number of small entities that would be subject to the regulation.

This amendment will permit bank holding companies to acquire and operate healthy savings associations—an activity bank holding companies are not now permitted to conduct. The amendment does not impose more burdensome requirements on bank holding companies than are currently applicable, and these provisions provide no barrier to meaningful participation by small bank holding companies in the activity.

The Board notes that there are not a significant number of small bank holding companies engaged in the operation of savings associations at this time. As noted, bank holding companies have not previously been permitted to acquire healthy savings associations; the amendment will expand the powers of bank holding companies by authorizing bank holding companies to acquire healthy, in addition to failing, savings associations.

List of Subjects in 12 CFR Part 225

Banks, Banking, Federal Reserve System, Holding companies, Reporting and recordkeeping requirements, and Securities.

For the reasons set out in this notice, and pursuant to the Board's authority under section 5(b) of the Bank Holding Company Act of 1956 (12 U.S.C. 1844), the Board amends 12 CFR part 225 as follows:

PART 225—BANK HOLDING COMPANIES AND CHANGE IN BANK CONTROL

1. The authority citation for part 225 continues to read as follows:

Authority: 12 U.S.C. 1817(j)(13), 1818, 1843(c)(8), 1844(b), 3106, 3108, 3907, and 3909.

2. In § 225.25 new paragraph (b)(9) is added to read as follows:

§ 225.25 List of Permissible nonbanking activities.

* * * * *

(b) * * *

(9) *Operating savings association.* Owning, controlling or operating a savings association, if the savings association engages only in deposit taking activities and lending and other activities that are permissible for bank holding companies under this subpart C.

3. In section 225.2, redesignate paragraphs (l) through (n) as paragraphs (m) through (o) respectively, and add the following as new paragraph (l):

---

[18] 12 U.S.C. § 1730a(m)(5).

[19] Pub. L. No. 101–73, § 217, 103 Stat. 183 (1989). Troubled savings associations acquired by bank holding companies in a state in which the bank holding company does not own a bank lose the ability to retain, operate, and establish branches beyond locations at which a national bank may branch if the savings association fails to meet certain asset tests contained in the Internal Revenue Code. This asset test is substantially the same as the current Qualified Thrift Lender test.

[20] Under FIRREA, any savings association that fails to meet the Qualified Thrift Lender test must, among other things, limit its branching to locations at which a national bank located in that state may branch so long as it remains a savings association.

[21] The provisions of FIRREA do not contain a restriction on establishing or operating remote service units. Accordingly, this condition of previous Board orders has not been adopted.

[22] *See, eg., Barnett Banks, Inc.,* 75 Federal Reserve Bulletin 83 (1988), in which the Board determined that the applicant could call the thrift Barnett Savings Bank, but not Barnett Bank, F.S.B.

[23] *See* 135 Cong. Rec. H2571 (daily ed. June 14, 1989) (statement of Rep. Barnard).

Federal Aviation Administration

14 CFR Part 39

[Docket No. 89–NM–77–AD; Amdt. 39–6317]

Airworthiness Directives; Airbus Industrie Model A310 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to Airbus Industrie Model A310 series airplanes, which requires modification of the emergency exits' opening mechanism. This amendment is prompted by reports of the accumulation of moisture in the area of the locking mechanism and subsequent ice buildup. This condition, if not corrected, could prevent the exit of passengers in an emergency situation.

EFFECTIVE DATE: October 13, 1989.

ADDRESSES: The applicable service information may be obtained from Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Greg Holt, Standardization Branch, ANM–113; telephone 431–1918. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive, applicable to Airbus Industrie Model A310 series airplanes, which requires modification of the emergency exits' opening mechanism, was published in the **Federal Register** on June 2, 1989 (54 FR 23670).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter supported the rule, but requested that the compliance time be changed from 100 hours time-in-service to 9 months, due to the lack of parts availability. The FAA concurs in part with the commenter. The FAA has confirmed that, contrary to prior information received, certain parts required for a portion of the modification, specifically the special replacement sealing rings for the hinge rods, will not be available for installation within the proposed compliance time. The final rule has been revised to extend the compliance time to 9 months for installation of the replacement rings. The FAA has determined that accomplishment of this portion of the modification at nine months will not adversely affect safety. However, the other portions of the modification, namely drilling drain holes in guide fittings, drilling drain holes in spring units, and applying silicone grease to all modified parts, are required to be accomplished within 100 hours time-in-service, as proposed.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the change noted above. The FAA has determined that this change will neither increase the economic burden on any operator nor increase the scope of the rule.

It is estimated that 18 airplanes of U.S. registry will be affected by this AD, that it will take approximately 47 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Required parts are estimated to be $841 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $48,978.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Airbus Industrie: Applies to Model A310 series airplanes, as listed in Airbus Industrie Service Bulletin A310–52–2017, Revision 2, dated December 22, 1987, certificated in any category. Compliance is required as indicated, unless previously accomplished.

To prevent frozen condensation from blocking the emergency exit doors' operating mechanism, accomplish the following:

A. Within 100 hours time-in-service after the effective date of this AD, modify the emergency exit doors' opening mechanism, in accordance with paragraphs C.(1), C.(2), and C.(3) of Airbus Industrie Service Bulletin A310–52–2017, Revision 2, dated December 22, 1987.

B. Within 9 months after the effective date of this AD, replace all sealing rings on the hinge rods, in accordance with paragraph C.(4) of Airbus Industrie Service Bulletin A310–52–2017, Revision 2, dated December 22, 1987.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment and then send it to the Manager, Standardization Branch, ANM–113.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective October 13, 1989.

Issued in Seattle, Washington, on August 29, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

---

14 CFR Part 93

[Docket No. 25758; Amdt. No. 93–57]

High Density Traffic Airports Slot Allocation and Transfer Methods

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule; correction.

SUMMARY: This action corrects editorial errors which appeared in a final rule, published on August 22, 1989 (54 FR 34904), amending the High Density Traffic Airports Rule and slot allocation and transfer regulations.

FOR FURTHER INFORMATION CONTACT: David L. Bennett at (202) 267–3491.

SUPPLEMENTARY INFORMATION: On August 22, 1989, the Department of Transportation published a final rule which made several technical amendments to Subparts K and S of Part 93 of the Federal Aviation Regulations (14 CFR Part 93); High Density Traffic Airports Slot Allocation and Transfer Methods; Docket No. 25758 (54 FR 34904).

The amendment number, given as No. 93–56, should be changed to No. 93–57.

Editorial errors in the regulatory text of Amendment No. 93–57, page 34906, third column, are corrected by making the following changes:

§ 93.123 [Corrected]

1. In the fourth line of the first full sentence under § 93.123(c)(1), remove "and § 93.127".

2. In the third and fourth lines of the first sentence under § 93.123(c)(2), remove "and § 93.124".

§ 93.213 [Corrected]

3. In the third line under § 93.213(a)(3), and in the second line under § 93.213(a)(4), change "fourth" to "last".

Issued in Washington, DC, on September 5, 1989.

Donald P. Byrne,

Acting Assistant Chief Counsel, Regulations and Enforcement Division.

[FR Doc. 89–21138 Filed 9–7–89; 8:45 am]

BILLING CODE 4910-13-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 154, 157, 260, 284, 385 and 388

[Docket No. RM87–17–000]

Natural Gas Data Collection System; Availability of PC Print Software and Corrected Record Formats for Rate, Tariff, and Certificate Filings

Issued August 31, 1989.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of Availability of Print Software and Corrected Record Formats for Rate, Tariff, and Certificate Filings.

SUMMARY: Software to print rate, tariff and certificate filings required to be filed on electronic medium in accordance with Order Nos. 493 (53 FR 15025 (Apr. 27, 1988)), 493–A (53 FR 30027 (Aug. 10, 1988)), 493–B (53 FR 49652 (Dec. 9, 1988)) and 493–C (54 FR 21197 (May 17, 1989)) is now available on diskette. This notice also identifies corrections and revisions to the record formats for rate, tariff and certificate filings. The print software may be ordered on the enclosed Print Software Order Form.

DATE: The print software and the revised record formats are available on August 31, 1989.

ADDRESS: Requests for copies of the various print software packages should be directed to: Reference and Information Center, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Room 2200, Washington, DC 20426, (202) 357–8118.

FOR FURTHER INFORMATION CONTACT: Brooks Carter (for General Information & Tariffs) (202)357–8066, Bob Czarick (for Certificates) (202)357–8995, Craig Hill (for Rates) (202)357–8822, Office of Pipeline and Producer Regulation, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Room 6100, Washington, DC 20426.

SUPPLEMENTARY INFORMATION: The PC software to produce a hardcopy printout of rate, tariff and certificate filings, when filed in accordance with updated record formats, is now available on diskette. The record formats for rate filings were issued on May 10, 1989; the record formats for tariff and certificate filings were issued on June 8, 1989. Staff has corrected certain errors in these formats and has made certain other minor revisions to correct anomalies or to clarify the filing instructions. The latest corrections and revisions to the record formats for rate, tariff and certificate filings are described in Appendices A, B, and C respectively. Complete copies of record formats, for rates, tariffs and certificates, as revised by this notice, are available on a separate diskette.

The programming language used for the print software is ANSI 1974 Standard COBOL. The diskettes contain files which can be run on an IBM-compatible PC with at least 640K RAM and DOS 3.0 (or later version). The PC print software is available in separate packages for rates, tariffs and certificates. Each print software package consists of 3.5" (1.44MB) or 5.25" (1.2MB) double-sided, high density diskettes containing a user's guide and hard copy executable code. The tariff and certificate print software packages also contain a test data file and COBOL source code. Persons interested in the COBOL source code for the PC version of the rates print software should contact Craig Hill at (202) 357–8822 for additional information. Mainframe versions of the print software for rates, tariffs, and certificates are scheduled for release in early October.

The PC print software has been initially tested by staff. If software problems occur, the Commission staff encourages users to provide written comments as to the exact nature of the problem and submit them to Bob Czarick, Office of Pipeline and Producer

Regulation, Room 6106, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC.

This notice is available through the Commission Issuance Posting System (CIPS), an electronic bulletin board service that provides access to formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed on a 24-hour basis using a personal computer with a modem by dialing (202) 357–8997. To access CIPS, set your communications software to use 300, 1200 or 2400 baud, full duplex, no parity, eight data bits and one stop bit. The text of the notice will be available on CIPS for 30 days from the date of issuance.

In addition to publishing the text of this notice in the **Federal Register**, the Commission also provides all interested persons an opportunity to inspect or copy the contents of this notice and the revised record formats during normal business hours in the Reference and Information Center (Room 2200) at the Commission's headquarters, 825 North Capitol Street, NE., Washington, DC 20426.

The PC hard copy software packages are available from the Commission's Reference and Information Center through its photocopy contractor, LaDorn Systems Corporation, also located in Room 2200, 825 North Capitol Street, NE., Washington, DC 20426. Persons requesting the PC software packages should fill out the enclosed Print Software Order Form. The software is available without charge. However, the Commission's copy contractor has copy fees for both diskettes and hardcopy.

Lois D. Cashell,
Secretary.

Print Software Order Form

(please print or type)

Use this form to order copies of the print software packages relating to rates, tariffs, and certificate filings (Notice of Availability issued August 31, 1989).

Send to: LaDorn Systems Corporation, 825 North Capitol Street, NE., Room 2200, Washington, DC 20426 (202) 898–1151.

Appendix A—Corrections/Revisions to Rate Filing Record Formats

General Instructions

All filings by anyone to the Federal Energy Regulatory Commission, whether by mail or in person, are to be submitted to the Secretary, through the Dockets Branch, in Room 3110, 825 North Capitol Street, NE., Washington, DC 20426. Courtesy copies of filings to be delivered to other Commission offices must be left with staff in the Dockets Branch for delivery. Courtesy copies will be enclosed in an outer envelope addressed to Room 3110 with the individual's name and address on an inner envelope. Courtesy copes will be delivered to Commission staff addresses throughout the business day.

The following revisions correct errors in the final rate filing record formats dated May 10, 1989:

1. RA16: Statement F(2), Rate of Return and Cost of Capital

The number of character positions for Items 241, 242 and 243 is increased from five to six to agree with the specified format of f(6,2). Character positions for Items 243 and 244 are revised accordingly.

2. RA17: Statement F(3), Debt Capital-Individual Instruments

The format for Item 259, Net Proceeds Per Unit, is revised from f(10,2) to f(14,2). Character positions for Item 259 and subsequent are revised accordingly.

3. RA18: Statement F(3)–1, Debt Capital-Total Debt

The number of positions for Item 274 is increased from 12 to 14. Revise character positions for Item 274 and subsequent.

The number of positions for Item 280 is decreased from 14 to 6 and the entry is now a percent instead of a dollar amount. Comment column is revised to: "(%); format, f(6,2); {[(item 277)–(item 279)] ÷ (item 276)} * 100"

4. RA19: Statement F(3)(g), Amortization of Gain/Loss on Reacquired Debt and Reacquired Preferred Stock—Part 1

The comment for Item 287, Historical Amortization Factor [Future Amortization Factor] is revised to: "format, f(7, 6); when item 282 is "1" or "3", enter the quotient 1 / { [yy of item 285) — (yy of item 286)] * 12 + [mm of item 285] — 1} * 12; when item 282 is "2" or "4", enter the quotient 1 / { [yy of item 285) — (yy of item 286) — 1 —] * 12 + [(mm of item 285) — (mm of item 286) + 12] } * 12

5. RA21: Statement F(4), Preferred Stock Capital

The number of positions for Item 307 is increased from 8 to 14 and the format is now f(14,2). Revise subsequent character positions accordingly.

Item 319, Weighted Average Cost of Money-Total Only, is deleted.

Old Item Numbers 320 and 321 are renumbered 319 (Optional Gain on Reacquired Preferred for Total) and 320 (Optional Adjusted Annual Cost of all Preferred Capital), respectively. The comment for Item 320 is revised to: "amount, ($); (item 317) — (item 319)"

A new Item 321, Optional Adjusted Percent Cost of all Preferred Capital, in added in positions 210–215. The Comment column contains: "(%); format, f(6,2); (item 320) / (item 316) * 100.

6. RA22: Statement F(5) / F(5)–3(a), Common Stock Capital

The number of positions for Item 330, Title, is reduced to 35.

The format for Items 339, 340, 342, 343, 344 and 345 is revised from f(7,2) to f(12,2). Character positions for Items 330–347 are adjusted accordingly.

7. RA23: Schedule F(5)–1, Stock Dividends, Splits, Etc.

The format for Items 360 through 363 is revised from f(7,2) to f(14,2). Character positions are adjusted.

8. RA24: Schedule F(5)–2/3(b), Stock Information

The format for Items 372 through 374 is revised from f(7,2) to f(14,2). The format for Item 376 is revised from f(8,2) to f(14,2). Character positions are adjusted.

9. RA25: Schedule F(5)–4/5, Earnings Per Share/Interest Coverage

The format for Item 382 is revised from f(7,2) to f(14,2) and character positions are revised.

10. RA26: Schedule F(6) Statement of Cash Flows—Part 1

The word "Less" is deleted from the names of Items 406 and 407. A (—) sign is added after the names of Items 410 through 413 and Item 415. The (—) sign after Item 414 is deleted.

11. RA27: Schedule F(6), Statement of Cash Flows—Part 2

A (—) sign is added after the names of Items 419, 421, 424 and 431.

The (—) sign is deleted from the names of Items 420, 422, 425, 427 and 437.

12. RA28: Schedule F(6), Statement of Cash Flows—Part 3

A (—) sign is added after the name of Item 446.

13. RA30: Statement G, Gas Operating Revenues and Sales Volumes Field Sales, Non-Jurisdictional Sales and Other Sales

The note below the title is deleted.

The codes for Item 481, Total Indicator, are revised. Instead of the codes in Exhibit C, use the following codes for Item 481:

code = 0, customer data
code = 1, month data
code = 2, juris./non-juris. total
code = 3, period total
code = 4, grand total for jurisdictional
code = 5, grand total for non-jurisdictional

14. RA30: Statement G, Gas Operating Revenues and Sales Volumes Transportation of Gas for Others

The codes for Item 511, Total, are expanded as follows:

code = 0, customer data
code = 1, month data
code = 2, period total
code = 3, grand total

15. RA34: Statement G, Gas Operating Revenues and Sales Volumes Products Extracted

The character positions for the Footnote ID are revised to 149–152 and the Filler (Tape Only) begins in 153.

16. RA40: Statement H(1), Operation and Maintenance Expenses

The codes for Item 617, Type of Balance, are revised as follows:

code = 1, individual item
code = 2, total operation
code = 3, total maintenance
code = 4, total oper. and maint.
code = 5, sub-function total
code = 6, project total
code = 7, function total
code = 8, grand total

17. RA47: Schedule H(1)–2, Purchased Gas Costs—Part 6

Comments text for Item 762 is properly aligned.

18. RA49: Schedule H(2)–1, Reconciliation of Depreciable Plant

The correct positions for Items 800 and 801 are 81–92 and 93–112, respectively.

19. RA50: Statement H(3), Income Taxes

In the comments for Item 819, code = 20, delete the words "at rate specified in item 833".

In the comments column for Item 833, delete the words following "19".

20. RA51: Schedule H(3)–6, Accumulated Deferred Income Taxes

The character positions for Item 840 are revised to 52–63; Footnote ID is now in 64–67 and 68–255 are blank filled (tape only).

21. RA78, RA79 and RA80: Statement M, Parts 1–3

In Items 1311, 1331 and 1354 (Year Reported), "change from" is deleted from the comments for code=2.

22. RB05: Schedule N–4, Rate of Return and Cost of Capital

(Changes are the same as for RA16)

23. RB06: Schedule N–5, Operation and Maintenance

(Changes are the same as for RA40)

24. RB08: Schedule N–7, Income Taxes

(Changes are the same as for RA50)

25. Exhibit A: Magnetic Tape Procedures

The correct prefix for the file name is "RF", not "RA". The example at the end of Exhibit A is incorrect.

Appendix B—Corrections/Revisions to Tariff Filing Record Formats

The General Instruction for submitting filings to FERC is revised as indicated in Appendix A.

The following revisions correct errors in the final tariff filing record formats dated June 8, 1989:

1. Tariff sheet pagination guidelines

A new Exhibit C is added to the tariff sheet record formats and contains voluntary guidelines for numbering tariff sheets. These are staff guidelines only and do not constitute revisions to the regulations in § 154.33(d)(2). The guidelines follow this section.

The previous Exhibit C, Hard Copy Formats for Tariff Sheets, is now Exhibit D.

2. TF03: Tariff Sheet Header Record Number 1

Informal comments and the pagination guidelines for inserted tariff sheets (No. 6 on the guidelines), there is now a possibility that "Sheet Number" may exceed six characters. Sheet Number will be increased to eight positions (char. pos. 5–12) and the subsequent position locations in TF03 are increased by 2.

3. TF04: Tariff Sheet Header Record Number 2

This record is revised to include two items which are needed for FERC processing of tariff sheets which supersede a range of tariff sheets. The new items indicate the first and last superseded sheet numbers. "Superseded Sheet Number" is revised to "Superseded Sheet ID. Refer to General Instruction 8 in the tariff record formats for an example of a tariff sheet superseding a range of sheets. In that example, the items in TF04 have the following values:

First Superseded Sheet No.: 10
Last Superseded Sheet No.: 39
Superseded Sheet ID: Sheet Nos. 10 through 39

The text of the tariff sheet will include a list of the specific sheets that are superseded.

Appendix C—Corrections/Revisions to Certificate Filing Record Formats

Introduction

After the release of the Certificate Formats on June 8, 1989, several typographical errors were brought to our attention. Staff also had several informal discussions with pipeline company personnel regarding anomalies in the formats, the instructions, and the exhibits. Revised pages issued with this notice reflect these discussions and specific indications of changes, and clarifications to the certificate formats detailed below. Finally, Staff has performed exhaustive tests on the print software being issued today with this notice. Several modifications to the instructions and notations on the formats have been made in this regard.

General Information

I. Purpose

The words "and Subpart H" are added after Subpart G.

III. What to Submit

The word "Selected" is added to the title, "Items not required on Electronic Media." This indicates that the Commission has the flexibility to capture other sections of the regulations under these subparts or other subparts of the regulations with respect to certificated activities on electronic media.

V. Where to Submit

"Room 3110" is added to the address of the Commission. Since this is also the address for hand deliveries, that address is deleted.

General Instructions

1(B): The first sentence in the second paragraph is modified to indicate that the Regulation Codes as found in Exhibit C do not have to be inserted into FILE3 (the write or composition file) in sequential order.

1(C): This paragraph and the table are modified to indicate a new maximum number of print specifications for FILE3 as follows:

Page orientation	Maximum line length (Char.)			Max. lines per page
	10 cpi	12 cpi	15 cpi	6 lpi
Vertical (Portrait)	70	84	105	54
Horizontal (Landscape)	100	120	150	42

These modifications of line length in characters per inch (cpi) will fix the margins for both portrait and landscape orientations. For portrait orientation (vertical), there will be a one inch (1") margin at the top, on the left (binding edge), and the bottom, and a one-half inch (½") margin on the right. For landscape orientation, there will be a one inch (1") margin at the top (binding edge) and a one-half inch (½") margin on the left, right, and bottom of the page.

13. Pipeline Facility/Segment Number:

The words, "within a project or projects," are deleted. This will clarify the intent that facility/segments in Exhibit K must be numbered in the following manner so as to coincide with the segment number in Schedule/Record CA/03, the Environmental Report (Part B—Environmental Factors). The following example has been added to this instruction:

For example, Exhibit K project numbers and facility/segment numbers must use the following convention:

Project Number 01; Facility/Segment Number 01, 02, 03, 04:

Project Number 02; Facility/Segment Number 05, 06, 07:

Project Number 03; Facility/Segment Number 08, 09, 10: and so on.

25. Joint Applications:

This instruction is completely revised to read as follows:

Each company in a joint application will file its own structured data (FILE1), accompanying footnotes (FILE2), and a driver file (FILE3) to produce the applicant's hard copy submission. Each company's Schedule/Record CA/01 must contain a footnote explaining, in detail, the joint nature of the application and must cross-reference the other joint applicants and their respective file names. Also, the submittal letter with the application should identify the joint applicants and file names to avoid confusion when submitting the proper filing fee for such an application.

Schedule/Records

CA/01: General Information

Item No. 3: The comment section is revised to read as follows: Year, Month, and Day the application is filed (yymmdd)

Item No. 10e:

The comment section is revised to include "See NOTE 1A" and a new NOTE 1A is added to Record CA/01:

Note 1A: For applications which contain new facilities and proposed abandonments, Item 10e should indicate a net amount of capacity. Indicate in a footnote what the gross amounts of capacity are for the new facilities and the abandoned capacity.

Character Positions: Starting with Item No. 10e, the character positions have been corrected.

CA/10: Exhibit K, Cost Factors & Total Costs

Character Positions: The character positions for the Footnote ID have been corrected to 196–199 and the Filler has been revised to positions 200–255.

Exhibits

Exhibit C: Certificate Applications: Filing Requirements

Regulation Code 121: Structured Data Records entry is corrected to "CA/09–CA/10".

Regulation Code 403: Regulation Section and Exhibit/Information to be reported column entries are corrected to "284.224, Certain Transportation, Sales, and Assignments by Local Distribution Companies."

Regulation Code 600 (New): This is a new code for SUBPART H, Section 284.244, Application Requirements for Interstate Pipelines.

Exhibit H: Hard Copy Formats for Certificate Applications

Printout of Customer/Shipper and Services, Schedule 1: The third line in the first note is corrected to indicate Items [11], [16], [17], and [18].

Printout of Exh. K—Summary of Project Estimates: The words "New" and "Abandonment" have been added to the "Total" line, respectively, for both reports.

Printout of Exh. K—Detail of Est. Facilities Costs: The note to this report has been modified to label pipe diameter and wall thickness. Also Item 113, code = 4 has been paired with Item 113, code = 8.

BILLING CODE 6717-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 81

[Docket Nos. 76N–0366 and 87N–0182]

Listing of Color Additives Subject to Certification; D&C Red No. 36

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is removing D&C Red No. 36 from the regulations (21 CFR 81.1(b) and 81.27(d)) that provide for the provisional listing of color additives. This removal corrects an inadvertent error that continued to include D&C Red No. 36 in these regulations after the confirmed effective date for the permanent listing of D&C Red No. 36 for general use in drugs and cosmetics, except for use in the area of the eye.

EFFECTIVE DATE: September 8, 1989.

FOR FURTHER INFORMATION CONTACT: Gerad L. McCowin, Center for Food and Safety and Applied Nutrition (HFF–330), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5676.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of August 2, 1988 (53 FR 29024), FDA published a final rule permanently listing D&C Red No. 36 for general use in drugs and cosmetics, except for use in the area of the eye. Among other things, the rule amended the tables of 21 CFR 81.1(b) and 81.27(d) by removing the entries for "D&C Red No. 36" from these regulations that provisionally listed the color additive. Provisional listing of D&C Red No. 36 was no longer necessary once the agency issued final regulations that permanently listed the color additive for the same uses for which the color additive was provisionally listed. The final rule was to be effective on September 2, 1988.

On October 28, 1988 (53 FR 43682), FDA published a final rule confirming the effective date of September 2, 1988, for the permanent listing of D&C Red No. 36; however, the agency stayed until December 27, 1988, one provision in the permanent listing regulations to which an objection had been made. Because of this stay, the agency also postponed the closing date of the provisional listing for D&C Red No. 36 until December 27, 1988. This postponement permitted the continued use of the color additive pending resolution of the one provision in the permanent listing to which an objection has been filed.

On December 27, 1988 (53 FR 52129), FDA terminated the stay of the one provision noted in the October 28, 1988, final rule (53 FR 43682) and amended the regulation for the permanent listing of D&C Red No. 36 to modify a limitation on use in ingested drugs. The effective date of the amended final rule was January 27, 1989, which provided time for interested persons to submit objections to the amendment. In the same issue of the **Federal Register**, FDA published a final rule (53 FR 52130) that postponed the closing date for the provisional listing of D&C Red No. 36 until February 27, 1989, so that FDA could respond to any objection received regarding the amended final rule permanently listing D&C Red No. 36.

On March 6, 1989 (54 FR 9200), the agency published a final rule announcing that no objections to the amended final rule had been submitted and confirming the effective date of January 27, 1989, for the amended final rule permanently listing D&C Red No. 36 for general use in drugs and cosmetics, except in the area of the eye. Inadvertently, FDA neglected to remove the entries from the regulations (tables in 21 CFR 81.1(b) and 81.27(d)) that provided for the provisional listing of D&C Red No. 36 until February 27, 1989. Although the passage of this date terminated the provisional listing of D&C Red No. 36, the agency's policy has been to remove references to color additives in the provisionally listed regulations when the color additives are either permanently listed or when petitions for such permanent listing are denied.

Therefore, FDA concludes that 21 CFR 81.1(b) and 81.27(d) should be amended to remove the entry for D&C Red No. 36 from each table. This action does not affect the permanent listing of this color additive for general drug and cosmetic use.

FDA further concludes that it is unnecessary to provide an opportunity for the filing of objections to this action because this rule is editorial in nature, and because the transitional provisions of the color additve amendments provide for the issuance of a final rule without providing an opportunity for objection.

List of Subjects in 21 CFR Part 81

Color additives, Cosmetics, Drugs.

Therefore, under the Transitional Provisions of the Color Additive Amendments of 1960 to the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR Part 81 is amended as follows:

PART 81—GENERAL SPECIFICATIONS AND GENERAL RESTRICTIONS FOR PROVISIONAL COLOR ADDITIVES FOR USE IN FOODS, DRUGS, AND COSMETICS

1. The authority citation for 21 CFR Part 81 continues to read as follows:

Authority: Secs. 701, 706, 52 Stat. 1055–1056 as amended, 74 Stat. 399–407 as amended (21 U.S.C. 371, 376); Title II, Pub. L. 86–618; sec. 203, 74 Stat. 404–407 (21 U.S.C. 376, note); 21 CFR 5.10.

§ 81.1 [Amended]

2. Section 81.1 *Provisional lists of color additives* is amended in the table of paragraph (b) by removing the entry for "D&C Red No. 36".

§ 81.27 [Amended]

3. Section 81.27 *Conditions of provisional listing* is amended in the table in the introductory text of paragraph (d) by removing the entry for "D&C Red No. 36".

Dated: August 30, 1989.

Ronald G. Chesemore,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 89–21068 Filed 9–7–89; 8:45 am]

BILLING CODE 4160-01-M

DEPARTMENT OF STATE

22 CFR Part 136

[Public Notice 1126; 108,889]

Personal Property Disposition at Posts Abroad

AGENCY: Department of State.

ACTION: Final rule.

SUMMARY: This action promulgates the final rule setting forth regulations governing disposition of personal property abroad by certain United States Government employees and contractors, and members of their families. As required by section 303(a) of the State Department's Basic Authorities Act (22 U.S.C. 4343(a)), the purpose of these regulations is to ensure that employees and members of their families do not personally profit from transactions with persons not entitled to exemptions from import restrictions, duties, or taxes.

EFFECTIVE DATE: August 21, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. James Merable, Office of the Comptroller, Department of State, telephone 703–875–6918.

SUPPLEMENTARY INFORMATION: On June 20, 1988, the State Department published interim regulations (53 FR 23188) on Personal Property Disposition at Posts Abroad. The comment period ended on August 20, 1988. Comments were received from Foreign Service posts abroad, USG employees who serve abroad, an employee organization (American Foreign Service Association or "AFSA"), and several USG agencies whose employees are affected. Most of the comments received were critical of parts of the legislation, asked for clarification, or concerned tax implications. Only one minor change has been made to the interim regulations based on comments received. Comments are summarized below.

Section 136.4(g) of the interim regulations stipulated that for the purposes of computing profits on property dispositions, proceeds received and costs incurred in a foreign currency shall be valued in US dollars at the time of receipt or payment. Use of these procedures was questioned by commenters. The section has been amended to provide that such conversion is only required when the purchase and sale occur in two different currencies. Profit on transactions involving goods both purchased and sold in the local currency will be calculated in the local currency rather than converting each part of the transaction to dollars before computing profit, as is required in all other transactions.

A number of comments were received which criticized the interim rule and the legislation as being unduly restrictive, or inequitable for USG employees. No regulatory relief could be provided along those lines, however, since the interim rule tracked the statute closely. The regulations already provide flexibility for chiefs of mission where the statute allows it.

For instance, it was asked if the rule could be changed to include interest or extraordinary maintenance expense in the calculation of the base price of an item. This could not be accomplished since base price (basis) and profit are defined in the statute. Similarly, the regulations cannot provide for averaging losses and profits on vehicle sales, as requested, since the law contains no such provision. Nor can they accommodate a request from AFSA and others to permit employees to retain any proceeds from the sale of personal property up to the fair replacement cost of the item sold.

The statute excludes from the definition of profit amounts contributed as charitable contributions. Commenters complained that since the IRS considers such receipts as realizable income, employees will be subject to taxes on all or part of money given to charity which they were required by the statute not to keep. The statute did not address the tax liabilities of employees, however, and does not allow retention of any profits, even to pay taxes on a capital gain, although this was suggested by several organizations and individuals.

E.O. 12291, Federal Regulations

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulations.

Regulatory Flexibility Act

These rules will not have a significant impact on a substantial number of small entities because they will affect only Federal employees and agencies.

Paperwork Reduction Act

These regulations do not require additional reporting under the criteria of the Paperwork Reduction Act of 1980.

List of Subjects in 22 CFR Part 136

Government employees, Foreign relations.

Accordingly, new part 136 is added to title 22, Code of Federal Regulations, as follows:

PART 136—PERSONAL PROPERTY DISPOSITION AT POSTS ABROAD

Sec.

136.1 Purpose.
136.2 Authority.
136.3 Definitions.
136.4 Restrictions on dispositions of personal property.
136.5 Chief of mission policies, rules or procedures.
136.6 Contractors.

Authority: 22 U.S.C. 4341.

§ 136.1 Purpose.

The primary purpose of these regulations is to ensure that employees and members of their families do not profit personally from sales or other transactions with persons who are not themselves entitled to exemption from import restrictions, duties, or taxes.

§ 136.2 Authority.

Section 303(a) of the State Department Basic Authorities Act of 1956 authorizes the Secretary of State to issue regulations to carry out the purposes of Title III of that Act.

§ 136.3 Definitions.

(a) *Basis* of an item shall include the initial price paid (or retail value at the time of acquisition if acquired by gift), inland and overseas transportation costs (if not reimbursed by the United States Government), shipping insurance, taxes, customs fees, duties or other charges, and capital improvements, but shall not include insurance on an item while in use or storage, maintenance, repair or related costs, or financing charges.

(b) *Charitable contribution* means a contribution or gift as defined in section 170(c) of the Internal Revenue Code, or other similar contribution or gift to a bona fide charitable foreign entity as determined pursuant to policies, rules or procedures issued by the chief of mission pursuant to § 136.5(b).

(c) *Chief of mission* has the meaning given such term by section 102(a) of the Foreign Service Act of 1980 (22 U.S.C. 2902(3).

(d) *Contractor* means: (1) An individual employed by personal services contract pursuant to section 2(c) of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2669(c)), pursuant to section 636(a)(3) of the Foreign Assistance Act of 1961 (22 U.S.C. 2396(a)(3)), or pursuant to any other similar authority including, in the case of an organization performing services under such authority, an individual involved in the performance of such service; and (2) any other individual or firm that enjoys exemptions from import limitations, customs duties or taxes on personal property from a foreign country in connection with performance of a contract for goods or services when such contract is with the United States Government or an agency or instrumentality thereof or when such contract is directly financed by grant assistance from the United States Government or an agency or instrumentality thereof and the individual or firm is a party to the contract, a subcontractor, or an employee of a contractor or subcontractor.

(e) *Employee* means an individual who is under the jurisdiction of a chief of mission to a foreign country as provided under section 207 of the Foreign Service Act of 1980. (22 U.S.C. 3927) and who is—

(1) An employee as defined by section 2105 of title 5, United States Code;

(2) An officer or employee of the United States Postal Service or of the Postal Rate Commission;

(3) A member of a uniformed service who is not under the command of an area military commander, or

(4) An expert or consultant as authorized pursuant to section 3109 of title 5, United States Code, with the United States or any agency, department, or establishment thereof; but is not a national or permanent resident of the foreign country in which employed.

(f) *Family member* means any member of the family of an employee who is entitled to exemption from import limitation, customs duties, or taxes which would otherwise apply by virtue of his or her status as a dependent or member of the household of the employee.

(g) *Foreign country* means any country or territory, excluding the United States, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the Trust Territory of the Pacific Islands, American Samoa, Guam, the Virgin Islands, and other territories and possessions of the United States.

(h) Except as otherwise provided by a chief of mission in policies, rules or procedures issued pursuant to § 136.5(b), an item shall be deemed of "minimal value" if its acquisition cost in U.S. dollars (or retail value if received as a gift) is within the limit determined by the Administrator of General Services for "minimal value" of foreign gifts under 5 U.S.C. 7342, currently $180. For purposes of determining "minimal value," all constitutent parts of components of an audio or visual system, automobile, boat, computer system, or other integrated machine, system or item of equipment must be valued as a single item even if acquired separately, except that spare or superseded parts (e.g., an old set of tires that has been replaced on vehicle) may be valued as separate items.

(i) *Personal property* means any item of personal property, including automobiles, computers, boats, audio and video equipment and any other items acquired for personal use, except that items properly determined to be of "minimal value" shall not be subject to limitations on disposition except for purposes of § 136.4(d) or as prescribed in policies, rules or procedures issued by a chief of mission.

(j) *Profit* means any proceeds (including cash and other valuable consideration but not including amounts of such proceeds given as charitable contributions) for the sale, disposition or assignment of personal property in excess of the basis for such property.

§ 136.4 Restrictions on dispositions of personal property.

(a) An employee or family member shall not sell, assign or otherwise dispose of personal property within a foreign country except with the prior written approval of the chief of mission or designee, except where the category of dispositions has been authorized to be undertaken without prior written approval in policies, rules or procedures issued by the chief of mission (cf. § 136.5(b)(1)).

(b) An employee or family member shall not retain any profit from the sale, assignment or other disposition within a foreign country of personal property that was imported into or purchased in that foreign country and that, by virtue of the official status of the employee, was exempt from import restrictions, customs duties, or taxes which would otherwise apply, when such sale, assignment or other disposition is made to persons not entitled to exemptions from import restrictions, duties, or taxes. An employee or family member shall not profit from an indirect disposition to persons not entitled to such exemptions, such as sale through a third country diplomat acting as a middleman, where the employee or family member knows or should know that the property is being acquired by the third party for resale to persons not entitled to exemptions, except that this restriction shall not apply to sales of personal property to official agencies of the foreign country in accordance with the laws or regulations of that country.

(c) Profits obtained from dispositions of personal property by an employee or family member that cannot be retained under paragraph (b) of this section including any interest earned by the employee or family member on such profits, shall be disposed of within 90 days of receipt by contribution or gift as defined in section 170(c) of the Internal Revenue Code or by other similar contribution or gift to a bona fide charitable foreign entity as designated by the chief of mission pursuant to § 136.5(b)(11) of this part.

(d) Except as authorized in advance by the chief of mission on a case-by-case basis, no employee or family member shall sell, assign or otherwise dispose of personal property within a foreign country that was not acquired for bona fide personal use. There shall be a presumption that property that is new, unused or held by the employer or family member in unusual or commercial quantities was not acquired for bona fide personal use. For purposes of this subsection, there is no exemption for items of minimal value § 136.3(h)).

(e) No employee or family member shall import, sell, assign or otherwise dispose of personal property within a foreign country in a manner that violates the law or regulations of that country or governing international law.

(f) Violations of the restrictions or requirements of paragraphs (a) through (e) of this section shall be grounds for disciplinary actions against the employee in accordance with the employing agency's procedures and regulations. Employees shall be responsible for ensuring compliance with these regulations by family members.

(g) For purposes of computing profits on personal property dispositions subject to these regulations, where acquisition and disposition of the property were transacted in different currencies, proceeds received and costs incurred in a foreign currency shall be valued in United States dollars at the time of receipt or payment at the rate of exchange that was in effect for reverse accommodation exchanges at U.S. missions at the time of such receipt or payment. Where property was acquired and sold in the same currency, no conversion is required.

§ 136.5 Chief of mission policies, rules or procedures.

(a) Each chief of mission shall establish a procedure under which employees may request approval for the sale of personal property and for conversion of proceeds of such sale from local currency into U.S. dollars, if applicable. This procedure may be modified to meet local conditions, but must produce a documentary record to be held by the post of the following:

(1) The employee's signed request for permission to sell personal property, and, if applicable, to convert local currency proceeds to U.S. dollars;

(2) A description of each item of personal property having more than minimal value, and the cost basis and actual sales price for each item;

(3) All profits received and whether profit is retainable;

(4) Donation to charities or other authorized recipients of non-retainable profits;

(5) Approvals to sell and, if applicable, to exchange proceeds, with any restrictions or refusals of the employee's request noted, signed by the chief of mission or designee; and

(6) For privately owned vehicle transactions, data on purchaser and statement that customs requirements have been met and title has been transferred or arranged with an agent identified on document.

(b) In order to ensure that due account is taken of local conditions, including applicable laws, markets, exchange rate factors, and accommodation exchange facilities, the chief of mission to each foreign country is authorized to establish policies, rules, and procedures governing the disposition of personal property by employees and family members in that country under the chief of mission's jurisdiction. Policies, rules and procedures issued by the chief of mission shall be consistent with the general restrictions set forth in § 136.4 and may include at least the following:

(1) Identification of categories of dispositions (e.g., sales of minimal value items) that may be made without prior written approval;

(2) Identification of categories of individuals or entities to whom sales of personal property can be made without restrictions on profits (e.g., other employees, third country diplomats), individuals or entities to whom sales can be made but profits not retained, and individuals or entities to whom sales may not be made;

(3) Requirements to report the total estimated and actual proceeds for all minimal value items, even if such items are otherwise exempted from limitations on profits of sale;

(4) Categories of items of personal property excluded from restrictions on disposition because generally exempt from taxation and import duties under local law;

(5) More restrictive definition of "minimal value" (see § 136.3(h) of this part);

(6) Limitations on manner of disposition (e.g., restrictions on advertising or yard sales);

(7) Limitations on total proceeds that may be generated by dispositions of personal property, including limitations on proceeds from disposition of "minimal value" items;

(8) Limitations on total profits that may be generated by dispositions of personal property, including limitations on profits from dispositions of "minimal value" items;

(9) Limitations on total proceeds from dispositions of personal property that may be converted into dollars by reverse accommodation exchange;

(10) Limitations on the timing and number of reverse accommodation exchanges permitted for proceeds of dispositions of personal property (e.g., only in last six months of tour and no more than two exchange conversions);

(11) Designation of bona fide charitable foreign entities to whom an employee or family member may donate profits that cannot be retained under these regulations.

(12) Designation of post officials authorized to approve on behalf of chief of mission employee requests for permission to sell personal property and requests to convert local currency proceeds of sale to U.S. dollars by reverse accommodation exchange.

(c) All policies, rules, and procedures that are issued by the chief of mission pursuant to paragraphs (a) and (b) of this section shall be announced by notice circulated to all affected mission employees and copies of all such policies, rules and procedures shall be made readily accessible to all affected employees and family members.

(d) Violations of restrictions or requirements established by a chief of mission in policies, rules, or procedures issued by a chief of mission pursuant to paragraphs (a) and (b) of this section shall be grounds for disciplinary actions against the employee in accordance with the employing agency's procedures and regulations. Employees shall ensure compliance by family members with policies, rules or procedures issued by the chief of mission.

§ 136.6 Contractors.

To the extent that contractors enjoy importation or tax privileges in a foreign country because of their contractual relationship to the United States Government, contracting agencies shall include provisions in their contracts that require the contractors to observe the requirements of these regulations and all policies, rules, and procedures issued by the chief of mission in that foreign country.

Lawrence S. Eagleburger,
Acting Secretary of State.

BILLING CODE 4710-15-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 8260]

RIN 1545–AJ92

Income Tax; Limitation on Taxpayer's Basis or Inventory Cost in Property Imported From Related Persons

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final Income Tax Regulations relating to the limitation on taxpayer's basis or inventory cost in property imported from a related person. This limitation is contained in section 1059A of the Internal Revenue Code of 1986 and was enacted by the Tax Reform Act of 1986. These regulations provide the public with the guidance needed to comply with section 1059A.

DATES: The regulations are effective with respect to imported property if the entry documentation required to be filed to obtain the release of the property from the custody of the United States Customs Service was filed after March 18, 1986, except that the regulations will not apply to property imported into the United States in an open transaction as described in § 1.1059A(c)(9), provided the entry documentation is filed prior to September 3, 1987.

FOR FURTHER INFORMATION CONTACT: W. Edward Williams of the Office of the Associate Chief Counsel (International) within the Office of Chief Counsel, Internal Revenue Service, Room 3319, 950 L'Enfant Plaza, Washington, DC 20024, Attention: CC:INTL:1 (INTL–960–86). Telephone 202–287–4851 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

This document contains amendments to the Income Tax Regulations (26 CFR part 1) under section 1059A of the Internal Revenue Code of 1986, as added by section 1248 of the Tax Reform Act of 1986. These regulations are issued under the authority contained in section 7805 of the Internal Revenue Code of 1986 (68A Stat. 917, 26 U.S.C. 7805).

On September 3, 1987, the **Federal Register** published proposed amendments to the Income Tax Regulations (26 CFR part 1) under section 1059A of the Internal Revenue Code of 1986 (52 FR 33427) [INTL–960–86, 1987–43 I.R.B. 36].

Section 1059A provides that a U.S. taxpayer that imports property into the U.S. in a transaction (directly or indirectly) from a person or persons related to the taxpayer, within the meaning of section 482 of the Code, may not claim, for purposes of computing the basis or inventory cost of the property, a greater cost than the amount of the cost taken into account for customs valuation purposes. However, because the rules for determining the value of imported property for customs purposes differ in some respects from the rules for determining cost basis or inventory cost for income tax purposes, certain adjustments to the customs value are required to determine the limitation to cost basis or inventory cost for income tax purposes. Congress was aware of the need for these adjustments, and the legislative history of section 1059A contemplates that the Internal Revenue Service will provide rules for making

necessary adjustments to the customs value. These regulations provide rules for adjusting the value utilized for customs value so that the customs value, as adjusted, will be the limitation under section 1059A for purposes of computing the basis or inventory cost of property imported by a U.S. taxpayer from a related person. These regulations have no applicability to the customs regulations issued under Title 19 of the Code of Federal Regulations and have no relevance in interpreting those regulations.

Numerous written comments were received with respect to the proposed regulations. The significant points raised by the comments and the changes made to the proposed amendments are discussed in the remainder of the preamble. After consideration of the comments regarding the proposed amendments, the amendments are adopted as modified by this Treasury decision.

Discussion of Major Comments and Revised Amendments

Section 1.1059A–1

In response to comments, paragraph (c)(6) has been clarified to state that the section 1059A limitation may be applied by the importer at any point in time after importation. Thus, a taxpayer is not required to compute an inventory amount which includes all capital expenses under section 471 prior to the application of section 1059A. The section 1059A limitation may be applied at any point after importation as long as costs that are taken into account for income tax valuation are also included in the comparative customs valuation.

In addition, paragraph (c)(1) has been revised to state that property subject only to the harbor maintenance tax imposed by 26 U.S.C. 4461 and property subject to both the user fee under 19 U.S.C. 58(c) and the harbor maintenance tax is not subject to the section 1059A limitation.

A suggestion was made that paragraph (c)(2) be revised to permit an adjustment to the section 1059A limitation for the value of assists when the importer does not allocate the value of assists to individual items but rather reports the total value of the assists for customs purposes on a periodic basis and includes the total value of the assists in the dutiable value of one item. The Internal Revenue Service was advised by the Customs Service that the periodic reporting of the value of assists is permitted under the circumstances described in 19 CFR 152.103(e). Therefore, paragraph (c)(2) has been revised to permit adjustments to customs values where the value of assists has been reported on a periodic basis in accordance with 19 CFR 152.103(e).

Paragraph (c)(9) has been revised to eliminate the requirement that a taxpayer may average customs values only in cases involving open transactions in which there has been a good faith overvaluation of one article and a good faith undervaluation of a second article. We were advised by the Customs Service that it does not recognize the concept of "good faith under- and overvaluation of merchandise" and that in cases where the transaction value depends on subsequent resale price, for example, an alternative or constructive method of valuation will be used. A corresponding revision was made in the example in paragraph (c)(9).

Special Analyses

It has been determined that these regulations are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, these regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

It has also been determined that these regulations are not a major rule as defined in Executive Order 12291 and that a regulatory impact analysis is therefore not required.

Drafting Information

The principal author of these final regulations is W. Edward Williams of the Office of Associate Chief Counsel (International), Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and the Treasury Department participated in developing these regulations, both on matters of substance and style.

List of Subjects in 26 CFR 1.1001–1 Through 1.1102–3

Income taxes, Gain and loss, Basis, Nontaxable exchanges.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—[AMENDED]

Paragraph 1. The authority citation for part 1 continues to read in part:

Authority: 26 U.S.C. 7805. * * *

Par. 2. The following new § 1.1059A–1 is added to read as follows:

§ 1.1059A–1 Limitation on taxpayer's basis or inventory cost in property imported from related persons.

(a) *General rule.* In the case of property imported into the United States in a transaction (directly or indirectly) by a controlled taxpayer from another member of a controlled group of taxpayers, except for the adjustments permitted by paragraph (c) (2) of this section, the amount of any costs taken into account in computing the basis or inventory cost of the property by the purchasing U.S. taxpayer and which costs are also taken into account in computing the valuation of the property for customs purposes may not, for purposes of the basis or inventory cost, be greater than the amount of the costs used in computing the customs value. For purposes of this section, the terms "controlled taxpayer" and "group of controlled taxpayers" shall have the meaning set forth in § 1.482–1(a).

(b) *Definitions*—(1) *Import.* For purposes of section 1059A and this section only, the term "import" means the filing of the entry documentation required by the U.S. Customs Service to secure the release of imported merchandise from custody of the U.S. Customs Service.

(2) *Indirectly.* For purposes of this section, "indirectly" refers to a transaction between a controlled taxpayer and another member of the controlled group whereby property is imported through a person acting as an agent of, or otherwise on behalf of, either or both related persons, or as a middleman or conduit for transfer of the property between a controlled taxpayer and another member of the controlled group. In the case of the importation of property indirectly, an adjustment shall be permitted under paragraph (c)(2) of this section for a commission or markup paid to the person acting as agent, middleman, or conduit, only to the extent that the commission or markup: is otherwise properly included in cost basis or inventory cost; was actually incurred by the taxpayer and not remitted, directly or indirectly, to the taxpayer or related party; and there is a substantial business reason for the use of a middleman, agent, or conduit.

(c) *Customs value*—(1) *Definition.* For purposes of this section only, the term "customs value" means the value required to be taken into account for purposes of determining the amount of any customs duties or any other duties which may be imposed on the importation of any property. Where an item or a portion of an item is not subject to any customs duty or is subject to a free rate of duty, such item or portion of such item shall not be subject to the provisions of section 1059A or this section. Thus, for example, the portion of an item that is an American good returned and not subject to duty (items 806.20 and 806.30, Tariff Schedules of the United States, 19 U.S.C. 1202); imports on which no duty is imposed that are valued by customs for statistical purposes only; and items subject to a zero rate of duty (19 U.S.C. 1202, General Headnote 3) are not subject to section 1059A or this section. Also, items subject only to the user fee under 19 U.S.C. 58(c), or the harbor maintenance tax imposed by 26 U.S.C. 4461, or only to both, are not subject to section 1059A or this section. This section imposes no limitation on a claimed basis or inventory cost in property which is less than the value used to compute the customs duty with respect to the same property. Section 1059A and this section have no application to imported property not subject to any customs duty based on value, including property subject only to a per item duty or a duty based on volume, because there is no customs value, within the meaning of this paragraph, with respect to such property.

(2) *Adjustments to customs value.* To the extent not otherwise included in customs value, a taxpayer, for purposes of determining the limitation on claimed basis or inventory cost of property under this section, may increase the customs value of imported property by the amounts incurred by it and properly included in inventory cost for—

(i) Freight charges,

(ii) Insurance charges,

(iii) The construction, erection, assembly, or technical assistance provided with respect to, the property after its importation into the United States, and

(iv) Any other amounts which are not taken into account in determining the customs value, which are not properly includible in customs value, and which are appropriately included in the cost basis or inventory cost for income tax purposes. See § 1.471–11 and section 263A.

Appropriate adjustments may also be made to customs values when the taxpayer has not allocated the value of assists to individual articles but rather has reported the value of assists on a periodic basis in accordance with 19 CFR 152.103(e). When 19 CFR 152.103(e) has been utilized for customs purposes, the taxpayer may adjust his customs values by allocating the value of the assists to all imported articles to which the assists relate. To the extent that an amount attributable to an adjustment permitted by this section is paid by a controlled taxpayer to another member of the group of controlled taxpayers, an adjustment is permitted under this section only to the extent that the amount incurred represents an arm's length charge within the meaning of § 1.482–1(d)(3).

(3) *Offsets to adjustments.* To the extent that a customs value is adjusted under paragraph (c)(2) of this section for purposes of calculating the limitation on claimed cost basis or inventory cost under this section, the amount of the adjustments must be offset (reduced) by amounts that properly reduce the cost basis of inventory and that are not taken into account in determining customs value, such as rebates and other reductions in the price actually incurred, effected between the purchaser and related seller after the date of importation of the property.

(4) *Application of section 1059A to property having dutiable and nondutiable portions.* When an item of imported property is subiect to a duty upon the full value of the imported article, less the cost or value of American goods returned, and the taxpayer claims a basis or inventory cost greater than the customs value reported for the item, the claimed tax basis or inventory cost in the dutiable portion of the item is limited under section 1059A and this section to the customs value of the dutiable portion under paragraph (c)(1). The claimed tax basis or inventory cost in the nondutiable portion of the item is determined by multiplying the customs value of the nondutiable portion by a fraction the numerator of which is the amount by which the claimed basis or inventory cost of the item exceeds the customs value of the item and the denominator of which is the customs value of the item and adding this amount to the customs value of the nondutiable portion of the item. The claimed tax basis or inventory cost in the dutiable portion is determined by multiplying the customs value of the dutiable portion by a fraction the numerator of which is the amount by which the claimed basis or inventory cost of the item exceeds the customs value of the item and the denominator of which is the customs value of the item and adding this amount to the customs value of the dutiable portion of the item. However, the taxpayer may not claim a tax basis or inventory cost in the dutiable portion greater than the customs value of this portion of the item.

(5) *Allocation of adjustments to property having dutiable and nondutiable portions.* When an item of imported property is subject to a duty upon the full value of the imported article, less the cost or value of American goods returned, and the taxpayer establishes that the customs value may be increased by adjustments permitted under paragraph (c)(2) of this section for purposes of the section 1059A limitation, the taxpayer's basis or inventory cost of the dutiable portion of the item is determined by multiplying the customs value of the dutiable portion times the percentage that the adjustments represent of the total customs value of the item and adding this amount to the customs value of the dutiable portion of the item. The taxpayer's basis or inventory cost of the nondutiable portion of the item is determined in the same manner. The amount so determined for the dutiable portion of the item is the section 1059A limitation for this portion of the item.

(6) *Alternative method of demonstrating compliance.* In lieu of calculating all adjustments and offsets to adjustments to customs value for an item of property pursuant to paragraph (c) (2) and (3) of this section, a taxpayer may demonstrate compliance with this section and section 1059A by comparing costs taken into account in computing basis or inventory costs of the property and the costs taken into account in computing customs value at any time after importation, provided that in any such comparison the same costs are included both in basis or inventory costs and in customs value. If, on the basis of such comparison, the basis or inventory cost is equal to or less than the customs value, the taxpayer shall be deemed to have met the requirements of this section and section 1059A.

(7) *Relationship of section 1059A to section 482.* Neither this section nor section 1059A limits in any way the authority of the Commissioner to increase or decrease the claimed basis or inventory cost under section 482 or any other appropriate provision of law. Neither does this section or section 1059A permit a taxpayer to adjust upward its cost basis or inventory cost for property appropriately determined under section 482 because such basis or inventory cost is less than the customs value with respect to such property.

(8) *Illustrations.* The application of this section may be illustrated by the following examples:

Example (1). Corporation X, a United States taxpayer, and Y Corporation are members of a group of controlled corporations. X pays $2,000 to Y for merchandise imported into the United States and an additional $150 for ocean freight and insurance. The customs value of the snipment

is determined to be the amount actually paid by X ($2,000) and does not include the charges for ocean freight and insurance. For purposes of computing the limitation on its inventory cost for the merchandise under section 1059A and this section, X is permitted, under paragraph (c)(2) of this section, to increase the customs value ($2,000) by amounts it paid for ocean freight and insurance charges ($150). Thus, the inventory cost claimed by X in the merchandise may not exceed $2,150.

Example (2). Assume the same facts as in Example (1) except that, subsequent to the date of importation of the merchandise, Y grants to X a rebate of $200 of the purchase price. At the time of sale, the rebate was contingent upon the volume of merchandise ultimately bought by X from Y. The value of the merchandise, for customs purposes, is not decreased by the rebate paid to X by Y. Therefore, the customs value, for customs purposes, of the merchandise remains the same ($2,000). For purposes of computing its inventory cost, X was permitted, under paragraph (c)(2) of this section, to increase the customs value for purposes of section 1059A of $2,000 by the amounts it paid for ocean freight and insurance charges ($150). However, under paragraph (c)(3) of this section, X is required to reduce the amount of the customs value by the lesser of the amount of the rebate or the amount of any positive adjustments to the original customs value. The inventory price claimed by X may not exceed $2,000 ($2,000 customs value, plus $150 transportation adjustment, less $150 offsetting rebate adjustment). While X's limitation under section 1059A is $2,000, X may not claim a basis or inventory cost in the merchandise in excess of $1,950. *See* I.R.C. section 1012; and section 1.471–2.

Example (3). Corporation X, a United States taxpayer, and Y Corporation are members of a group of controlled corporations. X pays $10,000 to Y for merchandise imported into the United States. The merchandise is composed, in part, of American goods returned. The customs value of the merchandise, on which a customs duty is imposed, is determined to be $8,000 ($10,000, the amount declared by X, less $2,000, the value of the American goods returned). For income tax purposes, X claims a cost basis in the merchandise of $11,000. None of the adjustments permitted by paragraph (c)(2) of this section is applicable. The portion of the merchandise constituting American goods returned represented 20 percent of the total customs value of the merchandise. Since the cost basis claimed by X for income tax purposes represents a 10 percent increase over the customs valuation (before reduction for American goods returned), the claimed tax basis in the dutiable content is considered to be $8,800 and in the portion constituting American goods returned is $2,200. Since a customs duty was imposed only on the dutiable content of the merchandise, the limitation in section 1059A and this section is applicable only to the claimed tax basis in this portion of the merchandise. Accordingly, under paragraph (a) of this section, X is limited to a cost basis of $10,200 in the merchandise. This amount represents a cost basis of $8,000 in the dutiable content and of $2,200 in the portion of the merchandise constituting American goods returned.

Example (4). Assume the same facts as in Example (3) except that X establishes that it is entitled to increase its customs value by $1,000 in adjustments permitted by paragraph (c)(2) of this section. Since the adjustments to customs value that X is entitled to under paragraph (c)(2) of this section are 10 percent of the customs value, for purposes of determining the limitation under section 1059A and this section, both the dutiable content and the portion of the merchandise constituting American goods returned shall be increased to an amount 10 percent greater than the respective values determined for customs purposes, or $8,800 for the dutiable content and $2,200 for the portion of the merchandise constituting American goods returned. Accordingly, under paragraph (a) of this section, X is limited to a cost basis of $11,000 in the merchandise.

Example (5). Corporation X, a United States taxpayer, and Y Corporation are members of a group of controlled corporations. X pays $10,000 to Y for merchandise imported into the United States. The customs value of the merchandise, on which a customs duty is imposed, is determined to be $10,000. Subsequent to the date of importation of the merchandise, Y grants to X a rebate of $1,000 of the purchase price. The value of the merchandise, for customs purposes, is not decreased by the rebate paid to X by Y. Notwithstanding the fact that X correctly reported and paid customs duty on a value of $10,000 and that its limitation on basis or inventory cost under this section is $10,000, X may not claim a basis or inventory cost in the merchandise in excess of $9,000. *See* I.R.C. section 1012; and section 1.471–2.

Example (6). Corporation X, a United States taxpayer, and Y Corporation are members of a group of controlled corporations. X pays $5,000 to Y for merchandise imported into the United States. The merchandise is not subject to a customs duty or is subject to a free rate of duty and is valued by customs solely for statistical purposes. Accordingly, pursuant to paragraph (c)(1) of this section, the merchandise is not subject to the provisions of section 1059A or this section.

Example (7). Assume the same facts as in Example 6, except that the merchandise is subject to a customs duty based on value and that the customs value (taking into account no costs other than the value of the goods) is determined to be $5,000. Assume further that the $5,000 payment is only for the value of the goods, no other cost is reflected in that payment, and only the $5,000 payment to Y is reflected in X's inventory cost or basis prior to inclusion of any other amounts properly included in inventory or cost basis. Pursuant to paragraph (c)(6) of this section, X, by demonstrating these facts is deemed to meet the requirements of this section and section 1059A.

Example (8). Corporation X, a United States taxpayer, and Y Corporation are members of a group of controlled corporations. X pays $9 to Y for merchandise imported into the United States and an additional $1 for ocean freight. The customs value of the article does not include the $1 paid for ocean freight. Furthermore, for customs purposes the value is calculated pursuant to computed value and is determined to be $8. For purposes of computing the limitation on its inventory cost for the article under section 1059A and this section, X is permitted, under paragraph (c)(2) of this section, to increase the customs value ($8) by the amount it paid for ocean freight ($1). Thus, the inventory cost claimed by X in the article may not exceed $9.

(9) *Averaged customs values.* In cases of transactions in which (i) an appropriate transfer price is properly determined for tax purposes by reference to events occurring after importation, (ii) the value for customs purposes of one article is higher and of a second article is lower than the actual transaction values, (iii) the relevant articles have been appraised on the basis of a value estimated at the time of importation in accordance with customs regulations, and (iv) the entries have been liquidated upon importation, the section 1059A limitation on the undervalued article may be increased up to the amount of actual transaction value by the amount of the duty overpaid on the overvalued article times a fraction the numerator of which is "1" and the denominator of which is the rate of duty on the undervalued article. This paragraph (c)(9) applies exclusively to cases of property imported in transactions that are open for tax purposes in which the actual transaction value cannot be determined and the entry has been liquidated for customs purposes on the basis of a value estimated at the time of importation in accordance with customs regulations; in these cases, the property is appropriately valued for tax purposes by reference to a formula, in existence at the time of importation, based on subsequent events and valued for customs purposes by a different formula. This paragraph (c)(9) does not apply where customs value is correctly determined for purposes of liquidating the entry and where the customs value is subsequently adjusted for tax purposes, for example by a rebate, under paragraph (c)(2) of this section. The application of paragraph (c)(9) may be illustrated by the following example:

Example. Corporation X, a United States taxpayer, and Y Corporation are members of a group of controlled corporations. X purchases Articles A and B from Y on consignment and imports the Articles into the United States. The purchase price paid by X will be determined as a percentage of the sale prices that X realizes. Rather than deferring liquidation, customs liquidates the entry on the basis of estimated values and the customs duties are paid by X. Ultimately, it is determined that Article A was undervalued and Article B was overvalued by X for customs purposes. The section 1059A limitation for Article A is computed as follows:

	Article A	Article B
Finally-determined customs value	$9	$9
Transaction value	$10	$5
Duty rate	10%	5%
Customs duty paid	$.90	$.45
Duty overpaid or (underpaid)	($.10)	$.20

The section 1059A limitation on Article A may be increased by the amount of the duty over-paid on Article B, $.20, times 1/.10, up to the amount of the transaction value. Therefore, the section 1059A limitation on Article A is $9.00 plus $1.00, or a total of $10.00. The section 1059A limitation on Article B is reduced (but never below transaction value) by $2.00 to $7.00.

(d) *Finality of customs value and of other determinations of the U.S. Customs Service.* For purposes of section 1059A and this section, a taxpayer is bound by the finally-determined customs value and by every final determination made by the U.S. Customs Service, including, but not limited to, dutiable value, the value attributable to the cost or value of products of the United States, and classification of the product for purposes of imposing any duty. The customs value is considered to be finally determined, and all U.S. Customs Service determinations are considered final, when liquidation of the entry becomes final. For this purpose, the term "liquidation" means the ascertainment of the customs duties occurring on the entry of the property, and liquidation of the entry is considered to become final after 90 days following notice of liquidation to the importer, unless a protest is filed. If the importer files a protest, the customs value will be considered finally determined and all other U.S. Customs Service determinations will be considered final either when a decision by the Customs Service on the protest is not contested after expiration of the period allowed to contest the decision or when a judgment of the Court of International Trade becomes final. For purposes of this section, any adjustments to the customs value resulting from a petition under 19 U.S.C. section 1516 (requests by interested parties unrelated to the importer for redetermination of the appraised value, classification, or the rate of duty imposed on imported merchandise) or reliquidation under 19 U.S.C. section 1521 (reliquidation by the Customs Service upon a finding that fraud was involved in the original liquidation) will not be taken into account. However, reliquidation under 19 U.S.C. section 1501 (voluntary reliquidation by the Customs Service within 90 days of the original liquidation to correct errors in appraisement, classification, or any element entering into a liquidation or reliquidation) or reliquidation under 19 U.S.C. section 1520(c)(1) (to correct a clerical error, mistake of fact, or other inadvertance within one year of a liquidation or reliquidation) will be taken into account in the same manner as, and take the place of, the original liquidation in determining customs value.

(e) *Drawbacks.* For purposes of this section, a drawback, that is, a refund or remission (in whole or in part) of a customs duty because of a particular use made (or to be made) of the property on which the duty was assessed or collected, shall not affect the determination of the customs value of the property.

(f) *Effective date.* Property imported by a taxpayer is subject to section 1059A and this section if the entry documentation required to be filed to obtain the release of the property from the custody of the United States Customs Service was filed after March 18, 1986. Section 1059A and this section will not apply to imported property where (1) the entry documentation is filed prior to September 3, 1987; and (2) the importation was liquidated under the circumstances described in paragraph (c)(9) of this section.

Lawrence B. Gibbs,

Commissioner of Internal Revenue.

Approved: June 26, 1989.

Kenneth W. Gideon,

Assistant Secretary of the Treasury.

RIN 1545-AJ54

Treatment of Dual Consolidated Losses

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations relating to the definition of "dual consolidated losses" for purposes of determining whether the net operating loss of a domestic corporation is available to reduce the taxable income of any other member of its affiliated group. The regulations are necessary to provide guidance to domestic corporations which are subject to an income tax of a foreign country and to other members of such corporations' affiliated group, as well as to officers and employees of the Internal Revenue Service.

EFFECTIVE DATES: The regulations are effective September 8, 1989, with respect to taxable years beginning after December 31, 1986.

FOR FURTHER INFORMATION CONTACT: David I. Bower of the Office of the Associate Chief Counsel (International), within the Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224 (Attention: CC:CORP:T:R (INTL-961-86) (202 566-6645, not a toll-free call)).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

These regulations are being issued without prior notice and public procedure pursuant to the Administrative Procedure Act (5 U.S.C. 553). For this reason, the collections of information contained in these regulations have been reviewed and, pending receipt and evaluation of public comments, approved by the Office of Management and Budget (OMB) under control number 1545-1083. The estimated annual burden per respondent varies from ½ to 1 hour, depending on individual circumstances, with an estimated average of .75 hour.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances.

For further information concerning this collection of information, and where to submit comments on this collection of information and the accuracy of the estimated burden, and suggestions for reducing this burden, please refer to the preamble to the cross-reference notice of proposed rulemaking published elsewhere in this issue of the **Federal Register**.

Background

This document contains temporary Income Tax Regulations (26 CFR part 1) under section 1503(d) of the Internal Revenue Code of 1986, which was added

to the Code by section 1249 of the Tax Reform Act of 1986 (Pub. L. 99-514).

Need for Temporary Regulations

Section 1503(d) of the Internal Revenue Code is effective for taxable years beginning after December 31, 1986. There is a need for immediate guidance as to the manner in which the requirements of the statute will be administered and as to those circumstances under which relief from the statute is provided.

Prior Law

A corporation that is created or organized in the United States or under the laws of the United States or any state is a "U.S. corporation." U.S. corporations are sometimes referred to as U.S. resident corporations. The United States taxes every U.S. corporation on its worldwide income and allows it to deduct losses wherever incurred. The United States allows U.S. corporations to file consolidated returns with other U.S. corporations that are commonly owned. When two or more U.S. corporations file a consolidated return, losses that one corporation incurs generally may reduce or eliminate tax on income that another corporation earns.

Some countries use criteria other than place of incorporation to determine whether corporations are residents for tax purposes. In particular, some countries treat corporations as residents for tax purposes if they are managed or controlled there. If one of these countries determines a corporation to be its resident, that country typically taxes it on its worldwide income and allows it to deduct losses wherever incurred. In some cases, the foreign country allows losses of a resident corporation to reduce or eliminate tax on income of other commonly owned resident corporations.

For tax purposes a corporation may be at the same time a U.S. resident for U.S. purposes and a resident of another country for its purposes if the other country uses a standard other than place of incorporation to determine residency. Such corporations are sometimes referred to as "dual resident corporations." A dual resident corporation is taxable in both countries on its worldwide income (or it could deduct its worldwide losses in both countries). In addition, if the foreign country has provisions that, like the U.S. consolidated return provisions, permit commonly controlled resident corporations to combine their income and losses, such dual resident corporations may be able, in effect, to use any losses generated twice offsetting the income of affiliates resident in the United States (but not abroad) and again offsetting the income of affiliates resident only in the other country.

Corporate groups attempted to isolate expenses in a dual resident corporation so that, viewed in isolation, the dual resident corporation was operating at a loss for tax purposes. This isolation of expenses allowed, in effect, the consolidation of the loss of the dual resident corporation with two profitable corporations, one in the United States and one in the foreign country. The profitable corporations, however, reported their income to only one country.

Statutory Provisions

Section 1249 of the Tax Reform Act of 1986 added subsection (d) to section 1503 of the Internal Revenue Code. Section 1503(d), as added by the 1986 Act, provides that if a domestic corporation is subject to a foreign country's tax on worldwide income, or on a residence basis as opposed to a source basis, any net operating loss it incurs cannot reduce the taxable income of any other member of a U.S. affiliated group for that or any other taxable year. Where a corporation is subject to foreign tax on its worldwide income or, otherwise on a residence basis, then, for U.S. tax purposes, its losses will be available to offset income of that corporation in other years, but not income of another U.S. corporation. Regulatory authority is provided to exempt a U.S. corporation from this rule to the extent that its losses do not offset the income of foreign corporations for foreign tax purposes. The provision applies to losses of dual resident corporations whether or not any of the income of any foreign corporation that the dual resident corporation's loss may reduce in the foreign country is or will be subject to U.S. tax. Loss carryovers incurred in years beginning prior to 1987 by a dual resident corporation are available to offset income that another member of the affiliated group earns in years beginning after 1986. Conversely, loss carrybacks incurred in years beginning after 1986 by a dual resident corporation are not available to offset income of affiliates earned prior to 1987.

Explanation of Regulations

Section 1.1503-2T(a) outlines the rules describing those net operating losses of domestic corporations that are not available to reduce the income of any other affiliate, so-called "dual consolidated losses." The net operating loss of a domestic corporation which is either subject to an income tax of a foreign country on its income without regard to whether such income is from sources in or outside of such foreign country, or is subject to an income tax of a foreign country on a residence basis, is a "dual consolidated loss" and will not be available to reduce the income of any other affiliate. This treatment generally applies regardless of whether the losses offset income of another corporation under the income tax laws of the foreign country and regardless of whether any income that the loss may reduce in the foreign country is subject to tax in the United States. Further, provisions are included to make clear that a dual consolidated loss, if acquired by or transferred to an affiliate in a section 381 transaction, cannot offset income of the affiliate.

Paragraph (b) defines the terms "domestic corporation," "dual consolidated loss," "dual resident corporation," "separate unit," and "subject to tax."

Paragraph (c) provides exceptions from the general rule of paragraph (a). Paragraph (c)(1) provides an exception from paragraph (a) if at no time after December 31, 1986, is there another person, corporation, or entity that is permitted, under the income tax laws of the foreign country, to use the losses, expenses, or deductions of the dual resident corporation, and the income tax laws of the foreign country do not allow the losses, expenses, or deductions of the dual resident corporation to be carried over or back to be used, by another person, corporation, or entity. Paragraph (c)(2) provides an exception from paragraph (a) where there is an elective agreement in place between the United States and the foreign country to take the loss in only one country. (There are no such agreements in force at the time of the publication of these regulations.) In other situations, an exception is available only if the dual resident corporation files an agreement to file amended returns as set forth in paragraph (c)(3) or if there is a restructuring as described in paragraph (c)(4).

Paragraph (c)(3)(i) provides an exception from the rule of paragraph (a) if at no time after December 31, 1986 is there another person, corporation, or entity that is permitted, under the income tax laws of the foreign country, to use the losses, expenses, or deductions of the dual resident corporation, but the foreign income tax law provides for a carryover or back of the losses, expenses, or deductions. Paragraph (c)(3)(i) provides that a dual consolidated loss may be used for U.S. tax purposes if the losses, expenses, or deductions of the dual resident corporation cannot currently be used under foreign laws by another person, corporation, or entity, and the U.S. group filing a consolidated return or, if there is no group, the dual resident corporation, files an agreement described in paragraph (c)(3) (ii) and (iii) to amend its return if the losses, expenses, or deductions of the dual resident corporation are subsequently used or are able to be used under foreign law. If, under the income tax laws of the foreign country, the losses, expenses, or deductions of the dual resident corporation are subsequently used or are able to be used to offset the income of another person, corporation, or entity, the dual consolidated loss will be reported on an amended return for the taxable year in which the dual consolidated loss arose and for each of the taxable years in which the tax liability is increased as a result of the application of the limitation on the use of the dual consolidated loss.

Paragraph (c)(4) provides a special transition rule that provides an exception from the rule of paragraph (a) for dual consolidated losses even though there may have been other persons, corporations, or entities which, under the income tax laws of the foreign country, could have used the losses, expenses, or deductions of the dual resident corporation to offset income. The exception of paragraph (c)(4) is allowed only if, on or before December 31, 1989, a restructuring of the corporate structure in the foreign country is completed so that at all times from the date of such restructuring to the close of the taxable year in which the dual consolidated loss arises, there is no other person, corporation, or entity which, under the income tax laws of the foreign country, could use the losses, expenses, or deductions of the dual resident corporation to offset income. The exception of paragraph (c)(4) is applicable only to dual consolidated losses arising after the restructuring takes place. Further, if the foreign income tax law provides for a carryover or back of the losses, expenses, or deductions of the dual resident corporation, then the affiliated group filing a consolidated return or, if there is no affiliated group filing a consolidated return, the dual resident corporation, must file an agreement as described in paragraphs (c)(3) (ii) and (iii), to amend its return (or returns) if the losses, expenses, or deductions are subsequently used or are able to be used to offset the income of another person, corporation, or entity under foreign law.

The Service is aware that there may be a number of dual resident corporations that were unable to utilize their losses to benefit their affiliates in the foreign country for reasons other than the enactment by the foreign country of mirror legislation prohibiting the use of such losses. If such taxpayers restructured their operations after the effective date of section 1503(d) to eliminate the dual resident status of an affiliated corporation or to terminate its ability to consolidate with foreign affiliates, then these regulations allow the U.S. consolidation of only those losses incurred after the restructuring. The Service invites comments from such taxpayers as to the reasons for their inability to utilize losses in the foreign country and the delay in restructuring in response to section 1503(d), so that a determination can be made as to whether additional transition relief would be appropriate. For example, if the Service determines that additional transition relief is justified, a closing agreement that provides safeguards to protect the government's interests will be considered.

Paragraph (d) sets forth special rules for separate units of a domestic corporation. Paragraph (d)(1) provides that if a domestic corporation holds an interest in an entity that is not taxed as an association for U.S. tax purposes, but is subject to tax in a foreign jurisdiction as a corporation on a residence or worldwide basis, then the interest held by the domestic corporation will be treated for purposes of section 1503(d) as if it were a dual resident corporation and a wholly-owned domestic subsidiary of a domestic corporation.

Paragraph (d)(2) provides that if a separate unit of a domestic corporation, other than a separate unit described in paragraph (d)(1), is permitted to use its losses, expenses, or deductions to offset the income of other persons, corporations, or entities, either in the taxable year in which a dual consolidated loss arises, or in past or future years by means of a carryover or carryback provision, then such separate unit will be treated as if it were a dual resident corporation and a wholly-owned domestic subsidiary of a domestic corporation.

Paragraph (d)(3) provides an exception from the rule in paragraph (d)(2) for any taxable year in which a certification is filed which provides that no portion of the separate unit's losses, expenses, or deductions as identified in paragraph (d)(2) has been or will be used to offset the income of any other person, corporation, or entity under the income tax laws of the foreign country. Paragraph (d)(4) provides that if the losses, expenses, or deductions of a separate unit subject to the certification requirement of paragraph (d)(3) are used by any means to offset the income of any other persons, corporation, or entity under the income tax laws of a foreign county, then such losses, expenses, or deductions shall be recaptured and reported as income. Paragraph (d)(4) also provides that in the event recapture occurs, an interest charge on the additional amount of tax owed shall be imposed.

Paragraph (d)(5) clarifies that a separate unit is treated as a separate entity for purposes of determining whether the losses of one entity are permitted under the income tax laws of a foreign country to offset the income of another entity. Accordingly, if a domestic corporation owns two separate units in a foreign country which permits the two units to combine their income and losses on a single income tax return and the two separate units actually so combine, then they will each be treated as a dual resident corporation for purposes of this section. The use of the loss of one separate unit to offset the income of the other separate unit under the foreign income tax laws will preclude a deduction of the separate unit's loss for U.S. tax purposes. However, an exception is provided in paragraph (d)(5)(ii) which treats as one single unit any two or more separate units of a domestic corporation if the units are not units described in paragraph (d)(1) and are located in the same foreign country.

Paragraph (e) provides a special rule which denies the use of a dual consolidated loss to offset the income produced by, or gain recognized from, the disposition or exchange of assets transferred to or acquired by a dual resident corporation or a corporation that has ceased to be a dual resident corporation.

Paragraph (f) provides a special rule for accounting for dual consolidated losses of dual resident corporations that are members of affiliated groups filing consolidated returns and of dual resident corporations that are separate units of a domestic corporation.

Special Analyses

It has been determined that these temporary rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to

these regulations, and, therfore, a final Regulatory Flexibility Analysis is not required.

Drafting Information

The principal author of these regulations is Riea M. Lainoff of the Office of Chief Counsel within the Office of Associate Chief Counsel (International), Internal Revenue Service. Other personnel from offices of the Internal Revenue Service and Treasury Department participated in developing the regulations.

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 602 are amended to read as follows:

Income Tax Regulations

PART 1—[AMENDED]

Paragraph 1. The authority for part 1 is amended by adding this following citation:

Authority. 26 U.S.C. 7805. * * *

Section 1.1503–2T also issued under 26 U.S.C. 1503(d). * * *

Par. 2. New § 1.1503–2T is added to read as follows:

§ 1.1503–2T Dual consolidated loss (temporary regulations).

(a) *In general.* This section applies for purposes of determining whether and to what extent the net operating loss of a dual resident corporation incurred in tax years beginning after December 31, 1986, shall be allowed to reduce the taxable income of any other member of the affiliated group. Except as provided in paragraph (c) of this section, any dual consolidated loss of a domestic corporation incurred in taxable years beginning after December 31, 1986, cannot reduce the taxable income of any affiliate of such domestic corporation for that or any other taxable year, regardless of whether those losses offset income of another corporation under the income tax laws of the foreign country and regardless of whether any of the income of any corporation that the loss may reduce in the foreign country is, has been, or will be subject to tax in the United States. This rule shall also apply to preclude the use of a dual consolidated loss to offset any income of an affiliate (whether or not an election to file a consolidated return has been made) by means of a transaction subject to section 381 of the Code. For purposes of the preceding sentence, an "affiliate" means any member of the affiliated group as determined under section 1504(a) without regard to the exceptions contained in section 1504(b) (other than section 1504(b)(3)) relating to includible corporations. Further, this rule shall also apply to preclude the use of a dual consolidated loss of a separate unit by a domestic corporation upon or as a result of the termination, liquidation, or sale of the separate unit. The following example illustrates the application of this paragraph (a).

Example. P, a domestic corporation, owns all of the outstanding stock of DRC, a domestic corporation. DRC is managed and controlled in Country W, a country which determines the tax residence of corporations according to place of management and control. Therefore, the income of DRC is subject to tax in both the United States and in Country W. There are currently no other corporations in Country W which could use the losses of DRC to offset income under the income tax laws of Country W. P no longer wishes to operate DRC as a separate corporation. Therefore DRC will be liquidated into P under section 332 of the Code. Normally, P, under section 381, would succeed to and take into account DRC's net operating loss carryovers. However, this paragraph (a) prohibits the net operating loss of DRC from reducing P's income (including income of P generated by assets previously held by DRC) for U.S. tax purposes. Therefore, DRC's net operating loss carryovers will not be available to offset P's income unless one of the exceptions described in paragraph (c) of this section applies.

(b) *Definitions.* The following definitions apply for purposes of this section.

(1) *Domestic corporation.* For purposes of this section, the term "domestic corporation" has the meaning assigned to it by sections 7701 (a)(3) and (a)(4) and shall also include any corporation treated as a domestic corporation by the Internal Revenue Code, including, but not limited to, section 269B and section 1504(d). Subject to the rules of paragraph (d) of this section, any separate unit (as defined in paragraph (b)(4) of this section) of a domestic corporation will be treated as a separate domestic corporation (and as a dual resident corporation) for purposes of this section. The following example illustrates the application of this paragraph (b)(1).

Example. A is a domestic corporation with a branch operation in Country X. A is owned by FP, a Country X corporation. Country X allows the Country X branch income and losses of A to be used to offset FP's losses or income. Under paragraph (d) of this section, the branch operations of A in Country X will be treated as a separate domestic corporation and as a dual resident corporation for purposes of this section. See paragraph (d) of this section for the treatment of any dual consolidated loss of the branch operations of A.

(2) *Dual consolidated loss.* The term "dual consolidated loss" means the net operating loss (as defined in section 172(c) and the regulations thereunder) of a domestic corporation incurred in a year in which the corporation is a dual resident corporation. The fact that a particular item taken into account in computing such net operating loss deduction is not taken into account in computing income subject to income tax in a foreign country shall not cause such item to be excluded from the calculation of the dual consolidated loss. A dual consolidated loss shall arise even though no other person, corporation, or entity is permitted, under the income tax laws of the foreign country, to use by any means the losses, expenses or deductions of the dual resident corporation to offset income. A dual consolidated loss shall not include—

(i) The net operating loss incurred during that portion of the taxable year prior to the date on which the domestic corporation becomes a dual resident corporation or subsequent to the date on which the domestic corporation ceases to be a dual resident corporation. For purposes of determining the amount of the net operating loss incurred in that portion of the taxable year prior to the date on which the domestic corporation becomes a dual resident corporation or subsequent to the date on which the domestic corporation ceases to be a dual resident corporation, in no event shall more than a pro rata portion of the net operating loss commensurate with the portion of the taxable year during which the domestic corporation was not a dual resident corporation be allocated to that portion of the taxable year in which the domestic corporation was not a dual resident corporation; or

(ii) Losses incurred in taxable years beginning on or before December 31, 1986.

(3) *Dual resident corporation.* For purposes of this section, a domestic corporation shall be a dual resident corporation if the worldwide income of such corporation is subject to the income tax of a foreign country, or such corporation is subject to the income tax of a foreign country on a residence basis (and not on a source basis).

(4) *Separate unit.* Solely for purposes of this section, the term "separate unit" shall mean any of the following:

(i) A foreign branch as defined in § 1.367 (a)–6T(g);

(ii) A partnership interest; or

(iii) A trust interest.

(5) *Subject to tax.* For purposes of determining whether a domestic corporation is subject to the income tax of a foreign country on its income, the fact that the corporation has no actual tax liability to the foreign country for a particular taxable year shall not be taken into consideration.

(c) *Exceptions*—(1) *No ability to use dual consolidated loss under foreign law*—(i) *In general.* Paragraph (a) of this section shall not apply to a dual consolidated loss if—

(A) At no time after December 31, 1986, has there been any other person, corporation, or entity which, under the income tax laws of the foreign country, is permitted to use by any means the losses, expenses, or deductions of the dual resident corporation to offset income; and

(B) Under the income tax laws of the foreign country, the losses, expenses, or deductions of the dual resident corporation incurred in taxable years beginning after December 31, 1986, cannot be carried over or back to be used, by any means, to offset the income of any other person, corporation, or entity in other years.

(ii) *Limitations.* For purposes of paragraph (c)(1)(i) of this section, none of the following circumstances shall constitute a satisfaction of paragraph (c)(1)(i)(A) of this section—

(A) The failure to make use of an election (including, but not limited to, the ability to surrender losses, expenses or deductions) that would enable another person, corporation, or entity to use the losses, expenses, or deductions of the dual resident corporation to offset income under the income tax laws of the foreign country;

(B) The fact that the income tax laws of the foreign country deny the use of losses, expenses, or deductions of its corporate residents that are also residents for tax purposes of another country to offset income of another person, corporation, or entity;

(C) The fact that the other person, corporation, or entity does not have sufficient income to benefit from an offset permitted under the income tax laws of the foreign country for a particular taxable year; or

(D) The fact that the dual resident corporation has no losses, expenses, or deductions during a particular taxable year.

(iii) *Examples.* The following examples illustrate this paragraph (c)(1).

Example (1). DRC, a domestic corporation, is also subject to tax in Country Y on its worldwide income. DRC has been filing a consolidated return for U.S. income tax purposes with DP, its domestic parent. DRC has also been able to use its losses to offset income of its affiliates in Country Y by using Country Y's form of consolidation. In order to prevent companies like DRC from taking losses against income of affiliates under Country Y law and then again using the losses of DRC to offset income of affiliates for U.S. tax purposes. Country Y law prevents a company which is also subject to tax on its worldwide income in another country, or is subject to tax on a residence basis in another country, from using the Country Y form of consolidation. DRC is a dual resident corporation as defined in paragraph (b)(3) of this section. DRC's losses are dual consolidated losses as defined in paragraph (b)(2) of this section which under paragraph (a) of this section may not be used to offset income of any other U.S. affiliate of DRC. The Country Y statute does not cause the exception provided by this paragraph (c)(1) to apply.

Example (2). P, a domestic corporation, owns DRC, a domestic corporation which is also subject to the income tax laws of Country Z on a residence basis, and FS, a Country Z corporation. Under Country Z laws, income or losses of DRC may not be consolidated with income or losses of P or FS. There is, however, a provision under Country Z's law by which DRC's unused losses could be carried forward, acquired, and used by FS if DRC is merged into FS. DRC's dual consolidated loss does not qualify for the exception from application of paragraph (a) provided by this paragraph (c)(1) because of the loss carryforward provisions under Country Z's income tax laws. However, DRC may qualify for an exemption from paragraph (a) of this section under the provisions of paragraph (c)(3) of this section.

Example (3). DRC is a dual resident corporation subject to tax on a residence basis in foreign country Y. Under the income tax laws of Y, DRC could elect to use its losses to offset the income of foreign entity FE on a Country Y consolidated income tax return for the taxable year ending December 31, 1987. Regardless of whether such election is made, DRC fails to satisfy the requirement of paragraph (c)(1)(i)(A) of this section.

Example (4). The same facts apply as in *Example* (3), except that Country Y changes its income tax law, effective as of January 1, 1987, to prevent the consolidation of losses by dual resident corporations. Under paragraph (c)(1)(ii)(B) of this section, the fact that this Country Y legislation prevents DRC from using its losses to offset the income of FE is disregarded and DRC fails to satisfy the requirement of paragraph (c)(1)(i)(A) of this section.

Example (5). The same facts apply as in *Example* (4), except that FE has no taxable income in taxable years 1987 through 1989. Moreover, DRC is profitable throughout this period and consequently has no losses which it could share with FE. Under paragraphs (c)(1)(ii) (C) and (D) of this section, the fact that FE would not receive a tax benefit from consolidation with DRC on a Country Y return is disregarded and DRC fails to satisfy the requirement of paragraph (c)(1)(i)(A) of this section. Because DRC does not have a net operating loss during 1987 through 1989, section 1503(d) does not affect the consolidation of DRC on a U.S. return for these years. However, DRC's failure to satisfy paragraph (c)(1)(i)(A) of this section at all times after December 31, 1986 will make it ineligible for the exception described in paragraph (c)(1) of this section with respect to any future taxable year in which it incurs a net operating loss.

Example (6). The same facts apply as in *Example* (5). In 1990, FE is transferred and is no longer eligible for consolidation on a Country Y return. There are no other entities with which DRC could consolidate under the income tax laws of Y. Nevertheless, since FE and DRC could have consolidated on a Country Y return during the period after December 31, 1986 and before the transfer of FE, DRC fails to satisfy the requirement of paragraph (c)(1)(i)(A) of this section in 1990 and in all future taxable years.

(2) *Elective agreement in place between United States and the foreign country.* Paragraph (a) of this section shall not apply to a dual consolidated loss to the extent such loss is subject to an election by the dual resident corporation to deduct the loss in the United States pursuant to an agreement entered into between the United States and the foreign country which puts into place an elective procedure through which losses would offset income in only one country.

(3) *Agreement to amend returns upon later use of losses, expenses, or deductions of a dual resident corporation*—(i) *In general.* Notwithstanding that, under the income tax laws of the foreign country, the losses, expenses, or deductions of the dual resident corporation can be carried over or back to offset, by some means, the income of any other person, corporation, or entity in other taxable years, paragraph (a) of this section shall not apply to a dual consolidated loss of that dual resident corporation if the requirements described in this paragraph (c)(3)(i) are satisfied.

(A) At no time after December 31, 1986, has there been any other person, corporation, or entity which, under the income tax laws of the foreign country, is permitted to use by any means the losses, expenses, or deductions of the dual resident corporation to offset income. For purposes of the preceding sentence, none of the circumstances described in paragraphs (c)(1)(ii) (A) through (D) of this section shall constitute a satisfaction of this paragraph (c)(3)(i)(A).

(B) The affiliated group or, if there is no affiliated group filing a consolidated return, the dual resident corporation which incurs the loss, files with its U.S. tax return for the taxable year in which the dual consolidated loss arises a binding agreement described in paragraphs (c)(3) (ii) and (iii) of this section. The agreement must be filed under this paragraph (c)(3) even if the only effect of the dual consolidated loss is to increase a net operating loss for U.S. tax purposes.

(ii) *Description of agreement.* Except as otherwise provided in paragraph (c)(3)(viii) of this section, the agreement described in this paragraph (c)(3)(ii) must be attached to, and filed by the due date (including extensions) of, the tax return of the affiliated group or dual resident corporation for the taxable year in which the dual consolidated loss arises. The agreement must be signed under penalties of perjury by the person who signs the tax return of the group or dual resident corporation. The agreement must include the following items, in paragraphs labeled to correspond with the subdivisions set forth below:

(A) The name, address, identifying number, and place and date of incorporation of the dual resident corporation and the country or countries which tax the dual resident corporation on a residence basis or which tax the worldwide income of the dual resident corporation;

(B) A statement that the document submitted constitutes the agreement of the affiliated group or dual resident corporation in accordance with the requirements of § 1.1503–2T(c)(3);

(C) A statement of the amount of the dual consolidated loss to be covered by the agreement and the year in which it arose;

(D) The agreement of the group or dual resident corporation to amend returns, as described in paragraph (c)(3)(iii) of this section;

(E) A waiver of the period of limitations, as described in paragraph (c)(3)(iv) of this section; and

(F) An agreement to file with the tax returns of the group or dual resident corporation for each of the fifteen years following the year the dual consolidated loss arose a waiver of the period of limitation, as described in paragrapah (c)(3)(iv) of this section, and a certification as described in paragraph (c)(3)(v) of this section.

(iii) *Terms of agreement.* The affiliated group or dual resident corporation must agree that if there is a "triggering event" described in this paragraph (c)(3)(iii), then, the affiliated group filing a consolidated return, or if there is no affiliated group filing a consolidated return, the dual resident corporation, shall, within 90 days after the date of occurrence of the triggering event, file an amended U.S. income tax return for the taxable year in which the dual consolidated loss arose reporting the dual consolidated loss on the amended return as a loss to which paragraph (a) of this section applies. An amended U.S. income tax return must also be filed for any other taxable year in which the tax liability increases as a result of such applications of paragraph (a) of this section. In addition, upon examination, the group or dual resident corporation must provide to the District Director a schedule of the amended carryforward and carryback losses and credits for each of the group's or dual resident corporation's taxable years for which no amended return is required to be filed pursuant to this paragraph (c)(3)(iii). For purposes of section 6601, the last date prescribed for payment of the additional amount of tax shown on an amended return filed pursuant to this paragraph (c)(3)(iii) shall be the same date as the date prescribed for the payment of tax for the taxable year with respect to which the amended return is filed. Any of the following events shall constitute a "triggering event" for purposes of this section—

(A) There is a failure for any taxable year to file the annual waiver or certification described in paragraphs (c)(3)(iv) and (v) of this section.

(B) Prior to the close of the fifteenth taxable year following the taxable year in which the dual consolidated loss arose, any of the following events—

(*1*) There is a failure to satisfy both the requirement of paragraph (c)(3)(i)(A) of this section and the requirements of paragraph (c)(4) of this section;

(*2*) Where the agreement is made by an affiliated group filing a consolidated return, the dual resident corporation (or its successor-in-interest) ceases to be a member of the affiliated group;

(*3*) Where the agreement is made by a dual resident corporation that is not a member of an affiliated group filing a consolidated return, the dual resident corporation is no longer in existence; or

(*4*) Where the dual resident corporation is a separate unit of a domestic corporation, the domestic corporation sells or transfers the dual resident corporation.

(iv) *Waiver of period of limitation.* The affiliated group or the dual resident corporation (or the successor-in-interest of such group or dual resident corporation) must file, with the agreement to amend returns and with the tax return for each of the fifteen taxable years following the taxable year in which the dual consolidated loss arose, a waiver of the limitation on assessment of any tax resulting from the amendment of any return as described in paragraph (c)(3)(iii) of this section. The waiver shall extend the period for assessment of such tax to a date not earlier than three years after the return is filed for the fifteenth taxable year following the taxable year in which the dual consolidated loss arose. The waiver shall also contain such other terms with respect to assessment as may be considered by the Commissioner to be necessary to insure the assessment and collection of the correct tax liability for each year for which the waiver is required. The waiver must be signed by a person authorized to sign the agreement described in paragraph (c)(3)(ii) of this section. A failure, at any time, to comply with the requirements of this paragraph (c)(3) or with the terms of any agreement filed pursuant to this paragraph (c)(3) shall extend the period of assessment of such tax until three years after the date on which the Internal Revenue Service receives actual notice of the use of or of the ability to use the losses, expenses, or deductions of the dual resident corporation to offset the income of another person, corporation, or entity under the income tax laws of the foreign country.

(v) *Annual certification.* The affiliated group or the dual resident corporation (or the successor-in-interest of such group or dual resident corporation) must file with its income tax return for each of the fifteen taxable years following the taxable year in which the dual consolidated loss arose a certification that the losses, expenses, or deductions of the dual resident corporation were not used or permitted to be used to offset the income of another person, corporation, or entity under the income tax laws of a foreign country. The annual certification pursuant to this paragraph (c)(3)(v) must be signed under penalties of perjury by a person authorized to sign the agreement described in paragraph (c)(3)(ii) of this section. The certification must identify the dual consolidated loss with respect to which it is given by setting forth the taxpayer's year in which the loss arose and the amount of such loss and must warrant that arrangements have been made to insure that the group or dual resident corporation will be informed of any subsequent use of or ability to use the losses, expenses, or deductions of the dual resident corporation to offset the income of another person, corporation, or entity under the income tax laws of the foreign country. If dual consolidated losses of more than one taxable year are subject to the rules of this paragraph (c)(3), the certifications for those years may be combined in a single document, but each dual

BEST COPY AVAILABLE

consolidated loss must be separately identified.

(vi) *Special rules for a succeeding group or a successor-in-interest*—(A) *Ceasing to be a member of the affiliated group.* For purposes of this paragraph (c)(3), and except as otherwise provided in this paragraph (c)(3)(vi), a dual resident corporation shall be deemed to have ceased to be a member of the affiliated group that filed the agreement described in paragraph (c)(3)(ii) of this section if it is no longer a member of that group, as defined in § 1.1502–1(b), or if the group ceases to exist because the common parent is no longer in existence or is no longer a common parent or the group no longer files on the basis of a consolidated return. However, the obligation to file an amended return pursuant to the agreement described in paragraph (c)(3)(ii) of this section shall not apply and the dual resident corporation shall not be deemed to have ceased to be a member of the group for purposes of this paragraph (c)(3) where the dual resident corporation ceases to be a member of the group solely by reason of an acquisition of its assets by a member of the group in a transaction to which section 381(a) applies provided the successor-in-interest of the dual resident corporation continues to be a member of the group.

(B) *Special rules for a succeeding group.* The obligation to file an amended return pursuant to the agreement described in paragraph (c)(3)(ii) of this section shall not apply where the dual resident corporation becomes a member of a succeeding group as a result of an acquisition described in § 1.1502–13(f)(2)(i) (*a*) or (*b*) (relating generally to the acquisition of assets of, by, or from a member of the affiliated group in a tax-free reorganization) and the succeeding group attaches to, and files with, its timely filed (including extensions) tax return for the taxable year in which the acquisition takes place a binding agreement—

(*1*) Which sets forth the same terms as are described in paragraph (c)(3)(ii) of this section,

(*2*) In which the group agrees to be bound by the terms of the agreement previously filed by the terminating group, and

(*3*) In which the group agrees to all the terms set forth in paragraph (c)(3)(iii) of this section.

The agreement must be signed under penalties of perjury by the person who signs the tax return of the succeeding group.

(C) *Special rules for a successor-in-interest.* In the case of a dual resident corporation that was not a member of an affiliated group filing a consolidated return in the taxable year in which the dual consolidated loss arose and that filed an agreement described in paragraph (c)(3)(ii) of this section, the assets of which are acquired in a transaction described in section 381(a), such corporation shall not be required to file an amended return pursuant to paragraph (c)(3)(iii)(B)(*3*) of this section provided its successor-in-interest attaches a binding agreement to its timely filed (including extensions) tax return for the taxable year in which the acquisition takes place. The agreement must be signed under penalties of perjury by the person who signs the tax return of the successor-in-interest. The agreement must:

(*1*) Set forth the same terms as are described in paragraph (c)(3)(ii) of this section,

(*2*) State the agreement of the successor-in-interest to be bound by the terms of the agreement previously filed by the dual resident corporation, and

(*3*) State the agreement of the successor-in-interest to all the terms set forth in paragraph (c)(3)(iii) of this section.

(vii) *Definitions.* For purposes of this section—

(A) The terms "succeeding group" and "terminating group" shall have the same meaning as in § 1.1502.13(f)(2)(i); and

(B) The term "successor-in-interest" shall mean an acquiring corporation that succeeds to the tax attributes of an acquired corporation under the provisions of section 381 by reason of a transaction described in section 381(a).

(viii) *Transition rules.* An affiliated group or a dual resident corporation (or a succeeding group or a successor-in-interest of a dual resident corporation) that meets the eligibility requirements described in paragraph (c)(3)(ix) of this section will be permitted to apply the transition rules in this paragraph (c)(3)(viii) for taxable years ending before December 31, 1989.

(A) The agreement in satisfaction of paragraph (c)(3) (ii) or (vi) of this section may be attached to the timely filed (including extensions) tax return of the affiliated group or of the dual resident corporation (or the succeeding group or the successor-in-interest of such dual resident corporation) for the first taxable year which ends on or after December 31, 1989. The agreement required for each of the taxable years ending before December 31, 1989 and for the first taxable year ending on or after December 31, 1989 may be combined on a single document.

(B) The requirement of paragraphs (c)(3)(iv) and (c)(3)(v) of this section regarding the filing of an annual waiver of the period of limitation and certification shall be satisfied for the taxable years ending before December 31, 1989, and no failure to file shall be deemed to have occurred with respect to such taxable years for purposes of paragraph (c)(3)(iii)(A) of this section if the waivers and certifications required under paragraphs (c)(3)(iv) and (c)(3)(v) of this section are filed with the tax return for the first taxable year ending on or after December 31, 1989.

(ix) *Eligibility for transition rules.* The rules in paragraph (c)(3)(viii) of this section shall apply only if, as of the date of the agreement in satisfaction of paragraph (c)(3) (ii) or (vi) of this section and filed pursuant to paragraph (c)(3)(viii) of this section, none of the triggering events described in paragraph (c)(3)(iii)(B) of this section has occurred.

(4) *No ability to use dual consolidated loss under foreign law after restructuring*—(i) *In general.* Notwithstanding that a dual resident corporation fails to satisfy either paragraph (c)(1)(i)(A) or (c)(3)(i)(A) of this section, paragraph (a) of this section shall not apply to any dual consolidated loss (or portion of a dual consolidated loss) described in paragraph (c)(4)(iii) of this section provided the requirements of either paragraph (c)(1)(i)(B) or (c)(3)(i)(B) of this section are satisfied and a restructuring that meets the requirements of paragraph (c)(4)(ii) of this section has been completed.

(ii) *Qualified restructuring.* A restructuring meets the requirements of this paragraph (c)(4)(ii) if it is completed on or before December 31, 1989, in the foreign country so that at all times from the date of such restructuring to the close of the taxable year in which the dual consolidated loss arises, there is no other person, corporation, or entity which, under the income tax laws of the foreign country, is permitted to use by any means the losses, expenses, or deductions of the dual resident corporation to offset income. For purposes of the preceding sentence, none of the circumstances described in paragraphs (c)(1)(ii) (A) through (D) of this section shall constitute a satisfaction of this paragraph (c)(4)(ii).

(iii) *Qualified losses.* Losses to which paragraph (c)(4)(i) of this section applies are the dual consolidated losses of a dual resident corporation that arise in a taxable year beginning after the restructuring described in paragraph (c)(4)(ii) of this section (or the portion of any dual consolidated loss that arises during that portion of the taxable year following the restructuring described in paragraph (c)(4)(ii) of this section). For purposes of determining the amount of

the dual consolidated loss which arises in that portion of the taxable year following the restructuring, in no event shall more than a pro rata portion of the dual consolidated loss commensurate with the portion of the taxable year beginning with the date of completion of the restructuring and ending on the last day of that same taxable year be allocated to that portion of the taxable year following the restructuring.

(d) *Special rule for separate units*—(1) *Separate units characterized as corporations under foreign law.* If a separate unit of a domestic corporation consists of an interest in an entity (including a foreign branch) that for U.S. tax purposes is not taxable as an association, but the entity is subject to income tax in a foreign jurisdiction as a corporation either on its worldwide income or on a residence basis (and not on a source basis), then for purposes of this section such separate unit of the domestic corporation will be treated as if it were a dual resident corporation and a wholly-owned domestic subsidiary of the domestic corporation. For purposes of paragraphs (c) (3) and (4) of this section, any agreement, waiver and certification required to be filed with respect to such dual resident corporation shall be filed with the federal income tax return of the domestic corporation owning the separate unit or by the affiliated group with which the domestic corporation files a consolidated return.

(2) *Other separate units.* Except as provided in paragraph (d)(3) of this section, if a separate unit of a domestic corporation (other than a separate unit described in paragraph (d)(1) of this section) is permitted under the income tax laws of a foreign country—

(i) To use its losses, expenses, or deductions to offset the income of any other person, corporation, or entity in the taxable year in which the dual consolidated loss arises; or

(ii) To carry over or back its losses, expenses, or deductions so that they may offset the income of any other person, corporation, or entity in other years, then such separate unit will be treated for purposes of this section as if it were a dual resident corporation and a wholly-owned domestic subsidiary of the domestic corporation. For purposes of the preceding sentence, none of the circumstances described in paragraphs (c)(1)(ii) (A) through (D) of this section shall preclude a separate unit from being treated as a dual resident corporation and a separate domestic corporation under this paragraph (d)(2). This paragraph (d)(2) applies regardless of whether the domestic corporation is a member of an affiliated group, and, if it is, regardless of whether the group files a consolidated return.

(3) *Certification.* Paragraph (d)(2) of this section shall not apply with respect to any taxable year for which the domestic corporation owning the separate unit (or the affiliated group of which the domestic corporation is a member) files a certification as described in this paragraph (d)(3). The certification must be attached to, and filed by the due date (including extensions) of, the federal income tax return of the domestic corporation owning the separate unit (or the affiliated group with which the domestic corporation files a consolidated return) for the taxable year to which it applies. With respect to returns filed without an attached certification for taxable years ending before December 31, 1989, the certification in satisfaction of this paragraph (d)(3) may be attached to the return for the first taxable year ending on or after December 31, 1989. The certification must be signed under penalties of perjury by the person who signs the return. The certification must include the following items, in paragraphs labeled to correspond with the subdivisions set forth below:

(i) A statement that the document submitted constitutes the certification required under the provisions of § 1.1503–2T(d)(3);

(ii) Identification of the separate unit, including the name under which it conducts business and its principal activity;

(iii) Identification of the total losses, expenses, and deductions incurred by the separate unit and included on the tax return for the taxable year;

(iv) Certification that no portion of the separate unit's losses, expenses or deductions identified above has been or will be used to offset the income of any other person, corporation, or entity under the income tax laws of the foreign country; and

(v) An agreement to comply with the recapture and interest charge requirements of paragraph (d)(4) of this section.

If the domestic corporation has more than one separate unit, the certification described above may be made on a single document, but the total losses, expenses, and deductions must be separately identified for each separate unit to which the certification applies.

(4) *Recapture upon subsequent use.* If in any taxable year any portion of the losses, expenses, or deductions of a separate unit which were the subject of a certification filed under paragraph (d)(3) of this section are used by any means to offset the income of any other person, corporation, or entity under the income tax laws of a foreign country, then the total amount of the dual consolidated loss shall be recaptured and reported as income on the tax return of the domestic corporation (or the affiliated group with which the domestic corporation files a consolidated return) for the taxable year that includes the last day of the taxable year for foreign tax purposes during which such use occurred. In addition, the domestic corporation owning the separate unit (or the affiliated group with which the domestic files a consolidated return) shall pay an interest charge on the amount of additional tax owed as a result of the recapture described in the preceding sentence. Such interest shall be determined under the rules of section 6601(a) as if the additional amount of tax had accrued and been due and owing for the taxable year in which the losses, expenses, or deductions giving rise to the recapture gave rise to a tax benefit for U.S. income tax purposes. For purposes of this paragraph (d)(4), a tax benefit will be considered to have arisen in a taxable year in which a loss that would have been considered a dual consolidated loss if paragraph (d)(3) of this section had not applied has reduced the U.S. income tax liability of the domestic corporation or of the affiliated group with which it files a consolidated return.

(5) *Treatment of separate units as separate entities*—(i) *In general.* A separate unit of a domestic corporation will be treated as a separate entity for purposes of determining under this section whether losses of one entity are permitted under the income tax laws of the foreign country to offset the income of another entity.

(ii) *Exception for separate units in same country.* If two or more separate units (not described in paragraph (d)(1) of this section) located in the same foreign country are owned by a single domestic corporation and the income and losses of such units are consolidated on an income tax return in that foreign country, then the separate units will be treated as one separate unit for purposes of paragraph (d)(2) of this section.

(6) *Examples.* The following examples illustrate this paragraph (d).

Example (1). X, a member of a U.S. affiliated group, has a foreign branch (as defined in § 1.367(a)–6T(g)) in Country Y. Under the Country Y income tax laws, the branch will be taxed as a permanent establishment and its income and losses may be used (on an elective basis) in the Country Y form of consolidation to offset the income of Z, an affiliate of X, under Country Y law. The branch of X incurs a net operating loss during the taxable year ending December 31, 1987. The foreign branch of X will be treated as a separate domestic corporation and a dual resident corporation under paragraph (d)(2) of this section, and its net operating loss will constitute a dual consolidated loss. Consequently, under paragraph (a) of this section, the branch's net operating loss may not be used to offset the income of any other U.S. affiliate or any income of X other than income derived from the branch operations. However, the branch will not be treated as a dual resident corporation if X (or the affiliated group of which X is a member) files a certification for the taxable year as described in paragraph (d)(3) of this section that its net operating loss was not in fact used by Z (or any other entity) to offset income under the Country Y income tax laws, and that such loss will be recaptured if it is so used in the future.

Example (2). X is classified as a partnership for U.S. tax purposes under Code section 7701 and applicable regulations. A, B and C are the sole partners of X. A and B are domestic corporations and C is a resident of foreign country Y. Under Country Y's law, X is classified as a corporation and its income and losses may be used in the Country Y form of consolidation to offset the income of the companies that are affiliates of X. X generates net operating losses. The partnership interests held by A and B are each treated as separate domestic corporations and dual resident corporations under paragraph (d)(1) of this section. A's and B's pro rata share of the losses of X are dual consolidated losses as defined in paragraph (b)(2) of this section. Under paragraph (a) of this section, the losses of X may not be used to offset the income of any other U.S. affiliate. A's pro rata share of losses of X may be used by A only to offset A's pro rata share of income of X. However, paragraph (a) of this section shall not apply to A's pro rata share of losses of X if A meets one of the exceptions described in paragraph (c) of this section. The same principles apply to limit the use of losses allocated to B.

Example (3). Domestic corporation W owns two unincorporated business operations in Country Y. The two businesses, A and B, constitute separate foreign branches (as defined in § 1.367(a)–6T(g)). Under the tax laws of Country Y, A is treated as a separate corporation and taxed on a residence basis. Thus, A is a separate unit described in paragraph (d)(1) of this section. B is not a separate unit described in paragraph (d)(1) of this section. W is a calendar year taxpayer for both United States and Country Y purposes. During the calendar year ending December 31, 1987, A operated at a loss and B was profitable. Country Y allows both of W's branches to report their combined operations on a single income tax return. Thus, the losses incurred by A may be used on the 1987 Country Y return to offset the income of B. A will be treated as a dual resident corporation under paragraph (d)(1) of this section. Because A is a separate unit described in paragraph (d)(1) of this section, paragraph (d)(5)(i) of this section treats A and B as separate entities for purposes of determining whether the losses, expenses, or deductions of A may be used to offset the income of another person, corporation, or entity and the exception in paragraph (d)(5)(ii) of this section does not apply. Since the loss incurred by A may be used to offset B's income under foreign tax laws, W will not qualify for the exceptions described in paragraph (c) of this section. Accordingly, W will report the income from B on its 1987 U.S. tax return, but will not be allowed to use the losses from A to offset that income or the income from any source other than from the operations of A.

(e) *Special rule for use of dual consolidated loss to offset tainted income*—(1) *In general.* The dual consolidated loss of any dual resident corporation that ceases to be a dual resident corporation shall not be used to offset income of such corporation to the extent that such income is tainted income as defined in paragraph (e)(2) of this section.

(2) *Tainted income defined.* Tainted income is any income derived from tainted assets (as defined in paragraph (e)(3) of this section), during the period beginning on the date of the transfer or acquisition of tainted assets and ending at the close of the fifteenth taxable year following the taxable year in which the dual resident corporation ceased to be a dual resident corporation.

(3) *Tainted assets defined.* Tainted assets are any assets transferred to or acquired by a dual resident corporation in a non-recognition transaction (as defined in section 7701(a)(45)) at any time during the three taxable years immediately preceding the taxable year in which such dual resident corporation ceased to be a dual resident corporation or at any time during the 15 taxable years immediately following the taxable year in which a dual resident corporation ceased to be a dual resident corporation. Tainted assets shall not include assets that were transferred to or acquired by such dual resident corporation on or before December 31, 1986.

(4) *Exception.* For assets transferred to or acquired by a dual resident corporation prior to the time it ceased to be a dual resident corporation, if it can be shown that, for the year in which assets were transferred to or acquired by such corporation, the corporation did not incur a dual consolidated loss (or carry forward a dual consolidated loss to such year) and that there was a valid business reason for the transfer or acquisition of such assets, the income derived from such assets shall not be subject to the limitation described in paragraph (e)(1) of this section.

(f) *Special rules for accounting for dual consolidated losses*—(1) *Determination of amount of dual consolidated loss*—(i) *Dual resident corporation that is a member of an affiliated group.* For purposes of determining whether a dual resident corporation that is a member of an affiliated group filing a consolidated return has a dual consolidated loss for the taxable year, the dual resident corporation shall compute its taxable income (or loss) in accordance with the provisions of § 1.1502–12 (relating to computation of separate taxable income of a member of an affiliated group filing a consolidated return), determined by taking into account the adjustments provided in § 1.1502–79(a)(3), that is:

(A) The portion of the consolidated dividends received deduction, the consolidated charitable contributions deductions, and the consolidated section 247 deduction, attributable to such member;

(B) Such member's capital gain net income (determined without regard to any net capital loss carryover attributable to such member);

(C) Such member's net capital loss and section 1231 net loss, reduced by the portion of the consolidated net capital loss attributable to such member (as determined under paragraph (b)(2) of § 1.1502–79); and

(D) The portion of any consolidated net capital loss carryover attributable to such member which is absorbed in the taxable year.

For purposes of this paragraph (f), any income, gain, or loss of a dual resident corporation shall not be deferred or eliminated under § 1.1502–13 (b)(2) or (c), or 1.1502–14. Further, sections 267 and 163(e)(3) shall not apply.

(ii) *Dual resident corporation that is a separate unit of a domestic corporation.* For purposes of determining whether a dual resident corporation that is a separate unit of a domestic corporation has a dual consolidated loss for the taxable year, the dual resident corporation shall compute its taxable income (or loss) as if it were a separate domestic corporation and a dual resident corporation, using only those items of income, expenses, and deductions which are otherwise attributable to such separate unit.

(2) *Effect of dual consolidated loss.* For any taxable year in which a dual resident corporation has a dual consolidated loss to which paragraph (a) of this section applies, the following rules shall apply.

(i) If the dual resident corporation is a member of an affiliated group filing a consolidated return, then such affiliated group shall compute its taxable income without regard to the items of income, loss, or deduction of the dual resident

corporation for the taxable year. The amount of taxable loss of the dual resident corporation for the taxable year shall be the amount of dual consolidated loss determined under paragraph (f)(1)(i) of this section. Such loss may be carried over or back for use in other taxable years as a net operating loss deduction by the dual resident corporation to the extent permitted under section 172. However, such loss shall be treated as a loss incurred by the dual resident corporation in a separate return limitation year, and, including in the case of a dual resident corporation that is a common parent, shall be subject to all of the limitations of § 1.1502–21(c)(2) (relating to limitations on net operating loss carryovers and carrybacks from separate return limitation years).

(ii) If the dual resident corporation is a separate unit of a domestic corporation, then such domestic corporation and the affiliated group with which it may file a consolidated return shall compute taxable income for the taxable year without regard to the items of income, loss, or deductions of the dual resident corporation for the current year. Further, the loss of the dual resident corporation (the separate unit of the domestic corporation) shall be treated as a loss incurred by a separate corporation and its use shall be subject to all of the limitations of § 1.1502–21(c)(2) (relating to limitations on net operating loss carryovers and carrybacks from separate return limitation years), as if such dual resident corporation were filing a consolidated return with the domestic corporation or with the affiliated group with which the domestic corporation files a consolidated return.

(3) *Basis adjustments for dual consolidated losses.* When a dual resident corporation is a member of an affiliated group filing a consolidated return, each member owning stock in the dual resident corporation shall adjust the basis of the stock in the manner described in subparagraphs (i) and (ii) of this paragraph (f)(3).

(i) *Positive adjustment.* Adjustments shall be made in accordance with the principles of § 1.1502–32(b)(1), except that there shall be no positive adjustment under § 1.1502–32(b)(1)(ii) for any amount of the dual consolidated loss which is not absorbed. There shall be no positive adjustment for any amount included in income upon the use of a dual consolidated loss in a foreign country under § 1.1503–2T(c)(3).

(ii) *Negative adjustments.* Adjustments shall be made in accordance with the principles of § 1.1502–32(b)(2), except that there shall be no negative adjustments under § 1.1502–32(b)(2)(ii) for the amount of the dual consolidated loss.

(4) *Examples.* The following examples illustrate this paragraph (f).

Example (1). (i) P, S1, S2, and T are domestic corporations. P owns all of the stock of S1 and S2. S2 owns all of the stock of T. T is a dual resident corporation. None of the exceptions described in paragraph (c) apply with respect to T. P, S1, S2, and T have filed and continue to file a consolidated federal income tax return. X, Y, and Bank are corporations which are not members of the affiliated group of which P is the common parent.

(ii) At the beginning of 1989, P had a basis in S2 of $1000. S2 had a basis in T of $500.

(iii) In 1989, T had an interest expense of $100 on a loan from Bank. T sold a noncapital item *u* in which it had a basis of $10 to S1 for $50. T sold noncapital item *v* in which it had a basis of $200 to S1 for $100. The sale of *u* and *v* are deferred intercompany transactions described in § 1.1502–13(a)(2). S1 had separate taxable income calculated in accordance with § 1.1502–12 of $200. In addition, S1 sold item *w* in which it had a basis of $50 to T for $100. The sale of item *w* is a deferred intercompany transaction described in § 1.1502–13(a)(2). P and S2 had no items of income, loss, or deduction for 1989.

(iv) For purposes of determining whether T has a dual consolidated loss in 1989 and the amount of such dual consolidated loss, T's taxable income (loss) is calculated under paragraph (f)(1) as follows:

($100)	interest expense to Bank
($100)	sale of item *v* to S1
$40	sale of item *u* to S1
($160)	

T therefore has a dual consolidated loss of $160 for 1989.

(v) Because T has a dual consolidated loss for the year, the consolidated taxable income of the P affiliated group is calculated without regard to the items of income, loss, or deduction of T. However, T is still a member of the P affiliated group. Therefore, the consolidated taxable income of the P group is $200 (attributable solely to the income of S1). The $50 gain recognized by S1 upon the sale of item *w* to T is deferred pursuant to § 1.1502–13(c)(1).

(vi) S2 may not make the positive adjustment provided for in § 1.1502–32(b)(1)(ii) to its basis in T for the dual consolidated loss incurred by T. However, S2 must make the negative adjustment provided for in § 1.1502–32(b)(2)(i) for the amount of its allocable part of the deficit in earnings and profits of T for the taxable year. Thus, as provided in § 1.1502–32(e)(1), S2 shall make a net negative adjustment to its basis in T of $160 and S2's basis in T is now $340. As provided in § 1.1502–33(b)(4)(ii)(a), S2's earnings and profits for 1989 must reflect S2's decrease in its basis in T stock for the taxable year. Since S2 has no other earnings and profits for the taxable year, S2 has a deficit in earnings and profits of $160 for the taxable year. As provided in § 1.1502–32(b)(2)(i), P must make a negative adjustment for the amount of its allocable part of the deficit in earnings and profits of S2 for the taxable year. Thus, P must make a net negative adjustment to its basis in S2 of $160 and P's basis in S2 is now $840.

Example (2). (i) The facts are the same as in *Example (1)*, except that in 1990, S1 sold items *u* and *v* to X for no gain or loss. T incurred an interest expense of $100 on a loan from Bank. T also sold item *q* in which it had a basis of $50 to S1 for $100. T also sold item *r* in which it had a basis of $100 to Y for $300. P and S2 had no items of income, loss, or deduction for 1990.

(ii) For purposes of determining whether T has a dual consolidated loss in 1990 and the amount of such dual consolidated loss, T's taxable income (loss) is:

($100)	interest expense to Bank
$50	sale of item *q* to S1
$200	sale of item *r* to Y
$150	

T therefore has no dual consolidated loss for 1990.

(iii) Since T does not have a dual consolidated loss for the taxable year, the group's consolidated taxable income is calculated in accordance with the general rule of § 1.1502–11 and not in accordance with the rule of § 1.1503–2T(f)(2). T has separate taxable income calculated in accordance with § 1.1502–12 of $100. On the disposition of items *u* and *v* outside the P affiliated group, no gain or loss is restored to income to T in accordance with § 1.1502–13(f)(1)(i) because the gain or loss on these items was not deferred, pursuant to § 1.1503–2T(f)(3). The $50 gain on the sale of item *q* from T to S1 is an intercompany transaction on which the gain or loss recognized is deferred pursuant to § 1.1502–13(c)(1). The consolidated taxable income of the P affiliated group computed without regard to the consolidated net operating loss deduction is $100.

(iv) As provided by § 1.1502–21(c)(2) of the regulations, the amount of the dual consolidated loss arising in 1989 which may be absorbed by the P affiliated group in 1990 is $100; that is, the consolidated taxable income computed without regard to the consolidated net operating loss deduction minus such consolidated taxable income recomputed by excluding the items of income and deduction of T. Section 1.1502–21(c) allows $100 of the dual consolidated loss to be included in the consolidated net operating loss deduction for 1990. The consolidated taxable income of the P group for 1990 is $0.

(v) S2 must make the positive adjustment provided for in § 1.1502–32(b)(1)(i) to its basis in T for the amount of its allocable part of the undistributed earnings and profits of T for the taxable year. S2 can not make the negative adjustment provided for in § 1.1502–32(b)(2)(ii) for the dual consolidated loss of T incurred in 1989 and absorbed in 1990. Thus, as provided in § 1.1502–32(e)(2), S2 shall make a net positive adjustment to its basis in T of $100 and S2's basis in T is now $440. As provided in § 1.1502–33(b)(4)(ii)(a), S2's earnings and profits for 1989 must reflect S2's increase in its basis in T stock for the taxable year. Since S2 has no other earnings and profits for the taxable year, S2 has earnings and profits of $100 for the taxable year. As provided in § 1.1502–32(b)(1)(i), P must make a positive adjustment for the amount of its allocable part of the undistributed earnings and profits of S2 for the taxable year. Thus, P must make a net positive adjustment to its basis in S2 of $100 and P's basis in S2 is now $940.

OMB Control Number Under the Paperwork Reduction Act

PART 602—[AMENDED]

Par. 3. The authority for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

§ 602.101 [Amended]

Par. 4. Section 602.101(c) is amended by inserting in the appropriate place in the table "§ 1503–2T * * * 1545–1083."

Lawrence B. Gibbs,

Commissioner of Internal Revenue.

Approved: July 26, 1989.

Kenneth W. Gideon,

Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

DEPARTMENT OF DEFENSE

Department of the Navy

32 CFR Part 706

Certifications and Exemptions Under the International Regulations for Preventing Collisions at Sea, 1972; Amendment

AGENCY: Department of the Navy, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Navy is amending its certifications and exemptions under the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), to reflect that the Judge Advocate General of the Navy has determined that USS ABRAHAM LINCOLN (CVN 72) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with certain provisions of the 72 COLREGS without interfering with its special functions as a naval aircraft carrier. The intended effect of this rule is to warn mariners in waters where 72 COLREGS apply.

EFFECTIVE DATE: August 31, 1989.

FOR FURTHER INFORMATION CONTACT: Captain P.C. Turner, JAGC, U.S. Navy Admiralty Counsel, Office of the Judge Advocate General, Navy Department, 200 Stovall Street, Alexandria, VA 22332–2400. Telephone number: (202) 325–9744.

SUPPLEMENTARY INFORMATION: Pursuant to the authority granted in 33 U.S.C. 1605, the Department of the Navy amends 32 CFR Part 706. This amendment provides notice that the Judge Advocate General of the Navy, under authority delegated by the Secretary of the Navy, has certified that USS ABRAHAM LINCOLN (CVN 72) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with 72 COLREGS: Rule 21(a), pertaining to the location of the masthead lights over the fore and aft centerline of the ship; Annex 1, section 2(g), pertaining to the distance of the sidelights above the hull; and Annex I, section 3(a), pertaining to the location of the forward masthead light in the forward quarter of the ship, without interfering with its special functions as a naval ship. The Judge Advocate General of the Navy has also certified that the aforementioned lights are located in closest possible compliance with the applicable 72 COLREGS requirements.

Moreover, it has been determined, in accordance with 32 CFR parts 296 and 701, that publication of this amendment for public comment prior to adoption is impracticable, unnecessary, and contrary to public interest since it is based on technical findings that the placement of lights on this vessel in a manner differently from that prescribed herein will adversely affect the vessel's ability to perform its military functions.

List of Subjects in 32 CFR Part 706

Marine safety, Navigation (water), and Vessels.

PART 706—[AMENDED]

Accordingly, 32 CFR part 706 is amended as follows:

1. The authority citation for 32 CFR part 706 continues to read:

Authority: 33 U.S.C. 1605.

§ 706.2 [Amended]

2. Table 2 of § 706.2 is amended by adding the following ship:

Vessel and number	Masthead lights, distance to stbd of keel in meters; Rule 21(a)	Forward anchor light, distance below flight dk in meters; § 2(k), Annex I	Forward anchor light, number of; Rule 30(a)(i)	AFT anchor light, distance below flight dk in meters; Rule 21(e), Rule 30(a)(ii)	AFT anchor light, number of; Rule 30(a)(ii)	Side lights, distance below flight dk in meters; § 2(g), Annex I	Side lights, distance forward of forward masthead light in meters; § 3(b), Annex I	Side lights, distance inboard of ship's sides in meters; § 3(b), Annex I
U.S.S. ABRAHAM LINCOLN—CVN–72	30.0					0.6		

3. Table Five of § 706.2 is amended by adding the following ship:

Vessel and number	Forward masthead light less than the required height above hull. Annex I, sec. 2(a)(i)	Aft masthead light less than 4.5 meters above forward masthead light. Annex I, sec. 2)(a)(ii)	Masthead lights not over all other lights and obstructions. Annex I, sec. 2(f)	Vertical separation of masthead lights used when towing less than required by Annex I, sec. 2(a)(i)	Aft masthead lights not visible over forward light 1,000 meters ahead of ship in all normal degrees of trim. Annex I, sec. 2(b)	Forward masthead light not in forward quarter of ship. Annex I, sec. 3(a)	After masthead light less than ½ ship's length aft of forward masthead light. Annex I, sec. (3)(a)	Percentage horizontal separation attained.
U.S.S. ABRAHAM LINCOLN—CVN–72						X		

Date: August 31, 1989.

Approved:

E. D. Stumbaugh,

Rear Admiral, JAGC, U.S. Navy Judge Advocate General.

32 CFR Part 706

Certifications and Exemptions Under the International Regulations for Preventing Collisions at Sea, 1972; Amendment

AGENCY: Department of the Navy, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Navy is amending its certifications and exemptions under the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), to reflect that the Judge Advocate General of the Navy has determined that USS TOPEKA (SSN 754) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with certain provisions of the 72 COLREGS without interfering with its special functions as a naval submarine. The intended effect of this rule is to warn mariners in waters where 72 COLREGS apply.

EFFECTIVE DATE: September 1, 1989.

FOR FURTHER INFORMATION CONTACT: Captain P.C. Turner, JAGC, U.S. Navy Admiralty Counsel, Office of the Judge Advocate General, Navy Department, 200 Stovall Street, Alexandria, VA 22332–2400. Telephone number: (202) 325–9744.

SUPPLEMENTARY INFORMATION: Pursuant to the authority granted in 33 U.S.C. 1605, the Department of the Navy amends 32 CFR part 706. This amendment provides notice that the Judge Advocate General of the Navy, under authority delegated by the Secretary of the Navy, has certified that USS TOPEKA (SSN–754) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with 72 COLREGS: Rule 21(c), pertaining to the arc of visibility of the sternlight; Annex I, section 2(a)(i), pertaining to the height of the masthead light; Annex I, section 2(k), pertaining to the height and relative positions of the anchor lights; and Annex I, section 3(b), pertaining to the location of the sidelights. Full compliance with the above-mentioned 72 COLREGS provisions would interfere with the special functions and purposes of the vessel. The Judge Advocate General of the Navy has also certified that the aforementioned lights are located in closest possible compliance with the applicable 72 COLREGS requirements.

Notice is also provided to the effect that USS TOPEKA (SSN–754) is a member of the SSN–688 class of vessels for which certain exemptions, pursuant to 72 COLREGS, Rule 38, have been previously authorized by the Secretary of the Navy. The exemptions pertaining to that class, found in the existing tables of section 706.3, are equally applicable to USS TOPEKA (SSN–754).

Moreover, it has been determined, in accordance with 32 CFR parts 296 and 701, that publication of this amendment for public comment prior to adoption is impracticable, unnecessary, and contrary to public interest since it is based on technical findings that the placement of lights on this vessel in a manner differently from that prescribed herein will adversely affect the vessel's ability to perform its military functions.

List of Subjects in 32 CFR Part 706

Marine Safety, Navigation (Water), and Vessels.

PART 706—[AMENDED]

Accordingly, 32 CFR part 706 is amended as follows:

1. The authority citation for 32 CFR part 706 continues to read:

Authority: 33 U.S.C. 1605.

§ 706.2 [Amended]

2. Table one of § 706.2 is amended by adding the following vessel:

Vessel and number	Distance in meters of forward masthead light below minimum required height. § 2(a)(i), Annex I
U.S.S. TOPEKA—SSN–754	3.5

3. Table three of § 706.2 is amended by adding the following vessel:

Vessel and number	Masthead lights, arc of visibility; Rule 21(a)	Side lights, arc of visibility; Rule 21(b)	Stern light, arc of visibility; Rule 21(c)	Side lights, distance inboard of ship's sides in meters; § 3(b), Annex I	Stern light distance forward of stern in meters; Rule 21(c)	Forward anchor light, height above hull in meters; § 2(k), Annex I	Anchor lights, relationship of aft light to forward light in meters; § 2(k), Annex I
U.S.S. TOPEKA—SSN–754			206°	4.2	6.2	3.5	1.7 below

Dated: September 1, 1989.

Approved:

E. D. Stumbaugh,

Rear Admiral, JAGC, U.S. Navy.

Date: September 5, 1989.

BILLING CODE 3810-01-M

PANAMA CANAL COMMISSION

35 CFR Parts 101, 113, 121, and 123

RIN 3207-AA18; 3207-AA19; and 3207-AA20

Arriving and Departing Vessels: Various Communication, Documentation; Dangerous Cargoes; Inspection and Registration of Vessels; Radio Communication

AGENCY: Panama Canal Commission.

ACTION: Final rule.

SUMMARY: This rule changes parts of title 35, Code of Federal Regulations concerning arriving and departing vessels, specifically those provisions relating to documentation, dangerous cargoes, inspection and registration of vessels, and radio communication. The rule changes reflect a recent reorganization in the Commission's Marine Bureau which has resulted in changes of the titles of responsible officials. The rule will clarify responsibility for reporting dangerous cargoes, as well as allow for greater consistency in the area of marine inspection.

EFFECTIVE DATE: October 10, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Michael Rhode, Jr., Assistant to the Chairman and Secretary, Panama Canal Commission, (202) 634-6441, or Captain William Y. Clark II, USCG, Special Assistant to the Marine Director, telephone in Balboa Heights, Republic of Panama, 011-507-52-4243.

SUPPLEMENTARY INFORMATION: On June 27, 1989, a notice of proposed rulemaking was published in the Federal Register (54 27030). Comments were invited from the public until July 27, 1989. No comments were received. Since the adoption of International Maritime Organization's rules concerning dangerous or hazardous cargoes in June, 1985, considerable information has been gathered concerning the specifics necessary to the proper reporting of these cargoes and the need to be consistent throughout the regulations. The amendments are mainly procedural. The intent is to clarify information for Canal users.

Further, the rule revises the requirement for vessels carrying nuclear materials to provide proof of financial responsibility to establish that such vessels must have adequate provision for indemnity and loss comparable in general scope to the protection afforded under the United States Atomic Energy Act or consistent with international practice and standards. Vessels will also be required to furnish the Commission with the results of radiation survey reports prior to transiting.

Additionally, the Commission's Marine Bureau has been reorganized. The titles of heads of certain units have changed and are published for the benefit of our customers. For example, the inspection of floating equipment is now under the direction of the U.S. Coast Guard Liaison Officer, who is also the Special Assistant to the Marine Director for Marine Safety. He heads a Marine Safety Unit consisting of four members, two of whom are floating equipment inspectors. The main purpose served by the changes to part 121, "Inspection and Registration of Vessels", is to properly reflect the present area of responsibility and to include references pertinent to U.S. Coast Guard Marine Inspection Regulations contained in 46 CFR.

Economic Assessment and Certification

The Panama Canal Commission has determined that these changes do not constitute major rules within the meaning of Executive Order 12291 dated February 17, 1981 (47 FR 13193), inasmuch as these changes, will not have an effect on the economy of $100 million or more per year. These changes will not result in a major increase in cost or prices for consumers, individual industries, local government agencies or geographic regions.

Further, the agency has determined that implementation of the rules will have no adverse impact on competition, employment, investment, productivity innovation or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Finally, the Commission has determined that these rules are not subject to the requirements of sections 603 and 604 of Title 5, United States Code, in that their promulgation will not have a significant impact on a substantial number of small entities.

List of Subjects

35 CFR Part 101

Arriving and departing vessels: Documentation requirements.

35 CFR Part 113

Dangerous cargo transportation.

35 CFR Part 121

Inspection and registration of vessels.

35 CFR Part 123

Radio communication.

For the reasons set out in the preamble, title 35, chapter I, subchapter C of the Code of Federal Regulations is amended as follows.

PART 101—ARRIVING AND DEPARTING VESSELS: VARIOUS COMMUNICATION, DOCUMENTATION, SANITATION AND ADMEASUREMENT REQUIREMENTS

1. The authority citation for Part 101 continues to read as follows:

Authority: 22 U.S.C. 3811, E.O. 12215, 45 FR 36043, 44 U.S.C. 3501.

2. Section 101.10 is amended by revising paragraphs (a)(3), (e) and (f) to read as follows:

§ 101.10 Same; list.

(a) *Documents for Commission Boarding Officer.* * * *

* * * * *

(3) Crew List (Panama Canal Form 1509)—1 Copy

* * * * *

(e) *Dangerous cargo manifest.* The dangerous cargo manifest for vessels carrying packaged dangerous goods, as defined in § 113.2(m) of this title, shall show the correct technical name, United Nations number, International Maritime Organization class and division, storage location, and quantity for each packaged dangerous good carried as cargo.

(f) *Loading plan.* The loading plan for vessels carrying dangerous cargo in bulk, as defined in § 113.2(f) of this title, shall show the location of cargo tanks or holds and the correct technical name, United Nations number, International Maritime Organization class and division, and quantity of dangerous cargo carried in each cargo tank or hold.

* * * * *

PART 113—DANGEROUS CARGOES

3. The authority citation for part 113 continues to read as follows:

Authority: Issued under authority vested in the President by 22 U.S.C. 3811, E.O. 12215, 45 FR 36043.

4. Section 113.3 is amended by revising the introductory text of paragraph (a) to read as follows:

§ 113.3 Classifications.

(a) Dangerous cargo shall be classified in accordance with the IMO class and division. Whenever there is a doubt as to the explosive or dangerous nature of

any commodity, or in case of conflict as to its classification, determination of the nature and classification of such cargoes shall be made by the Marine Safety Advisor or his designee. Dangerous cargoes shall be divided into the following classes:

* * * * *

5. Section 113.4 is amended by revising paragraph (a) to read as follows:

§ 113.4 Safety and alarm systems.

(a) All dangerous cargo alarms, safety devices, and the vessel's firefighting systems shall be tested 24 hours prior to arrival in Canal waters by any vessel carrying dangerous cargoes. An entry shall be made in the ship's log stating that such tests were conducted and the systems found in proper working order or, if not in proper order, a detailed listing of discrepancies shall be included.

* * * * *

6. Section 113.5 is revised to read as follows:

§ 113.5 Inspections.

The Canal Operations Captain or the Marine Safety Advisor or their designees may inspect vessels carrying dangerous cargoes to ensure that such vessels are in compliance with the requirements of this part.

Subpart B—Vessels Carrying Dangerous Cargoes in Bulk

7. Section 113.21 is revised to read as follows:

§ 113.21 Application.

This subpart applies to vessels carrying dangerous liquefied gases, liquids and solids in bulk, or tankers in ballast condition which are not gas free. It does not apply to vessels carrying combustible liquids in bulk as prescribed in § 113.3(b), subpart A, of this part.

8. Section 113.22 is revised to read as follows:

§ 113.22 Advance notice.

Vessels subject to this subpart shall provide not less than 48 hours advance notice to Canal authorities by radio of the information required by the "GOLF" item in the prearrival radio message prescribed in § 123.4(a) of this subchapter.

(Approved by the Office of Management and Budget under control number 3207-0001).

9. Section 113.26 is amended by revising paragraph (a) to read as follows:

§ 113.26 Transit requirements.

(a) To better ensure the safe passage of vessels subject to this subpart, operating restrictions beyond those applicable to other vessels may be imposed by the Canal Operations Captain or his designee.

* * * * *

10. Section 113.29 is amended by revising paragraphs (b) and (c) to read as follows:

§ 113.29 Prohibited cargoes.

* * * * *

(b) Bulk dangerous cargoes not listed in the Bulk Chemical Code, Gas Carrier Codes, or Solid Bulk Code are prohibited in Canal waters unless advance approval is given by the Marine Safety Advisor or his designee to carry such cargoes.

(c) Bulk chemical and liquefied gas carriers are prohibited from carrying in Canal waters dangerous cargoes that are not listed on their Certificate of Fitness or Certificate of Compliance, unless 30 days advance notice is given by the vessel and the Marine Safety Advisor or his designee approves the carriage of such cargoes in Canal waters.

(Approved by the Office of Management and Budget under control number 3207-0001.)

Subpart C—Vessels Carrying Dangerous Packaged Goods

11. Section 113.42 is revised to read as follows:

§ 113.42 Advance notice.

Vessels subject to this subpart shall provide not less than 48 hours advance notice to Canal authorities by radio of the information required in the "HOTEL" item of the radio message prescribed in § 123.4 of this subchapter, except that vessels carrying explosives shall provide the information required in the "GOLF" item of the message.

(Approved by the Office of Management and Budget under control number 3207-0001)

12. Section 113.43 is amended by revising paragraph (c) to read as follows:

§ 113.43 Anchoring requirements.

* * * * *

(c) Vessels carrying explosives or especially reactive or large amounts of dangerous materials as determined by the Canal Operations Captain, or his designee, may be instructed to anchor in one of the explosive anchorage areas described in § 101.8(a) (2), (3) and (c)(2) of this subchapter.

13. Section 113.45 is revised to read as follows:

§ 113.45 Transit requirements.

Normal operating restrictions will generally apply unless such vessels are carrying more than five tons of explosives or carrying especially more reactive or large amounts of dangerous goods as determined by the Marine Safety Advisor or his designee, in which case additional operating restrictions may be imposed.

14. Section 113.49 is amended by revising paragraphs (b) and (c) to read as follows:

§ 113.49 Class 1, Explosives.

* * * * *

(b) Explosive cargo may be loaded and discharged only at the Mindi Dock. Explosive anchorages prescribed in § 101.8 (a) (2), (3) and (c)(2), respectively, may be used upon approval of the Marine Safety Advisor, or his designee.

(c) The Marine Safety Advisor or his designee, upon application, may permit the discharge of explosives, whether intended for civilian or military use, at Commission docks and other locations within Canal waters in an emergency or when the character or packing of the explosives permits their safe discharge there.

15. Section 113.50 is amended by revising paragraphs (c), (d), and (e) to read as follows:

§ 113.50 Class 7, Radioactive substances.

* * * * *

(c) For the purpose of approval of shipments and prior notification of radioactive substances under the IMDG Code, Panama Canal waters will be considered a country en route. Notification shall be given to Canal authorities 30 days in advance of the arrival of the vessel in Canal waters for all fissionable materials, in order that approval may be given by the Marine Safety Advisor, or his designee, to transit such cargoes.

(d) Vessels carrying nuclear materials shall be required to provide current proof of financial responsibility and adequate provision for indemnity covering public liability and loss to the United States or any agency thereof, comparable in general scope to the protection afforded under section 170 of the United States Atomic Energy Act of 1954, as amended, 68 Stat. 919, 71 Stat. 576, or consistent with international practice and standards as set forth by the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal. Vessels shall also be required to furnish the Commission with the results of cargo radiation survey reports in accordance with the standards in IMO class 7.

(e) For the following radioactive substances, not less than 48-hour advance information required under § 123.4 shall be provided, indicating the specifics required by the IMDG Code:

(1) Low Specific Activity Substances or Low Level Solid Radioactive Substances as specified in Class 7 schedules 5, 6, and 7 of the IMDG Code.

(2) Radioactive Substances carried in limited quantities as specified in Class 7 schedules 1, 2, 3, and 4 of the IMDG Code.

(Approved by the Office of Management and Budget under control number 3207–0001)

PART 121—INSPECTION AND REGISTRATION OF VESSELS

16. The authority citation for part 121 continues to read as follows:

Authority: 22 U.S.C. 3811, E.O. 12215, 45 FR 36043, and 44 U.S.C. 3501.

Subpart A—General Provisions

17. Section 121.2 is revised to read as follows:

§ 121.2 Definitions.

As used in this part, the following terms have the meanings indicated:

(a) *Vessel* means any vessel as defined in § 111.3 other than a motorboat as defined in this section.

(b) *Motorboat* means any vessel not more than 20 meters (65 feet) in length propelled by machinery except tugboats and towboats. The word "motorboat" includes a boat temporarily or permanently equipped with a detachable motor. Motorboats are classed as follows:

Class A—Any motorboat less than 7 meters (23 feet) in length.

Class B—Any motorboat 7 meters (23 feet) or over and less than 12 meters (40 feet) in length.

Class C—Any motorboat 12 meters (40 feet) or over and less than 20 meters (65 feet) in length.

Class D—Any cayuco or piragua not more than 20 meters (65 feet) in length equipped with an outboard motor or motors operating in Madden or Gatun Lakes.

§ 121.3 [Removed]

18. Section 121.3 is removed.

Subpart B—Inspection

Vessels

19. Section 121.41 is amended by revising paragraphs (a) and (c) to read as follows:

§ 121.41 Certificates of inspection.

(a) Certificates of inspection shall be issued for a period of 1 year to passenger vessels, vessels equipped with boilers, and vessels whose hull or machinery is, in the judgment of the Marine Safety Unit, in such condition as to require inspection annually.

* * * * *

(c) Application shall be made by the owner or other responsible person for inspection and issuance of a new certificate of inspection prior to expiration of the certificate.

20. Section 121.42 is revised to read as follows:

§ 121.42 Distribution of certificates.

Two copies of the certificate of inspection shall be retained on file by the Marine Safety Unit. The original and one copy shall be given to the master or owner of the vessel named therein.

21. Section 121.45 is revised to read as follows:

§ 121.45 Drawings of new vessels to be furnished to the Marine Safety Unit.

The owner or other responsible person, when applying for the first inspection to a new vessel, shall furnish the Marine Safety Unit the following drawings and prints for review prior to construction: Midship section, inboard profile, outboard profile, arrangement of decks and hatch details, capacity of double bottoms and fuel compartments, hull penetrations and shell connections, machinery installation, piping systems, lifesaving equipment, fire fighting equipment, electrical, general alarm, radio, and emergency light circuits, and such other drawings or prints as show the general construction of the vessel, including dimensions, spacing of frames, disposition of hull plates, construction of transverse and longitudinal bulkheads, and location of same.

(Approved by the Office of Management and Budget under control number 3207–0001)

22. Section 121.47 is amended by revising paragraph (c) to read as follows:

§ 121.47 Inspection of hulls.

* * * * *

(c) The outboard shaft or shafts on every ocean or coastwise vessel shall be drawn for examination at least once every 3 years: Provided, that when it is shown that a vessel has had a long period of lay-up the Marine Safety Unit may grant an extension equal to the time the vessel has been out of commission, but in no case shall the extension exceed 1 year.

* * * * *

23. Section 121.58 is revised to read as follows:

§ 121.58 Safety valves.

(a) At the annual inspection of each boiler, the marine safety inspector shall check the setting of each boiler safety valve and make any adjustments that may be necessary to keep the boiler within the maximum allowable pressure. After adjusting the boiler safety valves, the marine safety inspector shall seal each safety valve separately with the official seal of the Marine Safety Unit.

(b) Each chief engineer, upon taking charge of the power plant of a vessel, shall examine all safety valves and if any seals are broken, or there is any evidence that valves have been tampered with, he shall report same in writing to the Marine Safety Unit. If at any time it is necessary to break the seal on a safety valve for any purpose, the chief engineer shall advise the Marine Safety Unit in writing, giving the reason for breaking the seal and requesting the valve be examined, adjusted, and resealed.

24. Section 121.63 is amended by revising the section heading to read as follows:

§ 121.63 Guards in dangerous places.

25. Section 121.65 is revised to read as follows:

§ 121.65 Notice to the Marine Safety Unit of vessel on dock; alterations.

(a) Whenever any vessel under the supervision of the Marine Safety Unit is placed upon the dock for repairs it shall be the duty of the owner or responsible official to report same to the Marine Safety Unit so that a thorough inspection may be made to determine what is necessary to make such vessel seaworthy. No repairs or alterations affecting the safety of the vessel, either in regard to hull or machinery, shall be made without the knowledge and authority of the Marine Safety Unit. Notice of such repairs and alterations is necessary even if such work does not require the vessel to be placed in a drydock.

(b) When a repair or alteration ordered by the Marine Safety Unit has been completed the same shall be reported to the Marine Safety Unit in writing by the owner or responsible official.

26. Section 121.66 is revised to read as follows:

§ 121.66 Whistles.

Every inspected vessel under the supervision of the Marine Safety Unit shall be provided with an efficient whistle suitable for sounding the necessary whistle signals. Means shall be provided to operate the whistle from

a position adjacent to the main steering station and from the remote steering station where such steering station is fitted. Details of the whistle operating devices shall meet the requirements of 46 CFR chapter I, subchapter J (Electrical Engineering).

27. Section 121.67 is revised to read as follows:

§ 121.67 Fog bells.

Inspected vessels 12 meters in length or greater, under the supervision of the Marine Safety Unit, shall be provided with an efficient fog bell. The bell, of corrosion resistant material, shall produce a clear tone at a sound pressure level of not less than 110 decibels at a distance of 1 meter. The diameter of the mouth of the bell shall not be less than 300mm for vessels of 20 meters or more in length, and shall be not less than 200mm for vessels of 12 meters to 20 meters in length. The mass of the striker shall not be less than 3 percent of the mass of the bell.

28. Section 121.69 is revised to read as follows:

§ 121.69 Proceeding to another port for repairs.

The Marine Safety Unit may issue a permit to proceed to another port for repairs, if in its judgment this can be done with safety. Such a permit shall state the conditions upon which it is granted.

29. Section 121.70 is revised to read as follows:

§ 121.70 Marking of draft on vessel.

All vessels 20 gross tons and over, under supervision of the Marine Safety Unit, shall have the draft of the vessel plainly and legibly marked upon the stem and upon the stern post or rudder post or at such other place at the stern of the vessel as may be necessary for easy observance. The draft shall be taken from the bottom of the lowest part of the keel to the surface of the water, the bottom of the mark to indicate the draft in feet. Sufficient marks shall be used to cover all working and loading conditions of the vessel. If any part of the hull or permanent equipment extends below the lowest part of the keel, the master or other responsible person shall produce evidence from which the vessel's maximum immersion may be determined.

30. Section 121.71 is revised to read as follows:

§ 121.71 Emergency lighting system.

Provision shall be made on passenger vessels, tug boats and dredges for an electric system of lighting, sufficient for all requirements of safety, throughout the vessel. There shall be a self-contained electric source capable of supplying power when necessary. Emergency lights shall be tested at least once each week. The date of the tests required by this section shall be noted in the vessel's logbook.

31. Section 121.72 is revised to read as follows:

§ 121.72 Repairs to firefighting and lifesaving apparatus.

No extensive repairs or alterations, except in an emergency, shall be made to lifesaving or firefighting equipment without prior notice to the Marine Safety Unit.

32. Section 121.74 is revised to read as follows:

§ 121.74 Repairs on boilers and unfired pressure vessels.

(a) Before undertaking repairs to a boiler or unfired pressure vessel, the engineer in charge of such vessel shall report the condition necessitating repairs and the nature of the proposed repairs to the Marine Safety Unit in writing.

(b) When damage occurs to boilers or pressure vessels through an accident that tends to render the further use of such boilers or pressure vessels unsafe until repairs are made, the engineer in charge thereof shall promptly report the facts of the accident and the proposed repairs to the Marine Safety Unit in writing.

(c) In cases requiring a written report under this section, repairs shall not commence until the Marine Safety Unit's Inspector has approved the proposed plan of repairs.

33. Section 121.76 is revised to read as follows:

§ 121.76 Inclining test.

When the Marine Safety Unit has any reason to question the stability of any vessel under its supervision, it shall require the owners of the vessel to make inclining tests on such vessels, under the general supervision of the Marine Safety Unit.

34. Section 121.79 is revised to read as follows:

§ 121.79 Carrying of excess steam.

When it is known or comes to the knowledge of the Marine Safety Unit that any steam vessel is or has been carrying an excess of steam beyond that which is allowed by her certificate of inspection, the Marine Safety Unit shall require the owner of said vessel to place on the boiler a lockup safety valve, that will prevent the carrying of an excess of steam, which shall be under the control of the Marine Safety Unit.

35. Section 121.85 is revised to read as follows:

§ 121.85 Sanitation.

The master and chief engineer of any vessel under supervision of the Marine Safety Unit shall see that the vessel and the passenger and crew quarters are kept in a sanitary condition.

36. Section 121.87 is revised to read as follows:

§ 121.87 Examination of boilers and machinery by engineer.

When an engineer assumes charge of the boilers and machinery of a vessel he shall examine the same immediately and thoroughly, and if he finds any part thereof in bad condition, he shall immediately report the fact to the master or employer and to the Marine Safety Unit, which shall thereupon investigate the matter to determine whether the former engineer has been negligent in his duties.

37. Section 121.88 is revised to read as follows:

§ 121.88 Fusible plug report.

The chief engineer of a steam vessel subject to this part shall report promptly to the Marine Safety Unit every renewal of every fusible plug in a boiler or boilers of a steam vessel upon which he is in charge as chief engineer.

38. Section 121.89 is amended by revising paragraphs (a), (a)(1), and (b) to read as follows:

§ 121.89 Boiler steam hours.

(a) Boilers on floating equipment of the Panama Canal Commission which are inspected by the Marine Safety Unit may not be operated under steam for more than the following prescribed number of hours between boiler washout periods:

(1) Boilers which are operated under an approved system of boiler feed water conditioning and with respect to which copies of reports of boiler water conditioning are filed with the Marine Safety Unit: 2,880 hours.

* * * * *

(b) The chief engineer of the vessel shall report all washouts to the Marine Safety Unit on Form 1588–4 when the washout is completed and steam raised in a boiler. The original of this report shall be forwarded to the Marine Safety Unit and a copy to his master or employer.

39. Section 121.90 is revised to read as follows:

§ 121.90 Annual report of floating equipment on hand.

The accountable officials of the Panama Canal Commission shall furnish the Marine Safety Unit with an annual report of all vessels and floating craft on hand by January 1st of each year. This report shall show:

(a) The accountable official.
(b) The responsible official.
(c) The location of vessel or craft.
(d) The number or name of vessel or craft.
(e) The description of vessel or craft.

40. Section 121.92 is revised to read as follows:

§ 121.92 Lifesaving apparatus.

Unless otherwise provided by this part, lifesaving apparatus for vessels subject to this part shall be in accordance with the requirements of the general rules and regulations for vessel inspection of the United States Coast Guard, or with the requirements of the International Convention for the Safety of Life at Sea.

41. Section 121.99 is amended by adding paragraph (c) to read as follows:

§ 121.99 Fire axes.

* * * * *

(c) The vessel's name shall be marked on each ax handle.

42. Section 121.102 is revised to read as follows:

§ 121.102 Portable fire extinguishers.

All vessels subject to this section shall be provided with good and efficient U.S. Coast Guard approved marine portable fire extinguishers. The number and type required shall be determined by the Marine Safety Unit.

43. Section 121.107 is amended by revising paragraphs (a), (b), and (c) and adding paragraph (d) to read as follows:

§ 121.107 Non-self-propelled vessels; equipment.

* * * * *

(a) *Dredges, floating cranes, and drill boats:*

4 Life rings (2 luminous), U.S. Coast Guard approved.
1 Life preserver for each person on board, U.S. Coast Guard approved.
1 Fire pump. Outlets from fire mains to be so arranged that one 50–foot length of hose can reach any part of the vessel.
6 Portable fire extinguishers.
4 Fire axes.
1 Anchor and anchor chain as approved by the Marine Safety Unit.
Lights and day marks as required by § 111.27 (Rule 27, 72 COLREGS).

(b) *Floating pile drivers:*

2 Life rings (1 luminous), U.S. Coast Guard approved.
1 Life preserver for each person on board, U.S. Coast Guard approved.
2 Fire axes.
2 Portable fire extinguishers.
1 Anchor and anchor chain as approved by the Marine Safety Unit.
Lights and day marks as required by § 111.27 (Rule 27, 72 COLREGS).

(c) *Barges, lighters and scows:*

1 Life ring, U.S. Coast Guard approved.
1 Suitable anchor with cable.
1 Life preserver for each person on board, U.S. Coast Guard approved.
Lights as required by part 111 of this chapter and Rule 24 (72 COLREGS).
1 Stern light, white, and so fixed as to show the light 67.5 degrees from right aft on each side, an arc of 135 degrees, visibility of 3 miles.
1 Each sidelight, green starboard and red port, showing an unbroken light over an arc of the horizon of 112.5 degrees and so fixed as to show the light from right ahead to 22.5 degrees abaft the beam on its respective side, visibility of 3 miles.
1 Diamond black shape (on tows exceeding 200 meters) for daylight display where best seen.

(d) *Inconspicuous, partly submerged vessels or objects, or combination of such vessels or objects being towed, shall exhibit:*

(1) White, 32–point, 3–mile lights, one at or near the forward end and one at or near the after end, if less than 25 meters in breadth, except that dracones need not exhibit a light at or near the forward end;

(2) In vessels 25 meters or more in breadth, two additional all-round white lights at or near the extremities of its breadth;

(3) In vessels more than 100 meters in length, additional all-round white lights between the lights prescribed in paragraphs (d) (1) and (2) of this section so that the distance between the lights shall not exceed 100 meters;

(4) A diamond shape at or near the aftermost extremity of the last vessel or object being towed; and, if the length of the tow exceeds 200 meters, an additional diamond shape where it can best be seen and located as far forward as is practicable.

44. Section 121.108 is revised to read as follow:

§ 121.108 Complement of officers and crew.

A certificate of inspection will not be granted to a vessel unless it has in service and on board such complement of officers and crew as may, in the judgment of the Marine Safety Unit, be necessary for safe navigation.

45. Section 121.131 is revised to read as follows:

§ 121.131 Equipment on Motorboats.

(a) Motorboats less than 7 meters (23′) in length shall carry the following equipment:

2 Oars or paddles.
1 Whistle.
1 Bailer.
20 Meters (65′) of manila line, not less than 15mm (⅝") diameter, or synthetic line of comparable strength.
2 Fire extinguishers, either 1¼ gallon foam, 4-lb. CO–2, or 2-lb. dry chemical, when engine is inboard, or one such extinguisher, if fixed system installed in engine space or if the engine is outboard. Extinguishers to be U.S. Coast Guard approved.
1 Combination light showing red to port and green to starboard or individual red and green side lights, visibility of one mile.
1 Stern light or all-round white light, visibility of two miles.
1 Anchor and suitable cable, 40 meters (130′).
1 Red flag.
1 Life preserver for each person carried, U.S. Coast Guard approved.
1 Copy of the "Motorboat Operator's Handbook".

(b) Motorboats 7 meters (23′) or over and less than 12 meters (40′) in length shall carry the following equipment:

1 Life ring buoy of not less than 600mm (24") outside diameter, U.S. Coast Guard approved.
1 Whistle, power-operated, audible at least one mile.
1 Bailer.
20 Meters (65′) of manila line, not less than 18mm (¾") diameter, or synthetic line of comparable strength.
3 Fire extinguishers, 2 of which shall be 2½ gallon foam, 15-lb. CO–2, or 10-lb. dry chemical. The third extinguisher shall be 1¼ gallon foam, 4-lb. CO–2, or 2-lb. dry chemical. This third extinguisher is not required if a fixed system is installed in the engine space. Extinguishers to be U.S. Coast Guard approved.
1 Boat hook.
1 Combination light showing red to port and green to starboard, or individual red and green side lights, visibility one mile.
1 Stern light or all-round white light, visibility of two miles.
1 Anchor and suitable cable, 40 meters (130′).
1 Red flag.
1 Red lantern.
1 Life preserver for each person carried, U.S. Coast Guard approved.
1 Copy of the "Motorboat Operator's Handbook".

(c) Motorboats 12 meters (40′) or over and not more than 20 meters (65′) in length shall carry the following equipment:

2 Life ring buoys not less than 600mm (24") in outside diameter, U.S. Coast Guard approved.
1 Approved fog horn.
1 Whistle, power-operated, audible at least one mile.

1 Bailer.
25 Meters (82′) of manila line, not less than 21mm (⅞") diameter, or synthetic line of comparable strength.
4 Fire extinguishers, 3 of which shall be 2½ gallon foam, 15-lb. CO–2, or 10-lb. dry chemical. The fourth extinguisher may be 1¼ gallon foam, 4-lb. CO–2, or 2-lb. dry chemical. This fourth extinguisher is not required if a fixed system is installed in engine space. Extinguishers to be U.S. Coast Guard approved.
2 Boat hooks.
1 Masthead light, white, 225 degrees, fixed to show the light from right ahead to 22.5 degrees abaft the beam on either side, minimum 2.5 meters above the gunwale, visibility three miles.
1 Combination light showing red to port and green to starboard or individual red and green sidelights, visibility two miles.
1 Stern light, white, 135 degrees, placed as nearly as practicable at the stern, and so fixed to show the light 67.5 degrees from right aft on each side, visibility two miles.
2 Emergency lights, red and all-round in a vertical line where they can best be seen, visibility two miles (daylight: two black balls) used when restricted in ability to maneuver.
1 Red lantern.
1 Red flag.
1 Anchor with 40 meters (130′) suitable cable.
1 Fog bell.
1 Life preserver for each person carried, U.S. Coast Guard approved.
1 Copy of the "Motorboat Operator's Handbook".

(1) Pilot vessels only:

2 Lights at or near the masthead, one all-round white upper and one all-round red lower not less than one meter apart, visibility two miles.

(2) For those vessels engaged in towing and pushing:

2 Masthead lights in a vertical line. When the length of the tow, measured from the stern of the towing vessel to the after end of the tow, exceeds 200 meters, three such lights in a vertical line (daylight: a black diamond shape where it can best be seen).

(d) Cayucos or piraguas less than 20 meters (65 feet) in length and equipped with an outboard motor or motors and operating in Madden and Gatun Lakes shall carry the following equipment:

2 Oars or paddles.
1 Whistle.
1 Bailer.
20 Meters (65′) of manila line, not less than 21mm (⅞") diameter, or synthetic line of comparable strength.
1 Flashlight.
1 Red flag.
1 Life preserver for each person carried, U.S. Coast Guard approved.
1 Copy of the "Motorboat Operator's Handbook".

(e) Life preservers, ring buoys and fire extinguishers required by this section shall be U.S. Coast Guard approved and shall be permanently marked with the name of the motorboat on which they are carried.

Subpart C—Registration and Numbering

46. Section 121.171 is revised to read as follows:

§ 121.171 Registration and numbering of motorboats.

All motorboats shall be registered, certificated, and assigned numbers by the Marine Safety Unit.

47. Section 121.173 is revised to read as follows:

§ 121.173 Registration and numbering of vessels under 20 meters (65′) in length not propelled by machinery.

Vessels not more than 20 meters (65′) in length and not propelled in whole or in part by machinery shall be registered and numbered by the Marine Safety Unit.

PART 123—RADIO COMMUNICATION

48. The authority citation for part 123 continues to read as follows:

Authority: Issued under authority of the President by 22 U.S.C. 3811, E.O. 12215, 45 FR 36043.

49. Section 123.3 is amended by revising paragraph (c) to read as follows:

§ 123.3 Radiotelephones required.

* * * * *

(c) A vessel of a type described in paragraph (a) of this section, which has notified the Traffic Management Division that it is ready to transit or otherwise navigate in Panama Canal waters and requires a Panama Canal pilot, shall, until a pilot boards the vessel, maintain a continuous watch on Channel 12. Channel 12 will be used for notification to vessels of their transit time and for advisory harbor control communication in Limon Bay.

* * * * *

50. Section 123.4 is amended by revising its heading, paragraph (a), and items GOLF and HOTEL thereunder to read as follows:

§ 123.4 Advance notification required by radio from vessels approaching the Canal.

(a) Vessels approaching the Panama Canal shall communicate by radio to the Traffic Management Division not less than 48 hours in advance of arrival at the Canal (or earlier if radio communication is practicable at an earlier time), the information required by this section unless this information has been previously communicated to the Canal authorities by other means. Symbols of the phonetic alphabet shall be used to identify each item and the word "NEGAT" shall be used after the items that can be answered "no", "none", or "not applicable". The following items of information shall be provided.

* * * * *

GOLF—If the vessel is carrying any explosives or bulk dangerous cargoes, as classified in § 113.3, state the technical name, quantity (in long tons), United Nations number, the International Maritime Organization class and division (include compatibility group for explosives only), and the stowage for each dangerous cargo carried. If the vessel is a tanker in ballast condition and not gas free, state the technical name, United Nations number and the International Maritime Organization class and division of the previously carried cargo. Tankers reporting "GOLF:NEGAT" shall, in addition, state the technical names of non-dangerous cargoes carried.

HOTEL—If the vessel is carrying any packaged dangerous goods, as specified in § 113.3, other than explosives, state the International Maritime Organization class and division and the total quantity (in long tons) within each class.

BILLING CODE 3640-04-M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 21

RIN 2900–AD29

Vocational Rehabilitation Panel

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) is changing the rules under which the cases of seriously disabled veterans are referred to the Vocational Rehabilitation Panel (VRP). Under the new procedure VA staff members may refer cases to the Panel on a voluntary basis. The requirement that certain cases be referred to the VRP is eliminated. This change should enable VA staff to focus their attention on cases in which their professional judgment indicates that consideration by the VRP is necessary.

EFFECTIVE DATE: October 10, 1989.

FOR FURTHER INFORMATION CONTACT: Morris Triestman, Rehabilitation Consultant, Policy and Program Development, Vocational Rehabilitation and Education Service, Veterans

---

Benefits Administration, Department of

2. In § 21.53, paragraph (f) is

for seriously disabled veterans and their

Counseling and Rehabilitation Officer in

facilities may petition the Agency to

The Agency evaluated the information

Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420 (202) 233-2888.

SUPPLEMENTARY INFORMATION: On March 6, 1989, VA published proposed regulations to place the use of the Vocational Rehabilitation Panel on a discretionary basis. Interested persons were given 30 days in which to submit comments, objections, or suggestions. Since no comments, objections, or suggestions were received these rules are adopted as final with the addition of technical amendments to bring the nomenclature in the proposed rule into conformance with Public Law 100-527 which created the Department of Veterans Affairs (see 54 FR 10476).

Thse regulatory amendments will better acquaint eligible veterans, vocational training and rehabilitation facilities, and the public at large with the way these provisions will be implemented.

These regulatory amendments do not meet the criteria for major rules as contained in Executive Order 12291, Federal Regulation. The changes will not have a $100 million annual effect on the economy, will not cause a major increase in costs or prices, and will not have any other significant adverse effects on the economy.

The Secretary of Veterans Affairs certifies that these regulatory amendments will not, if promulgated, have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601-612. Pursuant to 5 U.S.C. 605(b), these final regulatory amendments concern only the internal Department procedures for reviewing the eligibility and participation of individual veterans under this program.

The Catalog of Federal Domestic Assistance number is 64.116.

List of Subjects in 38 CFR Part 21

Civil rights, Claims, Education, Grant programs, Loan programs, Reporting requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: August 10, 1989.

Edward J. Derwinski,
Secretary.

PART 21—[AMENDED]

38 CFR part 21, Vocational Rehabilitation and Education, is amended as follows:

§ 21.52 [Amended]

1. In § 21.52 paragraph (e)(3) is removed.

2. In § 21.53, paragraph (f) is redesignated as paragraph (g), paragraph (e)(2) is revised and new paragraph (f) is added to read as follows:

§ 21.53 Reasonable feasibility of achieving a vocational goal.

* * * * *

(e) *Criteria for reasonable feasibility not met.*

* * * * *

(2) A finding that achievement of a vocational goal is infeasible without a period of extended evaluation requires compelling evidence which establishes infeasibility beyond any reasonable doubt.

(Authority: 38 U.S.C. 1504(a)(1), 1506(b))

(f) *Independent living services.* The counseling psychologist shall determine the current reasonable feasibility of a program of independent living services in each case in which a vocational rehabilitation program is not found reasonably feasible. The concurrence of the Vocational Rehabilitation and Counseling (VR&C) Officer is required in any case in which the counseling psychologist does not approve a program of independent living services.

(Authority: 38 U.S.C. 1500)

* * * * *

3. In § 21.57 paragraph (c) is revised to read as follows:

§ 21.57 Extended evaluation.

* * * * *

(c) *Determination.* (1) The determination of the reasonable feasibility of a veteran achieving a vocational goal will be made at the earliest time possible during an extended evaluation, but not later than the end of the period of evaluation, of an extension of that period. Any reasonable doubt as to feasibility will be resolved in the veteran's favor;

(2) When it is reasonably feasible for the veteran to achieve a vocational goal, an individualized written rehabilitation plan (IWRP) will be developed as indicated in § 21.84 of this part.

(Authority: 38 U.S.C. 1506(b))

* * * * *

4. Section 21.62 is revised to read as follows:

§ 21.62 Duties of the Vocational Rehabilitation Panel.

(a) *Consultation requested.* The panel shall provide technical and consultative services when requested by professional staff of the Vocational Rehabilitation and Counseling (VR&C) Division to:

(1) Assist staff members in planning and carrying out a rehabilitation plan for seriously disabled veterans and their dependents; and

(2) Consider other cases of individuals eligible for, or being provided assistance under chapter 31 and other programs of education and training administered by the Department of Veterans Affairs.

(Authority: 38 U.S.C. 1504(a))

(b) *Independent living services.* The Panel has a key responsibility to assure that seriously disabled service-connected veterans who need independent living services to increase their independence in daily living are provided necessary services. In carrying out this responsibility the Panel shall review all cases which come before it to assure that the proposed program of vocational rehabilitation or independent living services includes those services necessary to enable the veteran to achieve the goals of the program.

(Authority: 38 U.S.C. 1500)

(c) *Dependents.* The specific duties of the Panel with respect to dependents are more fully described §§ 21.3300, 21.3301, 21.3304, 21.4105, and 21.4276 of this part.

(Authority: 38 U.S.C. 1736, 1740, 1741, 1742, 1743)

5. In § 21.74 paragraph (c)(2) is revised to read as follows:

§ 21.74 Extended evaluation.

* * * * *

(c) * * *

(2) An additional period of extended evaluation of up to 6 months may be approved by the counseling psychologist, if there is reasonable certainty that the feasibility of achieving a vocational goal can be determined during the additional period. The counseling psychologist will obtain the concurrence of the Vocational Rehabilitation and Counseling Officer before approving the extension of a period of extended evaluation.

* * * * *

6. In § 21.76 paragraph (b) is revised to read as follows:

§ 21.76 Independent living.

* * * * *

(b) *Period of independent living services.* The duration of an independent living services program may not exceed 24 months unless the counseling psychologist finds that an additional period of up to 6 months would enable the veteran to substantially increase his or her level of independence in daily living. The concurrence of the Vocational

Counseling and Rehabilitation Officer in this finding is required.

(Authority: 38 U.S.C. 1505(d))

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 261

[SW-FRL-3642-7]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Final Denial

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA or Agency) today is finalizing its decision to deny a petition submitted by Rock Island Refining Corporation (Rock Island), Indianapolis, Indiana, to exclude certain solid wastes generated at its facility from the lists of hazardous wastes contained in 40 CFR 261.31 and 261.32. This action responds to a delisting petition submitted under 40 CFR 260.20, which allows any person to petition the Administrator to modify or revoke any provision of parts 260 through 268, 124, 270, and 271 of title 40 of the Code of Federal Regulations, and under 40 CFR 260.22, which specifically provides generators the opportunity to petition the Administrator to exclude a waste on a "generator-specific" basis from the hazardous waste lists.

EFFECTIVE DATE: September 8, 1989.

ADDRESS: The public docket for this final rule is located at the U.S. Environmental Protection Agency, 401 M Street SW. (Room M2427), Washington, DC 20460, and is available for viewing from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding Federal holidays. Call (202) 475-9327 for appointments. The reference number for this docket is "F-89-RIDF-FFFFF". The public may copy material from any regulatory docket at a cost of $0.15 per page.

FOR FURTHER INFORMATION CONTACT: For general information, contact the RCRA Hotline, toll free at (800) 424-9346, or at (202) 382-3000. For technical information concerning this notice, contact Terry Grist, Office of Solid Waste (OS-343), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 382-4782 .

SUPPLEMENTARY INFORMATION:

I. Background

A. Authority

Under 40 CFR 260.20 and 260.22, facilities may petition the Agency to remove their wastes from hazardous waste control by excluding them from the lists of hazardous wastes contained at 40 CFR 261.31 and 261.32. Petitioners must provide sufficient information to EPA to allow the Agency to determine (1) that the waste to be excluded is not hazardous based upon the criteria for which it was listed, and (2) that no other hazardous constituents are present in the waste at levels of regulatory concern.

B. History of the Rulemaking

Rock Island petitioned the Agency for an exclusion of its filter press cake generated from the processing and fractionation of crude oil. After evaluating the petition, EPA proposed, on June 14, 1989, to deny Rock Island's petition to exclude its waste from the lists of hazardous waste under 40 CFR 261.31 and 261.32 (see 54 FR 25302).

This rulemaking finalizes the proposed decision to deny Rock Island's petition.

II. Disposition of Delisting Petition

Rock Island Refining Corporation, Indianapolis, Indiana

1. Proposed Exclusion

Rock Island petitioned the Agency to exclude its filter press cake generated from the treatment of the following sludges: EPA Hazardous Waste No. K049—"Slop oil emulsion solids from the petroleum refining industry;" EPA Hazardous Waste No. K050—"Heat exchanger bundle cleaning sludge from the petroleum refining industry;" and EPA Hazardous Waste No. K051—"API separator sludge from the petroleum refining industry". Rock Island petitioned to exclude its waste based on the claim that the waste does not meet the criteria of the listing.

To support its claim that both the non-listed and listed constitutents of concern are not present in the filter press cake above levels of concern, Rock Island submitted (1) descriptions of its waste treatment processes, including schematic diagrams; (2) total constituent data for the EP toxic metals, nickel, antimony, and beryllium; (3) EP leachate analysis results for the EP toxic metals for representative waste samples; (4) OWEP analysis results for the EP toxic metals, nickel, antimony, and beryllium for a single sample; (5) oil and grease data for a single sample; (6) total constituent data for volatile and semivolatile organic compounds for a single sample; and (7) results from characteristics testing for ignitability, corrosivity, and reactivity.

The Agency evaluated the information and analytical data provided by Rock Island in support of its petition and the spot-check sampling visit analysis data collected as part of the EPA spot-check program, and determined that the hazardous constituents found in the petitioned waste could pose a threat to human health and the environment. Specifically, the Agency used its vertical and horizontal spread (VHS) model to predict the potential mobility of the hazardous constituents found in the petitioned waste. Based on this evaluation, the Agency determined that Rock Island failed to substantiate its claim that the hazardous constituents of concern will not leach and migrate at concentrations above the health-based levels used in delisting decision-making. See 54 FR 25302, June 14, 1989, for a more detailed explanation of why EPA proposed to deny Rock Island's petition.

2. Agency Response to Public Comments

The Agency did not receive any public comments regarding its decision to deny Rock Island's petition for the filter press cake.

3. Final Agency Decision

For the reasons stated in the proposal, the Agency believes that Rock Island's filter press cake should not be excluded from hazardous waste control. The Agency, therefore, is denying a final exclusion to the Rock Island Refining Corporation, located in Indianapolis, Indiana, for its filter press cake described in its petition as EPA Hazardous Waste Nos. K049, K050, and K051.

III. Effective Date

This rule is effective immediately. The Hazardous and Solid Waste Amendments of 1984 amended section 3010 of RCRA to allow rules to become effective in less than six months when the regulated community does not need the six-month period to come into compliance. That is the case here because this rule does not change the existing requirements for persons generating hazardous wastes. This facility has been obligated to manage its waste as hazardous before and during the Agency's review of its petition (except for the period during which the temporary exclusion was in effect). See 54 FR 25303, June 14, 1989 for a discussion of the temporary exclusion previously granted to Rock Island. Because a six-month deadline is not necessary to achieve the purpose of section 3010, EPA believes that this denial should be effective immediately. These reasons also provide a basis for making this rule effective immediately under the Administrative Procedures Act, pursuant to 5 U.S.C. 553(d).

IV. Regulatory Impact

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. The denial of this petition does not impose an economic burden on this facility because prior to submission, during the initial review of the petition, and again after November 8, 1986 (when its temporary exclusion ceased to be in effect), this facility should have handled its wate as hazardous. See 54 FR 25303, June 14, 1989. The denial of the petition means that the petitioner is to continue managing its waste as hazardous in the manner in which it has been doing, economically and otherwise. There is no additional economic impact, therefore, due to today's rule. This rule is not a major regulation, therefore, no Regulatory Impact Analysis is required.

V. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601–612, whenever an agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). The Administrator or delegated representative may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment does not have a significant adverse economic impact on small entities. The facility included in this notice may be considered a small entity, however, this rule only affects one facility in one industrial segment. The overall impact, therefore, on small entities is small. Accordingly, I hereby certify that this regulation does not have a significant economic impact on a substantial number of small entities. This regulation, therefore, does not require a regulatory flexibility analysis.

VI. Paperwork Reduction Act

Information collection and recordkeeping requirements associated with this final rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511, 44 U.S.C. 3501 *et. seq.*) and have been assigned OMB Control Number 2050–0053.

BILLING CODE 6560-50-M

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

48 CFR Parts 702, 734, and 752

[AIDAR Notice 89–5]

Miscellaneous Amendments to Acquisition Regulations

AGENCY: Agency for International Development, IDCA.

ACTION: Final rule.

SUMMARY: The AID Acquisition Regulation (AIDAR) is being amended to remove the order of succession for the Procurement Executive, establish a new threshold for major systems acquisitions, correct a reference and combine two similar contract clauses into a single clause.

EFFECTIVE DATE: September 8, 1989.

FOR FURTHER INFORMATION CONTACT: M/SER/PPE, Mr. James M. Kelly, Room 1600I, SA–14, Agency for International Development, Washington, DC 20523. Telephone (703) 875–1534.

SUPPLEMENTARY INFORMATION: AID considers the order of succession for the Procurement Executive unnecessary for inclusion in the AIDAR; it is basically an internal matter, not affecting the public. In the absence of the Procurement Executive, any communication addressed to him will automatically be referred to the person designated by him as acting Procurement Executive.

The dollar threshold for major systems acquisition was considered unrealistically low. Given the nature of AID acquisitions, dollar value is likely to be the primary consideration in whether or not an acquisition is a major system. AID is setting the threshold at $75 million initial year estimate or $200 million life of contract estimate.

The remaining changes are editorial—correction of a reference and combination of two versions of a contract clause into a single version with no substantive changes.

The changes being made by this Notice are not considered significant rules subject to FAR 1.301 or subpart 1.5. This Notice is exempted from the requirements of Executive Order 12291 by OMB Circular 85–7. This Notice will not have an impact on a substantial number of small entities, nor does it establish any information collection as contemplated by the Regulatory Flexibility Act and Paperwork Reduction Act.

List of Subjects in 48 CFR Parts 702, 734, and 752

Government procurement.

For the reasons set out in the Preamble, Chapter 7 of Title 48 of the Code of Federal Regulations is amended as follows:

1. The authority citations in Parts 702, 734, and 752 continue to read as follows:

Authority: Sec. 621, Pub. L. 87–195, 75 Stat. 445 (22 U.S.C. 2381), as amended; E.O. 12163, Sept. 29, 1979; 44 FR 56673, 3 CFR 1979 Comp., p. 435.

PART 702—DEFINITIONS

Subpart 702.170—Definitions

702.170–13 [Amended]

2. Section 702.170–13, Procurement Executive, is amended by removing paragraph (d).

PART 734—MAJOR SYSTEM ACQUISITION

3. Section 734.003, is revised as follows:

734.003 Responsibilities.

AID follows the policies and procedures in OMB Circular A–109 and FAR Part 34 regarding major systems acquisitions. In order to be considered a major system an AID procurement must have an estimated value of $75 million during the first year of the contract or a $200 million life of contract estimated value.

PART 752—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

Subpart 752.70—Texts of AID Contract Clauses

752.7026 [Amended]

4. Paragraph (a), *Alternate 70*, of section 752.7026, Reports, is amended by removing the reference to "*Alternate 72*" appearing in the introductory paragraph, replacing it with "*Alternate 71*".

5. Section 752.7031, Leave and Holidays, is amended by removing paragraph (c), *Alternate 72*, and

paragraph (d), *Alternate 73*. In place of these a new paragraph (c), *Alternate 72* is added as follows:

752.7031 Leave and holidays.

* * * * *

(c) *Alternate 72*. For use in addition to either *Alternate 70* or *71*, as appropriate, for any AID cost reimbursement contract involving performance overseas.

Leave and Holidays—Overseas (Aug 1989)

(a) *Vacation leave*. (1) The Contractor may grant to its employees working overseas under this contract, vacations of reasonable duration in accordance with the Contractor's practice for its employees, but in no event shall such vacation leave be earned at a rate exceeding twenty-six (26) work days per annum. Vacation leave is provided under this contract primarily for purposes of affording necessary rest and recreation to regular employees during their tour of duty in the Cooperating Country. The Contractor's Chief of Party, the employee and the Cooperating Country institution associated with this project shall develop vacation leave schedules early in the employee's tour of duty taking into consideration project requirements, employee preference and other factors.

(2) Leave taken during the concluding weeks of an employee's tour shall be included in the established leave schedule and be limited to that amount of leave which can be earned during a twelve-month period unless approved in accordance with paragraph (a)(3) of this clause.

(3) Vacation leave earned but not taken by the end of the employee's tour pursuant to paragraphs (a) (1) and (2) of this clause will be forfeited, unless the requirements of the project precluded the employee from taking such leave and the Contracting Officer, with the endorsement of the Mission, approves one of the following as an alternative:

(i) Taking, during the concluding weeks of the employee's tour, leave not permitted under (a)(2) of this section, or

(ii) Lump-sum payment for leave not taken provided such leave does not exceed the number of days which can be earned by the employee during a twelve-month period.

(b) *Sick Leave*. Sick leave is earned by regular and short-term employees in accordance with the Contractor's usual practice but not to exceed 13 work days per annum or 4 hours every 2 weeks. Additional sick leave after use of accrued vacation leave may be advanced in accordance with Contractor's usual practice, if in the judgment of the Contractor's Chief of Party it is determined that such additional leave is in the best interest of the project. In no event shall such additional leave exceed 30 days. The Contractor agrees to reimburse AID for leave used in excess of the amount earned during the employee's assignment under this contract. Sick leave earned and unused at the end of a regular tour of duty may be carried over to an immediately succeeding tour of duty under this contract. The taking of authorized home leave shall not constitute a break in service for the purpose of sick leave carryover. Contractor employees will not be compensated for unused sick leave at the completion of their duties under this contract.

(c) *Home leave*. (1) Home leave is leave earned for service abroad for use only in the United States, in the Commonwealth of Puerto Rico, or in the possessions of the United States.

(2) A regular employee who is a U.S. citizen or resident and has served at least 2 years overseas, as defined in paragraph (c)(4) of this clause, under this contract and has not taken more than 30 workdays leave (vacation, sick, or leave without pay) in the United States, may be granted home leave of not more than 15 calendar days for each such year of service overseas: *Provided*, that such regular employees agree to return overseas upon completion of home leave under an additional 2-year appointment, or for such shorter period of not less than 1 year of overseas service under the contract as the Mission Director may approve in advance. Home leave must be taken in the United States, the Commonwealth of Puerto Rico, or the possessions of the United States and any days spent elsewhere will be charged to vacation leave or leave without pay.

(3) Notwithstanding the requirement in paragraph (c)(2), of this clause, that the Contractor's regular employee must have served 2 years overseas under this contract to be eligible for home leave, Contractor may grant advance home leave to such regular employee subject to all of the following conditions:

(i) Granting of advance home leave would in each case serve to advance the attainment of the objectives of this contract;

(ii) The regular employee shall have served a minimum of 18 months in the Cooperating Country on his/her current tour of duty under this contract; and

(iii) The regular employee shall have agreed to return to the Cooperating Country to serve out the remainder of his/her current tour of duty and an additional 2-year appointment under this contract, or such other additional appointment of not less than 1 year of overseas service as the Mission Director may approve.

(4) The period of service overseas required under paragraph (c)(2) or paragraph (c)(3) of this clause, shall include the actual days in orientation in the United States (less language training) and the actual days overseas beginning on the date of departure from the United States port of embarkation on international travel and continuing, inclusive of authorized delays en route, to the date of arrival at the United States port of debarkation from international travel. Allowable vacation and sick leave taken while overseas, but not leave without pay, shall be included in the required period of service overseas. An amount equal to the number of days vacation and sick leave taken in the United States, the Commonwealth of Puerto Rico, or the possessions of the United States will be added to the required period of service overseas.

(5) Salary during travel to and from the United States for home leave will be limited to the time required for travel by the most expeditious air route. The Contractor will be responsible for reimbursing AID for salary payments made during home leave, if in spite of the undertaking of the new appointment, the regular employee, except for reasons beyond his/her control as determined by the Contracting Officer, does not return overseas and complete the additional required service. Unused home leave is not reimbursable under this contract.

(6) To the extent deemed necessary by the Contractor, regular employees in the United States on home leave may be authorized to spend not more than 5 days in work status for consultation at home office/campus or at AID/Washington before returning to their post of duty. Consultation at locations other than AID/Washington or home office/campus, as well as any time in excess of 5 days spent for consultation, must be approved by the Mission Director or the Contracting Officer.

(7) Except as provided in the schedule or approved by the Mission Director or the Contracting Officer, home leave is not authorized for TCN or CCN employees.

(d) *Holidays*. Holidays for Contractor employees serving overseas should take into consideration local practices and shall be established in collaboration with the Mission Director.

(e) *Military leave*. Military leave of not more than 15 calendar days in any calendar year may be granted in accordance with the Contractor's usual practice to each regular employee whose appointment is not limited to 1 year or less and who is a reservist of the United States Armed Forces, provided that such military leave has been approved in advance by the cognizant Mission Director or Assistant Administrator. A copy of any such approval shall be provided to the Contracting Officer.

Dated: August 29, 1989.

John F. Owens,

Procurement Executive.

BILLING CODE 6116-01-M

Proposed Rules

Federal Register
Vol. 54, No. 173
Friday, September 8, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 911

[Docket No. FV-89-074PR]

Limes Grown in Florida; Proposed Relaxation of the Container Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This rule proposes relaxing the container requirements currently in effect for Florida grown limes, by authorizing Florida lime handlers to use another container to ship fresh Florida limes to market. Container requirements ensure the packing of fruit in suitable containers for shipment to market, so that it arrives in the marketplace in good condition. This is in the interest of growers, handlers, and consumers.

DATES: Comments must be received by October 10, 1989.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposed rule to: Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456. Three copies of all written material shall be submitted, and they will be made available for public inspection at the office of the Docket Clerk during regular business hours. The written comments should reference the docket number and the date and page number of this issue of the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Gary D. Rasmussen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456, telephone (202) 475–3918.

SUPPLEMENTARY INFORMATION: This proposed rule is issued under Marketing Agreement and Marketing Order No. 911, both as amended (7 CFR part 911), regulating the handling of limes grown in Florida. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1, and has been determined to be a "non-major" rule under the criteria contained therein.

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposed action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act and rules issued thereunder are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes has small entity orientation and compatibility.

There are about 26 lime handlers subject to regulation under the marketing order for limes grown in Florida. In addition, there are about 230 lime growers in Florida. Small agricultural growers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and agricultural services firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of the handlers and growers may be classified as small entities.

Section 911.329 (7 CFR 911.329) specifies continuous container requirements for shipments of fresh limes grown in Florida. These requirements authorize Florida lime handlers to use specific containers for shipping fresh limes to market, and they have been in effect on a continuous basis for several seasons. The container requirements make sure the limes are packed in suitable containers for shipment to market, so that they arrive in the marketplace in good condition. Florida lime growers and handlers have found such requirements beneficial in the successful marketing of their limes.

The proposed action would add a new paragraph (a)(2)(x) to § 911.329, authorizing handlers to use another container to ship fresh limes to market. This container has inside dimensions of 12⅝ by 8¾ by 5⅞ inches, and it must contain not less than 10 pounds of limes. This proposed rule also would revise the title of § 911.329, for purposes of clarity.

The Florida Lime Administrative Committee (committee) recommended that this container be authorized. The committee recently conducted a research project on this container to determine if it would palletize efficiently when transported by truck. The research results indicate that the container ships well on pallets.

The committee works with the Department in administering the marketing agreement and order. The committee meets prior to and during each season to consider recommendations for modification, suspension, or termination of the regulatory requirements for Florida limes. Committee meetings are open to the public and interested persons may express their views at these meetings. The Department reviews committee recommendations and information submitted by the committee and other available information, and determines whether modification, suspension, or termination of the regulatory requirements would tend to effectuate the declared policy of the Act.

Some Florida lime shipments are exempt from container requirements. Handlers may make gift shipments in individually addressed containers of up to 20 pounds of limes each. Also, limes utilized in commercial processing are not covered by the container requirements.

The proposed action reflects the committee's and the Department's appraisal of the need to relax the container requirements applicable to shipment of fresh Florida limes. The Department's view is that the proposed relaxation would benefit lime handlers. The application of container requirements over the past several years has helped keep the limes in good condition during shipment to market. Although compliance with container requirements affects costs to handlers, these costs would be significantly offset when compared to the benefits resulting to growers, handlers, consumers, and the trade from the fruit being in better

condition upon arrival in the marketplace.

Based on the above, the Administrator of the AMS has determined that this proposed action would not have a significant economic impact on a substantial number of small entities.

List of Subjects in 7 CFR Part 911

Florida, Limes, Marketing agreements and orders.

For the reasons set forth in the preamble, it is proposed that 7 CFR part 911 be amended as follows:

PART 911—LIMES GROWN IN FLORIDA

1. The authority citation for 7 CFR part 911 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 911.329 is amended by revising the section title, and by adding a new paragraph (a)(2)(x) to read as follows:

§ 911.329 Florida lime container regulation.

(a)(1) * * *
(2) * * *

(x) Containers with inside dimensions of 12⅝ by 8¾ by 5⅞ inches: Provided, that such containers shall contain not less than 10 pounds net weight of limes.

* * * * *

Dated: September 1, 1989.

William J. Doyle,

Acting Deputy Director, Fruit and Vegetable Division.

[FR Doc. 89–21115 Filed 9–7–89; 8:45 am]

BILLING CODE 3410–02–M

---

7 CFR Part 971

[Docket No. FV-89-076]

Lettuce Grown in Lower Rio Grande Valley in South Texas; Proposed Amendment to Continuing Handling Regulation to Authorize a New Container

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would authorize the use of bulk bin containers for shipping South Texas lettuce to shredders under the container regulations of Marketing Order 971. Allowing handlers to ship lettuce in bulk bin containers to shredders should improve the improve returns to producers and handlers of South Texas lettuce.

DATES: Comments must be received by October 10, 1989.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposal to: Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456. Three copies of all written material shall be submitted, and they will be made available for public inspection at the office of the Docket Clerk during regular business hours. All comments should reference the docket number and the date and page number of this issue of the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Kenneth G. Johnson, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456, telephone (202) 447–5331.

SUPPLEMENTARY INFORMATION: This rule is proposed under Marketing Agreement No. 144 and Marketing Order No. 971 (7 CFR part 971), both as amended, regulating the handling of lettuce grown in the Lower Rio Grande Valley in South Texas. The marketing agreement and order are authorized by the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposal on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 10 handlers of South Texas lettuce subject to regulation under the marketing order, and approximately 20 producers in the production area. The Small Business Administration (13 CFR 121.1) has defined small agricultural producers as those having annual gross revenue for the last three years of less than $500,000, and small agricultural service firms are defined as those who gross annual receipts are less than $3,500,000. The majority of handlers and producers of South Texas lettuce may be classified as small entities.

As of July 6, 1989, estimated South Texas lettuce acreage planted was 2,434 acres compared to 1,629 acres in 1988. Total shipments of South Texas lettuce during the 1988–89 season were approximately 921,000 50-pound cartons. This represented nearly a 25 percent increase over the estimated 738,000 cartons shipped in the 1987–88 season. The majority of the crop was shipped to the fresh markets, with only a small volume (less than 1%) utilized by processors.

The handling requirements for South Texas lettuce are specified in § 971.322 (51 FR 2, January 2, 1986, 54 FR 8182, February 27, 1989). The current requirements for South Texas lettuce specify the inside dimensions of the five cartons that may be used to pack lettuce and the number of heads of lettuce that may be packed in each of those containers. Additionally, inspection is required and packaging lettuce on any Sunday or on Christmas Day is prohibited.

This proposed rule would add the dimensions for bulk bin containers for lettuce shipments to shredders to the list of containers presently permitted under the handling regulation. No pack specifications would be included which stipulate the number of heads of lettuce which may be shipped in a bulk bin. This change was unanimously recommended by the South Texas Lettuce Commission (committee), the agency responsible for local administration of the marketing order, at its June 21, 1989, meeting.

Handlers of South Texas lettuce has been using the bulk bin container on a test basis for lettuce shipments to shredders, in accordance with § 971.322(a)(5) of the handling regulation. Last year, the committee authorized the limited use of 1,000 bulk bins for such purpose. These containers have approximate inside dimensions of 46 inches (length) x 38 inches (width) x 36 inches (height). The committee has recommended authorizing bulk bin containers meeting these approximate dimensions. The bulk bin container has found general trade acceptance, and the South Texas lettuce industry believes that these shipments are no longer experimental but an integral part of their marketing efforts. Furthermore, the use of such containers for shipping lettuce to shredders could expand their lettuce market and reduce packing costs. The recommended bulk bin container is of a proper size to be palletized.

Last season, in accordance with § 971.322(e) handlers were required to file for experimental container exemptions by applying for a Certificate of Privilege before making lettuce shipments in bulk bin containers to shredders. Handlers also were required to provide reports as requested by the committee. The committee believes that permitting handlers to use the bulk bin containers for lettuce shipments to shredders and eliminating the need to file for experimental container exemptions and related reports would encourage the industry to increase such shipments to shredders. Accordingly, this action also would reduce the information collection and recordkeeping requirements that are subject to the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35). These requirements have been previously approved by the Office of Management and Budget (OMB) and assigned OMB No. 0581-0065.

Bulk bin containers are typically less expensive to use in packing lettuce than the cartons that are currently authorized for fresh market shipments. The committee believes that authorizing these bulk bin containers would assist the industry in expanding the market for shredded lettuce by reducing costs. Thus, it is proposed that the bulk bin containers would be authorized for handlers making lettuce shipments to shredders only. In addition, the handling regulation would be amended to specify that the pack requirement would be applicable to bulk bin container shipments of lettuce destined to shredders.

There is a sizable market for shredded lettuce, and allowing handlers to use bulk bin containers for such shipments would provide that market segment with the supply of lettuce it desires. This action is expected to have a positive effect on lettuce shipments which would be beneficial to producers and handlers.

Based on the above, the Administrator of the AMS has determined that this action would not have a significant economic impact on a substantial number of small entities.

A 30-day comment period is provided to allow interested persons sufficient time to respond to this proposal. All written comments timely received will be considered before a final determination is made on this matter.

List of Subjects in 7 CFR Part 971

Marketing agreements and orders, Lettuce, South Texas.

For the reasons set forth in the preamble, it is proposed that 7 CFR Part 971 be amended as follows:

PART 971—LETTUCE GROWN IN LOWER RIO GRANDE VALLEY IN SOUTH TEXAS

1. The authority citation for 7 CFR part 971 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

2. Section 971.322 is amended by redesignating paragraph (a)(6) as (a)(7) and adding new paragraphs (a)(6) and (b)(4) to read as follows:

§ 971.322 Handling regulation.

* * * * *

(a) * * *

(6) Bulk bin containers with inside dimensions of approximately 46 inches x 38 inches x 36 inches to be used for lettuce shipments to shredders only.

* * * * *

(b) * * *

(4) No pack requirements shall apply to bulk bin containers for lettuce shipments to shredders.

* * * * *

Dated: September 1, 1989.

William J. Doyle,

Acting Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410-02-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 89-NM-160-AD]

Airworthiness Directives; Boeing Model 757 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD), applicable to certain Boeing Model 757 series airplanes, which would require the installation of flexible deflectors at the left- and right-hand control quadrant assemblies. This proposal is prompted by reports of jamming of the aileron control system as a result of a loose object falling into the associated mechanisms. This condition, if not corrected, could reduce the ability of the pilot to control the airplane due to rotation of the control wheel in one direction only.

DATES: Comments must be received no later than October 30, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-160-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas Rodriguez, Airframe Branch, ANM-120S; telephone (206) 431-1928. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-addressed, stamped post card on which the following statement is made: "Comments to Docket Number 89-NM-160-AD." The post card will be date/time stamped and returned to the commenter.

Discussion

An operator of a Boeing Model 757 has reported that, while the airplane was on the ground, jamming of the aileron control system was experienced.

This occurrence was the result of a loose object that became lodged in the control quadrant assembly. This condition, if not corrected, could reduce the ability of the pilot to control the airplane.

The FAA has reviewed and approved Boeing Service Bulletin 757-27-0072, Revision 1, dated June 29, 1989, which describes procedures for installation of flexible deflectors at left- and right-hand quadrant assemblies to prevent entry of loose objects.

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would require the installation of flexible deflectors in accordance with the service bulletin previously described.

There are approximately 110 Model 757 series airplanes of the affected design in the worldwide fleet. It is estimated that 69 airplanes of U.S. registry would be affected by this AD, that it would take approximately 16 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Required parts are estimated at $246 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $61,134.

The regulations proposed herein would not have substantial direct effects on the States, on the relationships between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Applies to Model 757 series airplanes, as listed in Boeing Service Bulletin 757-27-0072, Revision 1, dated June 29, 1989, certificated in any category. Compliance required within the next 12 months, after the effective date of this AD, unless previously accomplished.

To reduce the possibility of aileron control system jamming due to loose objects being lodged in the control quadrant assembly, accomplish the following:

A. Install flexible deflectors in accordance with Boeing Service Bulletin 757-27-0072, Revision 1, dated June 29, 1989.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment, and then send it to the Manager, Seattle Aircraft Certification Office.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on August 29, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 89-21139 Filed 9-7-89; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 89-ASW-35]

Proposed Establishment of Control Zone; Lake Charles Chennault Industrial Airpark, LA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish a part-time control zone at Lake Charles Chennault Industrial Airpark, LA. This proposed action is necessary because Chennault Industrial Airpark meets the criteria for the establishment of a control zone by the fact that there is a part-time nonfederal airport traffic control tower (ATCT) at the Chennault Industrial Airpark and a federally certificated weather observer who is qualified to take hourly and special weather observations at the Chennault Industrial Airpark during the times the control zone is in effect. The intended effect of this proposal is to provide adequate controlled airspace for aircraft executing the standard instrument approach procedures (SIAP) serving the Chennault Industrial Airpark. The establishment of a control zone would allow the Chennault Industrial Airpark to be used as an alternate airport under instrument flight rules (IFR) weather conditions. The proposed control zone would exclude the area that overlies the Lake Charles, LA, Control Zone.

DATES: Comments must be received on or before October 31, 1989.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Docket No. 89-ASW-35, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530.

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT: Bruce C. Beard, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530; telephone: (817) 624-5561.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire.

BEST COPY AVAILABLE

Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89–ASW–35." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, 4400 Blue Mound Road, Fort Worth, TX, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Manager, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193–0530. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.171 of the Federal Aviation Regulations (14 CFR part 71) to establishing a part-time control zone at Lake Chares Chennault Industrial Airpark, LA. This proposed action is necessary because Chennault Industrial Airpark meets the criteria for the establishment of a control zone by the fact that there is a part-time nonfederal ATCT at the Chennault Industrial Airpark and there is a federally certificated weather observer who is qualified to take hourly and special weather observations at the Chennault Industrial Airpark during the times the control zone is in effect. The intended effect of this proposal is to provide adequate controlled airspace for aircraft executing the SIAP's serving the Chennault Industrial Airpark. The establishment of a control zone would allow the Chennault Industrial Airpark to be used as an alternate airport under IFR weather conditions. The proposed control zone would exclude the area that overlies the Lake Charles, LA, Control Zone. Section 71.171 of part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6E dated January 3, 1989.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is a not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.171 [Amended]

2. Section 71.171 is amended as follows:

Lake Charles Chennault Industrial Airpark, LA [New]

Within a 5-mile radius of the Chennault Industrial Airpark (latitude 30°12′45″N., longitude 93°08′36″W.), excluding the area that overlies the Lake Charles, LA, Control Zone. This control zone is effective during the specific dates and times established in advance by a notice to airmen. The effective dates and times will thereafter be continuously published in the Airport/Facility Directory.

Issued in Fort Worth, TX on August 23, 1989.

Larry L. Craig,

Manager, Air Traffic Division, Southwest Region.

[Docket No. 89N–0138]

Packaging Materials for Use Under High Temperature Conditions in Microwave Ovens

AGENCY: Food and Drug Administration.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Food and Drug Administration (FDA) is considering publishing a proposal that would amend the indirect food additive regulations by establishing maximum temperatures of use for certain food-packaging materials. Should FDA decide to follow this course, the maximum temperatures of use for the materials in the proposal would be based, at least in part, upon use and safety information that is submitted in response to this advance notice of proposed rulemaking (ANPR). This ANPR identifies the data and information needed by FDA to develop a proposal.

DATE: Comments by November 7, 1989.

ADDRESS: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Edward J. Machuga, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION:

I. Background

A. Microwave Cooking

The mechanics of heating food in microwave ovens differ from the mechanics of heating food in conventional ovens. In conventional ovens, the temperature of the oven walls and the air within the oven is raised to a cooking level, and this heat energy is transferred directly to the food or its container. The heat energy heats, browns, and crisps the food from the outside. Under normal operating conditions, microwave ovens heat the food by producing electromagnetic radiation that is absorbed by molecules, especially water and fat molecules, within the food. Absorption of microwave energy causes increased vibration of the molecules, resulting in heating of the food from the inside. This method of heating eliminates the possibility of browning and crisping the outside surface of the food.

B. Microwave Heat Susceptor Packaging

In general, dishes or packaging designed for use in microwave ovens are transparent to microwaves and play no part in heating the food. However, a new type of food-packaging material, referred to as "microwave heat susceptor packaging," has been developed that is itself an important factor in the heating of the food. This new packaging usually contains, as the food-contact surface, a metallized plastic film (i.e., the heat susceptor). The heat susceptor may be bound to a paperboard layer by means of adhesives, or a paper layer may be applied over the metallized film. In the latter case, the paper serves as the food-contact layer.

The heat susceptor absorbs the electromagnetic radiation in the microwave oven and, as a result, reaches a very high temperature, usually greater than 400 °F. The energy thus produced in the heat susceptor heats, browns, and crisps the food.

FDA did not envision the use of food-packaging materials at temperatures above 300 °F at the time that it adopted many of the regulations that list the food additive components of these packaging materials. As a result, petitions submitted in support of the use of the food additives regulated for use in these packaging materials do not contain adequate data to enable FDA to evaluate the safety of the use of these materials at high temperatures. Although microwave heat susceptor packaging may be manufactured with components that comply with various food additive regulations, such as 21 CFR 175.105, 175.300, 176.170, 177.1390, and 177.1630, FDA has not evaluated the safety of these food-packaging materials at temperatures above 300 °F.

The agency is concerned that the use of these materials at high temperatures may result in the heat susceptor packaging components (adhesives, polymers, paper, and paperboard) migrating into food at levels far in excess of those that the agency anticipated when it regulated the additives. In addition, the agency is concerned that the high temperatures produced in these packages may generate a number of degradation products whose safety needs to be assessed.

On September 22, 1988, FDA held a public meeting in Washington, DC, to notify manufacturers and users of food packaging of the agency's concerns regarding microwave food packaging that uses heat susceptors to brown or crisp food. The agency stated that while it was not aware of any hazards associated with the current uses of heat susceptor packaging, data were necessary to evaluate the safety of this high temperature use of food-packaging materials (Ref. 1). FDA also outlined the general types of data that it needs to do that evaluation. In addition, the Executive Vice President for Scientific Affairs of the National Food Processors Association presented a statement on microwave heat susceptor packaging (Ref. 2).

II. FDA Laboratory Studies

To assess the possible increased migration of heat susceptor packaging components to food, FDA has conducted preliminary laboratory studies on a number of microwavable packages that utilize heat susceptors of various designs. The results of these preliminary studies were presented at the September 22, 1988, public meeting and are summarized below:

1. Temperature measurements indicate that parts of the package reach temperatures in excess of 500 °F.
2. All of the packages used in the tests showed varying degrees of breakdown of the metallized polyethylene terephthalate (PET) film, including cracking and even melting of the film in some cases. When breakdown occurs, a functional barrier no longer exists between the food and the nonfood-contact layers of the package, allowing components of the nonfood-contact layers (adhesive and paperboard components) or their degradation products to migrate into the food.
3. In many instances, the paper and paperboard components of the heat susceptor packaging were blackened upon exposure to these high temperatures.
4. FDA's preliminary studies on the extraction of nonvolatile components followed only the migration of certain marker chemicals. These extraction studies, using corn oil as the food simulating solvent, were carried out to determine the level of migration of PET oligomers. Nearly all (95 percent) of a specific PET oligomer, the cyclic PET trimer, present in the unheated PET film migrated out of "pizza type" heat susceptor packaging into the corn oil when microwave cooking times of 3 minutes were used. Identification of other possible nonvolatile migrants from heat susceptor packaging was not carried out because this work would involve the development of many additional test protocols.
5. To determine whether volatile components of heat susceptor packages could also migrate into food, heat susceptors, formed into trays, were extracted with corn oil using a microwave cooking time of 3 minutes. The extracts were analyzed by headspace gas chromatography and found to contain detectable amounts of volatile chemicals, primarily from adhesives used in the package and from the paper substrate. These results indicate that a considerable number of volatile components of heat susceptor packaging will migrate to food under microwave heating conditions.

Further reports of these studies (Ref. 3), and copies of the experimental protocols used in FDA's preliminary laboratory studies of heat susceptor packages (Ref. 4), are available from the contact person listed above and are on file at the Dockets Management Branch (address above).

III. Regulatory Concerns

Based on the data from these studies, FDA has three primary concerns with respect to the use of heat susceptor packaging in microwave cooking. The first concern is that this use will greatly increase the levels of nonvolatile components of packaging materials that migrate into food. As indicated above, nearly all of the cyclic PET trimer migrated into corn oil from the tested heat susceptor packages in 3 minutes of microwave cooking time. This level of migration is 6 to 10 times higher than the level that FDA considered in evaluating uses of PET in contact with food. Moreover, when it evaluated those uses, FDA expected that the temperature of the food would not significantly exceed 250 °F.

A second FDA concern is that the high temperatures produced with microwave heat susceptor packaging and the cracking of the PET food-contact layer will allow adhesive components of the package, as well as degradation products of these adhesive components, to migrate directly into food. FDA laboratory studies confirm the migration of volatile components of the nonfood-contact layers into food-simulating solvents under conditions that simulate actual use. The adhesive components regulated in 21 CFR 175.105 are for applications in which a functional barrier exists between the adhesive components and the food and thus in which there is minimal migration. Consequently, available toxicology data may not be sufficient to establish the safety of the increased migration of the adhesive components of heat susceptor packages.

In addition, the high temperatures (greater than 400 °F) ionvolved in microwave cooking may cause significant decomposition of the adhesives, and the unregulated degradation products of this decomposition may also migrate into food. FDA is concerned about the safety of these unregulated degradation products.

A third FDA concern is that these high temperatures may cause increased migration of the paperboard components that are regulated in 21 CFR part 176. There is also the possibility that temperatures associated with the use of heat susceptor packages will cause significant breakdown of the paperboard components. The component chemicals and their breakdown products would be expected to migrate to the food at relatively high levels because of the high temperatures and the cracks that develop in the PET food-contact layer.

IV. Data Requirements for Heat Susceptor Packaging Materials

Based on findings from its preliminary examination of heat susceptor packages used at temperatures in excess of 400 °F, FDA believes that it may be necessary to amend existing food additive regulations to include temperature limitations and, in some cases, end test specifications to ensure that heat susceptor packaging will be safe under actual conditions of use. If FDA determines that they are necessary, the agency will establish upper temperature limits based on data submitted in response to this request and on currently available toxicological studies on the food additives involved and their possible degradation products. If no new data are submitted, existing petition data, which define the conditions under which the materials were tested, will provide the basis for any upper temperature limits.

Listed below are the types of data that FDA considers necessary for its review of whether to establish temperature limits in its regulations and of the safety at high temperatures of materials used in heat susceptor packaging:

1. Information on the chemical composition and construction of these packages.
2. Information on the temperature levels reached by various components of the package under actual conditions of use in microwave ovens.
3. Migration data obtained under maximum time/temperature conditions of use.
4. Identity of breakdown products under maximum time/temperature conditions of use.
5. Available toxicological safety data for component chemicals and breakdown products.
6. Current and anticipated use information (e.g., types of food contacted, cooking/heating times, and temperatures).

These data should be submitted to the Division of Food and Color Additives (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, as a letter, as a food additive master file, or as part of a food additive petition. These data should be submitted to FDA no later than December 7, 1989, to ensure that all relevant data for specific heat susceptor components are considered before the agency determines whether revision of the applicable regulations is necessary. General comments on this ANPR should be sent to the Dockets Management Branch (address above).

FDA is also requesting general comments and suggestions regarding the format of regulation changes for uses above 300 °F, should FDA determine that such changes are necessary. An approach currently being considered by FDA is to modify 21 CFR part 174 by adding a regulation to prohibit high temperature use except where specifically authorized in the food additive regulations. It may also be necessary to modify certain regulations, such as those governing uses of paper, polymers, and adhesives that do not limit high temperature uses. To ensure that it fully considers the effect of any decision it makes, FDA is requesting that all food additives that are currently used at temperatures above 300 °F be identified to it. In addition, anyone wishing to submit comments concerning the economic impact that might result from such changes is encouraged to do so.

V. Environmental Impact

FDA is required to consider the potential environmental effects of the action to be proposed. Therefore, FDA requests comments on the potential environmental consequences of implementing the policy discussed in this notice.

VI. References

The following references have been placed on display in the Dockets Management Branch (address above) and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

[Docket No. 88N–0320]

Current Good Manufacturing Practice in Manufacture, Processing, Packing, or Holding; Proposed Revision of Certain Labeling Controls; Extension of Comment Period

AGENCY: Food and Drug Administration.

ACTION: Extension of comment period.

SUMMARY: The Food and Drug Administration is extending to October 20, 1989, the comment period for the proposed rule, published June 23, 1989 (54 FR 26394), to amend the current good manufacturing practice (CGMP) regulations for human and veterinary drug products to revise certain labeling control provisions. The changes are intended to reduce the frequency of drug product mislabeling. FDA is taking this action in response to a request for an extension of the comment period.

DATE: Comments by October 20, 1989.

ADDRESS: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Robert J. Meyer, Center for Drug Evaluation and Research (HFD-362), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–295–8048.

SUPPLEMENTARY INFORMATION: In the Federal Register of June 23, 1989 (54 FR 26394), FDA issued a proposed rule to modify specific sections of the packaging and labeling control subpart of the CGMP regulations. The proposal specifies conditions for the use of gang-printed or cut labeling, exempts from CGMP labeling reconciliation requirements manufacturers that employ 100-percent drug product label inspection systems, and requires manufacturers to identify filled drug product containers that are not immediately labeled. The proposed amendments are based upon findings of a recent agency study of drug product recalls which identified label mixups as the leading cause of recall incidents involving mislabeled products. The proposed rule is intended to encourage desirable labeling operations and to contribute measurably to preventing drug product mislabeling. The proposal gave interested persons an opportunity to submit written comments by August 22, 1989.

In response to the proposal, the Compressed Gas Association (CGA) has requested a 60-day extension of the comment period. CGA expressed their need for additional time to consult their membership and to gather information to adequately respond to the proposal. CGA states that the requested extension of the comment period will permit them to prepare and submit detailed comments to the proposal.

FDA has carefully considered the request. The agency has determined that additional time for the preparation and submission of meaningful information and data is in the public interest. Accordingly, the comment period for submissions by any interested person is extended to October 20, 1989.

Interested persons may, on or before October 20, 1989, submit written comments regarding this proposal to the Dockets Management Branch (address above). Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: September 1, 1989.

Alan L. Hoeting,

Acting Associate Commissioner for Regulatory Affairs.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Part 650

[FHWA Docket No. 84–12, Notice No. 2]

RIN 2125–AB05

Erosion and Sediment Control on Highway Construction Projects

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Withdrawal of notice of proposed rulemaking.

SUMMARY: The FHWA is withdrawing a notice of proposed rulemaking (NPRM) which proposed to revise an existing regulation by adopting sections 208.01 and 208.03 of a document entitled "Guide Specifications for Highway Projects," by the American Association of State Highway and Transportation Officials (AASHTO). The existing regulation, to minimize erosion and sediment damage in the course of highway construction, will remain in effect without change. This determination has been made based on a further review as well as on comments submitted to the public docket.

DATE: This withdrawal is effective on September 8, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Philip Thompson, Office of Engineering, Bridge Division (202) 366–4611, or Mr. Michael Laska, Office of the Chief Counsel (202) 366–1383, Federal Highway Administration, 400 Seventh Street SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION: The policies and procedures for controlling erosion and sediment on highway construction projects are set forth in 23 CFR part 650, subpart B. The regulations require that Federal-aid highways shall be located, designed, constructed and operated according to standards that will minimize erosion and sediment damage to the highway and adjacent properties and abate pollution of surface and ground water resources pursuant to 23 U.S.C. 109 (g), (h) and 33 U.S.C. 1323. The FHWA conducted a review of the existing regulations to determine the effectiveness of current procedures in minimizing soil erosion from highway construction. The FHWA considered adopting the AASHTO Specifications for managing and enforcing erosion and sediment control activities on Federal-aid projects.

On January 18, 1985 the FHWA published an NPRM (50 FR 2694) requesting comments on the proposed revision to the regulation on sediment control on highway construction. The NPRM proposed that the AASHTO Specifications be included as an appendix to 23 CFR part 650, subpart B. Section 650.207 of the existing regulation would be revised to require inclusion of appropriate erosion and sediment control measures in a project's plans, specifications and estimates; and to include the reference to §§ 208.01 and 208.03 of the AASHTO Specifications with the requirement that policies and procedures of agencies subject to this regulation must meet or exceed the AASHTO Specifications. The comment period (Docket No. 84–12) closed March 19, 1985.

In response to the ANPRM, 21 comments were received. Eight comments supported the change, 9 supported some changes and opposed others, and 4 opposed the change. Upon further review and after carefully considering the public comments, the FHWA has determined that the existing regulation, 23 CFR part 650, subpart B provides adequate guidelines and regulation to assure that highways are located, designed, constructed and operated according to standards that will minimize erosion and sediment damage to the highway and adjacent properties and abate pollution of surface and groundwater resources. In addition to the comments, this determination was also based on findings of our continuing review of State Highway Agency activities over the last five years. These reviews indicate that temporary and permanent erosion control measures are being incorporated into project plans. Therefore, the FHWA is withdrawing the NPRM.

A regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory

Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

(Catalog of Federal Domestic Assistance Programs Number 20.205, Highway Planning and Construction).

23 CFR Part 658

[FHWA Docket No. 89–22]

RIN 2125–AC38

Truck Size and Weight; Saddlemount Combinations

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: In response to a petition from the National Automobile Transporters Association (NATA) and its member companies dated September 7, 1988, the FHWA proposes to amend 23 CFR 658.5 and 658.13 to regulate the overall length of driveway saddlemount combinations and driveway saddlemount with fullmount combinations. The proposed changes would increase the overall length limit from 65 to 75 feet and clarify that both saddlemount and saddlemount with fullmount automobile transporters are specialized equipment.

DATE: Comments on this docket must be received on or before December 7, 1989.

ADDRESS: Submit written, signed comments to FHWA Docket No. 89–22, Room 4232, HCC–10, Office of the Chief Counsel, Federal Highway Administration, 400 Seventh Street, SW., Washington, DC 20590. Commenters may, in addition to submitting "hard copies" of their comments, submit a floppy disk (either 1.2Mb or 36Kb density) in a format that is compatible with either word processing programs Word Perfect or WordStar. All comments received will be available for examination at the above address between 8:30 a.m. and 3:30 p.m., e.t., Monday through Friday, except legal holidays. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Mr. Max Pieper, Office of Motor Carrier Information Management and Analysis, (202–366–4029) or Mr. Charles Medalen, Office of the Chief Counsel, (202–366–1354), Federal Highway Administration, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 8:30 a.m. to 4:15 p.m., e.t., Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION: On January 29, 1988, the FHWA published a final rule in the **Federal Register** (53 FR 2593) amending 23 CFR 658.13(d). It provided in part as follows:

> (iii) Drive-away saddlemount with fullmount vehicle transporter combinations are considered to be specialized equipment. No State shall impose an overall length limit of less than 65 feet on saddlemount with fullmount combinations. (Triple saddlemount combinations shall be allowed when conforming to the 65-foot length limit and the applicable safety regulations at 49 CFR 393.71.)

In saddlemount combinations one or more truck tractors or trucks are connected to and towed by a truck or truck tractor. The connection is made by placing the front axle of the towed vehicle onto the frame of the towing vehicle and connecting it by a mechanism known as a saddle. The saddle functions like a fifth wheel kingpin connection. When two vehicles are towed in this manner the combination is referred to as a double saddlemount. Three towed vehicles comprise a triple saddlemount. When a smaller vehicle is mounted completely on the frame of the first or last vehicle in a saddlemount combination, it is known as a fullmount.

There were 27 responses to the notice of proposed rulemaking (NPRM) to allow saddlemount with fullmount vehicle transporter combinations within a 65-foot overall limit (FHWA Docket No. 84–18, 50 FR 48431, November 25, 1985). Of these, 19 from industry and one from a State Department of Transportation (DOT) favored a 75-foot overall minimum length limit. Comments from 7 State DOT's either favored a 65-foot or shorter overall length limit. The NPRM discussed several issues relative to the saddlemount combinations, i.e., the number of articulation points, the additional braking requirements of 49 CFR 393.71, and the low accident rate of the drive-away automobile transporter fleet. After carefully considering all the comments, the FHWA adopted a 65-foot minimum overall length limit as a safe and equitable balance.

Petition

In a letter dated September 7, 1988, NATA and its member companies petitioned the FHWA to amend 23 CFR 658.13(d)(iii) to increase the overall length limit for saddlemount combinations from 65 to 75 feet. This is because truck manufacturers have been building longer wheelbase power units since enactment of the Surface Transportation Assistance Act of 1982 (STAA), Pub. L. 97–424, 96 Stat. 2097, which prohibits overall length limits for certain vehicle combinations on the National Network (NN). In addition, many are being manufactured with wind deflectors installed on top or incorporated into the shape of the cab. Due to these increases in length and height, it is often impossible to transport three saddlemount vehicles within the 65-foot overall saddlemount length limit. Although NATA expects that more States will permit 75-foot saddlemount combinations in the future, only 10 do so at present. This means that as the length and height of trucks and truck tractors increase, fewer can be transported in saddlemount combinations, which actually decreases productivity in this industry, contrary to the intent of the STAA. Thus NATA believes that positive action by the Federal Government to restore productivity is appropriate, provided it can be achieved with the same degree of highway safety that attends the movement of other vehicle combinations of a similar size.

In October, 1984, NATA contracted with the Western Highway Institute (WHI) to conduct a comprehensive study and evaluation of saddlemount combinations. As support for its petition, NATA submitted a copy of WHI's report issued September, 1985, entitled "Saddlemount Combination Tests." A copy is available for review in the FHWA Docket Room.

Discussion

The Western Highway Institute (WHI) tested a 60-foot long double saddlemount and 65, 70 and 75-foot long triple saddlemount combinations for offtracking (expressed as swept width) and stopping distances (for service and emergency brakes). Swept width is the sum of the offtrack and the effective width of the vehicle and indicates how much total roadway width is needed to accommodate a vehicle in a given turning movement.

As part of its study, the Western Highway Institute contracted with the University of Michigan Transportation Research Institute (UMTRI) to examine, by computer simulation, the braking

efficiency, roll stability and rearward amplification of saddlemount combinations. The simulations tested the saddlemount combinations indicated. The results of these five tests are presented in Tables 1 through 5, which include other truck combinations or safety standards for comparison.

TABLE 1—OFFTRACKING

[Swept Width in Feet]

	73/75-foot triple saddlemount	60-foot double saddlemount	65/65-foot triple saddlemount	Twin 28-foot trailers	48-foot semi-trailer
60-foot radius	20.2	15.4	16.4	21.1	30.6
100-foot radius	14.0	11.7	12.0	14.9	19.0
165-foot radius	10.9	9.9	9.8	12.3	14.6

TABLE 2—STOPPING DISTANCES 96 [(IN FEET]

	73/75-foot triple saddle-mount	60-foot double saddle-mount	MVSS 121 standard
Service brakes:			
20 mph	32.1	34.3	35
30 mph	66.0	66.9	75
40 mph	105.8	115.2	131
50 mph	190.2	158.9	203
55 mph	231.8	213.2	246
Emergency brakes (20 mph):			
Primary	44.8		[1] 90
Secondary	52.7		[1] 90
Spring brakes		45.6	[1] 90

[1] 49 CFR 393.52 standard.

TABLE 3—BRAKING EFFICIENCY

[Ratio (In Percent) of Deceleration Capacity to Tire/Road Friction Level]

	73/75-foot triple saddle-mount	60-foot double saddle-mount	63/65-foot triple saddle-mount	48-foot semi-trailer
Light braking, 0.1 g [1]:				
All axles braked	60	66	61	[2] 62 [3] 96
Last axle unbraked	63	64	64	
Heavy braking, 0.4g:				
All axles braked	51	56	52	[2] 59 [3] 86
Last axle unbraked	58	59	59	

[1] A "g" is equal to the acceleration of a body caused by the force of gravity.

[2] Empty.

[3] Loaded.

Braking efficiency is a measure of the maximum braking level which can be sustained without wheel lockup and loss of vehicle control. Ideally, if the nondimensional friction level of a surface is 0.4, a vehicle would be able to attain a deceleration level of 0.4 g's for a braking efficiency value of 100 percent.

To explain the difference between light and heavy braking, the UMTRI report is quoted. "Light and heavy braking levels are distinguished in recognition of the fact that the light braking applied when operating, for example, on long downgrades and very slippery surfaces, generally involves a significantly different braking efficiency level than applies to heavy braking. Further, the 0.4 selection for the "heavy" braking level reflects the rather low braking capabilities which are generally seen with heavy-duty commercial vehicles."

TABLE 4—ROLLOVER THRESHOLD

[In g's]

73/75-foot triple saddle-mount	65-foot double saddle-mount	63/65-foot triple saddlemount	48-foot semitrailer
0.542	0.547	0.543	[1] 0.24–0.40 [2] .70

[1] Loaded.

[2] Empty.

Rollover threshold is the amount of lateral acceleration, in g's, that a turning vehicle will tolerate before rolling over.

TABLE 5—REARWARD AMPLIFICATION AT 55 MPH

73/75-foot triple saddle-mount	60-foot double saddle-mount	63/65-foot triple saddlemount	Twin 28-foot trailers
1.95	1.53	2.19	2.55 (1.9) (1.44)

Rearward amplification is an expression of the "crack-the-whip" effect on the rearmost unit compared to the towing unit in a tight turn. A value of 1.0 indicates that no exaggeration in the rear unit response is occurring, while a higher number indicates a greater response. In the report for WHI, UMTRI recorded the response to a quick lane-change maneuver as 2.55 for a twin 28-foot trailer combination. The 1.9 value for the twin-trailer combination was interpolated from Figure 3.1.2.e in a July 1986 report, "The Influence of Weight and Dimensions on the Stability and Control Of Heavy Trucks in Canada—Part 1" prepared for the Canroad Transportation Research Corporation (CTRC). This figure is based on work by UMTRI for the CTRC sponsored study. In its December, 1988 report for FHWA, "Safety Implications of Various Truck Configurations," UMTRI reported a response to a continuous weaving maneuver of 1.44 for the same combination.

The variances in these numbers for rearward amplification are attributed to different parameters in the two studies. These are (1) Sudden motion as opposed to the continuous motion present in normal operations, (2) tire loads and stiffness, and (3) the hitching mechanism. Based on a review of the information set forth in the tables above it appears that the 73/75-foot saddlemount does not provide any greater safety risks than the other vehicles and, in fact, may be safer under many conditions.

The FHWA proposes to increase the overall length limit for saddlemount combinations with up to three trailing units plus one fullmount from 65 to 75 feet. This action results in probable improved safety performance as the longer combination trucks better in a quick steering maneuver than does one 65 feet long.

Request for Comments

The FHWA solicits comments from all interested persons regarding the following matters:

1. The methods and vehicle combinations use and results obtained in the Western Highway Institute and University of Michigan Transportation Research Institute tests and other studies regarding the following vehicle characteristics:

a. Offtracking,
b. Braking,
c. Braking efficiency,
d. Rollover, and
e. Rearward amplification.

2. Any other information regarding the performance of saddlemount combinations.

3. The productivity of saddlemount combinations and the need to extend the overall Federal length limit on saddlemount combinations from 65 to 75 feet.

4. The extent to which increasing by regulation the overall length limit of saddlemount combinations from 65 to 75 feet affects, alters or impacts upon State

authority to regulate vehicles operating on State highways.

5. Any other information regarding safety concerns related to extending the overall length from 65 to 75 feet.

Regulatory Impact

The FHWA has considered the impact of this notice and has determined that it is not a major rulemaking action within the meaning of E.O. 12291 and not a significant rulemaking under the regulatory policies and procedures of the DOT. These determinations by the agency are based on the nature of the rulemaking. The FHWA has determined that this rulemaking technically amends the June 5, 1984, final rule (FHWA Docket 83–14, 49 FR 23302), clarifying and further defining certain issues contained therein. The impacts of the provisions addressed in this rulemaking do not differ in substance from those fully considered in the original impact statement accompanying the June 5 final rule. Automobile transporters make up a small segment of the total medium to heavy truck population (approximately 13,000 vehicles out of the total medium to heavy truck population of over 2 million.) Although saddlemount units constitute an even smaller percentage, productivity gains could be considerable for this minor constituency. NATA estimates that these gains could amount to as much as $6 to $7 million per year. Safety considerations have been addressed earlier in this preamble. The Regulatory Impact Analysis prepared for the June 5 rulemaking is available for inspection in the FHWA Public Docket Room 4232 in the Headquarters Office, 400 Seventh Street, SW., Washington, DC 20590.

Executive Order 12612 of October 26, 1987, "Federalism," requires that the effect of Federal Regulations on the States must be weighed. Any regulatory preemption of State law must be restricted to the minimum level necessary to achieve the objective of the statute under which the regulation is promulgated. In this case, the FHWA previously authorized saddlemount combinations with a 65-foot overall length limit in a final rule published in the Federal Register on January 29, 1986. As the FHWA already has a regulation on the minimum overall length for saddlemount combinations that the States must allow on the National Nework for trucks, this action does not preempt State authority in a new area. Furthermore, this action is consistent with the intent of the STAA to increase the productivity of the industry, without adversely affecting safety.

Under the criteria of the Regulatory Flexibility Act, FHWA hereby certifies that this action will not have a significant economic impact on a substantial number of small entities. (Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program).

List of Subjects in 23 CFR Part 658

Grants programs—transportation, Highways and roads, Motor carrier—size and weight.

Issued on August 30, 1989.

Thomas D. Larson,

Federal Highway Administrator.

In consideration of the foregoing, the FHWA proposes to amend 23 CFR part 658 as follows:

PART 658—TRUCK SIZE AND WEIGHT: ROUTE DESIGNATION—LENGTH, WIDTH AND WEIGHT LIMITATIONS

1. The authority citation for 23 CFR part 658 continues to read as follows:

Authority: Secs. 133, 411, 412, 413, and 416 of Pub. L. 97–424, 96 Stat. 2097 (23 U.S.C. 127; 49 U.S.C. app. 2311, 2312, and 2316), as amended by Pub. L. 98–17, 97 Stat. 59, and Pub. L. 98–554, 98 Stat. 2829; 23 U.S.C. 315; and 49 CFR 1.48.

2. Section 658.5 is amended by adding paragraphs (r) and (s), as follows:

§ 658.5 Definitions

* * * * *

(r) *Saddlemount.* A saddlemount is a vehicle combination in which one or more trucks or truck tractors are connected to and towed by a single truck tractor. The connection is made by placing the front axle of the towed vehicle onto the frame of the towing vehicle and connecting it by a mechanism known as a saddle which functions like a fifth wheel kingpin connection. When two vehicles are towed in this manner the combination is referred to as a double saddlemount. When three vehicles are towed in this manner, the combination is called a triple saddlemount.

(s) *Fullmount.* A fullmount is a smaller vehicle mounted completely on the frame of either the first or last vehicle in a saddlemount combination.

3. Section 658.13(d)(1)(iii) is revised to read as follows:

§ 658.13 Length

* * * * *

(d)(1) * * *

(iii) Drive-away saddlemount vehicle transporter combinations and driveway saddlemount with fullmour. vehicle transporter combinations are considered to be specialized equipment. No State shall impose an overall length limit of less than 75 feet on such combinations. (Saddlemount combinations are subject to all applicable safety regulations including those at 49 CFR 393.71)

BILLING CODE 4910-22-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part I

[INTL-399-88]

RIN 1545–AN16

Treatment of Dual Consolidated Losses

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: This document provides proposed Income Tax Regulations relating to the definition of "dual consolidated losses" for purposes of determining whether the net operating loss of a domestic corporation is available to reduce the taxable income of any other member of its affiliated group. In the Rules and Regulations portion of this issue of the **Federal Register**, the Internal Revenue Service is issuing temporary income tax regulations relating to the definition of a dual consolidated loss for purposes of determining whether the net operating loss of a domestic corporation is available to reduce the taxable income of any other member of its affiliated group. The text of the temporary regulations also serves as the comment document for this notice of proposed rulemaking.

DATES: The regulations under § 1.1503–2T are proposed to be effective as final regulations 30 days after publication of final regulations in the **Federal Register** with respect to taxable years beginning after December 31, 1986. Written comments and requests for a public hearing must be delivered or mailed by November 7, 1989.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:CORP:T:R (INTL–0399–88), Room 4429, Washington, DC 20224.

FOR FURTHER INFORMATION: David I. Bower of the Office of the Associate

Chief Counsel (International) within the Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224, attention: CC:CORP:T:R (INTL–0399–88) (202 566–6645 not a toll-free call).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments on the collection of information should be sent to Office of Management and Budget, Paperwork Reduction Project (1545–1083), Washington, DC 20503, with copies to the Internal Revenue Service Attention: IRS Report Clearance Officer T:FP, Washington, DC 20224.

The collection of information in this regulation is in § 1.1503–2T (c)(3)(i)(B), (c)(3)(iv), (c)(3)(v), (c)(4)(i), and (c)(4)(iii). This information is required by the Internal Revenue Service to provide an exception from a general rule that dual consolidated losses are not available to reduce the income of any other domestic affiliate, and to prevent dual resident corporations that are members of affiliated groups filing consolidated returns from using the dual consolidated loss to offset income of other members of their affiliated groups. The likely respondents are businesses or other for profit institutions.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances.

Estimated reporting burden: 300 hours.

Estimated average annual burden per respondent: .75 hour.

Estimated number of respondents: 400.

Estimated annual frequency of responses: Agreement and waiver—yearly.

Background

The temporary regulations published in the Rules and Regulations portion of this issue of the **Federal Register** add new § 1.1503–2T to Part I of Title 26 of the Code of Federal Regulations. These regulations implement section 1503(d) which was added by section 1249 of the Tax Reform Act of 1986 (Pub. L. 99–514). The preamble to the temporary regulations explains these additions to the income tax regulations.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. Chapter 5) and the Regulatory Flexibility Act (5 U.S.C. Chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Comments and Requests for Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably a signed original and eight copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request by any person who submits written comments on the proposed rules. Notice of the time and place for the hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these proposed regulations is Riea M. Lainoff of the Office of the Associate Chief Counsel (International) within the Office of Chief Counsel, Internal Revenue Service. Other personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations.

Lists of Subjects in 26 CFR 1.1501–1 through 1.1564–1

Income taxes, Controlled group of corporations, Consolidated returns.

The temporary regulations, FR Doc. (T.D. 8261) published in the Rules and Regulations portion of this issue of the **Federal Register** are hereby also proposed as final regulations under Title 26, Parts 1 and 602, of the Code of Federal Regulations.

Lawrence B. Gibbs,

Commissioner of Internal Revenue.

[FR Doc. 89–21073 Filed 9–7–89; 8:45 am]

Notices

Federal Register
Vol. 54, No. 173
Friday, September 8, 1989

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ACTION

Drug Alliance; Fund Availability Demonstration Grants

ACTION: Notice of Availability of Funds.

ACTION, the federal domestic volunteer agency, announces the anticipated availability of funds during fiscal year 1990 for Drug Alliance grants under the Special Volunteer Programs authorized by the Domestic Volunteer Service Act of 1973, as amended (Pub. L. 93–113, Title 1, part C; 42 U.S.C. 4992).

ACTION, historically a principal source of volunteer leadership in America, has been mandated by the President and Congress to respond to the crisis of illegal drug use by fostering innovative prevention programs that capitalise on volunteer resources on the local level. Volunteers of all ages and from every segment of the community can make vital contributions to drug prevention and awareness programs, and ACTION intends to support programs which encourage and sustain the spirit of voluntarism as a weapon in America's fight against drugs.

The best strategy to combat illegal drug use is to prevent it from starting. Effective prevention requires the involvement of every segment of the community, recognizing that no single approach will work in every locale. Comprehensive approaches assure that clear, consistent "no use" messages are delivered and reinforced by a variety of community resources. Reinforced by the provisions of the Omnibus Drug Abuse Act of 1988, there is growing recognition of the importance of involving youth in illicit drug use prevention activities after school and on weekends when schools are not in session and school-related prevention information and support is unavailable.

There is increasing attention being paid to the value and importance of providing youth the opportunity to participate in structured volunteer programs. As well as the obvious benefits to the community, there is increasing acceptance of the notion of "immunization"—that voluntary service may in fact reduce the risk of drug involvement among participating youth by reinforcing good work habits, helping enhance self-esteem, establishing a sense of belonging within the community, and providing positive role models.

While research on this "immunizing" effect is underway, it is clear that voluntary service can be of significant value to the community and to the participating youth. Accordingly, ACTION is very interested in efforts to combine voluntary service with drug prevention activity to maximize the likelihood of stopping illicit drug use before it begins. There is particular need for such programming in many inner city and rural low-income communities. The needs in such communities that may be met through voluntary service are often great and the youth who live in these areas are generally considered at extremely high risk for drug involvement.

Local community and youth serving organizations are in a unique leadership position to involve youth in meaningful structured volunteer programs that focus on illicit drug use prevention.

America's youth, who are often confronted by peer pressure and other encouragement to use illegal drugs, constitute the most important target for anti-drug programming. Drug-free youth also constitute a tremendous resource for a community's drug prevention educational effort. There is a critical need to develop programs which enable local communities to tap this resource. This announcement solicits innovative proposals in response to that need.

A. Eligible Strategy

Local community and youth serving organizations are encouraged to submit proposals to implement the following strategy by: (a) Expanding an existing program, or (b) developing a new program.

Strategy. The ideal program will provide structured non-stipended volunteer opportunities that focus on illicit drug prevention education activity appropriate for these youth program participants. It will involve parents, use non-stipended volunteers in its operation, and target youth at high risk of becoming involved in the use of illegal drugs, especially youth from low-income communities, in both inner city neighborhoods and rural settings, single parent or broken homes, and children of substance abusers.

The program must include a specific curriculum which conveys the harmful consequences of illicit drug use and teaches refusal skills, and may include group presentations, workshops, rallies, leadership training, peer counseling and theatrical or musical performances that involve the presentation of accurate anti-drug information. This should be structured with a specific number of hours of illicit drug use prevention education provided on a regular schedule for program participants. The involvement of other drug prevention educational resources from the community is encouraged.

B. Eligible Applicants

Only applications from private non-profit incorporated organizations and public agencies will be considered. Such organizations may include, but are not limited to, local coalitions or councils dedicated to the prevention of illegal drug use, volunteer groups, religious organizations, local government agencies, fraternities, sororities and youth service organizations.

Any applicant that does not adhere to a strict policy of the non-use of illicit drugs will not be eligible for consideration. Furthermore, an application will be ineligible if it refers to philosophy, proposed activities, training or educational materials that advocate the tolerance of the initial or responsible use of any illicit drug, or the illicit use of any legal drug. This issue must be addressed in the application.

C. Available Funds and Scope of the Grant

The amount of a grant may not be smaller than $20,000 nor larger than $35,000, and requires a 50% non-Federal match.

Applicants should specifiy the sources and nature of in-kind and other non-federal contributions. These contributions must be deemed allowable costs in accordance with ACTION requirements and be supported by a detailed budget narrative listing the source of that support and the formula used to compute those costs.

Publication of this announcement does not obligate ACTION to award any specific number of grants or to obligate any specific amount of money for these grants. Projects funded under this announcement may receive funds for a grant period not to exceed 12 months. They will not be eligible for renewal funding.

D. General Criteria for Grant Review and Selection

Grant applications will be reviewed and evaluated based on the criteria outlined below, as appropriate, as well as conformance to the instructions included in the application. Grant applicants with a demonstrated competence in conducting youth volunteer programs will be given preference.

1. Ability and plans to develop or expand an illicit drug use prevention program for high-risk youth that provides illicit drug use prevention education.
2. Ability and plans to involve at risk youth and parents in the development and implementation of the prevention program.
3. Ability and plans to recruit, train, utilize and retain non-stipended volunteers.
4. Plans to continue the illicit drug use prevention education beyond the end of the ACTION grant period or to incorporate the activities into future youth programs, without additional funding from ACTION.
5. Ability and plans to work with other local prevention networks and coalitions to implement the program.
6. Carefully formulated schedule for achieving objectives, including continuation of the project, and feasibility of methods for meeting those objectives.
7. Detailed description of methods to be used in evaluating the impact of the program on the drug abuse problem in the community.

E. The Associate Director of Domestic and Anti-Poverty Operations May Use Additional Factors in Choosing Among Applicants Who Meet the Minimum Criteria Specified Above, Such As

1. Geographic distribution;
2. Applicants accessibility to alternate resources, both technical and financial;
3. Allocation of Program Demonstration/Drug Alliance resources in relation to other ACTION funds;

F. Application Review Process

Applications submitted under this announcement will be reviewed and evaluated by their respective ACTION State and Regional Offices and ACTION's Program Demonstration and Development Division. ACTION's Associate Director for Domestic and Anti-Poverty Operations will make the final selection. ACTION reserves the right to ask for evidence of any claims of past performance or future capability.

G. Application Submission and Deadline

One signed original and two copies of all completed applications must be submitted to the appropriate ACTION State Office no later than 5:00 p.m. local standard time on November 1, 1989. Only those applications that include a-g listed below, and h–j (if required), and are received at the appropriate ACTION State Office by 5:00 p.m. local standard time on this date will be eligible. Incomplete applications will not be considered for funding.

All grant applications must consist of:

a. Application for Federal Assistance (ACTION Form A–1036) with narrative budget justification and a narrative of project goals and objectives, and assurances.

b. Signed and dated: Certification Regarding Drug-Free Workplace Requirements.

c. Signed and dated: Certification Regarding Debarment, Suspension, and Other Responsibility Matters Primary Covered Transactions.

d. Current resume of the candidate for the position of project director, if available, or the current resume of the director of the applicant agency or project.

e. Organization chart of the applicant organization showing how the project is related to the organization and how participating affiliates are related to the organization.

f. List of the current board of directors showing their names, addresses and organizational and professional affiliations.

g. Three letters of support attesting to the applicant's ability to meet the criteria contained in Section D.

h. CPA certification of accounting capability.

i. Articles of Incorporation.

j. Proof of non-profit status or an application for non-profit status, which should be made through documentation.

Items h, i and j above are not required for public agencies of state and local government.

To receive an application kit, please contact the appropriate ACTION State Program Office. Following is an address list of ACTION Regional Offices, along with the addresses and telephone numbers of the ACTION State Program Office under their jurisdiction.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

September 1, 1989.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate or the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of P.L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA. OIRM. Room 404–W Admin. Bldg., Washington, DC 20250, (202) 447–2118.

Reinstatement

- Food and Nutrition Service.

Food Stamp Mail Issuance Report.

BILLING CODE 3410–01–M

Office of the Secretary

Review of Need for United States Sugar Import Controls

AGENCY: Office of the Secretary, USDA.

ACTION: Notice.

SUMMARY: This notice announces the determination of the Secretary of Agriculture that continued operation of Additional U.S. Note 2 and paragraphs (b), (c), (d), and (e) of Additional U.S. Note 3 to Chapter 17 of the Harmonized Tariff Schedule of the United States (HTS) with respect to tariff rates and quotas applicable to the importation of sugar into the United States, is necessary to provide due consideration to the interests in the United States sugar market of domestic producers and materially affected contracting parties to the General Agreement on Tariffs and Trade (GATT).

FOR FURTHER INFORMATION CONTACT: John Nuttall, Foreign Agriculture Service, Department of Agriculture, Washington, DC 20250, Telephone: (202) 447–2916.

SUPPLEMENTARY INFORMATION: In accordance with paragraph (f) of Additional U.S. Note 3 to Chapter 17 of the Harmonized Tariff Schedule of the United States (HTSUS), the Secretary of Agriculture has consulted with the U.S. Trade Representative, the Department of State, and other concerned agencies as to whether the operation of Additional U.S. Notes 2 and 3 to Chapter 17 of the HTSUS would give due consideration to the interests in the United States sugar market of domestic producers and materially affected contracting parties to the GATT. An analysis of various elements pertinent to the operation of Additional U.S. Notes 2 and 3 to Chapter 17 of the HTSUS is set forth below.

A. Current World and U.S. Sugar Market Situation

World sugar consumption for 1988/89 is expected to exceed production for the fourth straight year. As a result, world ending stocks have been gradually declining, leading to a recovery in world sugar prices. World production in 1988/89 is estimated at 105.5 million metric tons, raw value, while consumption is estimated at 107.4 million metric tons, raw value, and ending stocks are projected to decline by about 350,000 metric tons, raw value. However, in comparison to 1984/85, ending stocks for 1988/89 are expected to decline by 8.5 million metric tons.

Since the middle of June, 1989 the world sugar price (f.o.b.s., Caribbean, No. 11 spot contract as published by the New York Coffee, Sugar & Cocoa Exchange) has settled into the 13 to 14 cent-per-pound range. It is difficult to predict the direction of prices in the coming year; futures contracts for 1990 are currently trading in the 12 to 13 cent-per-pound range and have recently been moving up and down from and within that range.

U.S. centrifugal sugar production for 1988/89 is estimated at about 6.3 million metric tons, raw value (6.9 million short tons, raw value), and domestic utilization is expected to be about 7.5 million metric tons, raw value (8.3 million short tons, raw value). During

---

the period January 1, 1989 through

and materially affected contracting

river. The Special Management Area

---

public review period by April 1990. At

McCray, Project Leader, at the above

evaluated (pheasant, bobwhite quail,

the period January 1, 1989 through August 13, 1989, 749,857 metric tons, raw value of sugar were charged against the quotas for the 39 countries which have quota allocations totalling, 1,123,440 metric tons, raw value. The domestic price of raw cane sugar (c.i.f., duty and fee paid, No. 14 nearby futures contract, as quoted by the New York Coffee, Sugar & Cocoa Exchange) has exceeded 23 cents per pound, raw value, every day since June 16, 1989.

B. Outlook for World and U.S. Sugar Market

It is difficult to accurately predict future trends in world centrifugal sugar production and consumption. However, both consumption and production during 1989/90 are expected to be above their levels for 1988/89, and to be somewhat more in balance than in 1988/89. These trends provide no precise indication as to the direction of prices and their impact on expected production and consumption trends.

As already indicated, current world future prices for contracts due to mature in 1990 have settled into the 12 to 13 cent-per-pound range. Current domestic futures prices for contracts also due to mature in 1990 have stabilized in the 22 to 23 cent-per-pound range, about 10 cents per pound above world futures contracts for this period.

C. GATT Council Decision on U.S. Sugar Import Restrictions

On June 22, 1989, the GATT Council adopted the report of the panel which examined US. restrictions on imports of sugar and which concluded that the quotas maintained under Additional U.S. Note 3 to Chapter 17 are inconsistent with the General Agreement. The Council requested the United States of either terminate the restrictions or bring them into conformity with the General Agreement.

Following the Council's action, the U.S. Department of Agriculture established a Taskforce to develop options for implementing U.S. law with respect to imports of sugar in a manner consistent with our GATT obligations. The Taskforce and other appropriate Government agencies are now formulating and evaluating these options.

In the interim and since no clear alternative has been decided upon by the date that this notice must be published, continuation of the operation of Additional U.S Note 2 and paragraphs (b), (c), (d), and (e) of Additional U.S. Note 3 to Chapter 17 of the HTSUS gives due consideration to the interests in the U.S. sugar market of domestic producers and materially affected contracting parties to the GATT.

Determination

After have consulted with the U.S. Trade Representative, the Department of State, and other concerned agencies in accordance with paragraph (f) of Additional U.S. Note 3 to Chapter 17 of the HTSUS, I have determined that the continued operation of Additional U.S. Note 2 and paragraphs (b), (c), (d) and (e) of Additional U.S. Note 3 to Chapter 17 of the HTSUS gives due consideration to the interests in the U.S. sugar market of domestic producers and materially affected contracting parties to the GATT, and that the operation of paragraph (g) of Additional U.S. Note 3, which would allow entry of sugar into the United States of not to exceed 6.90 million short tons, would not give due consideration to such interests.

Signed at Washington, DC on September 1, 1989.

Clayton Yeutter,

Secretary of Agriculture.

[FR Doc. 89-21108 Filed 9-5-89; 10:53 am]

BILLING CODE 3410-10-M

Forest Service

Sierra and Sequoia National Forests, CA; Intent To Prepare an Environmental Impact Statement

In the matter of Comprehensive Management Plan Middle Fork of the Kings, South Fork of the Kings, and Kings Wild and Scenic Rivers: Kings River Special Management Area Sierra and Sequoia National Forests Fresno County, California; Intent to Prepare an Environmental Impact Statement and Implementation Plan.

As required by the Wild and Scenic Rivers Act of 1968, as amended, the Department of Agriculture, Forest Service, will prepare an Environmental Impact Statement to determine future management practices for the Middle Fork of the Kings, South Forks of the Kings, and the Kings Wild and Scenic Rivers (W&SR) (totaling 28 miles), and the Kings River Special Management Area (approximately 49,000 acres), located on the Sierra and Sequoia National Forests. For that portion of the Middle Fork Kings and South Fork Kings W&SR that flows through the Sequoia National Park (totaling 55.5 miles), the Department of Interior, Park Service, will determine management practices at the time the Park's General Development Plan is updated.

In 1987, Congress created the Kings River Special Management Area (KRSMA) and designated a segment of the Kings River as a wild and scenic river. The Special Management Area was established to provide for public outdoor recreation use and enjoyment and to protect the areas' naturals, archaeological, and scenic resources, and to provide for appropriate fish and wildlife management.

The legislation also gives direction to the Forest Service to publish a management plan for the KRSMA within three years after the enactment of the act. The plan shall provide for enhancing wildlife carrying capacity, permitting grazing, developing hiking trails, and it will also include a plan for a trail from Garlic Creek to Little Tehipite Valley. The construction of any dam or diversion must have specific authority from the Congress. The plan will be tiered to the Sequoia Land and Resource Management Plan and the Sierra Draft Land and Resource Management Plan.

A range of alternatives will be considered. These alternatives will analyze various management practices and policies and their effects on resources, recreation and other current uses, and the protection of the W&SR's "Outstandingly Remarkable Values" as identified in the Sequoia National Forest Land and Resource Management Plan for the South Fork and the Kings River (2/25/88); the Environmental Assessment for the Boundaries and Classification of the Middle Fork, South Fork and The Kings Wild and Scenic Rivers (3/24/89); and the Sierra National Forest Draft Land and Resource Management plan for the Middle Fork Kings River and Kings River (6/12/89).

Federal, State, and local agencies, and individuals or organizations who may be interested in or affected by the decisions are invited to participate in the scoping process. This process will include:

1. Identification of potential issues.
2. Identification of issues to be analyzed in depth.
3. Elimination of insignificant issues or those which have been covered by a previous environmental review.
4. Determination of potential cooperating agencies and assignment of responsibilities.

Public comments have been, and will continue to be, solicited in a variety of ways including requests for written comments, information meilings, and public meetings.

Paul F. Barker, Regional Forester, Pacific Southwest Region, San Francisco, California, is the responsible official.

The draft Environmental Impact Statement is expected to be filed with the Environmental Protection Agency (EPA) and be available for a 90 day

public review period by April 1990. At that time EPA will publish a notice of availability of the draft EIS in the **Federal Register**. It is very important that those interested in the management of the Middle Fork of the Kings, South Forks of the Kings, and the Kings Wild and Scenic River (W&SR) and the Kings River Special Management Area, participate at that time. To be most helpful, comments on the draft EIS should be specific as possible and may address adequacy of the statement or the merits of the alternatives discussed (see The Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3). In addition, Federal court decisions have established that reviewers of a draft EIS must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions, Vermont Yankee Nuclear Power Corp. v NRDC, 435 U.S. 519, 553 (1978), and that environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final EIS, Wisconsin Heritages, Inc. v Harris, 490 F Supp. 1334, 1338 (E.D. Wis. 1980). The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final.

After the comment period ends on the DEIS, comments will be analyzed and considered by the Forest Service in preparing the final environmental impact statement (FEIS). The FEIS is scheduled to be completed by November 1990. In the final EIS, the Forest Service is required to respond to comments received (40 CFR 1503.4). The responsible official will consider the comments, responses, environmental consequences discussed in the EIS and applicable laws, regulations, and policies in making a decision regarding this proposal. The responsible official will document the decision and reasons for the decision in a Record of Decision. That decision will be subject to appeal.

Written comments and suggestions concerning the analysis should be sent to Jim Boynton, Forest Supervisor, Sierra National Forest, 1130 "O" Street, Fresno, CA 93721.

Questions about the proposed action and Environmental Impact Statement and Plan should be directed to Wallace McCray, Project Leader, at the above address, phone (209) 487-5155.

Robert L. Rice,

Acting Deputy Regional Forester.

August 31, 1989.

BILLING CODE 3410-11-M

Soil Conservation Service

Finding of No Significant Impact for Middle Fork of Salt River Watershed, Macon, Monroe, Randolph and Shelby Counties, Missouri

Introduction

The Middle Fork of Salt River Watershed is a federally assisted action authorized for planning under Public Law 83-566, the Watershed Protection and Flood Prevention Act. An environmental assessment was undertaken in conjunction with the development of the watershed plan. This assessment was conducted in consultation with local, state, and federal agencies as well as with interested organizations and individuals. Data developed during the assessment are available for public review at the following location: U.S. Department of Agriculture, Soil Convservation Service, 555 Vandiver Drive; Columbia, Missouri 65202.

Recommended Action

The proposed plan consists of 123 small single-purpose floodwater retarding dams (permanent pool areas range from 4 to 10 acres) with grade stabilization benefits, an accelerated land treatment program to adequately protect 1,300 acres of cropland for erosion control and a forest plan to manage 6,000 acres of forest land for increased productivity of wood products and enhancement of wildlife habitat.

Effect of Recommended Plan

The proposed project will have a major beneficial effect on the watershed problems of floodwater damage, soil erosion, and lack of forest management. The 123 small dams will eliminate flooding on 2,600 acres and reduce flooding on 21,000 acres of the 100-year floodplain, and provide grade stabilization benefits. Total flood damages will be reduced by 30 percent. Erosion will be reduced significantly on 1,300 acres of cropland that will be adequately protected with the plan. Management will be implemented on 6,000 acres of forest land resulting in increased productivity and enhanced wildlife habitat. Over all habitat units will increase by 650 for the five species evaluated (pheasant, bobwhite quail, white-tailed deer, eastern wild turkey, and cottontail rabbit).

Upland, stream channel and floodplain sediment deposition will all decrease significantly with the proposed project. Sediment leaving the watershed outlet (Mark Twain Lake) will decrease by over 12 percent or 55,000 tons annually.

Prime farmland will be increased by 1,700 acres due to a change in classification when 2-year flooding is reduced.

The proposed project will increase wetlands by 150 acres. There will be 145 acres of Type 1 wetlands converted to dams, spillways and water but 295 acres of wetland will develop in the littoral zones of the pools.

Installation of the proposed plan is expected to improve the quality of water in the Middle Fork of Salt River. The 123 small reservoirs will reduce sediment, nutrient and pesticide delivery via the trapping action of the dams. The dams will also have a beneficial impact on water quality parameters affecting aquatic life.

There are no threatened or endangered species in the watershed that will be affected by the project.

A complete cultural resources survey will be made prior to project installation, but no significant resources are expected to be adversely affected.

The proposed project will maintain present stream habitat.

There are no wilderness areas in the watershed.

No significant adverse environmental impacts will result from installation of the proposed project.

Alternatives

Various levels of land treatment measures were combined with different dam combinations to arrive at alternative plans. The recommended plan was selected by watershed Sponsors as the plan that would best accomplish the study goals.

Consultation—Public Participation

Scoping of the project was initiated at a public meeting held in Macon, Missouri on September 12, 1984. Public as well as federal, state and local agencies concerns were recognized. Several resource conservation and development concerns were acknowledged.

Public meetings, field tours and neighborhood meetings were held throughout the planning process to obtain input, discuss project alternatives, and inform the general

---

public and federal and state agencies

findings, Mr. Rollin N. Swank, State

Competitiveness Act of 1988 (15 U.S.C.

---

with the Government of India with

Harmonized Tariff Schedule of the

man-made fiber shorts. These trousers

public and federal and state agencies about the project.

Specific consultation was conducted with the U.S. Fish and Wildlife Service concerning threatened and endangered species, with the State Historical Preservation Officer concerning archeological and historic resources, and with the Missouri Department of Conservation and U.S. Fish and Wildlife Service biologists concerning project effects on wildlife habitat.

Agency consultation and public participation to date has shown no unresolved conflicts with the implementation of the selected plan.

Conclusion

The Environmental Assessment summarized above indicates that this federal action will not cause significant local, regional, or national impacts on the environment. Therefore, based on the above findings I have determined that an environmental impact statement for the Middle Fork of Salt River Watershed Plan is not required.

Dated: August 17, 1989.

Russell C. Mills,

State Conservationist.

[FR Doc. 89–21141 Filed 9–7–89; 8:45 am]

BILLING CODE 3410-16-M

Bullskin and Long Marsh Runs Critical Area Treatment and Land Drainage RC&D Measure Plan, West Virginia

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR part 1500); and the Soil Conservation Service Guidelines (7 CFR part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Bullskin and Long Marsh Runs Critical Area Treatment RC&D Measure, Eastern Panhandle Soil Conservation District, Jefferson County, West Virginia.

FOR FURTHER INFORMATION CONTACT: Rollin N. Swank, State Conservationist, Soil Conservation Service, 75 High Street, Morgantown, West Virginia 26505, telephone 304–291–4151.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Rollin N. Swank, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The purpose of the measure is critical area treatment and land drainage. The measure is designed to stabilize critically eroding streambank areas along Bullskin and Long Marsh runs through the installation of livestock exclusion fencing, alternative water facilities and seeding of filter strips adjacent to cropland areas.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Rollin N. Swank, State Conservationist.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

"(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.901—Resource Conservation and Development—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials.)"

Dated: July 31, 1989.

Rollin N. Swank,

State Conservationist.

DEPARTMENT OF COMMERCE

Office of the Under Secretary for Economic Affairs

Technical Details of National Trade Data Bank: Open Meetings

AGENCY: Office of the Under Secretary for Economic Affairs, Commerce.

ACTION: Notice of meetings.

SUMMARY: Two meetings will be held on certain technical aspects of the National Trade Data Bank (NTDB).

DATES: September 27, 1989 and September 29, 1989, 10:00 a.m.

ADDRESS: Room 1414 HCH Bldg. on September 27, 1989 and Room 4830 HCH Bldg. on September 29, 1989.

FOR FURTHER INFORMATION CONTACT: John E. Cremeans, 377–1405.

SUPPLEMENTARY INFORMATION: Pursuant to Section 5404, of Part I of Subtitle E, of Title V of the Omnibus Trade and Competitiveness Act of 1988 (15 U.S.C. 4901–4913), the Commerce Department will hold meetings on certain technical aspects of the design of the NTDB. The September 27, 1989 meeting will concern technical details and specifications of the magnetic tape and telecommunication transmission for the "standard" and "premium" services as described in **Federal Register** notice, Docket No. 90517–9117, Vol. 54, No. 159, p. 34204, August 18, 1989. The September 29, 1989 meeting will cover record layouts, indexes, and search concepts for the Compact Disk-Read Only Memory (CD–ROM) to be issued under the standard service. The meetings are intended for technical experts on these two aspects of the NTDB.

Dated: August 31, 1989.

SUPPLEMENTARY INFORMATION:

Authority. Executive Order 11651 of March 3, 1972, as amended; Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

On July 31, 1989, under the terms of the current bilateral textile agreement between the Governments of the United States and India, the Government of the United States requested consultations

with the Government of India with respect to imports in Categories 647/648 (man-made fiber trousers, breeches and shorts).

The purpose of this notice is to advise that, pending agreement on a mutually satisfactory solution concerning these categries, the Government of the United States has decided to control imports during the ninety-day consultation period which began on July 31, 1989 and extends through October 28, 1989.

If no solution is agreed upon in consultations between the two governments, CITA, pursuant to the agreement, may establish a prorated specific limit of 150,625 dozen for Categories 647/648 for the period July 31, 1989 through December 31, 1989.

A summary market statement concerning Categories 647/648 follows this notice.

Anyone wishing to comment or provide data or information regarding the treatment of Categories 647/648 under the agreement with India, or on any other aspect thereof, or to comment on domestic production or availability of products included in Categories 647/648, is invited to submit 10 copies of such comments or information to Auggie D. Tantillo, Chairman, Committee for the Implementation of Textile Agreements, U.S. Department of Commerce, Washington, DC 20230.

Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room H3100, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Further comments may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

The United States remains committed to finding a solution concerning these categories. Should such a solution be reached in consultations with the Government of India, further notice will be published in the **Federal Register.**

A description of the textile and apparel categories in terms of HTS numbers is available in the Correlation: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 53 FR 44937, published on November 7, 1988).

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

India—Market Statement

Man-Made Fiber Trousers, Slacks and Shorts (Category 647/648)

July 1989.

Summary and Conclusions.

U.S. imports of man-made fiber trousers, slacks and shorts (Category 647/648) from India reached 309,113 dozen during the year ending April 1989, a 67 percent increase over the 184,799 dozen imported a year earlier. Imports of man-made fiber trousers, slacks and shorts from India for the first four months of 1989 were 173,498 dozen, two and a half times the 69,794 dozen imported during the same period in 1988.

The sharp and substantial increase in Category 647/648 imports from India is disrupting the U.S. market for man-made fiber trousers, slacks and shorts.

U.S. Production and Market Share

U.S. production of man-made fiber trousers, slacks and shorts (Category 647/648) remained relatively flat from 1982 to 1986, averaging 40,901,000 dozen per year. U.S. production has been declining since 1986. Production fell to 32,599,000 dozen in 1988, 12 percent below the 1987 level and 20 percent below the 1982–86 average level. The domestic manufacturers share of the U.S. market dropped 15 percentage points in just six years, falling from 76 percent in 1982 to 61 percent in 1988.

U.S. Imports and Import Penetration

U.S. imports of man-made fiber trousers, slacks and shorts (Category 647/648) increased 58 percent from 13,163,000 dozen in 1982 to 20,766,000 in 1988. Imports during the year ending April 1989 reached 22,119,000 dozen, 15 percent above the 19,227,000 dozen imported during the same period a year earlier. Imports are up 19 percent in the first four months of 1989 over the same period in 1988. The ratio of imports to domestic production doubled during the past six years, rising from 32 percent in 1982 to 64 percent in 1988.

Duty-Paid Value and U.S. Producers' Price

Approximately 81 percent of Category 647/648 imports from India during the first four months of 1989 entered under HTSUSA numbers 6204.69.2510—women's woven man-made fiber trousers; 6204.69.2540—women's woven man-made fiber shorts. These trousers and shorts entered, the U.S. at landed duty-paid values below U.S. producers' prices for comparable garments.

Committee for the Implementation of Textile Agreements

September 5, 1989.

Commissioner of Customs

Department of the Treasury

Washington, D.C. 20229

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further amended on July 31, 1986; pursuant to the Bilateral Cotton, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Agreement of February 6, 1987, as amended, between the Governments of the United States and India; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on September 12, 1989, entry into the United States for consumption and withdrawal from warehouse for consumption of man-made fiber textile products in Categories 647/648, produced or manufactured in India and exported during the ninety-day period which began on July 31, 1989 and extends through October 28, 1989, in excess of 106,182 dozen.

Textile products in Categories 647 and 648 which have been exported to the United States on and after January 1, 1989 shall remain subject to the Group II limit established for the period January 1, 1989 through December 31, 1989.

Textile products in Categories 647 and 648 which have been exported to the United States prior to July 31, 1989 shall not be subject to the ninety-day limit established in this directive.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List; 1989 Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Addition to Procurement List.

SUMMARY: This action adds to Procurement List 1989 a commodity to be produced by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: October 10, 1989.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557-1145.

SUPPLEMENTARY INFORMATION: On March 24, 1989, the Committee for Purchase from the Blind and Other Severely Handicapped published notice (54 FR 12261) of proposed addition to Procurement List 1989, which was published on November 15, 1988 (53 FR 46018).

After consideration of the material presented to it concerning capability of qualified workshops to produce the commodity at a fair market price and impact of the addition on the current or most recent contractors, the Committee has determined that the commodity listed below is suitable for procurement by the Federal Government under 41 U.S.C. 46-48c and 41 CFR 51-2.6.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

a. The action will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The action will not have a serious economic impact on any contractors for the commodity listed.

c. The action will result in authorizing small entities to produce the commodity procured by the Government.

Accordingly, the following commodity is hereby added to Procurement List 1989:

Handkerchief, Man's
8440-01-288-2178

Beverly L. Milkman,
Executive Director.

BILLING CODE 6820-33-M

Procurement List; 1989 Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Additions to Procurement List.

SUMMARY: The Committee has received proposals to add to Procurement List 1989 services to be provided by workshops for the blind or other severely handicapped.

Comments Must Be Received on or Before: October 10, 1989.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51-2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the services listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following services to Procurement List 1989, which was published on November 15, 1988 (53 FR 46018):

Grounds Maintenance, Camp Bonneville, Camp Bonneville, Washington
Janitorial/Custodial, Naval Air Facility, El Centro, California
Janitorial/Custodial, U.S. Army Reserve Center, 2100 Quaker Point Road, Quakertown, Pennsylvania
Mailroom Operation, U.S. Corps of Engineers, Estes Kefauver Building, U.S. Courthouse Annex and Adjacent Buildings, Nashville, Tennessee
Operation of Postal Service Center, Dover Air Force Base, Delaware
Package Reclamation, Ogden Air Logistics Center, Hill Air Force Base, Utah.

Beverly L. Milkman,
Executive Director.

BILLING CODE 6820-33-M

COMMODITY FUTURES TRADING COMMISSION

Amex Commodities Corporation Proposed Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of availability of the terms and conditions of proposed commodity futures contract.

SUMMARY: The Amex Commodities Corporation ("ACC") has applied for designation as a contract market in futures on two-year U.S. Treasury notes. The Director of the Division of Economic Analysis ("Division") of the Commisson, acting pursuant to the authority delegated by Commission Regulation 140.96, has determined that publication of the proposal for comment is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments must be received on or before October 10, 1989.

ADDRESS: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Reference should be made to the ACC's two-year U.S. Treasury note futures contract.

FOR FURTHER INFORMATION CONTACT: Stephen Sherrod, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581, (202) 254-7227.

SUPPLEMENTARY INFORMATION: Copies of the terms and conditions of the proposed futures contract will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Copies of the terms and conditions can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254-6314.

Other materials submitted by the ACC in support of the application for contract market designation may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR part 145 (1987)), except to the extent they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9. Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Acts Compliance Staff of the Office of the Secretariat at

the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views or argument on the terms and condition of the proposed futures contract, or with respect to other materials submitted by the ACC in support of the application, should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581, by the specified date.

Issued in Washington, DC, on August 31, 1989.

Steven Manaster,
Director, Division of Economic Analysis.

[FR Doc. 89-21084 Filed 9-7-89; 8:45 am]

BILLING CODE 6351-01-M

Chicago Mercantile Exchange Proposed Option Contracts

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of availability of the terms and conditions of proposed commodity option contracts.

SUMMARY: The Chicago Mercantile Exchange ("CME" or "Exchange") has applied for designation as a contract market in (1) options on Japanese yen Euro-rate differential ("DIFF") futures, (2) options on British pound sterling DIFF futures and (3) options on West German deutsche market DIFF futures. For each of the proposed futures option contracts, the applications also contain petitions for exemptions from the volume requirement for the underlying futures contract specified in the Commission's rules. The Director of the Division of Economic Analysis ("Division") of the Commission, acting pursuant to the authority delegated by Commission Regulation 140.96, has determined that publication of the proposals for comment is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments must be received on or before October 10, 1989.

ADDRESS: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Reference should be made to the CME Japanese yen DIFF option, the CME pound sterling DIFF option or the CME deutsche mark DIFF option.

FOR FURTHER INFORMATION CONTACT: Stephen Sherrod, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581, (202) 254-7227.

SUPPLEMENTARY INFORMATION: In addition to requesting comment on the terms and conditions of the proposed option contracts, the Division also is requesting comment on the merits of petitions filed by the CME pursuant to § 33.11 of the Commission's rules. The petitions request exemptive relief from the trading volume tests set forth in the Commission's rules. In that regard, § 33.4(a)(5)(iii) of the Commission's rules requires, as a condition of designation for proposed options on futures contracts, that the exchange demonstrate that:

> * * * the volume of trading in all contract months for futures delivery of the commodity for which the option designation is sought has averaged at least 3,000 contracts per week on such board of trade for the 12 months preceding the date of application for option contract market designation, or alternatively, that such futures contract market, based on its trading history, substantially meets this total volume requirement in less than the 12 months preceding the date of application. * * *

The Division notes that the CME DIFF futures contracts which will underlie the proposed option contracts have only been trading since July 6, 1989. The futures trading volume requirement for each of the proposed option contracts has not been met.

As discussed in more detail in previous **Federal Register** notices (see, for example, 52 FR 41755, October 30, 1987), the Commission has stated that it believes that, at the minimum, a petition for exemption from the trading volume tests may be granted only if the underlying cash market for the commodity exhibits a high level of liquidity. Cash market liquidity would be evidenced by extensive and frequent trading activity, a large number of participants in the market, and tight bid/ask spreads. Further, the terms of the futures contract should ensure the opportunity for arbitrage and close alignment between the cash and futures market. In combination, the liquidity of the underlying cash market and the opportunities for arbitrage are major factors in determining the extent to which a less liquid futures contract could be disrupted by the exercise of options and the alternatives available to those exercising the options. In addition, to enable position holders to evaluate accurately the value of their option positions in the absence of active trading in the underlying futures contract, the Commission stated its belief that there should exist an accurate and widely available price series which would be representative of values of the commodity underlying the future.[1]

In requesting comment on the CME's proposed options on DIFF futures, the Division is seeking specific comment on whether it should grant the CME's requests for exemptions from the requirements of § 33.4(a)(5)(iii) for the proposed contracts. Commenters are requested to consider the issues noted above. Also, commenters are requested to address whether, if the petitions were granted, additional surveillance activities and expiration reviews, particularly at the outset of trading, should be implemented by the CME for the proposed contracts.

Copies of the terms and conditions of the proposed contracts will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Copies of the terms and conditions can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254-6314.

Other materials submitted by the CME in support of the applications for contract market designation may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145 (1987)), except to the extent they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9. Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Acts Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views or argument on the terms and condition of the proposed option contracts, or with respect to other materials submitted by the CME in support of the applications, should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW.,

---

[1] The Division notes that in those cases where the underlying futures contract fails to develop a sufficient level of trading volume, the option on the futures contract would become subject to the delisting criteria set forth in § 5.4 of the Commission's rules. Specifically, if the volume in the underlying futures contract market falls below an average weekly volume of 1,000 contracts for all months listed for the six-month period following designation of the option contract, no new option contract months may be listed until the volume in the underlying futures contract rises above an average of 2,000 contracts per week for all trading months listed for a period of three consecutive months.

Washington, DC 20581, by the specified date.

Issued in Washington, DC, on August 31, 1989.

Steven Manaster,

Director, Division of Economic Analysis.

BILLING CODE 6351-01-M

Chicago Mercantile Exchange; Proposed Amendments Relating to the Live Cattle and Live Hog Futures and Option Contracts

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of proposed contract market rule changes.

SUMMARY: The Chicago Mercantile Exchange ("CME" or "Exchange") has submitted a proposal to amend a number of the terms and conditions of the Exchange's live cattle and live hog futures and option contracts relating to termination of trading in live cattle and live hog futures and options, delivery days for live cattle and live hog futures, tendering of delivery certificates for live cattle futures, and position limits for live cattle and live hog futures.

In accordance with Section 5a(12) of the Commodity Exchange Act and acting pursuant to the authority delegated by Commission Regulation 140.96, the Director of the Division of Economic Analysis ("Division") of the Commodity Futures Trading Commission ("Commission") has determined, on behalf of the Commission, that these proposals are of major economic significance. On behalf of the Commission, the Division is requesting comment on these proposals.

DATE: Comments must be received on or before October 10, 1989.

ADDRESS: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Reference should be made to the amendments to the CME live cattle and live hog futures and option contracts.

FOR FURTHER INFORMATION CONTRACT: Fred Linse, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581 (202) 254–7303.

SUPPLEMENTARY INFORMATION: The Exchange submitted proposed amendments to the live cattle and live hog futures and option contracts that would:

(1) Move the last option trading day to the first Friday of the underlying futures delivery month. Under current contract specifications, the last option trading day is the last Friday that is more than three business days prior to the first business day of the contract month. As a result, option expiration currently occurs from approximately one to two weeks prior to the delivery month for the underlying futures contract.

(2) The first day futures delivery notices may be tendered will become the first business day after an option contract terminates trading. Currently, the live cattle futures contract specifies that delivery notices (certificates) may be tendered commencing with the third business day prior to the first business day of the expiring contract month. The live hog futures contract provides that delivery notices may be tendered beginning on the business day preceding the first business day of the expiring month. The first business day of an expiring contract month currently is the first delivery day of such months. Under the proposed amendments, the first delivery day of an expiring contract month for live cattle and live hog futures would be four business days and two business days, respectively, after the first Friday of that month.

(3) The last futures trading day will be moved to the business day that immediately precedes the last five business days of the contract month, so long as there are at least four delivery days following futures expiration for live cattle and at least three delivery days following futures expiration for live hogs. Currently, trading in the live cattle and live hog futures contracts ends on the 20th calendar day of the delivery month. If the 20th calendar day of the delivery month is not a business day, then trading ends on the business day preceding that day. As a result, under the proposed amendments, there will be a reduction of between zero and four days in the number of delivery days after the last trading day for both live cattle and live hogs.

(4) For live cattle futures, a certificate of delivery tendered on or after the last futures trading day will be changed from a three-day certificate to a one-day certificate. This change will allow two additional days on which delivery notices may be tendered before the end of the contract month. The proposed amendments do not contain provisions for the retender, reclaim or the issuance of demand notices for such one-day certificates of delivery.

(5) The time when the futures spot month speculative position limits of 300 contracts become effective will be moved to the close of business on the first business day after the revised option expiration date (see Item 1 above). Currently, the spot month speculative limits for the live cattle and hog futures contracts become effective at the close of business on the business day preceding the first business day of the delivery month. As amended, the contracts would allow one business day for anyone exercising an option or being exercised against on the option expiration day to liquidate any resulting futures positions over and above the spot-month speculative limits for the live cattle and live hog futures.

The CME indicates that the proposal to move the last option trading day to the first Friday of the contract month will improve the hedging effectiveness and basis predictability of both live cattle options and live hog options by causing option expiration to occur closer to the time of price convergence between the cash market and the underlying futures. The Exchange notes that the changes would benefit hog and cattle producers by allowing them to maintain option hedges through the release of the "USDA Hogs and Pigs" reports and the USDA "Cattle on Feed" reports.

Concerning the proposed amendments to the tender of certificate provision (Item 2), the CME indicates that this change would prevent the delivery process from starting before option trading ends, protecting option users who want to maintain their option positions through expiratin but do not want to participate in the futures delivery process. The Exchange notes that, under the proposed amendments, the option user would not automatically be forced into the futures delivery process and can easily avoid participating in futures delivery without negatively affecting other marketing objectives. Moreover, the proposed change would enable anyone exercising an option (or being exercised against) on or near the expiration date to more easily participate in the delivery process, if that is their objective, by reducing the time between option expiration and the start of the futures delivery period.

Regarding the last trading day proposal for live cattle and live hog futures, the Exchange states that by causing the last trading day to occur later in the month, there will be a reduction of between zero and four days in the number of delivery days after the last trading day for both live cattle and live hogs. The CME submits that this change will still allow sufficient time to settle all deliveries by the end of the contract month.

Changing the last trading day for futures also will partially offset the loss in delivery days before the last trading day that results from changing the first tender day for delivery notices in expiring contract months (see Item 2 above). In this respect, the CME notes that the proposed changes to the first tender day and the last trading day for the live cattle and hog futures contracts will genetally reduce the number of delivery days prior to the last trading day. These reductions range from zero to eight delivery days for live cattle and from zero to five delivery days for live hogs. The CME notes, however, that in all cases the total number of delivery days available in a delivery month will decline, with between four and eight fewer delivery days available during live cattle futures delivery months and between one and five fewer delivery days available during a live hog futures delivery month.

The time when the spot month speculative position limits become effective will continue to occur after the options expire. This would allow one business day for anyone exercising an option (or being exercised against) on the expiration day to liquidate any resulting futures positions over and above the spot month speculative limit.

The Exchange proposes to make the proposed amendments effective upon receipt of Commission approval. The CME intends to apply the proposed amendments only to newly listed contract months.

The Commission is seeking comment on the proposed amendments noted above. In particular, the Commission is requesting comment on the impact, if any, upon deliverable supplies for the live cattle and live hog futures contracts as a consequence of the reduced number of delivery days provided for under the CME's proposals. In addition, the Commission also is requesting comment regarding any potential effect on the proposed reduction in the number of delivery days would have on the ability to process deliveries at the delivery points.

Copies of the proposed amendments will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Copies of the amended terms and conditions can be obtained through the Office of Secretariat by mail at the above address or by phone at (202) 254–6314.

The material submitted by the Exchange in support of the proposed amendments may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR part 145 (1987)). Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Acts Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8

Any person interested in submitting written data, views or arguments on the proposed amendments should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581, by the specified date.

Issued in Washington, DC, on August 31, 1989.

Steven Manaster,

Director, Division of Economic Analysis.

BILLING CODE 6351-01-M

CONSUMER PRODUCT SAFETY COMMISSION

Notification of Request for Extension of Approval of Information Collection Requirements—Children's Sleepwear Flammability Standards

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), the Consumer Product Safety Commission has submitted to the Office of Management and Budget a request for extension of approval through August 31, 1992, of information collection requirements in the flammability standards for children's sleepwear and enforcement rules, codified at 16 CFR parts 1615 and 1616. These standards and enforcement rules are applicable to children's sleepwear garments in sizes 0 through 14, and fabrics used in the production of such garments. The standards and enforcement rules require manufacturers and importers of children's sleepwear garments and fabrics to perform periodic testing of representative samples to assure that children's sleepwear items meet the performance requirements of the standards. The enforcement rules also require manufacturers and importers to compile and maintain records of the testing required by the standards, and to make those records available to Commission investigators upon request.

Additional Details About the Request for Extension of Approval of Information Collection Requirements

Agency address: Consumer Product Safety Commission, Washington, DC 20207.

Title of information collection: Standard for the Flammability of Children's Sleepwear: Sizes 0 Through 6X (16 CFR Part 1615); and Standard for the Flammability of Children's Sleepwear: Sizes 7 Through 14 (16 CFR Part 1616).

Type of request: Extension of approval.

Frequency of collection: Varies depending upon the number of styles of items produced or imported and by number of items of each style manufactured or produced each year.

General description of respondents: Manufacturers and importers of children's sleepwear garments and fabrics used for production of children's sleepwear.

Estimated number of respondents: 200.

Estimated average number of hours per respondent: 437.5 per year.

Estimated number of hours for all respondents: 87,500 per year.

Comments: Comments on this request for extension of approval of information collection requirements should be addressed to Pamela Barr, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503; telephone: (202) 395–7340. Copies of the request for extension of information collection requirements are available from Francine Shacter, Office of Planning and Evaluation, Consumer Product Safety Commission, Washington, DC 20207; telephone: (301) 492–6416.

This is not a proposal to which 44 U.S.C. 3504(h) is applicable.

Dated: September 5, 1989.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

[FR Doc. 89–21181 Filed 9–7–89; 8:45 am]

BILLING CODE 6355-01-M

Notification of Request for Extension of Approval of Information Collection Requirements— Mattress Flammability Standard

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), the Consumer Product Safety Commission has submitted to the Office of Management and Budget a request for extension of approval through August 31, 1992, of information collection requirements in the flammability

BEST COPY AVAILABLE

standard for mattresses and mattress pads (16 CFR Part 1632). The standard is intended to reduce unreasonable risks of burn injuries and deaths from fires associated with mattresses and mattress pads. The standard prescribes a test to assure that a mattress or mattress pad will resist ignition from a smoldering cigarette. The standard requires manufacturers to perform prototype tests of each combination of materials and construction methods used to produce mattresses or mattress pads with acceptable results. Sale or distribution of mattresses or mattress pads without successful completion of the testing required by the standard violates section 3 of the Flammable Fabrics Act (15 U.S.C. 1192). An enforcement rule implementing the standard requires manufacturers to maintain records of testing performed in accordance with the standard and other information about the mattresses or mattress pads which they produce.

Additional Details About the Request for Extension of Approval of Information Collection Requirements

Agency address: Consumer Product Safety Commission, Washington, DC 20207.

Title of information collection: Standard for the Flammability of Mattresses and Mattress Pads (FF 4–74, Amended); 16 CFR part 1632.

Type of request: Extension of approval.

Frequency of collection: Varies depending upon the number of individual combinations of materials and methods of construction used to produce mattresses or mattress pads.

General description of respondents: Manufacturers and importers of mattresses and mattress pads.

Estimated number of respondents: 800.

Estimated average number of hours per respondent: 26 per year.

Estimated number of hours for all respondents: 2,080 per year.

Comments: Comments on this request for extension of approval of information collection requirements should be addressed to Pamela Barr, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503; telephone: (202) 395–7340. Copies of the request for extension of information collection requirements are available from Francine Shacter, Office of Planning and Evaluation, Consumer Product Safety Commission, Washington, DC 20207; telephone: (301) 492–6416.

This is not a proposal to which 44 U.S.C. 3504(h) is applicable.

Dated: September 5, 1989.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

DEPARTMENT OF DEFENSE

Department of the Army

Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. Law 92–463), announcement is made of the following Committee Meeting:

Name of the committee: Army Science Board (ASB)

Dates of meeting: 11–12 October 1989

Time: 0800–1700 hours each day

Place: The Pentagon, Washington, DC

Agenda: The Army Science Board Ad Hoc Subgroup on Ballistic Missile Defense (Follow-On) will meet for classified briefings and discussions reviewing matters that are an integral part of or related to the issue of the study effort. Some of the session will be a continuation of the BM/C3 studies as well as briefings from industry. This meeting will be closed to the public in accordance with section 552b(c) of title 5, U.S.C., specifically subparagraph (1) thereof, and title 5, U.S.C., Appendix 2, subsection 10(d). The classified and unclassified matters and proprietary information to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695–3039/7046.

Sally A. Warner,

Administrative Officer, Army Science Board.

BILLING CODE 3710-08-M

Defense Contract Audit Agency

Privacy Act of 1974; New Record System Notice

AGENCY: Defense Contract Audit Agency (DCAA), Department of Defense (DoD).

ACTION: Notice of a new system of records for public comment.

SUMMARY: The Defense Contract Audit Agency of the Department of Defense proposes to add a new system of records to its inventory of record systems subject to the Privacy Act of 1974, as amended (5 U.S.C. 552a). The record system notice for the new system is set forth below.

DATE: The proposed action will be effective without further notice on October 10, 1989, unless comments are received which would result in a contrary determination.

ADDRESS: Send any comments to Mr. Dave Henshall, ATTN: CMR, Defense Contract Audit Agency, Cameron Station, Alexandria, VA 22304–6178.

FOR FURTHER INFORMATION CONTACT: Mr. Dave Henshall, telephone: (202) 274–4400.

SUPPLEMENTARY INFORMATION: The Defense Contract Audit Agency systems of records notices subject to the Privacy Act of 1974, as amended, (5 U.S.C. 552a), have been published in the **Federal Register** as follows:

50 FR 22884, May 29, 1985 (DoD Compilation, changes follow)
51 FR 18017, May 16, 1986

A new system report, as required by 5 U.S.C. 552a(r) of the Privacy Act was submitted on August 29, 1989, to the Committee on Government Operations of the House of Representatives, the Committee on Governmental Affairs of the Senate, and the Office of Management and Budget (OMB), pursuant to paragraph 4b of Appendix I of OMB Circular No. A–130, "Federal Agency Responsibilities for Maintaining Records about Individuals", dated December 12, 1985 (50 FR 52730, December 24, 1985).

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

September 1, 1989.

RDCAA 211.11

SYSTEM NAME:

DCAA Drug-Free Federal Workplace Records.

SYSTEM LOCATION:

Primary location: Headquarters, Defense Contract Audit Agency, Personnel and Security Division, Building 4, Room 4B319, Cameron Station, Alexandria, VA 22304–6178.

Decentralized locations: DCAA regional offices; and offices of contractors who perform functions such as collection of urine specimens, laboratory analysis, and medical review of confirmed positive laboratory findings. The addresses for these locations may be obtained from the system manager.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

DCAA Federal employees and individuals who have applied to DCAA for employment.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records relating to program implementation; administration (selection, notification, testing of individuals in testing designated positions, and employee assistance); inter-service/agency support agreements (specimen collection, laboratory testing, and medical review services); training requirements; and policy guidance.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 7301; Pub. L. 100–71; and Executive Orders 12564, "Drug-Free Federal Workplace" and 9397.

PURPOSE(S):

The system is used to maintain Drug Program Coordinator records relating to the selection, notification and testing of DCAA Federal employees, and applicants for Federal employment, for use of illegal drugs.

The records are also used by the employee's Medical Review Official; the administrator of any Employee Assistance Program in which the employee is receiving counseling or treatment or is otherwise participating; and supervisory or management officials within the employee's agency having authority to take adverse personnel action against such employee.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

In order to comply with the provisions of 5 U.S.C. § 7301, the DCAA "Blanket Routine Uses" do not apply to this system of records.

To a court of competent jurisdiction where required by the United States Government to defend against any challenge against any adverse personnel action.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records are maintained in file folders. Records are also maintained in automated data systems and electronically secured files.

RETRIEVABILITY:

Records are retrieved by organizational levels, name of employee and/or applicant, Social Security Number, office symbol, occupational series and grade levels, or any other combination of these identifiers.

SAFEGUARDS:

Paper records are stored in locked file cabinets, and secured working environments. Automated records are protected by restricted access procedures. Access to records is strictly limited to authorized officials with a bona fide need for the records.

RETENTION AND DISPOSAL:

Records are retained for two years and then destroyed by shredding, burning, or erasure in the case of magnetic media.

SYSTEM MANAGER(S) AND ADDRESS:

Drug Program Coordinator, Personnel and Security Division, Headquarters, Defense Contract Audit Agency, Cameron Station, Alexandria, VA 22304–6178.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the Drug Program Coordinator, Personnel and Security Division, Headquarters, Defense Contract Audit Agency, Cameron Station, Alexandria, VA 22304–6178. Individuals must furnish the following information for records to be located and identified: Name; Date of birth; Social Security Number; Identification number (if known); Approximate date of record; and Geographic area in which consideration was requested.

RECORD ACCESS PROCEDURE:

Individuals seeking access to records about themselves contained in this system of records should address written inquiries to the Drug Program Coordinator, Personnel and Security Division, Headquarters, Defense Contract Audit Agency, Cameron Station, Alexandria, VA 22304–6178. Individuals must furnish the following information for records to be located and identified: Name; Date of birth; Social Security Number; Identification number (if known); Approximate date of record; and Geographic area in which consideration was requested.

CONTESTING RECORD PROCEDURE:

The Defense Contract Audit Agency rules for accessing records, for contesting contents, and appealing initial determinations by the individual concerned are published in DCAA Instruction Number 5410.10, "DCAA Privacy Act Program"; 32 CFR Part 290a; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Records are obtained from the individual to whom the record pertains, Agency employees involved in the selection and notification of individuals to be tested, laboratories that test urine specimens for the presence of illegal drugs, and supervisors, managers and other agency officials.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

National Institute on Disability and Rehabilitation Research Invitation for Applications for New Awards Under Certain Programs for Fiscal Year 1990 and Amendment of Notice

Purpose of Program: A consolidated application package (CAP) for several programs sponsored by the National Institute on Disability and Rehabilitation Research (NIDRR) was published in the **Federal Register** at 54 FR 27570 on June 29, 1989. The CAP announced closing dates and other information for priorities that were published in the **Federal Register** on April 25, 1989 at 54 FR 17896. The

---

purpose of this notice is to add two

Transportation Systems for Disabled

year 1990. The project period for the

1000 Independence Avenue, SW.,

with the Commission and are available

Hamilton contends that CCAE's latter

purpose of this notice is to add two additional competitions and to extend the project period for the Special Projects for Spinal Cord Injury. Because satisfactory applications were not received in fiscal year 1989 for the proposed Rehabilitation Engineering Center in Personal Licensed Transportation Systems for Disabled Persons and the Research and Demonstration project on Vocational Aspects of Low Back Pain Rehabilitation, and because there is a continuing need for research into these problems, NIDRR is requesting applications in these areas for fiscal year 1990. The project period for the Special Projects for Spinal Cord Injury is increased to 60 months. Applicants should use the application forms included in the CAP and refer to the notice of final funding priorities.

AMENDMENTS TO PROGRAM APPLICATION NOTICES FOR FISCAL YEAR

CFDA No.	Program Title	Funding Priority	Deadline for Transmittal of Applications	Estimated No. of Awards	Estimated Average Size of Award (Per Year)	Project Period (Months)
84.133A	Research and Demonstration	Vocational Aspects of Low Back Pain Rehabilitation.	12-18-89	1	$175,000	36
84.133E	Rehabilitation Engineering Centers	Personal Licensed Transportation For Disabled Persons.	12-08-89	1	500,000	60
84.133N	Spinal Cord Injury Model Demonstration	Does Not Apply	4-02-90	13	384,000	60

Note: The Department of Education is not bound by any estimates in this notice, except as otherwise provided by statute.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Delegation of Reporting Function

AGENCY: Department of Energy.

ACTION: Notice.

SUMMARY: Notice is hereby given that the President has delegated to the Secretary of Energy the authority to transmit to the Congress energy targets and reports regarding such energy targets, as required by section 301 of Public Law 96-294, (42 U.S.C. 7361). This delegation of authority does not affect normal inter-agency review and concurrence procedures.

FOR FURTHER INFORMATION CONTACT: George A. Doumani, Director, Office of Technology Policy (PE-10), Office of Policy, Planning and Analysis, U.S. Department of Energy, Washington, DC 20585; telephone (202) 586-5388, (FTS) 896-5388.

SUPPLEMENTARY INFORMATION: Title III of Public Law 96-294, Energy Targets, requires that in February of every odd-numbered year the President shall transmit to Congress "* * * energy targets for net imports, domestic production, and end-use consumption of energy for the calendar years 1985, 1990, 1995, and 2000." Title III also requires that in February of every even-numbered year "the President shall transmit to the Congress reports regarding the energy targets transmitted during the preceding year." On May 25, 1989, the President delegated to the Secretary of Energy the authority to transmit to the Congress energy targets and the reports regarding the energy targets, and required that the memorandum delegating this authority be published in the **Federal Register**. Therefore the text of the Memorandum from the President to the Secretary of Energy is set forth below.

Issued in Washington, DC, on July 18, 1989.

Linda G. Stuntz,

Deputy Under Secretary, Policy, Planning and Analysis.

Office of Energy Research

High Energy Physics Advisory Panel; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: High Energy Physics Advisory Panel (HEPAP).

Date and time: Thursday, October 5, 1989, 8:30 a.m.-5:00 p.m.; Friday, October 6, 1989, 8:30 a.m.-3:00 p.m.

Place: Omni Melrose Hotel, 3015 Oak Lawn Avenue, Dallas, Texas 75219.

Contact: Dr. Enloe T. Ritter, Executive Secretary, High Energy Physics Advisory Panel, U.S. Department of Energy, ER-221, GTN, Washington, DC 20545, Telephone: (301) 353-4829.

Purpose of panel: To provide advice and guidance on a continuing basis with respect to the high energy physics research program.

Tentative agenda:

Thursday, October 5, 1989 and Friday, October 6, 1989

—Discussion of National Science Foundation Elementary Particle Physics Programs
—Discussion of Department of Energy High Energy Physics Programs
—Discussion of Department of Energy Superconducting Super Collider (SSC) Programs
—Update on Stanford Linear Collider
—Report on LEP (Large Electron Positron) collider
—Discussion of the concept of regional detector centers
—Overview of SSC Laboratory Programs
—Reports on and discussions of topics of general interest in high energy physics
—Public Comment

Public participation: The meeting is open to the public. The Chairperson of the Panel is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to make oral statements pertaining to agenda items should contact the Executive Secretary at the address or telephone number listed above. Requests must be received at least 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda.

Minutes: Available for public review and copying at the Public Reading Room, Room 1E-190, Forrestal Building,

1000 Independence Avenue, SW., Washington, DC between 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on September 5, 1989.

J. Robert Franklin,

Deputy Advisory Committee, Management Officer.

Federal Energy Regulatory Commission

[Docket No. QF83-318-000]

NeKoosa Papers Inc.; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

August 30, 1989.

On August 17, 1989, NeKoosa Papers Inc. (Applicant), of 100 Wisconsin River Drive, Port Edwards, Wisconsin 54469 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located in Ashdown, Arkansas. The facility will consist of two (2) recovery boilers and two (2) steam turbine generators. The electric power production capacity will be 65 megawatts. The primary energy source will be black liquor. The facility will use natural gas for start-ups and shut-downs, however, such fossil fuel usage will not exceed 1.6% of the total fuel input during any calendar year period.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Project No. 10601-000 Alabama]

Pea River Associates, Inc.; Availability of Environmental Assessment

September 1, 1989.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for exemption from licensing for the proposed Elba Hydroelectric Project located on the Pea River in Coffee County, near Elba, Alabama, and has prepared an Environmental Assessment (EA) for the proposed project. In the EA, the Commission's staff has analyzed the potential environmental impacts of the proposed project and has concluded that approval of the proposed project, with appropriate measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, Room 1000, of the Commission's offices at 825 North Capitol Street, NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. EL89-45-000]

City of Hamilton, Ohio v. Cincinnati Gas & Electric Co.; Filing

August 30, 1989.

Take notice that on August 21, 1989, the City of Hamilton, Ohio (Hamilton) filed an "Emergency Complaint," pursuant to Section 306 of the Federal Power Act (FPA), 16 U.S.C. 825e, and 18 CFR 385.206, against Cincinnati Gas & Electric Company (CG&E) seeking expedited Commission consideration of alleged violations of the FPA, 16 U.S.C. 824d, and the Commission's implementing regulations, 18 CFR part 35.

Hamilton alleges that by letter dated August 9 and received on August 15, 1989, CG&E has stated that CG&E is unilaterally altering scheduling practices for jurisdictional transmission service. Hamilton contends that CG&E's latter unilaterally changing scheduling practices violates Sections 205(c) and 205(d) of the FPA. Hamilton further alleges that absent an immediate Commission order requiring CG&E to cease and desist such changes, Hamilton will, beginning on September 1, 1989, experience severe disruption of its municipal electric system's operations and serious financial impacts for its system and its ratepayers.

Hamilton states that it has executed same or next day service of its Complaint on CG&E and other interested parties.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). The answer to this Complaint, as well as any motions to intervene, or protests should be filed on or before thirty days from publication of this notice in the *Federal Register*. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 89-21061 Filed 9-7-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. RP89-219-000 and TM90-1-37-000]

Northwest Pipeline Corp.; Change in FERC Gas Tariff

August 31, 1989.

Take notice that on August 24, 1989, Northwest Pipeline Corporation (Northwest) tendered for filing and acceptance the following tariff sheets:

First Revised Volume No. 1

Fifty-Fourth Revised Sheet No. 10
Thirthieth Revised Sheet No. 10-A
Second Revised Sheet No. 12
Third Revised Sheet No. 12

Original Volume No. 1-A

Nineteenth Revised Sheet No. 201

Original Volume No. 2

Tenth Revised Sheet No. 2.3

Northwest states that the purpose of this filing is to update its Commodity

SSP Charge and Fixed Monthly SSP Charge, effective October 1, 1989, to: (1) reflect interest applicable to July, August and September 1989, (2) the amortization of principal and interest for the months of April, May and June 1989, and (3) to reflect the inclusion of additional SSP Costs that have been incurred since Northwest's last quarterly filing. The proposed revised Commodity SSP Charge is 3.62¢ per MMBtu. Northwest states that Second Revised Sheet No. 12 was filed to revise the Fixed Monthly SSP charge factors, effective April 1, 1989, to reflect some minor sales volume adjustments that apply to calendar years 1983 and 1984. Northwest also states that this filing supplements its Order No. 5000 take-or-pay buyout/buydown cost recovery filing in Docket No. RP89–137 by reflecting two additional supplies settlements.

Northwest states that a copy of this filing has been sent to all parties of record in Docket No. RP89–137 and to all jurisdictional customers and affected State regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Sections 385.214 and 385.211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before September 8, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TM89–4–18–000]

Texas Gas Transmission Corp.; Tariff Filing

August 31, 1989.

Take notice that on Augsut 25, 1989, Texas Gas Transmission Corporation (Texas Gas) tendered for filing the following revised tariff sheets to its FERC Gas Tariff, Original Volume No. 1:

Substitute Second Revised Sheet No. 14D
Substitute Second Revised Sheet No. 14E
Substitute Second Revised Sheet No. 14F
Substitute Second Revised Sheet No. 14G

Texas Gas states that this filing is made to reflect the modification of Tennessee Gas Pipeline Company's revised take-or-pay demand surcharge during the six-month amortization period July 1 through December 31, 1989 to Texas Gas' downstream customers. The modification was reflected in Tennessee's finding made July 14, 1989, which reduced the take-or-pay cost by one-half of the amount of foregone revenue associated with transportation discounts or $8,719,000. The filing complies with a June 30, 1989 Letter Order in this docket which allows Texas Gas to track any modifications which the Commission may approve. Texas Gas Reserves the right to revise the filing as necessary to reflect any modifications made by the Commission or as required by any appellate court. The proposed effective date of the tariff sheets listed above is August 1, 1989.

Copies of this filing have been served upon Texas Gas' jurisdictional and nonjurisdictional sales customers and interested state commissions.

Any person desiring to be heard to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, DC 20426, in accordance with Rules 2.11 and 2.14 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before September 8, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. TM90–1–78–000]

Overthrust Pipeline Co.; Tariff Filing

August 31, 1989.

Take notice that on August 29, 1989, Overthrust Pipeline Company (Overthrust), pursuant to 18 CFR 154.38 (d)(6) and Part 382, tendered for filing and acceptance Seventh Revised Sheet No. 6 to its FERC Gas Tariff, Original Volume No. 1.

Overthrust states that this filing implements the annual charge unit rate of $0.0017 per Mcf in each of its transportation rate schedules.

Overthrust requests an effective date of October 1, 1989, for the tendered tariff sheets.

Overthrust also states that copies of the filing were served upon Overthrust's jurisdictional customers and interested state public service commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before September 11, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Great Lakes Gas Transmission Co.; Proposed Changes in FERC Gas Tariff Purchased Gas Adjustment Clause Provisions

August 30, 1989

Take notice that Great Lakes Gas Transmission Company ("Great Lakes") on August 24, 1989 tendered for filing Second Substitute Twenty-Third Revised Sheet Nos. 57(i) and 57(ii), Third Substitute Tenth Revised Sheet No. 57(v) and Substitute Twenty-Fourth Revised Sheet Nos. 57(i) and 57(ii) to its FERC Gas Tariff, First Revised Volume No. 1.

Second Substitute Twenty-Third Revised Sheet Nos. 57(i) and 57(ii) and Third Substitute Tenth Revised Sheet No. 57(v) reflected revised current PGA rates for the months of August, September and October, 1989. The tariff sheets were filed as an Out of Cycle PGA to reflect the latest estimated gas cost as provided to Great Lakes by its sole supplier of natural gas, TransCanada PipeLines Limited ("TransCanada"). These pricing arrangements were the result of contract renegotiation between each of Great Lakes' resale customers and the supplier.

Substitute Twenty-Fourth Revised Sheet Nos. 57(i) and 57(ii) were filed to reflect the elimination of Michigan Gas Company as a sales customer under Rate Schedule S–1 and the implementation of a transportation service for Michigan Gas Company under a new Rate Schedule T–18. Initial tariff sheets reflecting Rate Schedule T–18 were filed by Great Lakes on August 8, 1989, to be effective September 1, 1989.

Great Lakes requested waiver of the notice requirements of the provisions of § 154.309 of the Commission's Regulations and any other necessary waivers so as to permit the above tariff sheets to become effective as requested in order to implement the gas pricing agreements between Great Lakes' resale customers and TransCanada on a timely basis.

Any person desiring to be heard or to protest said filing should file a Motion to Intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC, 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before September 8, 1989.

Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

[Docket No. TM90–1–26–000]

Natural Gas Pipeline Company of America; Proposed Changes in FERC Gas Tariff

August 30, 1989

Take notice that on August 28, 1989, Natural Gas Pipeline Company of America (Natural) tendered for filing as part of its FERC Gas Tariff sheets to be effective October 1, 1989.

Natural states that the purpose of the filing is to implement the Annual Charges Adjustment (ACA) charge necesary for Natural to recover from its customers annual charges assessed it by the Commission pusuant to Part 382 of the Commission's Regulations. The rate authorizing by the Commission to be effective October 1, 1989, is .17¢ per Mcf. Under Natural's billing basis of 14.65 psia at 1000 Btu, this rate converts to .16¢ per Mcf.

Natural requested waiver of the Commission's Regulations to the extent necessary to permit the tariff sheets to become effective on October 1, 1989.

Any person desiring to be heard or to to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed on or before September 8, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TM90–1–41–000]

Paiute Pipeline Co.; Change in Annual Charge Adjustment

August 30, 1989

Take notice that on August 25, 1989, Paiute Pipeline Company (Paiute) tendered for filing Tenth Revised Sheet No. 10 applicable to its FERC Gas Tariff, Original Volume No. 1 and Sixth Revised Sheet No. 10 applicable to its FERC Gas Tariff, Original Volume No. 1–A. Paiute states that the purpose of said filing is to revise its annual charge adjustment surcharge in order to recover the Commission's annual charges for the 1989 fiscal year.

Paiute has requested that the Commission accept its tariff sheet to become effective October 1, 1989.

Paiute states that copies of this filing have been mailed to the Nevada Public Service Commission, the California Public Utilities Commission, Southwest Gas Corporation, Sierra Pacific Power Company, and CP National Corporation.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before September 8, 1989. Protests will be considered by the Commassion in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TM90–1–49–000]

Williston Basin, Interstate Pipeline Co.; Annual Charge Adjustment Filing

August 31, 1989.

Williston Basin Interstate Pipeline Company (Williston Basin), on August 29, 1989, submitted for filing as part of its FERC Gas Tariff the following tariff sheets:

First Revised Volume No. 1: Eighteenth Revised Sheet No. 10
Original Volume No. 1–A: Fourteenth Revised Sheet No. 11, Seventeenth Revised Sheet No. 12
Original Volume No. 1–B: Seventh Revised Sheet No. 10, Seventh Revised Sheet No. 11
Original Volume No. 2: Twentieth Revised Sheet No. 10, Twelfth Revised Sheet No. 11B

The proposed effective date of the tariff sheets is October 1, 1989.

Williston Basin states that the instant filing reflects a revision to the Federal Energy Regulatory Commission's Annual Charge Adjustment (ACA) amount pursuant to the Commission's Statement of Annual Charges (18 CFR part 382) and Williston Basin's FERC Gas Tariff (First Revised Volume No. 1, Section 30; Oroginal Volume No. 1–A, Section 27 and Original Volume No. 1–B, Section 25). The filing incorporates an ACA surcharge of 0.170 cents per Mcf (0.159 cents per dkt on the Williston Basin system), a reduction of .01 cents per Mcf from the current amount, as authorized by the Commission.

Any person desiring to be heard or to protest said tariff application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with the Commission's Rules 211 and 214. All such petitions or protests should be filed on or before September 11, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a petition to intervene. Copies of the filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[Docket No. TM90–1–67–000]

Canyon Creek Compression Co.; Proposed Change in FERC Gas Tariff

August 30, 1989

Take notice that on August 28, 1989, Canyon Creek Compression Company (Canyon) tendered for filing Tenth Revised Sheet No. 4 (Original Volume No. 1) and First Revised Sheet No. 5 (Original Volume No. 1A) to be a part of its FERC Gas Tariff to be effective October 1, 1989.

Canyon states that the purpose of the filing is to implement the Annual Charges Adjustment (ACA) charge necessary for Canyon to recover from its customers annual charges assessed it by the Commission pursuant to Part 382 of the Commission's Regulations. The rate authorized by the Commission to be effective October 1, 1989 is .17¢ per Mcf.

Canyon requested waiver of the Commission's Regulations to the extent necessary to permit the tariff sheets to become effective October 1, 1989.

Canyon states that a copy of the filing is being mailed to Canyon's jurisdictional customers and interested state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed on or before September 8, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

BILLING CODE 6717-01-M

[Docket No. TM90–1–63–000]

Carnegie Natural Gas Co; Proposed Changes in FERC Gas Tariff

August 30, 1989

Take notice that Carnegie Natural Gas Company ("Carnegie") on August 28, 1989, tendered for filing the following revised tariff sheets in its FERC Gas Tariff, First Revised Volume No. 1:

Fifth Revised Sheet No. 15
Seventeenth Revised Sheet No. 47
Third Revised Sheet No. 47a
Seventeenth Revised Sheet No. 48

The proposed effective date is October 1, 1989.

Carnegie states that it is amending its sales and transportation rate schedules to reflect its Commission-authorized Annual Charge Adjustment ("ACA") unit charge of $.0017. Carnegie states that this filing is submitted in compliance with § 154.38(d)(6)(iii) of the Commission's Regulations and Section 24 of the General Terms and Conditions of Carnegie's FERC Gas Tariff, First Revised Volume No. 1.

Carnegie states that copies of the filing were served upon Carnegie's jurisdictional customers and interested state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before September 8, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717-01-M

[Docket No. TM90–1–55–000]

Questar Pipeline Co.; Tariff Filing

August 31, 1989.

Take notice that on August 29, 1989, Questar Pipeline Company (Questar Pipeline), pursuant to 18 CFR 154.38(d)(6) and Part 382, tendered for filing and acceptance the following tariff sheets to its FERC Gas Tariff:

First Revised Volume No. 1
  Twenty-Fourth Revised Sheet No. 12
  Fifth Revised Sheet No. 12–A
Original Volume No. 1–A
  Tenth Revised Sheet No. 5
Original Volume No. 3
  Thirteenth Revised Sheet No. 8

Questar Pipeline states that this filing implements the annual charge unit rate of $0.0017 per Mcf in each of its transportation and sales rate schedules. Questar Pipeline requests an effective date of October 1, 1989, for the tendered tariff sheets.

Questar Pipeline also states that copies of the filing were served upon Questar Pipeline's jurisdictional customers and interested state public service commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before September 11, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Pacific Interstate Offshore Co.; Change in Rate

August 31, 1989.

Take notice that on August 29, 1989, Pacific Interstate Offshore Company ("PIOC") submitting for filing, to be a part of its FERC Gas Tariff, Original Volume No. 1, the following tariff sheet:

Original Volume No. 1

Tenth Revised Sheet No. 4

PIOC states the purpose of this filing is to set forth the applicable Annual Charge Adjustment (ACA) surcharge of .17 cents per mcf in its Rate Schedule G–10 as provided for by Order No. 472. PIOC requests an effective date of October 1, 1988.

PIOC states that a copy of this filing has been served on PIOC's sole customer, Southern California Gas Company and the Public Utilities Commission of the State of California.

Any persons desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825

North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 or 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before September 11, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. TM90–1–69–000]

Stingray Pipeline Co.; Proposed Changes in FERC Gas Tariff

August 30, 1989.

Take notice that on August 28, 1989, Stingray Pipeline Company (Stingray) tendered for filing Second Revised Sixteenth Revised Sheet No. 4 to be a part of its FERC Gas Tariff, Original Volume No. 1 to be effective October 1, 1989.

Stingray states that the purpose of the filing is to implement the Annual Charges Adjustment (ACA) charge necessary for Stingray to recover from its customers annual charges assessed it by the Commission pursuant to the Part 382 of the Commission's Regulations. The rate authorized by the Commission to be effective October 1, 1989 is .17¢ per Mcf. Under Stingray's billing basis of 14.73 psia per Dekatherm, this rate converts to .16¢ per Dekatherm.

Stingray requested waiver of the Commission's Regulations to the extent necessary to permit the tariff sheet to become effective on October 1, 1989.

Stringray states that a copy of the filing is being mailed to Stingray's jurisdictional customers and interested state regulatory agenices.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street N.E., Washington, DC 20426, in accordance with § 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed on or before September 8, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

BILLING CODE 6717-01-M

[Docket No. EL89–46–000]

Safe Harbor Water Power Corp.; Order To Show Cause

Issued August 31, 1989.

Before Commissioners: Martha O. Hesse, Chairman; Charles G. Stalon, Charles A. Trabandt, Elizabeth Anne Moler and Jerry J. Langdon.

Safe Harbor Water Power Corporation (Safe Harbor) owns a 230 MW generating unit and sells the output to its owners, Pennsylvania Power & Light Company and Baltimore Gas & Electric Company. The unit power agreement contains a formula rate. In a settlement agreement approved by the Commission in Docket No. EL88–2–000,[1] a provision providing for annual examination of the over-all return was added to the formula rate.

Under the terms of that provision, in August of each year, interested parties may request that the Commission institute, or the Commission may itself institute, an investigation of the over-all return component of the formula rate. Also, under the terms of that provision, if the Commission proceeds on its own motion, the Commission must publish an order to show cause and give Safe Harbor and any other affected party the opportunity to respond. If the Commission decides to set the over-all return for investigation and hearing, the settlement agreement provides that the only issue to be addressed will be the level of the over-all return appropriate for Safe Harbor, that the burden of going forward will be on the party advocating a lower return, and that, if the return is ultimately determined to be unjust and unreasonable, refunds will be due dating back to the date of the Commission order setting the matter for investigation and hearing.

Safe Harbor currently uses a 10.6% over-all return in its formula rate. Our preliminary analysis indicates that this return may be excessive and may be unjust and unreasonable. We will therefore order Safe Harbor to show cause why the Commission should not set Safe Harbor's over-all return for investigation and hearing.

Any person desiring to be heard should file a protest or motion to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.211 and 385.214 (1988). All such protests or

---

motions should be filed on or before

examination of the common equity

Any person wishing to become a party

REFUND APPLICATIONS RECEIVED

motions should be filed on or before September 21, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene.

The Commission orders:

(A) Safe Harbor is hereby ordered to show cause why the Commission should not set Safe Harbor's over-all return for investigation and hearing.

(B) Safe Harbor shall file its response to the order to show cause on or before September 21, 1989.

(C) The Secretary shall promptly publish a copy of this order in the **Federal Register.**

By the Commission.

Lois D. Cashell,

Secretary.

[FR Doc. 89-21097 Filed 9-7-89; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. EL89-47-000]

Commonwealth Edison Company of Indiana, Inc.; Order To Show Cause

Issued August 31, 1989.

Before Commissioners: Martha O. Hesse, Chairman; Charles G. Stalon, Charles A. Trabandt, Elizabeth Anne Moler and Jerry J. Langdon.

Commonwealth Edison Company of Indiana, Inc. (CECI) owns a 600 MW generating unit and sells the output to its parent, Commonwealth Edison Company. The unit power agreement contains a formula rate. In a settlement agreement approved by the Commission in Docket No. ER88-531-000,[1] a provision providing for annual examination of the common equity return was added to the formula rate.

Under the terms of that provision, in August of each year, interested parties may request that the Commission institute, or the Commission may itself institute, an examination of the common equity return component of the formula rate. Also, under the terms of that provision, if the Commission proceeds on its own motion, the Commission must publish an order to show cause and give CECI and any other affected party the opportunity to respond. If the Commission decides to set the common equity return for investigation and hearing, the settlement agreement provides that the only issue to be addressed will be the level of the common equity return, that the burden of going forward will be on the party advocating a lower common equity return, and that, if the return is ultimately determined to be unjust and unreasonable, refunds will be due dating back to the date of the Commission order setting the matter for investigation and hearing.

CECI currently uses a common equity return of 13.91% in its formula rate. Our preliminary analysis indicates that this return may be excessive and may be unjust and unreasonable. We will therefore order CECI to show cause why the Commission should not set CECI's common equity return for investigation and hearing.

Any person desiring to be heard should file a protest or motion to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.211 and 385.214 (1988). All such protests or motions should be filed on or before September 21, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene.

The Commission orders:

(A) CECI is hereby ordered to show cause why the Commission should not set CECI's common equity return for investigation and hearing.

(B) CECI shall file its response to the order to show cause on or before September 21, 1989.

(C) The Secretary shall promptly publish a copy of this order in the **Federal Register.**

By the Commission.

Lois D. Cashell,

Secretary.

Office of Hearings and Appeals

Cases Filed During the Week of May 12 Through May 19, 1989

During the Week of May 12 through May 19, 1989, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under DOE procedural regulations, 10 CFR part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

Dated: August 30, 1989.

Richard W. Dugan,

Acting Director, Office of Hearings and Appeals.

List of Cases Received by the Office of Hearings and Appeals

[Week of May 2 through May 19, 1989]

Date	Name and location of applicant	Case no.	Type of submission
5/15/89	Terrol Energy, Inc., Boulder, Colorado	KEE-0177	Exception to the reporting requirements.
If granted: Terrol Energy, Inc. would not be required to file the 1988 Energy Reserve Estimates.			
5/17/89	Benedetta Enterprises, Inc., Ronkonkoma, New York	KFA-0288	Appeal of an information request denial.
If granted: The May 9, 1989 Freedom of Information Request Denial issued by the Chicago Operations Office would be rescinded and Benedetta Enterprises, Inc. would receive access to information relating to a solicitation for proposals for the operation of an on-site service station.			
5/19/89	John R. Penley, New York City, New York	KFA-0289	Appeal of an information request denial.
If granted: The March 21, 1989 Freedom of Information Request Denial issued by the Savannah River Operations would be rescinded and John R. Penley would receive a waiver of search and duplication fees with respect to copies of all records pertaining to and/or captioned with his name, or the names of two environmental organizations.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared August 21, 1989 through August 25, 1989 pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities AT (202) 382-5076.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 7, 1989 (54 FR 15007).

DRAFT EISs

ERP No. D-AFS-G65049-00, Rating EC2, Ozark/Ouachita Mountains Vegetation Management Plan, Implementation, Ouachita, Ozark and St. Francis National Forests, AR and McCurtain and LeFlore Counties, OK.

Summary: EPA supports selection of the preferred alternative over the current management alternative. EPA's recommendations regarding herbicide use and prescribed burning to prevent adverse impacts to surface and groundwater quality should be incorporated in the final EIS.

ERP No. D-DOE-A07030-00, Rating EC2, Clean Coal Technology Program, Continuation.

Summary: EPA had several recommendations for improvement of the EIS and expressed concerns about air emissions and waste generation by the program.

ERP No. D-UAF-B24004-MA, Rating EC2, OTIS Air National Guard Base Wastewater Treatment Facility, Continuing Operation, Barnstable County, MA.

Summary: EPA has no objection to the Air National Guard's preferred action to pump treated effluent to new effluent infiltration basins located in the Cape

Cod Canal area. However, EPA requests that the WWTP ability's to achieve future state and federal discharge limitations and comply with water quality guidelines be evaluated.

Final EISs

ERP No. F–AFS–L65129–ID, Wing Creek-Twentymile Timber Sale and Road Construction, Geographic Display Area Management Plan, Implementation, Nezperce National Forest Land and Resource Management Plan, Elk City and Clearwater Ranger Districts, Idaho County, ID.

Summary: EPA has no objections to the proposed action as described. No formal comments were sent to the agency.

ERP No. F–AFS–L65130–AK, Big Islands Management Area Analysis, Implementation and Special Use Permit, Chugach National Forest Land and Resource Management Plan, Hawkins, Hinchinbrook, Montague, Green, Little Green and Wooded Islands and The Needle, Prince William Sound, AK.

Summary: EPA has no objections to the proposed project as described. No formal comments were sent to the agency.

ERP No. F–AFS–L82006–00, Pacific Northwest Region Western Spruce Budworm Management Plan, Implementation, WA and OR.

Summary: EPA has no objections to the project as described in the final EIS. No formal review comments were submitted to the agency on this project.

ERP No. F–FHW–L40115–OR, North Marine Drive Improvement, I–5 to Rivergate Industrial District, Funding and Section 10/404 Permits, Multnomah County, OR.

Summary: EPA has no objections to the proposed action as described. No formal comments were sent to the agency.

Dated: September 5, 1989.

Richard E. Sanderson,

Director, Office of Federal Activities.

Transfer of Data to Contractors

AGENCY: Environmental Protection Agency.

ACTION: Notice of transfer of confidential data and request for comments.

SUMMARY: The Environmental Protection Agency (EPA) intends to release confidential data collected under Section 308 of the Clean Water Act to one EPA contractor for the purpose of assisting EPA in developing regulations under the Resource Conservation and Recovery Act (RCRA).

DATE: The transfer to the Contractor of the described confidential business information will occur no sooner than September 18, 1989.

ADDRESSES: Comments may be sent to the Docket Clerk, Industrial Technology Division, Office of Water (WH–552), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Comments should be identified as "Transfer of Confidential Data."

FOR FURTHER INFORMATION CONTACT: For technical information regarding the Office of Water databases subject to this notice, contact Ernst P. Hall, Industrial Technology Division, Office of Water (WH–552), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, telephone 202–382–7128. For technical information regarding data uses under RCRA, contact Robert W. Hall, Office of Solid Waste (OS–323), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, telephone 202–475–8814.

SUPPLEMENTARY INFORMATION:

1. Transfer of Data

On October 12, 1980, Congress enacted the Solid Waste Disposal Act Amendments of 1980, which added Section 3001(b)(3)(A)(ii) (the Bevill Amendment) to RCRA. This section temporarily prohibits EPA from regulating "solid waste from the extraction, beneficiation, and processing of ores and minerals, including phosphate rock and overburden from the mining of uranium ore" as hazardous waste under subtitle C of RCRA, pending EPA's completion of certain studies of these wastes.

Under EPA contract No. 68–01–7290, ICF Incorporated is assisting the Special Wastes Branch, Office of Solid Waste, in developing a hazard criterion. EPA will use this criterion to identify the "special wastes" that will be temporarily exempt under the Bevill Amendment.

To facilitate implementation of this criterion, the EPA Office of Water will transfer to an EPA Office of Solid Waste contractor, ICF Incorporated (Fairfax, Va.), certain information that has been submitted to the EPA under Section 308 of the Clean Water Act (the Federal Water Pollution Control Act (FWPCA) Amendments of 1972, as amended (33 U.S.C. 1251 et seq.)). The information to be transferred has been collected to support the promulgation of effluent limitations guidelines and standards for certain industry categories. Some of the information gathered under FWPCA may be subject to claims of business confidentiality.

The information to be transferred to ICF Incorporated was collected by several contractors, including the Cyrus N. Rice Division of NUS, the Radian Corporation, and Jacobs Engineering Group, Inc. who were assisting the Industrial Technology Division of the Office of Water by collecting facility-level data from a large number of ore and mineral processing industries. These data included process descriptions, waste stream volume and descriptions, waste constituent data, through-put rates, and other related information from the ferrous and non-ferrous metals, ferroalloys, coal gasification, elemental phosphorus, hydrofluoric acid, lightweight aggregate, phosphoric acid and soda ash industries. EPA used these data to develop effluent limitations guidelines and standards for several major industries, such as iron and steel manufacturing, non-ferrous metals manufacturing, and inorganic chemicals manufacturing.

The information transferred will concern all industries potentially affected by the Bevill Amendment.

Dated: August 25, 1989.

Rebecca W. Hanmer,

Acting Assistant Administrator for Water.

National Combined Sewer Overflow Control Strategy Document Availability

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability.

SUMMARY: This notice announces the availability of a document which describes EPA's National Combined Sewer Overflow Control Strategy.

DATE: Copies of this document will be available from EPA Office of Water for a period of 90 calender days, beginning September XX, 1989.

ADDRESSES: Copies of this document can be obtained by writing to Ms. Angie McLean, Permits Division, EN–336, U.S. EPA Environmental Protection Agency, 401 M Street SW., Washington, DC 20460 or by telephoning her at (202) 475–9543.

FOR FURTHER INFORMATION CONTACT: William A. Collins, Jr., telephone: (202) 475–9517.

National Combined Sewer Overflow Control Strategy

Introduction

Combined sewer overflows (CSOs) are flows from a combined sewer in excess of the interceptor or regulator capacity that are discharged into a receiving water without going to a publicly owned treatment works (POTW). CSOs occur prior to reaching the headworks of a treatment facility and are distinguished from bypasses which are "intentional diversions of waste streams from any portion of a treatment facility" (40 CFR 122.41(m)).[1]

Most major municipal areas in the United States are served by a combination of sanitary sewers, separate storm sewers, and combined sanitary and storm sewers. The Agency has estimated that there are between 15,000 and 20,000 CSO discharge points currently in operation. Sanitary sewer systems must adhere to the strict design and operational standards established to protect the integrity of the sanitary sewer system and wastewater treatment facilities. Discharges from separate sanitary sewer systems with less than secondary treatment are prohibited. The regulation of discharges from separate storm sewer systems is addressed in section 402(p) of the Clean Water Act (CWA). EPA is proposing regulations implementing section 402(p) which include requirements to develop system-wide municipal storm water management programs to reduce pollutants from municipal separate storm sewers. The following strategy is designed to control effluents from combined systems which are not regulated under the sanitary system standards nor as discharges from separate storm sewer regulations.

This CSO permitting strategy is designed to complement the control programs for sanitary sewers and separate storm sewers. This strategy establishes a uniform, nationally-consistent approach to developing and issuing NPDES permits for CSOs. CSOs have been shown to have severe adverse impacts on water quality, aquatic biota, and human health under certain conditions. Therefore, permits for CSOs are to be developed expeditiously to minimize these potential impacts by establishing technology-based and water quality-based requirements.

The objectives of this strategy are threefold:

(1) To ensure that if CSO discharges occur, they are only as a result of wet weather,

(2) To bring all wet weather CSO discharge points into compliance with the technology-based requirements of the CWA and applicable State water quality standards, and

(3) To minimize water quality, aquatic biota, and human health impacts from wet weather overflows.

Statement of Strategy

CSOs are point sources subject to NPDES permit requirements including both technology-based and water quality-based requirements of the CWA. CSOs are not subject to secondary treatment regulations applicable to publicly owned treatment works (*Montgomery Environmental Coalition* vs. *Costle*, 646 F. 2d 568 (D.C. Cir. 1980)).

Technology-based permit limits should be established for best practicable control technology currently available (BPT), best conventional pollutant control technology (BCT), and best available technology economically achievable (BAT) based on best professional judgement (BPJ) when permitting CSOs. The CWA of 1977 mandates compliance with BPT on or before July 1, 1977. The Water Quality Act Amendments of 1987 (WQA) mandates compliance with BCT/BAT on or before March 31, 1989.

Section 301(b)(1)(C) of the CWA mandates compliance with water quality standards by July 1, 1977. In addition it is likely that at least some CSO discharges will be point source discharges to waters listed under section 304(1) of the CWA and subject to the control requirements of that Section.

All CSO discharges must be brought into compliance with technology-based requirements and State water quality-based requirements. The Agency expects that this can be achieved using a combination of CSO control measures.

Applicability of Strategy

This strategy applies to all CSOs. Flows in combined sewers can be classified into two categories: wet weather flow and dry weather flow. Wet weather flow is a combination of sanitary flow, industrial flow, infiltration from groundwater, and stormwater flow, including snow melt. Dry weather flow is the flow in a combined sewer that results from domestic sewage, groundwater infiltration and industrial wastes with no contribution from stormwater runoff or stormwater induced infiltration.

This strategy applies to EPA and approved NPDES States. EPA Headquarters will oversee the implementation of the strategy to ensure actions taken by the Regions and States are consistent with the national strategy and that the Agency as a whole is making progress towards meeting the statutory requirements and achieving the water quality objectives of the CWA.

This strategy does not apply to bypasses. Bypasses are "intentional diversions of waste streams from any portion of a treatment facility." The treatment facility begins at the headworks where equalization of the waste streams takes place. Bypasses are regulated under 40 CFR 122.41(m). Bypasses from any portion of the treatment facility are prohibited unless the criteria in 40 CFR 122.41(m)(4) are satisfied. These criteria are (1) bypasses are unavoidable to prevent loss of life, personal injury, or severe property damage; (2) there are no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime; and (3) the permittee submitted notices as required under 40 CFR 122.41(m)(3).

Implementation

Communities are responsible for developing and implementing system-wide combined sewer management plans. State-wide permitting strategies will be developed by the States or Regions to ensure implementation and consistency with this CSO strategy. Permitting strategies should be developed no later than January 15, 1990 and Regions should approve State strategies no later than March 31, 1990. A discussion of different elements that may be addressed in the strategies is provided below.

1. Identification

CSO point sources currently discharging without a permit are unlawful and must be permitted or eliminated. The Regions and States must identify the communities with combined sewer systems and each particular CSO discharge point within these communities. The permitting strategy should place each CSO discharge point into one of three categories: (1) Not permitted; (2) permitted in conjunction with POTW; and (3) permitted separately from POTW. The status of compliance with technology-based and water quality-based permit requirements should be provided for each CSO discharge. An ongoing commitment of evaluating and maintaining CSO location and permit discharge status records should be adopted by every community.

---

[1] Flows to the treatment works (POTW), including dry weather and wet weather flows, are subject to secondary treatment regulations, water quality standards, and the National Municipal Policy. Dry weather discharges from CSOs, which are also subject to this strategy, are illegal and must be expeditiously eliminated. Regions and approved States should use appropriate enforcement actions to eliminate such activities and assure compliance.

2. Priorities

The Regions and States are expected to set priorities in permitting and controlling the unpermitted and insufficiently permitted discharges. In addition to the requirements identified above, the permitting strategy should describe the Regional or State completed and planned actions and timing to bring the discharges into compliance. Permitting and control priorities should be established based upon a system-wide evaluation of known or suspected impacts from CSOs using estimates of flows, frequencies, durations, and pollutant loadings to rank POTW collection systems for permitting.

One of the most important considerations for establishing priorities is whether the CSO discharges to marine or estuarine waters. Other factors to be considered in the priority setting effort are the nature of CSO control measures and the use designation of streams and the estimated increases in beneficial uses resulting from these measures, receiving waters listed under section 304(1) of the Water Quality Act of 1987, other water program efforts such as the Great Lakes program and pretreatment program evaluations.

3. Permit Issuance

A single, system-wide permit should be issued whenever possible for all discharges, including overflows, from a combined sewer system operated by a single authority. The permit should identify separately, as specifically as possible, the location of each overflow in the system (i.e., longitude, latitude, street address, and a map).

Different parts of a single combined sewer system are in some cases owned and/or operated by more than one authority. Permits issued to such authorities should require joint preparation and implementation of the requirements of this strategy and specifically define the responsibilities and duties of each owner and operator. The POTW is responsible for planning and coordinating a system-wide approach. The individual owners and/or operators are responsible for their own discharges and must cooperate with the POTW. When a CSO is permitted separately from the POTW, the POTW's NPDES permit should cross-reference this for informational purposes.

4. Compliance Schedules

Compliance dates for water-quality and technology-based limitations are governed by the statutory deadlines in section 301 of the CWA. CSOs that discharge toxic pollutants into water bodies listed under paragraph (B) of section 304(1) of the CWA are additionally regulated under section 304(1). All CSOs that are subject to section 304(1) must achieve applicable water quality standards by the statutory deadlines in that Section (see Final Guidance for Implementation of Requirements Under section 304(1) of the CSW as Amended, March 1988 and forthcoming regulations). To the extent technology and water quality-based limitations cannot be met by the applicable dates, the permit should contain the statutory dates and public notice should be given simultaneously with an administrative enforcement order or other appropriate enforcement actions requiring compliance within the shortest reasonable time. Effluent limitations based upon newly developed water quality standards or new interpretations of existing water quality standards, however, may be covered by compliance schedules in the NPDES permit. This strategy is not to be considered a new development or new interpretation of water quality standards.

5. Minimum Technology-Based Limitations

All permits for CSO discharges should require the following technology-based limitations as a minimum BCT/BAT, established on a BPJ basis: (1) Proper operation and regular maintenance programs for the sewer system and combined sewer overflow points; (2) maximum use of the collection system for storage; (3) review and modification of pretreatment programs to assure CSO impacts are minimized; (4) maximization of flow to the POTW for treatment; (5) prohibition of dry weather overflows; and (6) control of solid and floatable materials in CSO discharges. Control measures, as mentioned below, may also be required on a case-by-case basis to address the particular circumstances of each combined sewer system and overflow point. All BPJ permits must consider the factors set forth at 40 CFR 125.3(d).

6. Additional CSO Control Measures

Cost is always a consideration when establishing technology-based limits in NPDES permits (40 CFR 125.3). However, the CWA under section 301(b)(1)(C) also requires any additional permit limits that may be necessary to protect State water quality standards. In the event additional control measures are necessary, the permittee should choose the most cost effective control measures which will insure compliance with water quality standards. For example, CSO control programs should be designed to incorporate best management practices and other low cost operational methods and only incorporate more expensive control measures if necessary to meet water quality standards.

Additional control measures that should be considered to bring all wet weather CSOs into compliance with technology-based and applicable State water quality standards include improved operation and maintenance, best management practices, system-wide storm water management programs, supplemental pretreatment program modifications, sewer ordinances, local limits program modifications, identification and elimination of illegal discharges, monitoring requirements, pollutant specific limitations, compliance schedules, flow minimization and hydraulic improvements, direct treatment of overflows, sewer rehabilitation, in-line and off-line storage, reduction of tidewater intrusion, construction of CSO controls within the sewer system or at the CSO discharge point, sewer separation, and new or modified wastewater treatment facilities.

7. Monitoring

Monitoring requirements for wet weather CSOs will vary based on the unique circumstances of each combined sewer system and overflow point. Cost effective monitoring requirements should be developed to serve three purposes: (1) To characterize CSO discharges, including their frequency, duration, and pollutant loadings; (2) to evaluate the water quality impacts of these discharges; and (3) to determine compliance with CSO permit requirements.

Discharge monitoring and/or modeling, wasteload allocations that address rainfall-related hydrological conditions, and often stream surveys are necessary to measure the extent to which CSO discharges are causing violations of technology-based limitations or water quality standards, and to design corrective programs. These monitoring/modeling requirements should be included in the initial CSO permits with reopener clauses to adjust permit limits as warranted.

Compliance monitoring requirements should also be included in CSO permits. These monitoring requirements should include collecting and reporting data on CSO events and insuring that no dry weather overflows occur. Monitoring may also include inspections or reports aimed at assuring that required facility improvements have been made and/or that best management practices and other operation and maintenance requirements are being effectively implemented. Permits should require development and implementation of a monitoring plan or program to assure data needs are met. In-stream monitoring is expected to be conducted after improvements are made to assure water quality standards are met.

8. Water Quality Standards Modification

Section 301(b)(1)(C) of the CWA mandates compliance with water quality standards. Permits must be written to ensure CSO discharges do not cause violations of water quality standards. The applicability of water quality standards should not be waived under any circumstances. In limited cases, it may be appropriate to adjust some water quality standards to address the impact of pollutants in wet weather flows more adequately. In these cases, this strategy encourages monitoring, modeling, or wasteload allocation procedures to better quantify influences and formulate control strategies to address rainfall-related hydrological conditions.

EPA sets forth the criteria for modifying State water quality standards at 40 CFR 131.10(g). In general, States may remove a designated use which is not an existing use as defined in 40 CFR 131.3, or establish subcategories of a use if the State can demonstrate that attaining the designated use is not feasible because of one of the six enumerated criteria listed at 40 CFR 131.10(g) including that controls more stringent than those required by sections 301(b) and 306 of the Act would result in substantial and widespread economic and social impact. States may not remove designated uses if they are existing uses, as defined in 40 CFR 131.3, unless a use requiring more stringent criteria is added; or if such uses will be attained by implementing effluent limits required under sections 301(b) and 306 of the Act and by implementing cost effective and reasonable best management practices for nonpoint source control. Additionally, prior to removing any uses or establishing subcategories of use, the State must provide notice and an opportunity for public hearing under 40 CFR 131.20(b). Changes in designated uses or the establishment of subcategories of uses must be made on a site-specific basis in accordance with the procedures specified in 40 CFR 131.10(j).

In instances where current State water quality standards waive or relax compliance with those standards during wet weather, these wet weather provisions should be revised during the next triennial review to ensure appropriate water quality standards coverage during wet weather events.

9. Funding

CSOs which cause adverse impacts on water quality and human health should be considered for funding. CSO corrections are fundable under both the Construction Grants and State Revolving Fund programs, although significant limitations apply.

Construction grants may be awarded for CSOs under the following CWA provisions: section 201(g)(1) Governor's 20 percent discretionary fund; section 201(n)(1) funding from State's regular allotment for CSOs that are a major State priority and meet the water quality criteria in regulation (40 CFR 35.2024); and section 201(n)(2) special national fund, from a reserve of 1 percent of construction grants appropriated in FY 89 and FY 90, for marine CSOs that meet the water quality criteria in the regulation.

Before a State Revolving Fund (SRF) may use the capitalization grant, State match, or repayments of first round loans from the grants for CSOs, the State must meet the first use requirements, i.e., its National Municipal Policy list of projects must all be in compliance, on an enforceable schedule, have an enforcement action filed, or have a funding commitment. Once the first use requirement is met, the SRF may make loans or provide other assistance for CSOs with 20 percent of its grant amount (or with other grant dollars for CSOs under section 201(n)(1)) and with all of its matching or other funds in excess of the grant amount. Before the first use requirement is met, the SRF may fund CSOs with State funds in excess of the matching, bond proceeds in excess of the grant and match, and repayments of loans made with non-grant funds. For further information regarding SRF funding, see *Initial Guidance for SRFs*, January 1988.

10. Permit Application Forms

CSOs that are permitted in conjunction with a POTW should be identified in the permit application form submitted to the permitting authority. POTWs must submit a Form A (EPA Form 7550–22) 180 days prior to discharge or permit expiration. CSOs that are permitted separately from a POTW, should submit a NPDES Form 2C (EPA Form 3510–2C) to the permitting authority 180 days prior to permit expiration. For new CSOs, NPDES Form 2D (EPA Form 3510–2D) should be submitted 180 days prior to discharge.

Dated: August 10, 1989.

Rebecca W. Hanmer,

Acting Assistant Administrator for Water.

BILLING CODE 6560-50-M

[OPTS-59274C; FRL-3642-9]

Certain Chemicals Approval of a Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of an application for test marketing exemption (TME) under section 5(h)(1) of the Toxic Substances Control Act (TSCA) and 40 CFR 720.38. EPA has designated this application as TME–89–23. The test marketing conditions are described below.

EFFECTIVE DATE: September 1, 1989.

FOR FURTHER INFORMATION CONTACT: Andrea Pfahles-Hutchens, New Chemicals Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–611, 401 M St. SW., Washington, DC 20460, (202) 382–2255.

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use, and disposal of the substances for test marketing purposes will not present an unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present any unreasonable risk of injury.

EPA hereby approves TME–89–23. EPA has determined that test marketing of the new chemical substance described below, under the conditions set out in the TME application, and for the time period and restrictions specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, use, and the number of customers must not exceed that specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

The following additional restrictions apply to TME-89-23. A bill of lading accompanying each shipment must state that the use of the substance is restricted to that approved in the TME. In addition, the applicant shall maintain the following records until 5 years after the date they are created, and shall make them available for inspection or copying in accordance with section 1l of TSCA:

1. Records of the quantity of the TME substance produced and the date of manufacture.

2. Records of dates of the shipments to each customer and the quantities supplied in each shipment.

3. Copies of the bill of lading that accompanies each shipment of the TME substance.

T-89-23

Date of Receipt: July 26, 1989.

Notice of Receipt: August 18, 1989 (54 FR 34231).

Applicant: Confidential.

Chemical: (G) Organoaluminum compound.

Use: (G) Contained destructive use.

Production Volume: Confidential.

Number of Customers: Confidential.

Test Marketing Period: Confidential.

Risk Assessment: EPA identified no significant environmental concerns for or releases of the test market substance. EPA did identify health concerns for corrosivity to eyes, skin, and the respiratory tract; however, exposure will be prevented through the required use of protective equipment. Therefore, the test market activities will not present any unreasonable risk of injury to health or the environment.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information that comes to its attention which casts significant doubt on its finding that the test marketing activities will not present an unreasonable risk of injury to health or the environment.

Dated: September 1, 1989.

John W. Melone,

Director, Chemical Control Division, Office of Toxic Substances.

Proposed Administrative Penalty Assessment and Opportunity to Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed administrative penalty assessment and opportunity to comment.

SUMMARY: EPA is providing notice of a proposed administrative penalty assessment for an alleged violation(s) of the Clean Water Act. EPA is also providing notice of opportunity to comment on the proposed assessment.

Under 33 U.S.C. 1319(g), EPA is authorized to issue orders assessing administrative civil penalties for various violations of the Act. EPA may issue such orders after the commencement of either a Class I or Class II administrative penalty proceeding. EPA provides public notice of the proposed assessments pursuant to 33 U.S.C. Section 1319(g)(4)(a).

Class II proceedings are conducted under EPA's "Consolidated Rules of Practice Governing the Administrative Assessment of Civil Penalties and the Revocation or Suspension of Permits." The procedures through which the public may submit written comment on a proposed Class II order or participate in a Class II proceeding, and the procedures by which a respondent may request a hearing, are set forth in the "Consolidated Rules of Practice Governing the Administrative Assessment of Civil Penalties and the Revocation or Suspension of Permits." The deadline for submitting public comment on a proposed Class II order is thirty days after issuance of public notice.

On the date identified below, EPA commenced the following Class II proceeding for the assessment of penalties:

In the Matter of the Guam Department of Public Works, Ordot Landfill, Ordot, Guam; EPA Docket No. IX-FY89-39; filed on August 30, 1989, Regional Hearing Clerk, U.S. EPA, Region 9, 215 Fremont Street, San Francisco, CA 94105, (415)974-8600; proposed penalty of $86,500 for discharging (leachate) without a permit as detected during Guam Environmental Protection Agency inspections.

FOR FURTHER INFORMATION CONTACT: Persons wishing to receive a copy of EPA's "Consolidated Rules of Practice Governing the Administrative Assessment of Civil Penalties and the Revocation or Suspension of Permits", review the complaint or other documents filed in this proceeding, comment upon a proposed assessment, or otherwise participate in the proceeding should contact the Regional Hearing clerk indentified above. Unless otherwise noted, the administrative record for each of the proceedings is located in the EPA Regional Office identified above, and the file will be open for public inspection during normal business hours. All information submitted by the respondent is available as part of the administrative record, subject to provisions of law restricting public disclosure of confidential information. In order to provide opportunity for public comment, EPA will issue no final order assessing a penalty in these proceedings prior to October 30, 1989.

Dated: August 25, 1989.

Keith Takata,

Acting Director, Water Management Division.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-828-DR]

Amendment to Notice of a Major Disaster Declaration; Texas

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the State of Texas (FEMA-828-DR), dated May 19, 1989, and related determinations.

DATED: August 31, 1989.

FOR FURTHER INFORMATION CONTACT: Neva K. Elliott, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472 (202) 646-3614.

NOTICE: The notice of a major disaster for the State of Texas, dated May 19, 1989, is hereby amended to include the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of May 19, 1989: Donley County for Individual Assistance and Public Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.)

Robert G. Chappell,

Acting Associate Director, State and Local Programs and Support, Federal Emergency Management Agency.

BILLING CODE 6718-02-M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1000 L Street, NW., Room 10220. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-200059-001

Title: Port of Oakland Terminal Use Agreement

Parties: Port of Oakland (Port), Canadian Transport Company, Ltd. (CTC)

Synopsis: The Agreement amends the basic agreement (Agreement No. 224-200059) whereby the Port assigns certain facilities in the Port's Charles P. Howard Terminal to CTC. It acknowledges that the occasional discharge of Star Shipping A/S (Star) container cargo at the therein assigned premises, pursuant to Agreement No. 224-200261 between the Port and Star, will not be included in Agreement No. 224-200059 with respect to provisions covering payment of modified tariff rates. It also provides that CTC's vessels loading or discharging Star's containers at Star's assigned premises at the Port's Seventh Street Marine Terminal shall be subject to the modified dockage rates set forth in Agreement No. 224-200059.

Agreement No.: 224-2000117-002

Title: Port Authority of New York and New Jersey Terminal Agreement

Parties: Port Authority of New York and New Jersey Atlantic Container Line BV (ACL)

Synopsis: The Agreement provides for certain adjustments to the lease language relating to terminal improvements to be performed by ACL.

By Order of the Federal Maritime Commission.

Dated: September 5, 1989.

[FR Doc. 89-21120 Filed 9-7-89; 8:45 am]

BILLING CODE 6730-01-M

Issuance of Certificate (Casualty); Trans World Cruises, Inc.

Notice is hereby given that the following have been issued a Certificate of Financial Responsibility to Meet Liability Incurred for Death or Injury to Passengers or Other Persons on Voyages pursuant to the provisions of Section 2, Public Law 89-777 (80 Stat. 1356, 1357) and Federal Maritime Commission General Order 20, as amended (46 CFR 540):

Trans World Cruises, Inc./Arcalia Shipping Company, c/o Freehill, Hogan & Mahar, 80 Pine Street, New York, New York 10005-1759.

Vessel: VASCO DA GAMA.

Dated: September 1, 1989.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies; Albert P. Qualls, Jr. et al.

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than September 22, 1989.

A. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *Albert P. Qualls, Jr.*, Fort Walton Beach, Florida; to acquire 68.05 percent of the voting shares of American National Financial Corporation, Panama City, Florida, for a total of 76.39 percent, and thereby indirectly acquire American National Bank, Panama City, Florida.

2. *James E. Dutmers, Jr.*, Traverse City, Michigan; to acquire 12.29 percent of the voting shares of Empire Banc Corporation, Traverse City, Michigan, and thereby indirectly acquire Empire National Bank of Traverse City, Traverse City, Michigan.

B. **Federal Reserve Bank of St. Louis** (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Dominic P. Riggio and Ninfa Riggio*, Du Quoin, Illinois; to acquire an additional 2.52 percent of the voting shares of Du Quoin Bancorp, Inc., Du Quoin, Illinois, and thereby indirectly acquire Du Quoin National Bank, Du Quoin, Illinois.

Board of Governors of the Federal Reserve System, September 1, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

[FR Doc. 89-21123 Filed 9-7-89; 8:45 am]

BILLING CODE 6210-01-M

United Bank Corporation of New York, et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than September 27, 1989.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. *United Bank Corporation of New York*, Downsville, New York; to acquire 100 percent of the voting shares of The First National Bank of Lisbon, Lisbon, New York.

B. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *First Chicago Corporation*, Chicago, Illinois, and American National Corporation, Chicago, Illinois; to acquire 100 percent of the voting shares of Citizens Holding Corporation, Genoa City, Wisconsin, and thereby indirectly acquire Citizens State Bank, Genoa City, Wisconsin.

C. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *First Bank Corp.*, Fort Smith, Arkansas; to become a bank holding company by acquiring 100 percent of the voting shares of First National Bank of Fort Smith, Fort Smith, Arkansas.

D. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Parkway Financial, Inc.*, Overland Park, Kansas; to become a bank holding company by acquiring 100 percent of the voting shares of Parkway Bank, in organization, Overland Park, Kansas.

E. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Tomball Capital Corporation*, Wilmington, Delaware; to become a bank holding company by acquiring 100 percent of the voting shares of Tomball National Bank, Tomball, Texas.

2. *Tomball National Bancshares, Inc.*, Tomball, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of Tomball National Bank, Tomball, Texas.

Board of Governors of the Federal Reserve System, September 1, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Salin Bancshares of North Central Indiana, Inc.; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than September 27, 1989.

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Salin Bancshares of North Central Indiana, Inc.*, Indianapolis, Indiana; to acquire Skyline Village, an Indiana Limited Partnership, Corunna, Indiana, and thereby engage in promoting community welfare by the construction and operation of low income housing in Markle, Indiana, pursuant to section 225.25(b)(6) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, September 1, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Family Support Administration

Forms submitted to the Office of Management and Budget for Clearance:

The Family Support Administration (FSA) will publish on Fridays information collection packages submitted to the Office of Management and Budget (OMB) for clearance, in compliance with the Paperwork Reduction Act (44 U.S.C., Chapter 35). Since the last scheduled publication for August 25, 1989, the following package was submitted to OMB:

(For a copy of the package below, call the FSA Reports Clearance Officer on 202 252-5598.)

(0970-0018) Quarterly Work Incentive Demonstration Program Report. The information prescribed in the information collection requirements is used by the Secretary, Department of Health and Human Services to compare the effectiveness of the WIN demonstrations to the former WIN programs in the 24 states that elected to participate in this option. This collection is a renewal.

Number of Respondents: 24, *Frequency of Response:* 4, *Total Annual Responses:* 96, *Average per Response:* 15 hours, *Estimated Annual Burden:* 1440 hours.

OMB Desk Clearance Officer: Justin Kopca.

Written comments and recommendations for the proposed information collections should be sent directly to the OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3201, 725 17th Street, NW., Washington, DC 20503.

Dated: August 28, 1989.

Sylvia E. Vela,

Acting Associate Administrator, Office of Management and Information Systems, FSA.

[FR Doc. 89-20918 Filed 9-7-89; 8:45 am]

BILLING CODE 4150-04-M

Food and Drug Administration

[Docket No. 89N-0330]

Levamisole Hydrochloride for Use in Goats; Data; Availability

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of safety, effectiveness, and environmental data to be used in support of a new animal drug application (NADA) or supplemental NADA for the use of levamisole hydrochloride in goats. The data, contained in Public Master File (PMF) 5117, were compiled under Interregional Research Project No. 4 (IR-4), a national agricultural program for obtaining clearances for use of agricultural products for minor or special uses.

ADDRESSES: Submit NADA's to Document Control Section (HFV-16), Center for Veterinary Medicine, Food and Drug Administration, Rm. 6B-45, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Dianne T. McRae, Center for Veterinary Medicine (HFV-135), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4913.

SUPPLEMENTARY INFORMATION: Levamisole hydrochloride drench for use in goats is a new animal drug use under section 201(w) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 321(w)). As a new animal drug, levamisole hydrochloride is subject to section 512 of the act (21 U.S.C. 360b) requiring that its uses in goats be subject to an approved NADA or supplemental NADA. Goats are a minor species under 21 CFR 514.1(d). The IR-4 Project, Northeastern Region, New York State College of Veterinary Medicine, Cornell University, Ithaca, NY 14853-6401, has provided data and information to demonstrate safety and effectiveness to the target animal for use of levamisole hydrochloride drench in goats for treatment and control of stomach worms (*Haemonchus contortus* and *Trichostrongylus axei*) and intestinal worms (*T. colubriformis*). The PMF contains data from one adequate and well-controlled effectiveness study in goats and tissue residue data from a study in goats. IR-4 has also provided an environmental assessment of the proposed use.

The data and information are contained in PMF 5117. Sponsors of NADA's or supplemental NADA's may reference without further authorization the PMF to support approval of an application filed under 21 CFR 514.1(d). An NADA or supplemental NADA should include, in addition to a reference to the PMF, drug labeling and other information needed for approval, such as data concerning human food safety; data supporting extrapolation from major species to fulfill effectiveness requirements; manufacturing methods; facilities and controls; and information addressing the potential environmental impacts of the manufacturing process. Persons desiring more information concerning the PMF or requirements for approval of an NADA may contact Dianne T. McRae (address above).

In accordance with the freedom of information provisions of Part 20 (21 CFR part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information in this PMF submitted to support approval of an application may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

Dated: August 31, 1989.

Richard H. Teske,

Deputy Director, Center for Veterinary Medicine.

[FR Doc. 89-21069 Filed 9-7-89; 8:45 am]

BILLING CODE 4160-01-M

Temporary Deferment of Activities Relating to Medical Device Submissions

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that the Office of Device Evaluation (ODE), Center for Devices and Radiological Health (CDRH) has completed the move from its former Silver Spring, MD location to Rockville, MD. FDA is announcing that during the period required for the move, June 26, 1989, through July 13, 1989 (18 calendar days), the agency, while continuing to accept mail, did not officially receive premarket notifications, premarket approval applications, or investigational device exemption applications, and did not continue its review of such pending submissions. The statutory review periods on pending submissions were suspended during this 18-day period needed for the relocation of ODE. The new address for submissions to ODE is set forth below.

ADDRESS: The new address for submissions to ODE is: Center for Devices and Radiological Health, Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850-4302.

FOR FURTHER INFORMATION CONTACT: Joseph M. Sheehan, Center for Devices and Radiological Health (HFZ-84), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4874.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of June 16, 1989 (54 FR 25705), FDA announced its intention to defer activities related to certain medical device submissions for about 10 days during ODE's move from Silver Spring, MD to Rockville, MD. FDA also announced that it would provide information on the exact period during which the activities were temporarily deferred, and provide the new address for submissions. The agency deferred its actions on new and existing submissions (as listed in the June notice) during the period June 26, 1989, through July 13, 1989 (18 calendar days). The new address for device submissions is provided above under the heading "**ADDRESSES**".

Dated: September 1, 1989.

Alan L. Hoeting,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 89-21131 Filed 9-7-89; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 89D-0342]

Diagnostic Ultrasound Medical Devices; Fetal Doppler Ultrasound; Availability

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of the Fetal Doppler Ultrasound Draft Guide and the summary minutes of two Obstetrics-Gynecology Devices Panel (the Panel) meetings at which the guide was discussed.

DATES: Comments by November 7, 1989.

ADDRESSES: Submit written requests for single copies of the guide and the summary minutes of the Panel meetings to the Division of Small Manufacturers Assistance, Center for Devices and Radiological Health (HFZ-220), 5600 Fishers Lane, Rockville, MD 20857. Send two self-addressed adhesive labels to assist that office in processing your requests. Submit written comments on the guide and the summary minutes of the Panel meetings to the Dockets Management Branch (HFA-305), Food and Drug Administration, Room 4-62, 5600 Fishers Lane, Rockville, MD 20857. Requests and comments should be identified with the docket number found in brackets in the heading of this document.

The guide and summary minutes of the Panel meetings and received comments are available for public examination in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Lillian Yin, Center for Devices and

Radiological Health (HFZ-470), Food and Drug Administration, 1390 Piccard Drive, Rockville, MD 20850, (301) 427-1180.

SUPPLEMENTARY INFORMATION: For almost 10 years, clinical investigators have been studying various ways of using diagnostic Doppler ultrasound instrumentation to evaluate the developing fetus. During this period, FDA considered such devices to be investigational and issued a letter to this effect on March 7, 1986. Because of its concern about the use of high output Doppler ultrasound transducers for fetal applications, FDA issued a January 30, 1987, letter to the industry containing guidance about transducer labeling. Although FDA withdrew its guidance (October 30, 1987) in the face of strong opposition to such labeling, it continued to seek regulatory means of ensuring that Doppler ultrasound devices, with their potential for higher energy delivered to the fetus, would be used as safely as possible. Over the past 3 years, FDA has been working with the diagnostic ultrasound industry, the relevant medical communities, and academia to develop a regulatory policy to allow commercial marketing of fetal Doppler ultrasound instrumentation that is safe and effective.

On June 3 and 4, 1988, FDA participated in a workshop cosponsored by the American Institute of Ultrasound in Medicine (AIUM) and the National Electrical Manufacturers Association (NEMA) to address the educational needs associated with fetal Doppler ultrasound. Following that, FDA convened the Panel on August 29, 1988, to identify obstetric applications of Doppler ultrasound with proven effectiveness and the information needed to demonstrate the effectiveness of a given instrument. After reviewing and discussing the clinical studies described in the published literature (as well as the AIUM draft statement on ultrasound bioeffects), the Panel concluded that fetal Doppler ultrasound could be indicated for two instances: (1) Detection of fetal cardiac structural anomalies and (2) detection of intrauterine growth retardation. The Panel emphasized that, for both endorsed indications, the instrumentation must be used adjunctively together with other diagnostic techniques and only for high risk pregnancies. The Panel also noted the significant importance of adequate clinical training.

Following the August meeting, FDA drafted a guide outlining the information needed on a given instrument for each of the two designated indications for use, together with rationale to employ 510(k) premarket notification as the regulatory pathway for placing such devices on the market. In particular, FDA proposed to allow manufacturers to introduce instrumentation with specialized user-system feedback features that would enhance user awareness of acoustic output. FDA also outlined the types of preclinical and clinical testing that would need to be conducted. After collaborative sessions with AIUM and NEMA, FDA presented these proposals to the Panel on January 19, 1989, in an open public forum, for comment and deliberation. The Panel unanimously agreed with FDA's proposals, but emphasized its concern that fetal Doppler ultrasound for low risk (assymptomatic) populations remains investigational subject to premarket approval provisions.

FDA now seeks to make the above information available for comment to a wider audience by publishing this notice of availability of the draft guide and summary minutes of the Panel meetings where the development of these policies was discussed in detail.

Dated: September 1, 1989.

Alan L. Hoeting,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 89-21198 Filed 9-7-89; 8:45 am]

BILLING CODE 4160-01-M

Health Resources and Services Administration

Final Funding Categories, Final Review Criteria and Funding Preference for Training Grants for Acquired Immunodeficiency Syndrome (AIDS) Regional Education and Training Centers Program

The Health Resources and Services Administration announces the final funding categories, review criteria and funding preference which will be used in making grant awards for the (AIDS) Regional Education and Training Centers Program (ETCs) for Fiscal Year 1989, as authorized by Section 301 of the Public Health Service Act, as amended.

The (AIDS) Regional Education Training Centers will provide training for health care personnel in the care of people with Acquired Immunodeficiency Syndrome AIDS and other conditions related to infection with the Human Immunodeficiency Virus (HIV). The goal of the training is to prepare community primary care providers, including health care workers in Federal health facilities, health professional trainees, and faculty, to be able to counsel, diagnose, and manage such patients and to prepare selected trainees to act as instructors in their local areas. The centers will operate in collaboration with health professions schools, community hospitals, health departments, and other organizations involved in the provision of care to people with HIV related conditions.

Program Objectives

The purpose of the training grant program is to support the development of AIDS Regional Education and Training Centers (ETCs) for the health provider community. The program objectives for each center are to: (1) Provide multidisciplinary education and training to primary care providers, health professional trainees, and faculty on prevention and treatment of HIV infection and its implications, with particular emphasis on ambulatory care settings; (2) provide guidance in the development of a multidisciplinary approach to the management of HIV infection; (3) select and provide additional training to certain participants to qualify them for extending the training to others in their community; (4) develop multidisciplinary curricula for care of the HIV infected, including culturally relevant materials; (5) provide updates of new and timely information about HIV infection to primary and secondary health care providers; (6) serve as the support system for area health professionals through regional hotlines, clearinghouses, and referral activities, and (7) provide information on the availability of clinical trial opportunities in order to assist patients to gain access to such trials.

All public and nonprofit private entities are eligible to apply for new grants. Eligible entities may include, but are not limited to, schools in academic health science centers; professional associations; consortia of health care and community organizations, e.g., Area Health Education Centers (AHECS); public or nonprofit private hospitals; and health departments which could develop AIDS education and training programs for health care providers.

Proposed funding categories, review criteria and a proposed funding preference were published in the **Federal Register** of June 22, 1989, (54 FR 26256), for public comment. No comments were received during the 30-day comment period.

Therefore, the funding categories, review criteria and funding preference as proposed will be retained as follows:

Final Funding Categories

Funds have been appropriated for these purposes by Pub. L. 100-436. Approximately $9.3 million is available in Fiscal Year (FY) 1989 for competitive grants.

1. Applications (new or supplemental) will be accepted for the expansion of existing ETCs and/or the development of additional ETCs. For the purpose of this announcement, high incidence is defined as more than 400 new AIDS cases from February 6, 1988 to February 6, 1989 as indicated in the Centers for Disease Control *AIDS Weekly Surveillance Report* dated February 6, 1989. Approximately $1.1 million is available for this purpose to support an estimated 2 new ETC centers.

2. Supplemental applications from established ETCs will be accepted to enhance efforts to train workers in federally funded comprehensive health care services projects and develop and introduce AIDS curricula in health professions schools. Approximately $2.0 million will be awarded for these activities ($1.3 million for training and $700,000 for curriculum development). These funds are being made available only to existing ETCs because their expertise and community experience make it more efficient for prompt initiation of both of these activities. In addition, providing supplemental funding for the ETCs ongoing activities is the most expedient and cost effective mechanism to achieve the maximum results with the funds available.

3. Supplemental applications from established ETCs will be accepted to conduct specialized training of health professionals regarding alcohol and other drug abuse, with an emphasis on the effects of alcohol and other drug abuse on the prevention and management of the HIV epidemic. In the conduct of this training, the provider should utilize previously developed health professions training materials dealing with the abuse of alcohol and other drugs and HIV infection. Approximately $275,000 is available for this effort which is to provide funding for 2-3 substantive, coordinated activities. Funds for this effort are made available only to the existing ETCs because of their experience in training primary care providers in the management of HIV patients. They have an established training process which can quickly reach primary care health professionals. In addition, utilization of existing ETCs for this purpose avoids needless and inefficient duplication of effort.

Final Review Criteria

Applications for new training grants will be reviewed and rated according to the applicant's ability to meet the following review criteria:

1. The degree to which the project plan adequately provides for meeting the project specifications;
2. The potential effectiveness of the project in carrying out the purposes of the grant program;
3. The capability of the applicant to conduct the proposed activities in a cost efficient manner;
4. The soundness of the fiscal plan for assuring effective utilization of grant funds; and
5. The potential of the project to continue on a self-sustaining basis after the period of grant support.

Final Funding Preference

A funding preference will be accorded an applicant proposing a center in a State where no federally funded ETC program office exists.

This program is listed at 13.145 in the *Federal Catalog of Domestic Assistance* and is not subject to the provisions of Executive Order 12372, Intergovernmental review of Federal Programs (as implemented through 45 CFR Part 100).

Dated: September 1, 1989.

John H. Kelso,

Acting Administrator.

[FR Doc. 89-21129 Filed 9-7-89; 8:45am]

BILLING CODE 4160-15-M

Public Health Service

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Public Health Service (PHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following requests have been submitted to OMB since the list was last published on Friday, August 25, 1989.

(Call PHS Reports Clearance Officer on 202-245-2100 for copies of package)

1. 1990 Client Sample Survey of Outpatient Programs—NEW—This voluntary data collection will provide the National Institute of Mental Health, the States, and the mental health field with statistics on the sociodemographic, clinical, and service characteristics of clients in outpatient programs of specialty mental health organizations. A scientific sample will be selected of the client admissions and clients under care in these programs. *Respondents:* State or local governments, businesses or other for-profit, Federal agencies or employees, non-profit institutions, small businesses or organizations; *Number of Respondents:* 730; *Number of Responses per Respondent:* 2.5; *Average Burden per Response:* 7.6153 hours; *Estimated Annual Burden:* 13,898 hours.

2. Alcoholism/Substance Abuse and Mental Health Tribal Provider Checklist—NEW—The Alcoholism/Substance Abuse and Mental Health Services program checklists will collect information from Tribal program staff under contract to the Indian Health Service (IHS), on the interaction between these two groups of health care workers in serving clients. Information collected will be used to plan joint training programs. The same information will be obtained concurrently from IHS employees who are counselors in these IHS programs. *Respondents:* Individuals; *Number of Respondents:* 590; *Number of Responses per Respondent:* 1; *Average Burden per Response:* 0.33 hours; *Estimated Annual Burden:* 195 hours.

3. *Hearing Aid Devices:* Professional and Patient Labeling and Conditions for Sale (21 CFR 801.420 and 801.421)—0910-0171—The regulation requires that data useful in selecting, fitting and checking the performance of a hearing aid will be provided in a user brochure. Data is used by the physicians, audiologists, and dispensers to evaluate the appropriateness of a hearing aid for the user. Respondents: Businesses or other for-profit, small businesses or organizations.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. N–89–1917; FR–2606]

Underutilized and Unutilized Federal Buildings and Real Property Determined by HUD To Be Suitable for Use for Facilities to Assist the Homeless

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized and underutilized Federal property determined by HUD to be suitable for possible use for facilities to assist the homeless.

EFFECTIVE DATE: September 8, 1989.

ADDRESS: For further information, contact Morris Bourne, Director, Transitional Housing Development Staff, Room 9140, Department of Housing and Urban Development, 451 Seventh Street SW, Washington, DC 20410; telephone (202) 755–9075; TDD number for the hearing- and speech-impaired (202) 426–0015. (These telephone numbers are not toll-free.)

SUPPLEMENTARY INFORMATION: In accordance with the December 12, 1988 Court Order in *National Coalition for the Homeless* v. *Veterans' Administration,* No. 88–2503–OG (D.D.C.), HUD is publishing this Notice to identify Federal buildings and real property that HUD has determined are suitable for use for facilities to assist the homeless. The properties were identified from information provided to HUD by Federal landlording agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or suplus Federal property.

The Order requires HUD to take certain steps to implement section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), which sets out a process by which unutilized or underutilized Federal properties may be made available to the homeless. Under section 501(a), HUD is to collect information from Federal landholding agencies about such properties and then to determine, under criteria developed in consultation with the Department of Health and Human Services (HHS) and the Administrator of General Services (GSA), which of those properties are suitable for facilities to assist the homeless. The Order requires HUD to publish, on a weekly basis, a Notice in the **Federal Register** identifying the properties determined as suitable.

The properties identified in this Notice may ultimately be available for use by the homeless, but they are first subject to review by the landholding agencies pursuant to the court's Memorandum of December 14, 1988 and section 501(b) of the McKinney Act. Section 501(b) requires HUD to notify each Federal agency with respect to any property of such agency that has been identified as suitable. Within 30 days from receipt of such notice from HUD, the agency must transmit to HUD: (1) Its intention to declare the property excess to the agency's need or to make the property available on an interim basis for use as facilities to assist the homeless; or (2) a statement of the reasons that the property cannot be declared excess or made available on an interim basis for use as facilities to assist the homeless.

First, if the landholding agency decides that the property cannot be declared excess or made available to the homeless for use on an interim basis the property will no longer be available.

Second, if the landholding agency declares the property excess to the agency's need, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law and the December 12, 1988 Order and December 14, 1988 Memorandum, subject to screening for other Federal use.

Finally, in lieu of declaring any particular property as excess, the landholding agency may decide to make the property available to the homeless for use on an interim basis.

Homeless assistance providers interested in any property identified as suitable in this Notice should send a written expression of interest to HHS, addressed to Judy Breitman, Division of Health Facilities Planning, U.S. Public Health Service, HHS, Room 17A–10, 5600 Fishers Lane, Rockville, MD 20857; (301) 443–2265. (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit such written expressions of interest within 30 days from the date of this Notice. For complete details concerning the timing and processing of applications, the reader is encouraged to refer to HUD's **Federal Register** Notice on June 23, 1989 (54 FR 26421), as corrected on July 3, 1989 (54 FR 27975).

For more informaiton regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: U.S. Army: (Military Facilities) HQ–DA, Attn: DAEN–ZCI–P–Robert Conte; Room 1E671 Pentagon, Washington, DC 20360–2600 (202) 693–4583; (Corps of Engineers civil works projects) Bob Swieconek, HQ–US Army Corps of Engineers, Attn: Cere–MN, 20 Massachusetts Avenue NW., Washington, DC 20415–1000 (202) 272–1750; GSA: James Folliard, Federal Property Resources Services, GSA, 18th and F Streets NW, Washington, DC 20405 (202) 535–7067; U.S. Navy: Andrea Wohfeld, Code 20 YAW, Naval Facilities Engineering Command, 200 Stovall Street, Alexandria, VA 22332 (202) 325–7342. (These are not toll-free numbers.)

Dated: August 31, 1989.

James E. Schoenberger,

General Deputy Assistant Secretary for Housing—Federal Housing Commissioner.

Suitable Land—By State

Number of properties ()

Alabama

Fort Rucker (1),
Cairns Army Airfield,
Fort Rucker, AL.
Agency: Army.
Location: Property 63002T.

Comment: 720 sf trailer in restricted area; poor condition.

Kansas

Portion, Kanopolis Lake (1),
Elsworth County, KS.
Agency: GSA.
Location: Property 7–D–KS–499–C.

Comment: Parcel is 10.6 acres. Between ⅛ and ⅛ is suitable.

Suitable Buildings

Alabama

Fort Rucker (1),
Lowe Army Heliport,
Fort Rucker, AL.
Agency: Army.
Location: Property S4005T.

Comment: 800 sf trailer in partially restricted area; poor condition.

Arizona

Building KI–2000, Health Clinic (1),
Navaho Reservation,
Kaibeto, AZ.
Agency: GSA.

Comment: Use restricted to Navaho Indians (to be transferred to the Dept. of Interior).

Public Health Service Indian Hospital (1),
Fort Apache Reservation,
Whiteriver, AZ.
Agency: GSA.

Comment: 7 metal trailers on reservation; restricted to use of Indian tribe.

Georgia

Fort Benning Military Reservation (13),
Fort Benning, GA.
Agency: Army.
Location: Property 5267, 5268, 5269, 5270, 5271, 5272, 5273, 5274, 5275, 5276, 5277, 5278, 5279.

Comment: 13 trainee barracks, 4248 sf each; poor condition; no public transportation.

Fort Benning Military Reservation (1),
Fort Benning, GA.
Agency: Army.
Location: Property 5286.

Comment: Detachment dayroom, 1400 sf; no public transportation.

Fort Benning Military Reservation (1),
Fort Benning, GA.
Agency: Army.
Location: Property 278.

Comment: Very small storage building, 376 sf.

Fort Benning Military Reservation (1),
Fort Benning, GA.
Agency: Army.
Location: Property 275.

Comment: Large storehouse, 4055 st.

Fort Benning Military Reservation (1),
Fort Benning, GA.
Agency: Army.
Location: Property 276.

Comment: Small storage building, 438 sf.

Fort Benning Military Reservation (1),
Fort Benning, GA.
Agency: Army.
Location: Property 4954.

Comment: Custody facility, 3776 sf; estimated cost to modify for occupancy: $70,000.

Fort Benning Military Reservation (1),
Fort Benning, GA.
Agency: Army.
Location: Property 4092.

Comment: Small storage building, 336 sf.

Nebraska

VA Medical Center (20),
600 South 70th Street,
Lincoln, NE.
Agency: GSA.
Location: Building 20; 3420 sf.

Comment: Building interior has been severely vandalized. Eligible as historic site.

New York

Stewart Army Subpost (1), 1210 Brenning Road, New Windsor, NY. Agency: Army. Location: Property 1942.

Comment: One building, 25,690 sf.

Unsuitable land

California

Waterline—Keswick Dam Road (1), Redding, CA. Agency: GSA. Location: Property 9–B–CA–1302.

Comment: Property is a waterpipe; government does not own land.

New York

Naval Reserve Center (4), 112 House Avenue, Freeport NY. Agency: Navy. Location: Property 42, 718 SF; 40, 990 SF.

Comment: Contamination; partially buried oil tanks; all buildings contain extensive friable asbestos.

Unsuitable Buildings

Hawaii

Portion, South Point Air Force Station (6), Naalehu, HA. Agency: GSA. Location: Approximately 70 miles SW of Hilo and 85 miles SE of Kona.

Comment: Abandoned fuel tank which may be leaking; exposed friable asbestos.

Idaho

Sawtooth National Recreation Area (14), Ketchum, ID. Agency: GSA. Location: Property 9–A–ID–506D.

Comment: Remote area; no existing means to provide power water, sewage, heating systems.

North Carolina

Building 1–3358 (1), Fort Bragg, NC. Agency: Army.

Comment: Building unsafe due to termite infestation.

New York

Naval Reserve Center (4), 112 House Avenue, Freeport, NY. Agency: Navy. Location: 42, 718sf; 40, 990sf.

Comment: Contamination; within 2000 ft from flammable or explosive material; partially buried tank; all buildings contain extensive friable asbestos.

Utah

Tooele Army Depot (282), Tooele, UT. Agency: Army. Location: Various buildings.

Comment: Secured facility with no alternative public access.

Tooele Army Depot, North Area (3), Tooele, UT. Agency: Army. Location: Property 130, 105, 132.

Comment: Friable asbestos.

Virginia

Fort Lee (2), Shop Road, Fort Lee, VA. Agency: Army. Location: Property 6005, 6011.

Comment: Very serious deterioration of roof and floors; buildings must be removed from site.

Fort Lee (3), Byrd Avenue, Fort Lee, VA. Agency: Army. Location: Property 4100, 4101, 4103.

Comment: Serious deterioration of roof and floors; major cannibalization of useful parts.

West Virginia

Former Naval & Marine Reserve Center (1), 13th and Ohio River, Wheeling, WV. Agency: Navy.

Comment: Building only, land leased from city; serious friable asbestos.

BILLING CODE 4210-27-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Receipt of Application for Permit

The public is invited to comment on the following application for a permit to conduct certain activities with marine mammals. The application was submitted to satisfy requirements of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*) and the regulations governing marine mammals (50 CFR part 18).

Applicant: U.S. Fish and Wildlife Service, File No. PRT 690038, Alaska Office of Fish and Wildlife Research, 1011 E. Tudor Road, Anchorage, Alaska 99503

Type of Permit: Scientific Research

Name and number of Animals: Polar bear (*Ursus maritimus*); up to 200 per year

Summary of Activity to be Authorized: The applicant proposes to amend his current marine mammal permit PRT 690038 to include testing of the Bio-Electrical Impedance (BIA) as a means of measuring the fat and fat-free body mass of polar bears that are already authorized to be taken under the permit

Source of Marine Mammals for Display: Alaska

Period of Activity: Through 1990

Concurrent with the publication of this notice in the **Federal Register**, the Office of Management Authority is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors for their review.

Written data or comments, requests for copies of the complete application, or requests for a public hearing on this application should be submitted to the Director, Office of Management Authority (OMA), P.O. Box 3507, Washington, DC 22203–3507, within 30 days of the publication of this notice. Anyone requesting a hearing should give specific reasons why a hearing would be appropriate. The holding of such hearing is at the discretion of the Director.

Documents submitted in connections with the above application(s) are available for review during normal business hours (7:45 am to 4:15 pm) at 4401 Fairfax Drive, Room 430, Washington, DC.

Dated: September 1, 1989.

R.K. Robinson,

Chief, Branch of Permits, Office of Management Authority.

Grazing Advisory Board; Meeting

AGENCY: Bureau of Land Management, Interior, Susanville District Grazing Advisory Board, Susanville, California.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given that the Susanville District Grazing Advisory Board, created under the Secretary of the Interior's discretionary authority on May 14, 1986, will meet on September 28, 1989.

The September 28 meeting will begin at 10:00 a.m. at the Surprise Resource Area Office, Bureau of Land Management, 602 Cressler Street, Cedarville, California.

Subjects to be covered during the meeting will be a discussion about FY 1990 proposed range improvement projects, proposed helicopter gathering of wild horses and burros for FY 1990, a report of the progress of R.C. Roberts trailing permit, expenditure of Section 10 funds, a report on FY 1989 progress, and

a discussion of other items as appropriate.

The meeting is open to the public. Interested persons may make oral statements to the Board between 3:00 p.m. to 4:30 p.m. on September 28, 1989 or file a written statement for the Board's consideration. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, 705 Hall Street, Susanville, California 96130 by September 25, 1989. Depending on the number of persons wishing to make oral statements, a per person time limit may be established.

Summary minutes of the Board meeting will be maintained in the District Office, and will be available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

Herrick E. Hanks,

District Manager.

[CA-010-09-4212-13, CA 25864]

Realty Action—Acquisition of Private Lands by Exchange in Mariposa County, California

AGENCY: Bureau of Land Management, Interior.

SUMMARY: The following described private lands are being considered for acquisition by the United States by way of a land exchange under sec. 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716):

Offered Private Land:

Mariposa County, California

T. 3 S., R. 18 E., MDM
  Sec. 25: NE¼SE¼, E½SW¼
  Sec. 35: SE¼NE¼, W½NE¼, NW¼SE¼
  Sec. 36: N½NW¼
T. 4 S., R. 18 E., MDM
  Sec. 2: lots 6 through 11, inclusive
  Sec. 10: lots 18 and 19

Aggregating 600 acres, more or less.

The proponent is the Trust for Public Land, 116 New Montgomery Street, San Francisco, California 94105.

This notice deals exclusively with the offered private lands listed above. This is because the Federal lands were previously published for exchange to the proponent and the 45 day public comment period has been completed. The publication of this notice is for the purpose of soliciting comments on the offered private lands as listed above and does not reopen the comment period for the selected Federal lands previously published. The selected Federal lands were previously published in the **Federal Register** as follows: Vol. 54, No. 2, Jan. 4, 1989, pg. 194 (CA 23982); Vol. 54, No. 21, Feb. 2, 1989, pg., 5282 (CA 23982 amendment); Vol. 53, No. 42, March 3, 1988, pg. 6878 (CA 21707).

The purpose for acquiring the offered private land is to improve the Bureau's management capabilities on the Merced River. The United States would be acquiring river-front properties that are adjacent to several thousand acres of public land. This exchange is particularly significant because the land to be acquired by the U.S. is located on a section of the Merced River that is a designated part of the National Wild and Scenic River System. This action involves the transfer of both the surface and mineral estate for all parcels to be exchanged.

DATE: Comments concerning the offered private lands listed in this notice may be submitted to the District Manager on or before October 23, 1989. Any comments need to specify which parcel is being referred to.

ADDRESS: Comments should be sent to the District Manager, c/o the Area Manager, Folsom Resource Area, 63 Natoma Street, Folsom, California 95630.

FOR FURTHER INFORMATION CONTACT: Mike Kelley at (916) 985–4474 or at the address listed above.

Date: September 1, 1989.

D. K. Swickard,

Area Manager.

BILLING CODE 4310-JB-M

Realty Action—Direct Sale of Public Lands in Lane County, Oregon

[OR-45323; OR-090-09-4212-14: GP9-325]

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action—direct sale of public lands in Lane County, Oregon.

The following land is suitable for direct sale under section 203 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1713, at no less than the appraised fair market value. The land will not be offered for sale until at least 60 days after publication of this notice:

Willamette Meridian, Oregon

T. 21 S., R. 2 W.,
  Sec. 7: Lot 2

Containing 0.26 acre

The above described land is hereby segregated from appropriation under the public land laws, including the mining laws, but not from sale under the above cited statute, for 270 days or until title transfer is completed or the segregation is terminated by publication in the **Federal Register**, whichever occurs first.

This land is difficult and uneconomic to manage as part of the public lands and is not suitable for management by another Federal agency. No significant resource values will be affected by this disposal. The sale is consistent with BLM's planning for the land involved and the public interest will be served by the sale.

Purchasers must be U.S. citizens, 18 years of age or older, a state or state instrumentality authorized to hold property, or a corporation authorized to own real estate in the state in which the land is located.

The land is being offered to Donovan R. and Donna D. Holbrook using the direct sale procedures authorized under 43 CFR 2711.3–3. Direct sale is appropriate since the land has been inadvertently occupied by part of the Holbrook' house and yard for many years and direct sale will resolve the unauthorized use while preserving the Holbrook's equity in the improvements.

The terms, conditions, and reservations applicable to the sale are as follows:

1. A right-of-way for ditches and canals will be reserved to the United States under 43 U.S.C. 945.

2. All materials in the land will be reserved to the United States in accordance with section 209 of the Federal Land Policy and Management Act of 1976.

3. Patent will be issued subject to all valid existing rights and reservations of record.

4. The sale will be subject to:

a. Such rights for public road purposes as Lane County, Oregon, or its successors in interest may have pursuant to a road right-of-way R.S. 2477 (43 U.S.C. 932).

Detailed information concerning the sale, including the reservations, sale procedures and conditions, and planning and environmental documents, is available at the Eugene District Office, P.O. Box 10226, 1255 Pearl Street, Eugene, Oregon 97440.

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, Bureau of Land Management, at the above address. Objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In absence of any objections, this realty action will become the final determination of the Department of the Interior.

Dated: September 1, 1989.

Ronald L. Kaufman,

District Manager.

BILLING CODE 4310-33-M

[OR-090-09-4212-13; GP9-324: OROR 45339]

Realty Action—Exchange; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action—exchange of public lands in Lane County, Oregon.

SUMMARY: The following described public land is being considered for transfer out of Federal ownership by exchange under section 206 of the Federal Land Policy and Management Act of 1986 (43 U.S.C. 1716):

Willamette Meridian, Oregon

T. 15 S., R. 6 W.
  Sec. 35: NE¼NE¼
  Containing 40.00 acres in Lane County.

In exchange for these lands, the United States will acquire the following described lands from Rosboro Lumber Company:

Willamette Meridian, Oregon

T. 17 S., R. 3 E.
  Sec. 3: Lot 4
  Sec. 9: Lot 5
  Sec. 11: Lot 3
  Containing 80.37 acres in Lane County.

The purpose of the exchange is to bring into public ownership three parcels of land on the McKenzie River with important public values. The public land to be exchanged in an isolated parcel without legal access. The private lands being offered have important scenic quality, recreation, wildlife habitat and timber values. These lands will be managed to preserve existing scenic qualities and, where compatible, for multiple use. The public interest will be well served by making this exchange. The final determination on disposal will await completion of an environmental assessment.

The value of the lands to be exchanged is approximately equal and adjustments in the volume of timber on the lands to be exchanged will be made in order to bring the values as close as possible upon completion of the final appraisal of the lands. Full equalization of values will be achieved by payment to the United States of funds in an amount not to exceed 25 percent of the total value of the public land to be transferred. All mineral rights are expected to be transferred with the surface with the exception of oil and gas rights on the federal tract.

The exchange will be subject to:

1. All valid existing rights, including any right-of-way, easement, permit or lease of record.

2. A reservation to the United States of a right-of-way for ditches and canals constructed by authority of the United States under the Act of August 30, 1890 (43 U.S.C. 945).

Publication of this notice in the **Federal Register** segregates the public land, described above, from apropriation under the public land laws, including the mining laws, but not from exchange pursuant to section 206 of the Federal Land Policy and Management Act of 1976. The segregative effect of this notice will terminate upon issuance of patent or in two years, whichever occurs first.

DATE: For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the Eugene District Manager at the address shown below. Any objections will be reviewed by the Oregon State Director, Bureau of Land Management, who may sustain, vacate, or modify this reality action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

ADDRESSES: Detailed information concerning this exchange is available for review at the Eugene District Office, P.O. Box 10226 (1255 Pearl Street), Eugene, Oregon 97440.

FOR FURTHER INFORMATION CONTACT: Ronald Wold, Eugene District Office, at (503) 683–6403.

Date of Issue: August 30, 1989.

Ronald L. Kaufman,

District Manager.

BILLING CODE 4310-33-M

[NM-040-4410-08]

Kansas Resource Management Plan

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability: proposed issues and planning criteria.

SUMMARY: The Bureau of Land Management (BLM), Tulsa District, Oklahoma Resource Area (ORA), has completed the public scoping process for the Resource Management Plan (RMP) and Environmental Impact Statement (EIS) for BLM managed Federal lands and minerals throughout the State of Kansas. The result of this scoping effort, the Issue and Criteria document, proposes oil and gas leasing as the only issue to be addressed and analyzed within the Kansas RMP/EIS.

AVAILABILITY: The Issue and Criteria document has been sent to all persons on the Kansas RMP/EIS mailing list. Additional copies of the Issue and Criteria document are available upon request from the ORA manager at the address below.

DATE: Comments relating to the Issue and Criteria document will be accepted until November 6, 1989.

ADDRESS: Comments on the RMP issues and criteria or requests to be included on the mailing list sould be sent to: Paul W. Tanner, Area Manager, Oklahoma Resource Area, 200 NW Fifth Street, Room 548, Oklahoma City, OK 73102.

FOR FURTHER INFORMATION CONTACT: Paul W. Tanner, Area Manager, or Brian Mills, RMP Team Leader, Oklahoma Resource Area, (405) 231–5491.

SUPPLEMENTARY INFORMATION: The planning area for the Kansas RMP includes all BLM managed Federal surface and mineral estate within Kansas. The Federal mineral estate encompasses over 744,000 acres of both split estate minerals (Fed. minerals under private or State surface) and minerals under other Federal surface management agencies lands. Not included, are Federal minerals under the U.S. Forest Service managed Cimarron National Grassland. Planning on the USFS lands will be accomplished by the Pike and San Isabel National Forest.

The public has been invited to participate in this land use planning effort, beginning with the identification of issues and planning criteria. BLM held a series of public scoping meetings at which time oral comments and suggestions were accepted.

Public notice for coal and other resource information and indications of interest and needs pursuant to 43 CFR 3420.1–2, for inclusion in the Kansas RMP, was solicited through both the **Federal Register** and News Releases. Coal companies, state and local governments, and the general public were encouraged to submit information to the BLM to assist in the determinations of coal development potential and possible conflicts with other resources.

The lack of interest in developing the Federal coal resource has resulted in the elimination of coal considerations as a potential planning issue. The issue to be addressed by the Kansas RMP will be Federal Oil and Gas Leasing and Development. This issue will include:

1. Determining which areas will be open for leasing and development subject to standard lease terms and conditions.

2. Determining which areas will be open for leasing and development subject to minor constraints such as seasonal restrictions, (wildlife, recreation, etc.).

3. Determining which areas will be open for leasing and development subject to major constraints such as No-Surface Occupancy (NSO) stipulations on areas larger than 40 acres in size or more than ¼ mile in width.

4. Determining which areas will be closed to leasing.

5. Determining which of the previous listed categories existing leases will be subject to upon lease termination.

The proposed planning criteria includes:

1. All proposed actions must comply with laws, executive orders and regulations.

2. For each proposed action, the resource outputs must be reasonable and achievable with available technology.

3. All proposed actions must recommend resource allocations which are in accordance with the principles of multiple-use and sustained yield.

4. All proposed actions must evaluate and consider long term benefits to the public in relation to short term benefits.

5. All proposed actions must provide for the orderly development of leasable minerals while containing environmental impacts to a minimum.

The planning issue and proposed planning criteria are presented for public comment and are subject to change based upon such public comment.

Comments should be received by November 6, 1989. The planning team will seek public involvement throughout the planning process.

Complete records of all phases of the planning process will be available for public review at the Oklahoma Resource Area Office at the address above. Draft and final RMP/EIS documents will be available upon request.

Dated: August 31, 1989.

Larry L. Woodard,

State Director.

BILLING CODE 4310-FB-M

[ID-943-09-4214-11; IDI-05384]

Proposed Continuation of Withdrawal; Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Forest Service, Department of Agriculture, proposes that a 149.15 acre withdrawal for eight recreation and two administrative sites continue for an additional 30 years. The land is being used for recreation and administrative site purposes. These lands will remain closed to surface entry and mining, but have been and would remain open to mineral leasing.

EFFECTIVE DATE: Comments should be received, on or before September 7, 1989.

FOR FURTHER INFORMATION CONTACT: Larry R. Lievsay, Idaho State Office, BLM, 3380 Americana Terrace, Boise, Idaho 83706, 208–344–1735.

The U.S. Forest Service proposes that the existing land withdrawal made by Public Land Order No. 1376 be continued for a period of 30 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, insofar as it affects the following described land:

Boise Meridian

Phillips Creek Recreation Area
T. 15 N. R. 14 E. (unsurveyed)
  Sec. 27, metes and bounds description within SE¼SW¼.
Josephus Lake Recreation Area
T. 14 N., R. 11 E. (unsurveyed)
  Sec. 17, metes and bounds description within N½N½NE¼SE¼ and S½S½SE¼NE¼.
Seafoam Administrative Site
T. 14 N., R. 11 E. (unsurveyed)
  Sec. 13, metes and bounds description within SW¼SW¼;
  Sec. 14, metes and bounds description within N½NW¼.
Wildhorse Recreation Area
T. 6 N., R. 20 E. (unsurveyed)
  Sec. 29, metes and bounds description within NE¼.
Flat Rock Recreation Site
T. 11 N., R. 15 E. (unsurveyed)
  Sec. 8, metes and bounds description within SE¼SE¼.
Blind Creek Recreation Site
T. 11 N., R. 15 E. (unsurveyed)
  Sec. 17, metes and bounds description within NW¼SW¼.
Beaver Creek Recreation Area
T. 13 N., R. 11 E. (unsurveyed)
  Sec. 35, metes and bounds description within S½.
Mill Creek Recreation Site
T. 13 N., R. 17 E. (unsurveyed)
  Sec. 10, metes and bounds description within NE¼NE¼.
Indian Springs Administrative Site
T. 15 N., R. 13 E.
  Sec. 2, metes and bounds description within NW¼NE¼.

The areas described aggregate 149.15 acres in Custerand Lemhi Counties.

The withdrawal is essential for protection of substantial capital improvements on the recreation and administrative sites. The withdrawal closed the described land to surface entry and mining but not to mineral leasing.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuation may present their views in writing to the Idaho State Director at the above address.

The authorized officer of the Bureau of Land Management will undertake such investigations as necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued; and if so, for how long. The final determination of the withdrawal will be published in the **Federal Register**. The existing withdrawal will continue until such final determination is made.

Dated: August 30, 1989.

William E. Ireland,

Chief, Realty Operations Section.

BILLING CODE 4310-GG-M

[AZ-050-06-4333-11]

Arizona: Long-Term Visitor Permit Program for 1989–1990 and Subsequent Use Seasons; Revision to Existing Supplementary Rules; Yuma District, Arizona, and California Desert District, California

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Changes to the Long-Term Visitor Permit Program for the 1989–1990 and subsequent use seasons, and revisions to and establishment of supplementary rules in the Yuma District, Arizona, and the California Desert District, California.

SUMMARY: The BLM's Yuma District and California Desert District announce revisions to the "Long-Term Visitor Program" for the 1989–1990 and subsequent use seasons. The program, which was instituted in 1983, establishes an annual long-term use season from September 15 to April 15. During this time, visitors who wish to camp on public lands in one location for extended periods must stay in designated Long-Term Visitor Areas (LTVAs) and purchase a $25 LTVA permit. Beginning with the 1989-1990 use season, the following modificaitons are being made to the Long-Term Visitor Program:

1. The La Posa LTVA may no longer be occupied without an LTVA or a guest permit during the period of operation of the annual Quartzite Pow Wow.

2. In addition to rules of conduct set forth in Title 43 of the Code of Federal Regulations (CFR), Part 8365.1–6, the following changes to the LTVA supplementary rules established September 15, 1988, apply to designated LTVAs.

a. Stipulation 7 shall be reworded to read as follows: "7. Unoccupied Camping Units. Camping sites or dwelling unit(s) must not be left unoccupied within any LTVA for periods of greater than 5 days unless approved in advance by the authorized officer."

b. Stipulation 12 shall be reworded to read as follows: "12. Self-Contained Vehicles. In Pilot Knob, Dunes Vista, Midland, Tamarisk, and Hot Springs LTVAs, camping is restricted to self-contained camping units only. The La Posa LTVA is restricted to self-contained camping units except within 500 feet of a BLM vault toilet. The Imperial Dam LTVA is also restricted to self-contained units except in the South Mesa area. Self-contained units must have a permanently affixed wastewater holding tank of 10 gallon minimum capacity."

c. Stipulation 13 shall be divided into two stipulations. The reference to speed limits will remain stipulation 13 and read as follows: "The speed limit in LTVAs is 15 MPH, or as otherwise posted." The reference to off-highway vehicle use shall be made a separate stipulation, to read as follows: "14. Off-Highway Vehicle Use. Motorized vehicle free play is prohibited. Motorized vehicles should be used in LTVAs only for access to and from campsites."

d. Stipulation 15 shall be reworded to read as follows: "15. Pets. Pets must be kept on a leash at all times. Keep an eye on your pets. Unwatched pets may fall prey to coyotes or other desert predators. Pet owners are responsible for cleanup and sanitary disposal of pet waste."

e. Stipulation 18 shall be reworded to read as follows: "18. Quiet hours. Quiet hours are from 10 p.m. to 6 a.m. in accordance with applicable State time zone standards."

All other stipulations as established on September 15, 1988, shall remain the same.

EFFECTIVE DATE: September 15, 1989.

FOR FURTHER INFORMATION CONTACT: Don Applegate, Outdoor Recreation Planner, Yuma District, 3150 Winsor Avenue, Yuma, Arizona 85365, 602–726–6300; or David Mensing, Outdoor Recreation Planner, California Desert District, 1695 Spruce Street, Riverside, California 92507, 714–351–6402.

SUPPLEMENTARY INFORMATION: The purpose of the Long-Term Visitor Program is to provide areas for long-term winter camping use. The sites designated as LTVAs are, in most cases, the traditional use areas of long-term visitors. Designated sites were selected using criteria developed during the land management planning process, and environmental assessments were completed for each site location.

The program was established to safely and properly accommodate the increasing demand for long-term winter visitation and to provide natural resource protection through improved management of this use. The designation of LTVAs assures that specific locations are available for long-term use year after year and that inappropriate areas are not used for extended periods.

Visitors may camp without an LTVA permit outside of LTVAs, on public lands not otherwise posted or closed to camping, for up to 14 days in any 28-day period. The Mule Mountain LTVA is also open to short-term camping without an LTVA permit for a period not to exceed 14 days.

Authority for the designation of LTVAs is contained in 43 CFR 8372.0–3 and 0–5(g). Authority for the establishment of a Long-Term Visitor Permit Program is contained in 43 CFR 8372.1, and for the payment of fees is contained in 36 CFR part 71.

The authority for establishing supplementary rules is contained in CFR Title 43, Chapter II, 8365.1–6. The LTVA supplementary rules have been developed to meet the goals of individual resource management plans. These rules will be available in each local office having jurisdiction over the lands, sites, or facilities affected and posted near and/or within the lands, sites, or facilities affected. Violations of supplementary rules are punished by a fine not to exceed $1,000 and/or imprisonment not to exceed 12 months.

Maps showing the location of all LTVAs are available at both the California Desert District and Yuma District Offices.

Ed Hastey,

State Director, California.

D. Dean Bibles,

State Director, Arizona.

Realty Action; Correction To Exchange of Public Lands in San Benito County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Correction of notice of realty action, exchange of public and private lands (CA 19806).

SUMMARY: This document corrects the Notice of Realty Action (CA 19806) published in Vol. 53, pages 8807–8808, March 17, 1988. The above referenced notice should have included the following described land:

Mt. Diablo Meridian, California

T. 15 S., R. 9 E.
Section 10, E½SE¼
Containing 80.00 acres.

SUPPLEMENTAL INFORMATION: The above described land was inadvertently omitted from the land description in the above notice which is hereby corrected to include it. The parcel is contiguous with the rest of the land to be exchanged to the Bureau of Land Management.

For a period of 45 days from publication of this notice in the **Federal Register**, interested parties may submit comments to the Area Manager, Hollister Resource Area Office, P.O. Box 365, Hollister, CA 95024–0365.

FOR FURTHER INFORMATION CONTACT: Steve Addington, Hollister Resource Area Office (408) 637–8183, or at the above address.

Dated: September 1, 1989.

Minerals Management Service

Development Operations Coordination Document; Kerr-McGee Corp.

AGENCY: Minerals Management Service.

ACTION: Notice of the receipt of a proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Kerr-McGee Corporation has submitted a DOCD describing the activities it proposes to conduct on Lease OCS–G 4832, Block 108, Main Pass Area, offshore Louisiana and Mississippi. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an existing onshore base located at Hopedale, Louisiana.

DATE: The subject DOCD was deemed submitted on August 28, 1989. Comments must be received within 15 days of the publication date of this Notice or 15 days after the Coastal Management Section receives a copy of the plan from the Minerals Management Service.

ADDRESSES: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44487, Baton Rouge, Louisiana 70805.

FOR FURTHER INFORMATION CONTACT: Warren Williamson; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736–2874.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective May 31, 1988 (53 FR 10595).

Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: August 30, 1989.

DEPARTMENT OF JUSTICE

Lodging of Consent Order Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a proposed consent order in *United States* v. *Acton Corporation, et al.,* Civil Action No. 89–3652 has been lodged with the United States District Court for the District of New Jersey on August 25, 1989. The proposed consent order concerns cleanup of a hazardous waste site known as the Lone Pine Landfill Site, which is located in Freehold Township, Monmouth County, New Jersey. The proposed consent order requires defendants to perform a cleanup at the Site, and pay certain United States Environmental Protection Agency costs.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent order. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Acton Corporation, et al.,* D.J. Ref. 90–11–2–294.

The proposed consent order may be examined at the office of the United States Attorney, 502 Federal Building, 970 Broad Street, Newark, New Jersey 07102, and the Region II Office of the Environmental Protection Agency, 26 Federal Plaza, New York, New York 10278. Copies of the consent order may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1517, Ninth Street and Pennsylvania Avenue, Washington, DC 20530. A copy of the proposed consent order may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $24.10 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

Myles E. Flint,

Acting Assistant Attorney General, Land Land Natural Resources Division.

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S–3504, Washington, DC 20210.

New General Wage Determinations Decisions

The numbers of the decisions added to the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" are listed by Volume State and page number(s).

Volume I

New Jersey:

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC, this 1st day of September, 1989.

Robert V. Setera,

Acting Director, Division of Wage Determinations.

BILLING CODE 4510-27-M

Employment and Training Administration

[TA-W-22,897]

Levolor-Lorentzen, Inc., Weirton, WV; Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on June 30, 1989 applicable to all workers of Levolor-Lorentzen, Inc., Weirton, West Virginia.

Based on new information from the company, a few workers including truck drivers were separated from Levolor-Lorentzen, Inc., in Weirton, West Virginia a few weeks prior to the impact date. The notice, therefore, is amended by changing the impact date to April 17, 1988.

The amended notice applicable to TA-W-22,897 is hereby issued as follows:

All workers of Levolor-Lorentzen, Incorporated, Weirton, West Virginia engaged in the production of venetian blinds and who became totally or partially separated from employment on or after April 17, 1988 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 30th day of August 1989.

Robert O. Deslongchamps,

Director, Office of Legislation and Actuarial Services, UIS.

[FR Doc. 89-21175 Filed 9-7-89; 8:45 am]

BILLING CODE 4510-30-M

[TA-W-21,912 et al.]

Noble Drilling Corp./Temple Drilling Co.; Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In the matter of TA-W-21,912 Noble Drilling Corporation, New Orleans, Louisiana, TA-W-21,913 Noble Drilling Corporation, Williston, North Dakota, TA-W-21,913A Noble Drilling Corporation, All Locations in Montana and TA-W-21,912A Temple Drilling Company, Houston, Texas, TA-W-21,912B Temple Drilling Company, Broussard, LA.

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued Certifications of Eligibility to Apply for Worker Adjustment Assistance on January 31, 1989 applicable to all workers of Noble Drilling Corporation, New Orleans, Louisiana and Williston, North Dakota. The certifications were amended on March 10, 1989 to include workers at a predecessor-in-interest firm (Temple Drilling Company) in Houston, Texas and Broussard, Louisiana. The amended notice was published in the Federal Register on March 27, 1989 (54 FR 12508).

New information from the company shows worker separations in November 1985 in the State of Montana. The Noble Drilling Company operated rigs in the Williston Basin in 1985 which encompasses Western North Dakota and Eastern Montana. Workers were moved back and forth across the state lines and several were laid off in Montana.

The notice, therefore, is amended by including coverage under TA-W-21,913 for workers of Noble Drilling Company in Montana.

The intent of the certifications is to cover all workers of Noble Drilling Corporation, New Orleans, Louisiana, Williston, North Dakota and all locations in Montana and its Predecessor-in-interest firm, Temple Drilling Company, Houston, Texas and Broussard, Louisiana. The amended notice applicable to TA-W-21,912 and TA-W-21,913 is hereby issued as follows:

All workers of Noble Drilling Corporation, New Orleans, Louisiana, Williston, North Dakota and all locations in Montana and its predecessor-in-interest firm, Temple Drilling Company, Houston, Texas and Broussard, Louisiana who became totally or partially separated from employment on or after October 1, 1985 and before June 30, 1987 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 30th day of August 1989.

Robert O. Deslongchamps,

Director, Office of Legislation and Actuarial Services, UIS.

BILLING CODE 4510-30-M

Mine Safety and Health Administration

[Docket No. M-89-125-C]

Consolidation Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Consolidation Coal Company, Consol Plaza, Pittsburgh, Pennsylvania 15241 has filed a petition to modify the application of 30 CFR 75.1105 (housing of underground transformer stations, battery-charging stations, substations, compressor stations, shops, and permanent pumps) to its Blacksville No. 1 Mine (I.D. No. 46-01867) located in Monongalia County, West Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that air currents used to ventilate structures or areas enclosing electrical installations be coursed directly into the return.

2. The mine has two underground pump installations which are not able to be ventilated effectively to a return airway. The mine also has three other pump locations that will not be able to be ventilated to a return airway when nearby workings are sealed. The pumps remove water which is accumulating along the mainline haulage.

3. In the area of the pump installations, the roof and ribs have deteriorated over a period of time because of the hooving bottom. This, in turn, has caused the stoppings to crush out. If ventilating tubing were installed to the nearest return entry, it would be ineffective due to the extreme distance.

4. As an alternate method, petitioner proposes that—

(a) The pump installations would be housed in a fireproof structure, equipped with automatically closing fire doors activated by thermal devices with an activation temperature not greater than 165 °Fahrenheit. Such fire doors would be designed to enclose all associated electric components in a reasonably airtight enclosure in case of a fire or excessive temperature;

(b) An audible and visual signal, activated by the heat sensors, would be located so that it can be seen or heard by a responsible person;

(c) The electric equipment would be protected with thermal devices, or equivalent, designed and installed to interrupt all power circuits supplying electric equipment within the fireproof structure;

(d) A suitable automatic fire suppression system would be installed and maintained in the fireproof structure;

(e) Firefighting equipment would be provided on the outside of the fireproof structure on the intake side; and

(f) The area enclosing the structure would be examined daily for hazardous conditions. A record of the examinations would be kept in a book on the surface.

5. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before October 10, 1989. Copies of the petition are available for inspection at that address.

Dated: August 30, 1989.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 89-21173 Filed 9-7-89; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-89-124-C]

Webster County Coal Corp.; Petition for Modification of Application of Mandatory Safety Standard

Webster County Coal Corporation, P.O. Box 45, Henderson, Kentucky 42420 has filed a petition to modify the application of 30 CFR 75.1103-4(a) (automatic fire sensor and warning device systems; installation; minimum requirements) to its Retiki Mine (I.D. No. 25-00672) located in Henderson County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. On July 1, 1988, petitioner was granted a modification of 30 CFR 75.1103-4(a) to install an early warning fire detection system and to monitor the air with a carbon monoxide detection system in all belt entries utilized as intake aircourses (docket No. M-87-278-C).

2. This petition concerns paragraphs 1(b), 1(c), 3, and 5 of MSHA's Decision and Order.

3. Paragraph 1(b) of the Decision and Order requires that the carbon monoxide monitoring devices be located so that the air is monitored at each belt drive and tailpiece and at intervals not to exceed 2,000 feet along each conveyor belt entry, except as provided in 1(c) or unless the District Manager requires additional carbon monoxide monitors. A monitoring device is required at the tailpiece or not more than 50 feet outby (force ventilation) and 50 feet inby (outby exhaust ventilation) the tailpiece on the same split of air.

Petitioner requests that outby the tailpiece be changed to outby the temporary stopping (across the belt).

4. Paragraph 1(c) of the Decision and Order requires only one sensor at a belt drive under certain conditions and that it be installed not more than 50 feet outby (force ventilation) 50 feet inby the drive, belt take-up and tailpiece on the same split of air.

Petitioner requests to add the words or the belt drive discharges at an angle onto the conveyor belt system with the header within 50 feet of the tailpiece and to change the last sentence to read, It shall be installed not more than 100 feet inby (if the airflow is inby) or outby (if the airflow is outby) the drive, belt take-up and tailpiece on the same split of air.

5. Paragraph 3 of the Decision and Order requires the low-level carbon monoxide monitoring devices be capable of providing both visual and audible alarm signals.

Petitioner requests that at 10 ppm above the established ambient level, all persons shall be withdrawn to a safe area outby the working places be changed to the approved firefighting plan shall be implemented and appropriate action shall be taken to determine the cause of actuation.

6. Paragraph 5 of the Decision and Order requires in part that the sensor located at or near the section loading point activate the fire alarm signals and give a warning signal on the working section that can be seen if carbon monoxide reaches 10 ppm above the established ambient level and can be heard at 15 ppm above the ambient.

Petitioner requests that the warning be seen or heard if carbon monoxide reaches 10 ppm above the established ambient level.

7. Petitioner states that the proposed amendment to the Decision and Order granting the petition modifying the application of 30 CFR 75.1103–4(a) will improve the paragraphs addressed, and will provide no less than the same measure of protection for the miners.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before October 10, 1989. Copies of the petition are available for inspection at that address.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Ad Hoc Challenge III Review Committee; Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92–463), as amended, notice is hereby given that a meeting of the Ad Hoc Challenge III Review Committee to the National Council on the Arts will be held on October 23, 1989, from 9:00 a.m.–5:30 p.m. in Room M07 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the Agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Ms. Yvonne M. Sabine, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682–5433.

Dated: August 30, 1989.

Yvonne M. Sabine,

Director, Council and Panel Operations, National Endowment for the Arts.

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Astronomical Sciences Subcommittee on Optical/Infrared Astronomy; Notice of Meeting

In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Committee for Astronomical Sciences Subcommittee on Optical/Infrared Astronomy.

Date & Time: September 26 and 27, 1989 9:00 a.m.–5:00 p.m.

Place: National Science Foundation September 26 Room 536, September 27 Room 1243.

Type of Meeting: September 26 and 27, 1989 Open.

Contact Person: Dr. G. Wayne van Citters, Jr., Program Director, Astronomical Instrumentation and Development, Division of Astronomical Sciences, Room 618, National Science Foundation, Washington, DC 20550 (202/357–9793).

Minutes: May be obtained from the contact person at the above address.

Purpose of Committee: To provide advice and recommendations concerning research programs, proposals, and projects in NSF-funded astronomy with the objective of achieving the highest quality forefront research for the funds allocated. To provide advice and recommendations concerning short-range and long-range plans in astronomy, including a recommendation of relative priorities.

Agenda: September 26 and 27.

Preparation of report on topics discussed at the Subcommittee meeting held on August 28 and 29, 1989.

M. Rebecca Winkler,

Committee Management Officer.

September 5, 1989.

OFFICE OF PERSONNEL MANAGEMENT

Request for Approval of RI 25–2 Application for Minimum Annuity Submitted to OMB for Clearance

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980, (title 44, U.S. Code, chapter 35) this notice announces a request to extend the use of RI 25–2 (Application for Minimum Annuity). OPM currently uses RI 25–2 to determine if an annuitant qualifies for the minimum annuity, repealed under section 305 of Public Law 99–251 (Federal Employees Benefits Improvement Act of 1986). Annuitants who were entitled to the minimum annuity prior to the repeal date of February 27, 1986 continue to receive the minimum annuity in accordance with Section 305.

Approximately 50 Civil Service annuitants complete the form, which requires approximately 15 minutes, for a total public burden of 13 hours. For copies of this proposal, call Larry Dambrose (632–0199) or Grace Butler (632–0259).

DATE: Comments on this proposal should be received within 10 working days from the date of this publication.

ADDRESSES: Send or deliver comments to—

C. Ronald Trueworthy, Agency Clearance Officer, U.S. Office of Personnel Management, 1900 E Street, NW., Room 6410, Washington, DC 20415,

and

Joseph Lackey, OPM Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, NW., Room 3235, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Mary Beth Smith-Toomey, 202–632–5472.

PROSPECTIVE PAYMENT ASSESSMENT COMMISSION

Meeting

Notice is hereby given of the meetings of the Prospective Payment Assessment Commission on Monday and Tuesday, September 18 and 19, 1989 at the Madison Hotel, 15th & M Streets, NW., Washington, DC.

The Subcommittee on Diagnostic and Therapeutic Practices will be meeting in Executive Chambers 1 and 2, second floor, at 9 o'clock a.m. September 18, 1989. The Subcommittee on Hospital Productivity and Cost-Effectiveness will convene its meeting at 9 o'clock a.m. in Mt. Vernon Salon B and C, second floor, on September 18, 1989.

The Full Commission will convene at 1:30 o'clock p.m. on September 18, 1989 with a Technical Advisory Panel on Outpatient Classification Systems in Mt. Vernon Salon B and C, second floor.

The Full Commission will convene again on September 19, 1989 at 9:00 o'clock a.m. in Mt. Vernon Salon B and C, second floor.

All meeting are open to the public.

Donald A. Young, MD,

Executive Director.

BILLING CODE 6820-SW-M

EXECUTIVE OFFICE OF THE PRESIDENT

Office of Science and Technology Policy

National Advisory Committee on Semiconductors (NACS)

The purpose of the National Advisory Committee on Semiconductors, is to devise and promulgate a national semiconductor strategy, including research and development. The implementation of this strategy will assure the continued leadership of the United States in semiconductor technology. The Committee will meet on September 11–12, 1989, at Science Applications International Corporation, 1555 Wilson Blvd., 7th Floor, Rosslyn, Virginia 8:00 a.m. The proposed agenda is:

(1) Briefing of the Committee on its organization and administration.

(2) Briefing of the Committee by OSTP personnel and personnel of other agencies on proposed, ongoing, and completed studies regarding semiconductors.

(3) Discussion of composition of panels to conduct studies.

A portion of the September 11–12 sessions will be closed to the public.

The briefing on some of the current activities of OSTP necessarily will involve discussion of material that is formally classified in the interest of national defense or for foreign policy reasons. This is also true for a portion of the briefing on panel studies. As well, a portion of both of these briefings will require discussion of internal personnel procedures of the Executive Office of the President and information which, if prematurely disclosed, would significantly frustrate the implementation of decisions made requiring agency action. These portions of the meeting will be closed to the public pursuant to 5 U.S.C. 552 b.(c) (1), (2), and (9)(B).

A portion of the discussion of panel composition will necessitate the disclosure of information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Accordingly, this portion of the meeting will also be closed to the public, pursuant to 5 U.S.C. 552 b.(c)(6).

Because of the security in the New Executive Office Building, persons wishing to attend the open portion of the meeting should contact Hazel Houston, at (703) 556–7130, prior to 3:00 p.m. on September 8, 1989. Mrs. Houston is also available to provide specific information regarding time, place and agenda for the open session.

Dated: August 25, 1989.

Barbara J. Diering,

Special Assistant, Office of Science and Technology Policy.

BILLING CODE 3170-01-M

SECURITIES AND EXCHANGE COMMISSION

[34–27198; File No. SR–DTC–89–15]

Self-Regulatory Organizations; Filing of Proposed Rule Change by the Depository Trust Company Relating to Expanding Participation in the International Institutional Delivery System

August 30, 1989.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on August 10, 1989, The Depository Trust Company filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Depository Trust Company ("DTC") is filing herewith a proposed rule change providing for expansion of the DTC's International Institutional Delivery System (IID) system to include participation and input of data by foreign entities.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose for the proposed rule change is to provide for greater participation in DTC's IID system. The proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to DTC since the proposed rule change will increase efficiency in processing international securities transactions.

(B) Self-Regulatory Organization's Statement on Burden on Competition

DTC does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

DTC has not solicited or received comments on its proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number SR–DTC–89–15 and should be submitted by September 29, 1989.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 89–21101 Filed 9–7–89; 8:45 am]

BILLING CODE 8010-01-M

[34–27199; File No. NSCC–89–13]

Self-Regulatory Organizations; Filing of Proposed Rule Change by National Securities Clearing Corporation Relating to the Automated Settlement of Mutual Fund Dividends

August 30, 1989.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on August 14, 1989, NSCC filed with the Securities and Exchange Commission that proposed rule change as described in Items I, II, and II below, which Items have been prepared by NSCC. The Commission is publishing this notice to solicit comment on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of a modification of the Networking aspect of the Fund/SERV Service Rule to provide for the automated settlement of mutual fund dividend payments.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NSCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NSCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) The purpose of the proposed rule filing is to provide for the automated settlement of mutual fund dividend payments between Fund Members and Members who participate in NSCC's Networking Service.[1]

Currently, through Networking, dividend information is passed between the Fund Member (or Mutual Fund Processor) and the Member. Payment of these dividend amounts occurs directly between the Fund Members and the NSCC Member and not through Networking. The proposed rule change will enable the Fund Member to make one payment to NSCC for such dividend amounts due and NSCC will include such amounts with the Members' other settlement obligations. The proposed rule change will require Fund Members to submit, along with the information currently transmitted, valid payable date for the dividends. A valid payable date will be defined as a date on which banks in New York are open for business. (This will permit settlement of these amounts to occur on the days that other monies settle through NSCC.).

Based on the data received from the Fund Member, NSCC will issue a Dividend Report to the Fund Member and Member. This report will indicate dividend amounts which must be paid by the Fund Member the day the Dividend Report is issued and the dividend amount which must be paid by the Fund Member the following day. The Dividend Report will also indicate any corrections made by the Fund Member to previously reported items.

---

[1] "Networking," a service provided by NSCC on a fee basis, permits automated transmission of mutual fund data. *See* Securities Exchange Act Release No. 26376 (December 20, 1988), 53 FR 52544.

On the Dividend Payable Date, the Fund Member will be required to pay NSCC the amount of the dividends indicated on the Dividend Report. This payment will be separate from the Fund Member's other settlement obligations, and must be made in Federal Funds. On the Dividend Payable Date, Members will be credited with the amount indicated on the Dividend Report. This amount will be netted with Members' other settlement obligations, and settlement will be made in accordance with current procedures.

Since NSCC will be paid by the Fund Member on Dividend Payable Date in Federal Funds but will make payments to Members in next day funds, NSCC will credit the Members pro rata for interest earned on NSCC's investment of the dividend amounts received in Federal Funds.

The payment of dividends to Members, similar to other Fund/SERV payments, will not be a guaranteed service. If NSCC were to credit a Member with a dividend amount and not receive the corresponding payment from the Fund Member, the credit will be subject to reversal. While NSCC has a lien on such payments to Members pursuant to the provisions of Rule 18, NSCC has agreed that is a Member becomes insolvent before settlement occurs, NSCC will segregate this payment and NSCC will relinquish its lien to the extent that it has demonstrated to NSCC that the payment was for the benefit of a customer of the Member. However, if the Member becomes insolvent after settlement has occurred, and the dividend payments have already been netted with the Member's other settlement obligations, NSCC will not segregate this payment and will use it to offset the Member's payment obligations to NSCC.

(2) The proposed rule change facilitates the prompt and accurate clearance and settlement of securities transactions by providing for the settlement, on an automated basis of dividend payments between mutual funds and brokerage firms. The rule change, therefore, is consistent with the requirements of the 1934 Act and the rules and regulations thereunder applicable to NSCC.

B. Self-Regulatory Organization's Statement on Burden on Competition

NSCC does not believe that the proposed rule will have an impact or impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments have been solicited or received. NSCC will notify the Commission of any written comments received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reason for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be approved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with provisions of 5 U.S.C. 522, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above (SR–NSCC–89–13) and should be submitted by September 29, 1989.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Shirely E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 35–24945]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

August 31, 1989.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their view in writing by September 25, 1989 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Ocean State Power II, et al. (70-7630)

Ocean State Power ("OSP"), One Bowdoin Square, Boston, Massachusetts 02114, a general partnership and subsidiary of EUA Ocean State Corporation ("EUA–OS"), Washington Highway, Lincoln, Rhode Island 02865, and Narragansett Energy Resources Company ("NERC"), 280 Melrose Street, Providence, Rhode Island 02901, and their respective indirect parent companies, Eastern Utilities Associates ("EUA"), One Liberty Square, Boston, Massachusetts 02109 and New England Electric System ("NEES"), 25 Research Drive, Westborough, Massachusetts 01582; Ocean State Power II ("OSP II"), One Bowdoin Square, Boston, Massachusetts 02114, a proposed subsidiary of EUA–OS and NERC, and their respective indirect parent companies EUA and NEES; EUA Service Corporation ("EUA Service"), 750 West Center Street, West Bridgewater, Massachusetts 02379, and New England Power Service Company ("NEP Service"), 25 Research Drive, Westborough, Massachusetts 01582, subsidiaries of EUA and NEES, respectively; Blackstone Valley Electric Company ("Blackstone"), Washington Highway, Lincoln, RI 02865, a subsidiary of EUA; TransCanada PipeLines Company ("TC"), 54 Commerce Court West, Toronto, Ontario M5L 1C2, Canada, and its indirect subsidiary TCPL Power Ltd. ("TCPL"), 123 Dyer Street, Providence, Rhode Island 02903 an affiliate of OSP and proposed affiliate of OSP II, have filed a joint application-declaration pursuant to sections 6(a), 7, 9(a)(1), 9(a)(2), 10, 12(b), 12(d), 12(f), 13(b) and 13(e) of the Act and Rules 43, 44, 45, 50(a)(5), 90, 91 and 95 thereunder.

By prior order, the Commission (i) approved the acquisition by EUA–OS and NERC of 25% and 20% equity interests, respectively, in OSP and (ii) autorized EUA and NEES to fund their respective subsidiaries' obligations to contribute to the capital of OSP under the OSP Partnership Agreement (HCAR No 24727, October 13, 1988) ("Order"). EUA–OS and NERC now propose to acquire 25% and 20% percent equity interests, respectively, in OSP II, and EUA and NEES propose to provide their respective subsidiaries the capital funding to be contributed to the capital of OSP II and to guarantee proportionately their subsidiaries' performance under the OSP II Partnership Agreement. Such funding will be in the form of purchases of common stock, capital contributions, loans, and/or advances provided that the aggregate amount of all investments, including investments already approved by the Commission in the Order in amounts of $30 million and $25 million for EUA and NEES, respectively, shall not exceed $60 million and $50 million, respectively. EUA Service and NEP Service propose to provide certain incidental services for OSP II at cost in accordance with the Commission's rules.

OSP II, in connection with its plans to construct, own and operate the second unit ("Second Unit") of a combined cycle electric generating facility ("Project") to be located in Burrillville, Rhode Island, proposes to raise one hundred percent of its construction financing for the Second Unit through non-recourse loans from a syndicate of financial institutions under an approximately $225 million general construction-loan credit facility ("Credit Facility"). Irving Trust Company will be the lead agent ("Irving") to the Credit Facility. The Credit Facility will have a seven-year term, comprised of a construction loan facility with a term of approximately two to four years that will convert to a term-loan facility upon the Second Unit's achieving commercial operation. The term-loan facility is intended to provide OSP II flexibility with regard to the timing of arranging long-term, fixed-rate permanent financing with new lenders, which will be subject to further Commission approval.

The Credit Facility will be secured by a lien on all of the physical assets of the Second Unit and by an assignment to the lenders of (i) all of OSP II's rights and interests in connection with the Second Unit under the contracts necessary for the construction and operation of the Second Unit and specified insurance, (ii) all of the partners' interests in OSP II, (iii) proportional guarantees to the partnership by the parents of the performance of the partners' obligations (herein, EUA's and NEES' guarantees of EUA–OS and NERC obligations, respectively), under the Equity Contribution Agreements, and (iv) the Equity Contribution Agreements themselves. The lenders will have the sole benefit of all of the Second Unit security.

Under the construction-loan facility, OSP II may obtain fixed-rate, 30-day advances, by exercising a competitive bid option, or if the option is not exercised, or for those amounts not covered by accepted bids, OSP II will pay its choice of the London Interbank Offered Rate ("LIBOR"), plus ½% per annum, Irving's Certificate of Deposit ("CD") rate, plus ⅝% per annum or Irving's Prime Rate, plus ⅛% per annum. These rates will increase by ⅛% per annum each time drawings occur after one of two defined reference dates. The term-loan facility employs the same base rates with margins ranging from ⅜% to ¾% on the LIBOR and CD options. Fifty percent of the outstanding amounts under the construction-loan facility will be amortized when the Second Unit goes into commercial operation, and the remainder will convert to loans under the term-loan facility. The assumed effective cost of money under the Credit Facility will be 10.241%.

Initially, OSP intended to develop and own both units of the Project. In order to provide separate collateral for the financing of the Second Unit, however, the investors in OSP decided to form a separate partnership for the development and ownership of the Second Unit. The investors in both partnerships and their respective ownership interests, will be the same although certain investors intend to form distinct, special purpose subsidiaries to hold their interests in OSP II. In connection with this arrangement, OSP purposes to transfer to OSP II all of its interests in the Second Unit, and they, along with Blackstone, will amend and restate the Interconnection Agreement.

When the First Unit commences commercial operation, OSP will be an electric utility company within the meaning of section 2(a)(3) of the Act. Pursuant to the terms of the OSP Partnership Agreement, TCPL, and indirectly its parent company TC, will then hold a 9.9 percent voting interest within the meaning of section 2(a)(11). As part of the formation of OSP II, which will own and develop the Second Unit of the Project, TCPL and indirectly TC propose to acquire a 9.9 percent voting interest in, and therefore become an affiliate of, a second electric utility company. TCPL's rights and obligations in OSP II will be governed by the OSP II Partnership Agreement.

In order to avoid obtaining zoning approvals for the operation of a generating facility on the site, OSP proposes to reconvey to Blackstone approximately four acres of the site for the Project which OSP had previously acquired from Blackstone. OSP will, however, retain an easement across such property for access to the site.

OSP II seeks an exception from the Commission's competitive bidding requirements of rules 50(b) and (c) pursuant to Rule 50(a)(5).

The Columbia Gas System, Inc. (70–7672)

The Columbia Gas System, Inc. ("Columbia"), 20 Montchanin Road, Wilmington, Delaware 19807, a registered holding company, has filed an application-declaration pursuant to sections 6(a), 7, 9(a), 10, and 12(b) of the Act and Rules 45 and 50(a)(5) thereunder.

Under the existing Employees' Thrift Plan of Columbia Gas System ("Thrift Plan"), employees of Columbia system companies ("Participants") may deposit up to 16% of their salary in four available investment options, including Fund B ("Fund B"), which provides for investment in Columbia's common stock. Contributions by Participants are matched by the Columbia system company employing the Participant for up to 6% of a Participant's salary. Columbia's matching contributions are deposited only in Fund B. Columbia currently meets its matching obligations by transferring cash to the trustee of the Thrift Plan, which cash is used to purchase Columbia's common stock. Cash dividends paid on shares of Columbia common stock held in Fund B are reinvested in additional shares of Columbia common stock.

Columbia now proposes to meet its anticipated obligation to match Participants' contributions for 15 years and to provide for the reinvestment of cash dividends paid on shares held in Fund B by allocating shares of Columbia's common stock, in lieu of cash. Such shares will be purchased and held by a proposed Leveraged Employee Stock Ownership Plan ("LESOP"). The LESOP will finance the acquisition of Columbia's common stock through the issuance of debt, through December 31, 1990, in a principal amount not to exceed $208 million in the form of publicly issued medium-term notes ("Notes"), maturing in up to 15 years. Columbia anticipates that the interest rate on the debt will be 9.5% to 10.0%. The Notes would be issued under an indenture, which will contain a proposed subordinated guaranty by Columbia. The proceeds of the LESOP borrowings will be used to purchase existing shares of Columbia common stock on the open market and up to 2.5 million shares of authorized but unissued shares of Columbia common stock, which Columbia proposes to issue and sell to the LESOP at the prevailing market price. At current market prices, $200 million would purchase approximately 4.3 million shares, or 9.4%, of Columbia's total common stock outstanding.

The LESOP's debt principal and interest would be repaid from cash dividends paid on shares of Columbia's common stock held in Fund B. To the extent that such cash dividends are insufficient to service the LESOP's debt, Columbia would make periodic contributions to the LESOP in an amount which, together with the cash dividends, would be sufficient to meet the LESOP's debt principal and interest payments.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 89-21103 Filed 9-7-89; 8:45am]

BILLING CODE 8010-01-M

DEPARTMENT OF STATE

Advisory Committee on International Investment; Meeting

The Department of State will hold a meeting of the Advisory Committee on International Investment on October 5, 1989 from 9:00 a.m. to 12 noon. The meeting will be held in Room 1315 (the Loy Henderson Conference Room) at the Department of State, 2201 "C" Street, NW., Washington, DC 20520.

The agenda and approximate times topics will be discussed are as follows:

9:00—Review of agenda and introduction of first speaker by Professor Isaiah Frank of the Johns Hopkins School of Advanced International Studies.

9:05—Welcoming remarks by Assistant Secretary of State for Economic and Business Affairs Eugene J. McAllister. Assistant Secretary McAllister will provide a brief overview of U.S. Government initiatives in support of the economic reform process in Poland and Hungary. Members will be invited to comment on these initiatives and to express their views as to what reforms will be required in Poland and Hungary to induce U.S. firms to increase trade and investment activity in these countries.

10:15—Coffee.

10:30—Commentary on the current status of the strengthened National Treatment Instrument initiative in the OECD, the bilateral investment treaty (BIT) program, and of TRIMs in the GATT by William B. Milam, Deputy Assistant Secretary of State for International Finance and Development and by the Director of the Office of Investment Affairs at the Department of State. Remarks to be followed by questions and comments by committee members.

11:00—Presentation on Inward Investment. Followed by comments and questions by members of the committee.

12:00—Meeting concludes.

Access to the Department of State is controlled. Therefore, members of the public wishing to attend the meeting must notify the Office of Investment Affairs at (202) 647-1128 to arrange admittance. Please use the "C" Street entrance.

Dated: August 28, 1989.

Robert C. Reis, Jr.,

Executive Secretary.

BILLING CODE 4710-07-M

Advisory Committee to United States Section International North Pacific Fisheries Commission; Partially Closed Meeting

The Advisory Committee to the United States Section, International North Pacific Fisheries Commission, will meet on September 28, 1989, at the Sheraton Anchorage Hotel, Anchorage, Alaska, at 7:00 p.m. This session will discuss the Protocol to the International Convention for the High Seas Fisheries of the North Pacific Ocean, surveillance of foreign fishing fleets, the progress of fisheries research, the Alaska salmon fisheries, and fishery developments as they affect the International North Pacific Fisheries Commission. The session will be open to the public.

The Advisory Committee will also meet at 2:00 p.m. on September 29, 1989. These sessions will not be open to the public inasmuch as the discussion will involve classified matters pertaining to the United States' negotiating position to be taken at the 35th Annual Meeting of the International North Pacific Fisheries Commission to be held in Seattle, WA, November 7-10, 1989. Pursuant to section 4(c) of the North Pacific Fisheries Act of 1954, as amended, 16 U.S.C. 1023(c) which provides that the "advisory committee * * * shall be granted opportunity to examine and to be heard on all proposed programs of study and investigation, reports, and recommendations of the United States Section", the members of the Advisory Committee will examine various options for the negotiating position at the Special Meeting, and these considerations must necessarily involve review of classified matters. Accordingly, the determination has been made to close this session pursuant to section 10(d) of the Federal Advisory Committee Act, 5 U.S.C. App. I, Section 10(d) and 5 U.S.C. 552b(c)(1) and (c)(9).

Requests for further information on the meeting should be directed to Mr. Jeffrey A. Miotke, Pacific Fisheries Officer, OES/OFA Room 5806, U.S. Department of State, Washington, DC 20520. Mr. Miotke can be reached by telephone on (202) 647-2009.

Dated: August 25, 1989.

Edward E. Wolfe,

Deputy Assistant Secretary, Oceans and Fisheries Affairs.

BILLING CODE 4710-09-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Radio Technical Commission for Aeronautics (RTCA) Special Committee 159—Minimum Aviation System Performance Standard for GPS; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I), notice is hereby given for the thirteenth meeting of RTCA Special Committee 159 on Minimum Aviation System Performance Standard for GPS to be held October 16–18, 1989, in the RTCA Conference Room, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, DC 20005, commencing at 1:30 p.m.

The agenda for this meeting is as follows: (1) Chairman's remarks; (2) approval of the minutes of meeting held June 15-18, RTCA Paper No. 272-89/SC159-210; (3) reports of Working Group activities on integrity implementation, operations, and test requirements; (4) review of EUROCAE and other comments; (5) integration of integrity Requirements into Committee Report; (6) Working Groups meet in separate sessions; (7) assignment of tasks; (8) other business; and (9) date and place of next meeting.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements to obtain information should contact the RTCA Secretariat, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, DC 20005; (202) 682-0266. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on August 29, 1989.

Geoffrey R. McIntyre

Designated Officer

BILLING CODE 4910-13-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: Denver and Adams Counties, Colorado

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Denver and Adams Counties, Colorado.

FOR FURTHER INFORMATION CONTACT: Leon Witman, Division Administrator, Federal Highway Administration, 555 Zang Street, Room 258, Lakewood, Colorado 80228, Telephone (303) 969-6730.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the State of Colorado, State Department of Highways, will prepare an environmental impact statement (EIS) on a proposal to improve Interstate 25 in Denver and Adams Counties, Colorado. The proposed improvement would involve the widening of existing I-25 between the interchanges with I-70 and I-76 for a distance of about 2.6 miles.

Improvements to the corridor are considered necessary to provide for the existing and projected traffic demand. Also, included in this proposal is the reconstruction of the I-25 interchange with 58th Avenue in Adams County and the closure of the I-25 interchange with 49th Avenue in Denver County. Alternatives under consideration include (1) taking no action; (2) widening the existing four-through lane highway to five-through lane highway each direction plus auxiliary lanes; (3) replacement access for the I-25 interchange with 49th Avenue; and (4) widening the existing 58th Avenue from four to seven lanes.

Letters describing the proposed action and soliciting comments will be sent to appropriate Federal, State, and local agencies, and to private organizations and citizens who have previously expressed or are known to have an interest in this proposal. Public meetings will be held in the I-25 corridor late 1989/early 1990. In addition, a public hearing will be held. Public notice will be given of the time and place of the meetings and hearing. The draft EIS will be available for public and agency review and comment prior to the public hearing. No formal scoping meeting is planned at this time.

To ensure that the full range of issues related to this proposed action is addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Issued on August 29, 1989.

Leon J. Witman,

Division Administrator, Lakewood.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: August 31, 1989.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: 1545-0192.
Form Number: 4970.
Type of Review: Extension.
Title: Tax on Accumulation Distribution of Trusts.
Description: Form 4970 is used by a beneficiary of a domestic or foreign trust to compute the tax adjustment attributable to an accumulation distribution. The form is used to verify whether the correct tax has been paid on the accumulation distribution.
Respondents: Individuals or households.
Estimated Number of Respondents/Recordkeepers: 33,000.
Estimated Burden Hours Per Response/Recordkeeping:

Recordkeeping	40 min.
Learning about the law or the form.	18 min.
Preparing the form	50 min.
Copying, assembling, and sending the form to IRS.	20 min.

Frequency of Response: Annually.
Estimated Total Reporting/Recordkeeping Burden: 109,230 hours.
OMB Number: 1545-0219.
Form Number: 5884.
Type of Review: Revision.
Title: Jobs Credit.
Description: Internal Revenue Code section 38(b)(2) allows a credit against income tax to employers hiring

BEST COPY AVAILABLE

Sunshine Act Meetings

individuals from certain targeted groups (such as welfare recipients, etc.). The employer uses Form 5884 to figure this jobs credit. IRS uses the information on the form to verify that the correct amount of credit was claimed.

Respondents: Farms, Businesses or other for-profit, Small businesses or organizations.

Estimated Number of Respondents/Recordkeepers: 85,000.

Estimated Burden Hours Per Response/Recordkeeping:

Recordkeeping	4 hr, 4 min.
Learning about the law or the form.	2 hr, 20 min.
Preparing the form	7 hr, 10 min.
Copying, assembling, and sending the form to IRS.	1 hr, 20 min.

Frequency of Response: On occasion.

Estimated Total Reporting/Recordkeeping Burden: 434,350 hours.

OMB Number: 1545–0895.

Form Number: 3800.

Type of Review: Revision.

Title: General Business Credit.

Description: Internal Revenue Code section 38 permits taxpayers to reduce their income tax liability by the amount of their general business credit, which is an aggregation of their investment credit, jobs credit, alcohol fuel credit, research credit, low-income housing credit, and employee stock ownership (ESOP) credit. Form 3800 is used to figure the correct credit.

Respondents: Farms, Businesses or other for-profit, Small businesses or organizations.

Estimated Number of Respondents/Recordkeepers: 200,000.

Estimated Burden Hours Per Response/Recordkeeping:

Recordkeeping	10 hr, 31 min.
Learning about the law or the form.	35 min.
Copying, assembling, and sending the form to IRS.	48 min.

Frequency of Response: On occasion.

Estimated Total Reporting/Recordkeeping Burden: 2,382,000 hours.

OMB Number: 1545–1020.

Form Number: 1041–T.

Type of Review: Extension.

Title: Transmittal of Estimated Taxes Credited to Beneficiaries.

Description: This form was developed to implement the provisions of Internal Revenue Code section 643(g) which allows a trustee of a trust to elect to assign any overpayment of estimated tax to a beneficiary(ies). This form serves as a transmittal so that Service Center personnel can determine the correct amounts that are to be credited to the beneficiaries.

Respondents: Businesses or other for-profit.

Estimated Number of Respondents/Recordkeepers: 1,000.

Estimated Burden Hours Per Response/Recordkeeping:

Recordkeeping	7 min.
Learning about the law or the form.	5 min.
Preparing the form	5 min.
Copying, assembling, and sending the form to IRS.	10 min.

Frequency of Response: Annually.

Estimated Total Reporting/Recordkeeping Burden: 970 hours.

Clearance Officer: Garrick Shear, (202) 535–4297, Internal Revenue Service, Room 5571, 1111 Constitution Avenue, NW, Washington, DC 20224.

OMB Reviewer: Milo Sunderhauf, (202) 395–6880, Office of Management and Budget, Room 3001, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports Management Officer.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Tuesday, September 12, 1989, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Memorandum and resolution re: (1) Notice of establishment of the Investigative Files and Records System of Records pursuant to the Privacy Act of 1974, which system of records consists of files and records compiled by the Corporation's Office of Inspector General on Corporation employees or other persons involved with the Corporation's programs or operations who have been under investigation for fraud and abuse with respect to the Corporation's programs or operations; and (2) final amendment to Part 310 of the Corporation's rules and regulations, entitled "Privacy Act Regulations," which amendment exempts from certain provisions of the Corporation's regulations implementing the Privacy Act of 1974 the Corporation's Investigative Files and Records System of Records.

Memorandum and resolution re: Final amendments to Part 309 of the Corporation's rules and regulations, entitled "Disclosure of Information," in order to conform the regulation to the Financial Institutions Reform, Recovery, and Enforcement Act of 1989, which amendments substitute the term "depository institution" each place the term "bank" appears, with certain exceptions.

Memorandum and resolution re: Final amendments to Part 311 of the Corporation's rules and regulations, entitled "Rules Governing Public Observation of Meetings of the Corporation's Board of Directors," in order to conform the regulation to the Financial Institutions Reform, Recovery, and Enforcement Act of 1989, which amendments: (1) Reflect that the number of directors necessary to constitute a quorum has been changed from two to three; (2) substitute the term "depository institution" each place the term "bank" appears; and (3) revise the examples of action which may be taken by the Board in closed meetings to include matters relating to conservatorships and various applications made by savings associations which require Corporation approval.

Memorandum and resolution reconstituting the membership of the Committee on Liquidations, Loans and Purchases of Assets.

Memorandum regarding the extension and modification of certain contracts.

Reports of actions approved by the standing committees of the Corporation and by officers of the Corporation pursuant to authority delegated by the Board of Directors.

Discussion Agenda:

Memorandum and resolution re: Statement of Policy entitled "Bank Merger Transactions," which redefines and clarifies product and geographic markets and the standards to be applied in assessing both the competitive effects and prudential concerns involved in proposed bank merger transactions.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898–3813.

Dated: September 5, 1989.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714-01-M

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Tuesday, September 12, 1989, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b (c)(2), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" ((5 U.S.C. 552b (c)(6), (c)(8), and (c)(9)(A)(ii)).

Note: Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda:

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(2) and (c)(6)).

Matters relating to the possible closing of certain insured banks:

Names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550–17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898–3813.

Dated: September 5, 1989.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

Friday
September 8, 1989

Part II

Department of Education

Kuhry Bequest Program; Notices

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services

The Kuhry Bequest Program

AGENCY: Department of Education.

ACTION: Notice of applicability of regulations.

SUMMARY: The Secretary is applying the Rehabilitation Short-Term Training regulations in 34 CFR part 390 to the Kuhry Bequest Program with two changes. One change is new selection criteria for this program. The other change is the addition of educational services to the types of authorized projects. The Secretary takes this action to establish appropriate procedures for the implementation of this program.

EFFECTIVE DATE: The provisions in this notice take effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments. If you want to know the effective date of these provisions, call or write the Department of Education contact person. A document announcing the effective date will be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Eileen F. Lehman, Office of Developmental Programs, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue, SW. (Mary E. Switzer Building, Room 3318), Washington, DC 20202-2649. Telephone: (202) 732–4281.

SUPPLEMENTARY INFORMATION: The Secretary is the recipient of a bequest of $614,780 to provide for the care and welfare of people who are blind. These funds will be used to provide grants (referred to in this notice as the Kuhry Bequest Program, named after the bequestor) for short-term training of professionals related to the care and welfare of people who are blind.

The Secretary will apply the Rehabilitation Short-Term Training regulations in 34 CFR part 390 to the Kuhry Bequest Program with certain changes. These regulations have been selected because the general requirements (subpart A) of the Short-Term Training program and the Kuhry Bequest Program are similar. Subpart B and subpart E, which specify the kinds of projects authorized under the program and the conditions to be met by a grantee, have been demonstrated to be sound. Because the Kuhry Bequest Program, under the terms of the bequest, is only for the care and welfare of those who are blind, the selection criteria in subpart D are not wholly appropriate. The selection criteria to be applied adhere to the terms of the bequest, are clearer, and are presented in an order that should benefit applicants in the preparation of applications in terms of ease and coherence.

On February 23, 1989 the Secretary published a notice of proposed applicability of regulations for the Kuhry Bequest Program in the **Federal Register** (54 FR 7922).

A change since the publication of the notice is the expansion of the areas in which short-term training may be provided. Types of projects that are authorized for training now include training in areas relating to the delivery of educational services in addition to rehabilitation services. As a result of public comment, the selection criterion relating to the extent to which persons who are familiar with blindness are involved in the project is amended to include support of regional or national organizations.

Analysis of Comments and Changes

In response to the Secretary's invitation in the notice, two parties submitted comments. An analysis of the comments and of the changes in the notice of applicability of regulations since publication of the proposed notice follows.

What Types of Projects Are Authorized Under This Program?

Comment: The Secretary received one comment concerned with the limitation of the short-term training to rehabilitation professionals because individuals working in settings such as nursing homes, hospitals, educational facilities, or social services agencies also provide services related to the care and welfare of the blind.

Discussion: The Secretary recognizes the need for training a broad array of professionals to provide for the care and welfare of the blind. This need is particularly evident in the provision of transition services to adolescents who are in an educational setting. The Secretary believes that personnel, such as those who provide services in nursing homes, hospitals, and social services agencies are already covered under § 390.10 of the regulations.

Changes: In section 390.10 of the regulations, in addition to the delivery of vocational, medical, social, and psychological rehabilitation services, the Secretary has included educational services.

Quality of Key Personnel

Comment: One commenter requested that the applicant be able to demonstrate a record of competence, expertise and the ability to leverage resources in national and regional training projects in the field of blindness.

Discussion: While the Secretary recognizes the relevance of the comment to applications that may be national or regional in scope, the regulations do not require applications to be national or regional in scope. Past experience has indicated that the impact of most short-term training projects is most strongly felt in the locality. It follows that the recommended expertise would not be necessary for all training projects.

Changes: None

Extent to Which Persons Who Are Familiar With Blindness Are Involved in the Project

Comment: One commenter asked that the criterion by which the Secretary reviews each application to determine the extent to which it demonstrates the support of community organizations with an interest in providing services for persons who are blind be changed to a demonstration of support from national or regional organizations knowledgeable about needs for short-term training in this area.

This commenter also urged that the number of points allotted to this criterion be increased from 10 to 25.

Discussion: The Department recognizes that national and regional groups would have valuable input regarding the need for services. However, applicants are not required to develop applications that are regional or national in scope. To increase the points available under this criterion would distort the balance of the selection factors.

Changes: The Department has amended section (e)(2) of the selection criteria to include national and regional organizations knowledgeable about the need for short-term training to further the care and welfare of persons who are blind.

Other Factors the Secretary Considers in Reviewing an Application

Comment: One commenter urged that a special priority be established to set aside funds for programs in the Pacific Basin.

Discussion: While the Secretary is authorized to consider geographical distribution of projects in making awards under this program, to give priority to the needs of one particular geographical area would not be appropriate under the terms of the bequest.

Changes: None

The Secretary will apply the regulations for Rehabilitation Short-

Term Training in 34 CFR part 390 to this competition with the exception of changes to the selection criteria in § 390.30 and to the types of projects to be funded in § 390.10. The Secretary will apply the following selection criteria:

Selection Criteria

(a) Evidence of need (15 points).

(1) The Secretary reviews each application to determine that the need for the training project has been adequately justified.

(2) The Secretary reviews each application to determine that the need for the training project has been established and validated in terms of its potential impact on the service delivery system.

(b) Plan of operation (25 points).

(1) The Secretary reviews each application to determine the quality of the plan of operation for the project.

(2) The Secretary reviews each application to determine the extent to which the application shows—

(i) High quality in the design of the project;

(ii) An effective plan of management that insures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project relate to the purpose of the program;

(iv) The way the applicant plans to use its resources and personnel to achieve each objective;

(v) A clear description of how the applicant will ensure that project participants who are otherwise eligible to participate are selected without regard to race, color, national origin, gender, age, or handicapping condition.

(c) Nature and scope of training program content (15 points).

(1) The Secretary reviews each application to determine that the application demonstrates the adequacy and scope of the proposed training program content.

(2) The Secretary reviews each application to determine that—

(i) The educational objectives are clearly defined, measurable and achievable;

(ii) The proposed course content and methodology to develop and implement the training can be expected to achieve the stated educational objectives; and

(iii) The program and teaching methods provide for an integration of theory and practice relevant to the educational objectives of the program.

(d) Quality of key personnel (15 points).

(1) The Secretary reviews each application to determine the quality of key personnel proposed for the project, including—

(i) The qualifications of the project director;

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (d)(1) (i) and (ii) of this section will commit to the project; and

(iv) The extent to which the applicant, as part of its nondiscriminatory employment practices, will ensure that its personnel are selected for employment without regard to race, color, national origin, gender, age, or handicapping condition.

(2) To determine personnel qualifications, the Secretary considers experience and training, in fields related to the objectives of the project, as well as other information that the applicant provides.

(e) Extent to which persons who are familiar with blindness are involved in the project (10 points).

(1) The Secretary determines the extent to which the application shows:

(i) Persons who are familiar with blindness are involved in the planning and development of the project;

(ii) Persons who are familiar with blindness participate in the implementation or conduct of the project as directors, trainers, advisors, or consultants; and

(iii) Plans for recruiting persons who are familiar with blindness to participate in the project as trainees.

(2) The Secretary reviews each application to determine the extent to which it demonstrates the support of community, regional, or national organizations with an interest in providing services for persons who are blind.

(f) Adequacy of resources (5 points). The Secretary reviews each application to determine the adequacy of the resources that the applicant plans to devote to the project, including facilities, equipment, and supplies.

(g) Evaluation plan (5 points).

(1) The Secretary reviews each application to determine the quality of the evaluation plan for the project.

(2) The Secretary determines that the methods of evaluation are appropriate for the project and, to the extent possible, are objective, and produce data that are quantifiable.

(h) Budget and cost effectiveness (10 points).

(1) The Secretary reviews each application to determine that the project has an adequate budget and is cost effective.

(2) The Secretary determines that—

(i) The budget for the project is adequate to support the project activities; and

(ii) Costs are reasonable in relation to the objectives of the project.

(Approved by the Office of Management and Budget under Control Number 1820-0018.)

Types of Projects

In addition to the delivery of services as listed in § 390.10, the Kuhry Bequest Program will also fund short-term training projects that provide short-term training and technical instruction in areas of special significance to the delivery of educational services.

BILLING CODE 4000-01-M

[CFDA No.: 84.999]

Kuhry Bequest Program; Invitation for Applications for New Awards for Fiscal Year 1990

Purpose of Program: The Secretary is the recipient of a bequest of $614,780 that provides for the care and general welfare of the people of this country who are blind. These funds will be used to provide grants for projects that provide short-term training related to the care and welfare of people who are blind. The Secretary invites applications for programs that train people in the application and use of rehabilitation technology for persons who are blind. The Secretary also invites applications for projects that propose to use innovative methods of training adolescents and young adults who are blind to improve their vocational and social functioning.

Deadline for Transmittal of Applications: November 17, 1989.

Applications Available: September 11, 1989.

Available Funds: $614,780.

Estimated Range of Awards: $25,000–$100,000.

Estimated Average Size of Awards: $55,000.

Estimated Number of Awards: 6–25.

NOTE: The Department is not bound by any estimates in this notice.

Project Period: Up to 12 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in

34 CFR parts 74, 75, 77, 80, 81, and 85; and (b) The regulations governing the Rehabilitation Short-Term Training Program in 34 CFR part 390, except that educational services are added to the types of authorized projects and revised selection criteria will be used, as described in the notice of applicability of regulations as published in this issue of the **Federal Register**.

The Education Department General Administrative Regulations in 34 CFR Part 79 (Intergovernmental Review of Department of Education Programs and Activities) do not apply because these funds are from a private bequest and are not funds appropriated for Federal financial assistance.

For Applications or Information Contact: Eileen Lehman, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue, SW., Room 3318, Switzer Building, Washington, DC 20202-2649. Telephone: (202) 732-4281.

Program Authority: 20 U.S.C. 3481

Dated: September 1, 1989.

Robert R. Davila

Assistant Secretary, Office of Special Education and Rehabilitative Services.

Office of the Assistant Secretary for Community Planning and Development

24 CFR Part 570

Community Development Block Grants-Fair Housing Requirements; Rule

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

24 CFR Part 570

[Docket No. R-89-1450; FR-2658]

RIN: CPD-5-89

Community Development Block Grants—Fair Housing Requirements

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Final Rule.

SUMMARY: The Fair Housing Amendments Act of 1988 (Pub. L. 100–430, approved September 13, 1988) became effective on March 12, 1989. This Act expanded the coverage of the Fair Housing Act (42 U.S.C. 3601–20) to prohibit discriminatory housing practices based on handicap and familial status. This final rule makes technical changes to HUD's Community Development Block Grant (CDBG) regulations at 24 CFR Part 570 to reflect the amendments.

DATE: Effective date: October 11, 1989.

FOR FURTHER INFORMATION CONTACT: Laurence Pearl, Director, Office of Program Standards and Evaluation, Fair Housing and Equal Opportunity, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410–5000, (202) 755–5288. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: The Fair Housing Amendments Act of 1988 (Pub. L. 100–430, approved September 13, 1988) expanded the coverage of the Fair Housing Act (42 U.S.C. 3601–20) to prohibit discriminatory housing practices based on two new protected classes (handicap and familial status). Classes protected before the amendments included race, color, religion, sex or national origin. The amendments became effective on March 12, 1989. Following notice and public comment, final regulations implementing the amendments to the Fair Housing Act were published on January 23, 1989 (54 FR 3231).

On September 6, 1988 (53 FR 34415), the Department published a final rule amending substantial portions of its regulations governing the Community Development Block Grant Program (CDBG Program) (24 CFR part 570). The final rule included revisions addressing the Fair Housing Act and requirements for affirmatively furthering fair housing in the CDBG program. That final rule stated that technical amendments to the CDBG regulations reflecting the expanded coverage of the Fair Housing Act would be made following the issuance of final regulations implementing the substantive provisions of that Act. Today's final rule makes these promised revisions.

The following sections have been revised to reflect the expanded coverage under the Fair Housing Act: (1) Section 570.206, which governs program administration costs for fair housing activities; (2) § 570.601(b), which contains a description of the coverage of the Fair Housing Act; and (3) § 570.904, which addresses the fair housing review criteria. Statutory citations have been revised in § 570.303, which governs grantee certification requirements.

HUD has determined that notice and prior public comment on this rule is unnecessary and that good cause exists for making this rule effective as soon as possible after publication. The substantive changes made by the recent amendments to the Fair Housing Act were fully addressed in another rule that was subject to public notice and comment. Since the changes made in today's final rule are technical corrections, further notice and public comment is not required.

Findings and certifications

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50, which implement section 102(2)(C) of the National Environment Policy Act of 1969. The Finding of No Significant Impact is available for public inspection during regular business hours (7:30 a.m. to 5:30 p.m. weekdays) in the Office of the Rules Docket Clerk, Office of the General Counsel, Department of Housing and Urban Development, Room 10276, 451 Seventh Street SW., Washington, DC 20410–0500.

The rule does not constitute a "major rule" as that term is defined in section 1(d) of the Executive Order on Federal Regulations issued by the President on February 17, 1981. An analysis of the rule indicates that it does not (1) have an annual effect on the economy of $100 million or more (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

In accordance with 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. The rule does not affect the amount of funds provided in the CDBG program. Rather the rule modifies and updates program administrative and procedural requirements to comport with recently enacted legislation.

The General Counsel, as the Designated Official under Executive Order No. 12606—The Family, has determined that the rule will not have a significant impact on family formation, maintenance, or well-being. The rule merely makes technical changes to administrative and procedural CDBG requirements to comport with recently enacted legislation. The impact on the family of rules implementing the legislation was fully addressed in a final rule issued January 23, 1989 (54 FR 3232, 3282).

The General Counsel, as the Designated Official under section 6(a) of Executive Order No. 12611—Federalism, has determined that the final rule does not involve the preemption of State law by Federal statute or regulation and does not have Federalism implications. The rule makes only minor changes to administrative and procedural rules to reflect recent statutory changes. Federalism issues related to the implementation of the substantive amendments to the Fair Housing Act were discussed in the final rule issued January 23, 1989 (54 FR 3232, 3282).

The rule was not listed on the Department's Semiannual Agenda of Regulations published April 24, 1989 (54 FR 16708) under Executive Order No. 12291 and the Regulatory Flexibility Act.

The Catalog of Federal Domestic Assistance program numbers are:

14.218	Community Development Block Grant—Entitlement
14.219	Community Development Block Grant—Small Cities
14.221	Urban Development Action Grant
14.225	Secretary's Discretionary Fund/ Territories Program
14.227	Secretary's Discretionary Fund/ Community Development Technical Assistance Grants
14.232	Secretary's Discretionary Fund/ Special Projects

List of Subjects for 24 CFR Part 570

Community development block grants, Grant programs: housing and community development, Loan programs: housing and community development, Low- and moderate-income housing, New communities, Pockets of poverty, Small cities.

For the reasons set forth in the Preamble, Title 24 of the Code of Federal Regulations is amended as follows:

PART 570—COMMUNITY DEVELOPMENT BLOCK GRANTS

1. The authority citation for Part 570 continues to read as follows:

Authority: Title I, Housing and Community Development Act of 1974 (42 U.S.C. 5301–5320); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d).

2. Section 570.206(c) is revised to read as follows:

§ 570.206 Program administration costs.

* * * * *

(c) *Fair housing activities.* Provision of fair housing services designed to further the fair housing objectives of the Fair Housing Act (42 U.S.C. 3601–20) by making all persons, without regard to race, color, religion, sex, national origin, familial status or handicap, aware of the range of housing opportunities available to them; other fair housing enforcement, education, and outreach activities; and other activities designed to further the housing objective of avoiding undue concentrations of assisted persons in areas containing a high proportion of low and moderate income persons.

* * * * *

3. Section 570.303(d)(2) is revised to read as follows:

§ 570.303 Certifications.

* * * * *

(d) * * *

(2) The Fair Housing Act (42 U.S.C. 3601–20).

* * * * *

4. Section 570.601(b) is revised to read as follows:

§ 570.601 Public Law 88–352 and Public Law 90–284; affirmatively furthering fair housing; Executive Order 11063.

* * * * *

(b) "Public Law 90–284" refers to the Fair Housing Act (42 U.S.C. 3601–20), which states that it is the policy of the United States to provide, within constitutional limitations, for fair housing throughout the United States and prohibits any person from discriminating in the sale or rental of housing, the financing of housing, or the provision of brokerage services, including otherwise making unavailable or denying a dwelling to any person, because of race, color, religion, sex, national origin, handicap or familial status. The Fair Housing Act further requires the Secretary to administer the programs and activities relating to housing and urban development in a manner affirmatively to further the policies of the Fair Housing Act. In accordance with this statutory direction, the Secretary requires that grantees administer all programs and activities related to housing and community development in a manner to affirmatively further the policies of the Fair Housing Act; furthermore, section 104(b)(2) of the Act requires that each grantee receiving funds under section 106 of the Act (entitlement or small cities grantees) certify to the satisfaction of the Secretary that it will affirmatively further fair housing.

* * * * *

5. In 570.904, the first sentence of paragraph (c) and paragraph (c)(1) introductory text are revised to read as follows:

§ 570.904 Equal Opportunity and Fair Housing Review criteria.

* * * * *

(c) *Fair housing review criteria.* Section 570.601(b) sets forth the general requirements for the Fair Housing Act (42 U.S.C. 3601–20) and the grantee's certification that it will affirmatively further fair housing. * * *

(1) The recipient has conducted an analysis to determine the impediments to fair housing choice in its housing and community development program and activities. The term "fair housing choice" means the ability of persons regardless of race, color, religion, sex, handicap, familial status or national origin, of similar income levels to have available to them the same housing choices. This analysis shall include a review for impediments to fair housing choice in the following areas:

* * * * *

Dated: August 22, 1989.

Audrey E. Scott,

General Deputy Assistant Secretary for Community Planning and Development.

Department of Transportation

Federal Aviation Administration

14 CFR Parts 25 and 121

Miscellaneous Changes to Emergency Evacuation Demonstration Procedures, Exit Handle Illumination Requirements, and Public Address Systems; Notice of Proposed Rulemaking

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 25 and 121

[Docket No. 26003; Notice No. 89-23]

RIN 2120-AC45

Miscellaneous Changes to Emergency Evacuation Demonstration Procedures, Exit Handle Illumination Requirements, and Public Address Systems

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to modify the procedures for conducting an emergency evacuation demonstration by requiring that the flightcrew take no active role in the demonstration and by changing the age/sex distribution requirement for demonstration participants. This notice also proposes to standardize the illumination requirements for the handles of the various types of passenger emergency exits. In addition, it is proposed to add a requirement that would prevent the inadvertent disabling of the public address system because of an unstowed microphone. These proposals resulted from the public technical conference on Emergency Evacuation of Transport Airplanes held in Seattle, Washington, September 3–6, 1985, and are intended to enhance the provisions of transport category airplanes for egress of occupants under emergency conditions.

DATE: Comments must be received on or before January 8, 1990.

ADDRESS: Comments on this proposal may be mailed in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket (AGC-204), Docket No. 26003, 800 Independence Avenue SW., Washington, DC 20591, or delivered in duplicate to FAA Rules Docket, Room 915–G, 800 Independence Avenue SW., Washington, DC 20591. Comments delivered must be marked: Docket No. 26003. Comments may be examined in Room 915–G weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. In addition, the FAA is maintaining an information docket of comments in the Office of the Regional Counsel (ANM-7), FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. Comments in the information docket may be examined in the Office of the Regional Counsel weekdays, except Federal holidays, between 7:30 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: Franklin Tiangsing, Regulations Branch (ANM-114), Transport Airplane Directorate, Aircraft Certification Service, FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168; telephone (206) 431–2121.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments relating to the environmental, energy, or economic impact that might result from adopting the proposals contained in this notice are invited. Substantive comments should be accompanied by cost estimates. Commenters should identify the regulatory docket or notice number and submit comments, in duplicate, to the Rules Docket address specified above. All comments received on or before the closing date for comments will be considered by the Administrator before taking action on this proposed rulemaking. The proposals contained in this notice may be changed in light of comments received. All comments will be available in the Rules Docket, both before and after the closing date for comments, for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerning this rulemaking will be filed in the docket. Commenters wishing the FAA to acknowledge receipt of their comments must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 26003." The postcard will be date/time stamped and returned to the commenter.

Availability of NPRM

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-230, 800 Independence Avenue SW., Washington, DC 20591; or by calling (202) 267-3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future rulemaking documents should also request a copy of Advisory Circular No. 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedures.

Background

On September 3, 1985, the FAA held a public technical conference in Seattle, Washington, to solicit and review information from the public on a variety of topics related to the emergency evacuation of transport category airplanes. As a result of the conference, three working groups were formed to discuss current safety regulations and to recommend changes. These groups, which were Design and Certification, Operations and Training, and Maintenance and Reliability, were comprised of individuals representing various aviation related organizations. The proposals in this notice are the result of certain recommendations made by the Design and Certification Working Group.

Section 25.803(c) of the Federal Aviation Regulations (FAR) defines the requirements for conducting an emergency evacuation demonstration for the type certification of transport category airplanes. Similar requirements for U.S. air carrier operators are defined in § 121.291 of the FAR and Appendix D of part 121. Section 121.291 requires, in part, that each holder must conduct an emergency evacuation demonstration in accordance with Appendix D of part 121 for each type and model of airplane to be used in passenger-carrying operations, unless compliance has been shown with § 25.803 in effect on December 1, 1978 (Amendment 25–46) during type certification, or with § 121.291(a) in effect on October 24, 1967 (Amendment 121–30). Appendix D of part 121, in turn, contains demonstration criteria which are similar to those of § 25.803. Section 25.803(c)(19) of part 25, and Appendix D, paragraph (a)(19), of part 121 currently require the applicant's approved emergency evacuation training program procedures to be fully utilized during the demonstration. Most operators' procedures call for one or more of the flight crewmembers to enter the cabin and assist in an evacuation. To the extent that they are available for such assistance, it is appropriate that they do so in an evacuation under actual emergency conditions. It cannot be assured, however, that the flight crewmembers will always be available to provide such assistance on a timely basis. They may have to perform other duties which would delay their entry into the cabin. Such duties may, for example, include engine shutdown or communications with persons on the ground. If the evacuation is initiated by a flight attendant, the flightcrew may not be immediately aware of the evacuation. Furthermore, they may not

be available to assist in the cabin because they are incapacitated or have already evacuated through one of the cockpit emergency exits. In this regard, some operators' procedures call for one of the flightcrew to leave the airplane immediately and assist on the ground.

Because it cannot be assured that the flightcrew would always be available to assist in an evacuation under actual emergency conditions, the working group recommended that the demonstration should be conducted without their assistance in the cabin. With the proposed change, the demonstration would more accurately reflect conditions that are likely to be encountered during an actual evacuation.

As proposed, the flightcrew could participate in the coordination of the demonstration by determining when the airplane is properly prepared for the demonstration, relaying information to ground personnel, or initiating the demonstration. When the demonstration starts, the flightcrew would have to be in their assigned seats. They should then leave the airplane through one of the exits close to the flight deck, after simulating the time required to complete the emergency checklist. After the flightcrew has reached the ground, they would be permitted to assist evacuees.

Section 121.291(a) would be amended to specify that any demonstration conducted on or after the effective date of the amendment would have to be conducted without the active participation of the flightcrews, regardless of whether the demonstration is conducted under the provisions of that part or during type certification under the provisions of § 25.803. This would not, however, preclude an analysis made after that date which is based on the results of earlier demonstrations.

Since the role of the flightcrew in the demonstration would be minimal, there would be no need for them to be members of a regularly scheduled line crew. Section 25.803(c)(7) of part 25, and Appendix D, paragraph (12), of part 121, would therefore be revised accordingly. Additionally, the word "or" in § 25.803(c)(7)(i) would be changed to "and" in order to clarify that the requirement is for a joint part 25 and part 121 certification effort.

Section 25.803(c), as well as Appendix D to part 121, currently specifies, in part, that the emergency evacuation demonstration must be conducted using a representative load of persons in normal health. Of this load, at least 30 percent must be female and at least 5 percent must be over 60 years of age with a proportionate number of females (i.e., 30 percent of 5 percent, or 1.5 percent of the total load must be female and over 60). In addition, at least 5 percent, but not more than 10 percent, must be children under 12 years of age.

The use of elderly persons in conducting emergency evacuation demonstrations, as currently specified, subjects those persons to a high risk of suffering injuries, such as broken bones, etc. Furthermore, it is an unnecessary risk since compensating factors can be applied to provide the same test results. Although there is less risk of injury to children, the use of minors in conducting emergency evacuation demonstrations actually violates prevailing child labor laws in many states. Because of these unnecessary risks, the FAA has permitted emergency evauation demonstrations to be conducted with other mixtures of age and sex under the equivalent safety provisions of § 21.21(b)(1).

In view of these unnecessary risks, the Design and Certification Working Group recommended that the FAA re-evaluate the mixture of sex and age used for emergency evacuation demonstrations. In responding to the recommendations, the FAA first reviewed three sources of data to determine the average mixture of passengers being flown in air carrier operations: (1) The "Demographic Characteristics of Airline Passengers (1984)," *The Airliner Cabin Environment: Air Quality and Safety*, National Academy Press; (2) an age distribution survey of trans-Atlantic passengers conducted in the United Kingdom by the Civil Aviation Authority (CAA); and (3) a cursory age/sex distribution survey of airline passengers conducted by the Air Transport Association (ATA).

A review of the age distribution data from the "Demographic Characteristics of Airline Passengers" shows that the percentage of passengers over 50 years of age is 27. The data from the CAA survey shows that the percentage of such passengers is 33. From an average of these data, it is assumed that the percentage of passengers over 50 years of age is 30.

The ATA data shows that the percentage of passengers under 12 years of age is 3. By rounding to the nearest 5 percent, it is assumed that the percentage of passengers under 12 years of age is 5.

The "Demographic Characteristics of Airline Passengers" data show that 46 percent of all passengers are female. The ATA data show that 38 percent of the passengers over 60 years of age are female (that is 5 percent of the total number of passengers) and 36 percent of the passengers, ages 12 to 59, are female (30 percent of the total).

In addition to reviewing data concerning the average mixture of passengers being flown in air carrier operations, the FAA also reviewed test data concerning the relative evacuation capability of different mixtures of age and sex.

The FAA Civil Aeromedical Institute (CAMI) conducted a series of test to compare the relative evacuation rate of four different seating configurations adjacent to a Type III emergency exit (as defined in § 25.807). From those tests, the relative evacuation rates of different mixtures of age and sex were developed. In addition, the Aerospace Industries Association of America (AIA) presented data to the working group concerning the relative evacuation capability of different mixtures of age and sex. The CAMI and AIA data indicate that two age groups, participants under 50 years of age and those over 50, will adequately represent the average passenger age distribution if the percentage of passengers under 12 years of age is added to the older age group. The 5 percent assumed to be under 12 years were therefore added to the 30 percent assumed to be over 50 years to produce 35 percent.

The relative evacuation rate data from those two reports were compared with the average mixture of passengers being flown in air carrier service to produce the mixture of age and sex proposed for use in the emergency evacuation. As proposed, at least 35 percent of the participants must be over 50 years of age, at least 40 percent must be female, and at least 15 percent must be female and over 50 years of age. The 15 percent that must be female and over 50 years of age is part of the 40 percent of the participants who must be female. Based on analyses of the data discussed above, the FAA has determined that the results of evacuation demonstrations using the proposed mixture of age and sex would be comparable to results of such demonstrations under the current rules. While the proposed change would not preclude the use of persons under 12 years of age or over 60 years, it would eliminate the requirement to unnecessarily expose them to the risk of suffering injuries.

Copies of relevant portions of the documents cited above have been placed in the docket.

It is also proposed to allow the use of an alternate mixture of sex and age, provided it would produce equivalent results. Producing equivalent results would mean that it would have to produce the same evacuation rates as the age/sex distribution specified in the regulation, or the 90-second time limit would have to be adjusted accordingly. Typically, the applicant would have to conduct comparative tests in order to show that the alternate age/sex distribution would produce equivalent results.

Although not a direct result of the working group recommendations, this notice proposes to clarify the wording in § 25.803(c)(3) and paragraph (a)(3) of Appendix D to part 121 to specify that stands and ramps may be used in emergency evacuation demonstrations at overwing exits only when off-wing descent devices are not installed on the airplane. This has been the practice since the inception of the rule, and the rewording will prevent any future uncertainty over the requirement. These changes would also require corresponding conforming changes to § 25.803(c)(18) and paragraph (a)(18) of Appendix D.

As a further conforming change, § 121.291(a) would be revised to extend the exceptions of those subparagraphs to include emergency evacuation demonstrations conducted in accordance with any later amendments to that section or § 25.803(a).

This notice also proposes to revise § 25.811 to standardize the requirements for illumination of passenger emergency exit operating handles. This section currently specifies that each operating handle of Type I and Type A passenger emergency exits must be self-illuminated, or it must be conspicuously located and well-illuminated by a separate light source. Section 25.811 does not provide this option for Type III exits. The operating handle of a Type III passenger emergency exit must be self-illuminated. Although § 25.811 does not extend this option to Type III exits, the FAA has accepted such exits with handles which are conspicuously located and well-illuminated by a separate light source, under the equivalent level of safety provisions of § 21.21(b)(1). Further, § 25.811 does not provide criteria for illumination of the operating handles of Type II and Type IV passenger emergency exits. As proposed, this section would specify the same alternative methods of illumination for the operating handles of all passenger emergency exits, regardless of the type.

The emergency lighting required by § 25.812 may provide sufficient illumination of the operating handles of Type II and Type IV passenger emergency exits in many airplanes; however, as noted above, § 25.811 does not currently provide criteria for illumination of the operating handles of such exits. Because no criteria are contained in § 25.811, there may be transport category airplanes in current air carrier, air taxi or commercial service which have no illumination or insufficient illumination of those handles. Although no retrofit requirement is proposed in this notice, the FAA is considering future rulemaking to amend parts 121 and 135 to require air carrier, air taxi and commercial operators to provide sufficient illumination of the operating handles of Type II and Type IV exits. The FAA specifically invites comments concerning the models and numbers of transport category airplanes in such service with Type II or Type IV exits, the adequacy of any existing illumination of operating handles in those airplanes, the cost of providing sufficient illumination of those handles on a retrofit basis, and whether the cost of modifying airplanes in service would be commensurate with any increase in safety that would result.

Covers are sometimes provided for the operating handles of passenger exits. Section 25.811 currently requires the instructions for the removal of such covers from Type III exits to be self-illuminated; however, the FAA has allowed the option of locating the instructions conspicuously and providing sufficient illumination by a separate source of light in lieu of self-illumination. Although the need for such illumination is of equal importance, § 25.811 does not currently specify any means to illuminate the instructions for removal of the operating handle cover from any other type of passenger emergency exit. Section 25.811 would therefore be amended to specify that the instructions for removing such covers from any type exit must either be self-illuminated or conspicuously located and well-illuminated by a separate source of light.

Part 25 does not require the installation of a public address system for type certification. Section 25.1411 does, however, contain certain accessibility standards that are applicable if a public address system is installed. The FAA proposed in Notice 86–5 (51 FR 19140; May 27, 1986) to adopt a new § 25.1423 which would, in part, require a power source which is independent of engine operation and auxiliary power unit operation, the forward motion of the airplane, and all normal means used by the flightcrew for power source disconnection. Since the time Notice 86–5 was developed, the Design and Certification Working Group identified a need for additional standards concerning the public address system.

Under certain circumstances, the public address system can be rendered inoperative inadvertently. During a recent incident in which there was an emergency evacuation due to a large fuel spill from one wing, the escape slides were deployed into the fuel. The flight attendants at the back of the cabin could not be notified of this potentially hazardous situation because the cockpit microphone was not returned to the stowed position after use and was thereby rendered inoperative. As recommended, a new regulation is proposed which would require the public address system to be designed so that it will not be rendered inoperative when any microphone is not in the stowed position. Since this requirement is a system design standard rather than an accessibility requirement as currently found in § 25.1411(a)(2), the new requirement would be placed in a new § 25.1423 entitled, "Public address system." The proposed new requirement would be in addition to any standards which may result from Notice 86–5. Additionally, the design standards found in § 121.318 would be added to the new § 25.1423 so that all the design requirements for the public address system will be found in one location in part 25. The addition of the requirements in part 121 to § 25.1423 is merely an editorial change and does not impact the regulatory evaluation of this NPRM.

As proposed in this notice, the requirement to have a public address system that will not be rendered inoperative when any microphone is not in the stowed position would apply only to future transport category airplanes for which an application for type certificate is made after the effective date of the change. Although no retrofit requirement is proposed in this notice, the FAA is considering future rulemaking to amend parts 121 and 135 to require air carrier, air taxi or commercial operators of transport category airplanes already in service to have public address systems which meet this new standard. The FAA specifically invites comments as to whether the cost of modifying such airplanes would be commensurate with the increase in safety that would result.

Regulatory Evaluation

Cost-Benefit Analysis

The regulatory evaluation analyzes the costs and benefits of a Notice of Proposed Rulemaking to amend parts 25 (Airworthiness Standards for Transport Category Airplanes) and 121 (Certification and Operations for Domestic, Flag, Supplemental Air Carriers, and Commercial Operators of

Transport Category Airplanes) of the FAR. This notice proposes to modify the procedures for conducting an emergency evacuation demonstration by requiring that the flightcrew take no active role in the demonstration and by changing the age/sex distribution requirement for demonstration participants. This notice also proposes to extend the illumination requirement for the operating handles of Type I and Type A exits currently in the regulations to include the operating handles of Type II and Type IV exits and to change the handle illumination requirement for Type III exits to correspond to the requirements for the operating handles of Type I and Type A exits. In addition, the notice proposes to add a requirement to prevent the public address system from becoming inoperative due to a microphone not being stowed. An example of a means of compliance would be to install a "push-to-talk" switch on each microphone.

This notice is a result of findings of the recent public Emergency Evacuation Task Force and is intended to improve the chances of passengers safely escaping an airplane during an emergency evacuation.

Costs

The FAA estimates the total incremental cost of compliance that would accrue from implementation of the proposed rule to be less than $74,000 (discounted present value, 10 years, 10 percent, 1986 dollars).

According to information available to the FAA, only one of the proposed amendments to part 25 would result in additional cost to manufacturers of transport category airplanes produced under new type certificates. In addition, none of the proposed amendments to part 121 are expected to adversely impact air carrier operators.

Each of the proposed amendments is evaluated below for probable cost impact:

1. Proposed Amendments

a. *Regularly Scheduled Line Crew.* This proposed amendment would require that flight crewmembers need not be members of a regularly scheduled line crew, provided they have knowledge of the airplane. In other words, such flight crewmembers need not be line pilots. This amendment is not expected to impose any additional cost on aircraft manufacturers because it represents nothing more than a minor procedural change.

b. *Age/Sex Distribution of Passengers used in an Emergency Evacuation Demonstration.* This proposed amendment would require that the age/sex distribution of persons who participate in manufacturers' emergency evacuation demonstrations must consist of at least 40 percent female, at least 35 percent must be over 50 years of age, and at least 15 percent must be female and over 50 years of age. This requirement is not expected to impose additional costs to manufacturers, because any costs generated from the age/sex distribution change would be offset by the savings accrued from the elimination from such demonstrations of the requirement that includes the participation of persons under 18 and over 60 years of age. The other part of this amendment would allow an alternate passenger load to be used if it can be shown that either the alternate passenger load will produce an equivalent evacuation rate, or the 90-second time limit is adjusted to produce a demonstration that will provide an equivalent evacuation capability to that provided by a demonstration used for the representative passenger load. This feature would not impose any additional cost to manufacturers because it only represents an option to the 90-second evacuation time limit. Moreover, it is reasonable to assume that a manufacturer would not choose to use an alternate passenger load if it were not deemed to be in the manufacturer's best interest.

c. *Emergency Evacuation Demonstrations by Flight Attendants without Flightcrew.* This proposed amendment would require that emergency evacuation demonstrations be conducted by flight attendants without reliance on the flightcrew. This requirement would not impose an additional cost to manufacturers because it represents nothing more than a minor procedural change. This change would allow the flightcrew to perform other duties, such as engine shutdown and communication with persons on the ground.

d. *Passenger Emergency Exit Handle.* This amendment would require that all passenger emergency exit operating handles and the instructions for removal of covers from those handles that are covered must be: (1) Self-illuminated, or (2) conspicuously located and well-illuminated. This amendment would impose little, if any, additional cost impact on manufacturers, because illumination of the operating handles of three of five types of exits is already required under the current regulations. For instance, the current regulations require that the operating handles of Type I and Type A passenger emergency exits must be self-illuminated or conspicuously located and well-illuminated by another source. In addition, the handles of Type III exits must be self-illuminated under the current regulations; however, the regulations do not include the option for the handle to be conspicuously located and well-illuminated by another source. The FAA has made findings of equivalent safety under the provisions of § 21.21(b)(2) for the handles of Type III exits, wherein the handle is conspicuously located and well-illuminated. Thus, for the aforementioned reasons, the optional means of lighting the handles of Type III exits would not impose additional costs on manufacturers, because they are already in compliance. This practice is expected to continue.

The current regulations do not provide criteria for the illumination of the operating handles of Type II and Type IV exits. This proposal would standardize the illumination of the operating handles of all passenger emergency exits to only two methods (self-illuminated, or conspicuously located and well illuminated by another source), regardless of the type of exit involved. Neither of these two exit types currently is required to have handles which meet the provisions of the proposed amendment. Nevertheless, the proposed amendment would not impose any significant additional cost on manufacturers. This is primarily because transport category airplanes seldom have such exits. For the few airplanes which will have Type II or IV exits, the emergency lighting currently required by § 25.812 would provide sufficient lighting for the exit handles or would provide the electrical circuitry with which additional lighting could easily be provided.

e. *Public Address System.* This amendment would require that the public address system incorporate a feature, such as a push-to-talk switch, so that the system would be capable of operating regardless of the position of any microphone. Based on the informed judgment of FAA personnel, this item is expected to cost under $400 per airplane. While some FAA personnel projected lower cost estimates, the higher cost figure was chosen to represent a worst-case scenario. From a cost impact standpoint, this worst-case cost estimate is expected to be negligible relative to the minimum cost of more than $20 million required to manufacture each of the transport category airplanes expected to come into the U.S. service, under new type certificates, in the early to middle 1990's.

f. *Appendix D to Part 121.* The proposed amendments to this part would impose the same requirements on air carrier operators as those proposed as § 25.803(c) (7) and (8) for aircraft manufacturers. They would also establish the effective date of the amendments as the date on which the new standards became effective for such operators. These proposed amendments are not expected to impose additional costs to air carrier operators for those reasons given previously for aircraft manufacturers.

Benefits

The proposed rule is expected to generate benefits in the form of enhanced safety. Such safety would take the form of reduced likelihood of serious injuries and fatalities. Such injuries and fatalities would be incurred primarily during survivable post-crash ground fire emergency evacuations from air carrier airplanes and would be due largely to ineffective public address systems and inadequate illumination near or at some passenger emergency exit handles.

Estimation of these benefits, in monetary terms, is extremely difficult, since there has not been a documented aviation accident in which either serious injuries or fatalities have been shown to have resulted due to those deficiencies noted previously. There was, however, a potentially catastrophic emergency evacuation in 1984 from a Boeing 747 airplane at Honolulu, Hawaii. During that incident, the escape slides were deployed into a large pool of spilled fuel. This presented a potential hazard due to the possibility of fire. The public address system was inoperative because one cockpit microphone was not returned to the stowed position; therefore, the flight attendants at the back of the cabin could not be notified of the fuel leakage.

As a result of that incident, the aforementioned safety deficiencies in emergency evacuation equipment and procedures, and aviation accident information contained in a report published by the National Transportation Safety Board, the FAA believes there is an increased probability, over the next 10 years, of a survivable post-crash ground fire accident which could result in injuries or fatalities. This evaluation employs benefits for total cumulative airplane-years of exposure, based on the number of newly type certificated transport category airplanes projected to come into U.S. service between 1987 and 1996. An airplane-year of exposure refers to one airplane operating for 1 year at typical utilization rates for transport category airplanes. As a result of uncertainty related to whether or not an aviation accident would occur and result in casualties that could be prevented by the provisions of the proposed rule, this evaluation employs a range of potential benefits. The lower end of the range represents the prevention of four serious injuries and the upper end represents the prevention of a fatality. In monetary terms, this equates with a potential range of total benefits between $216,000 and $1,000,000 (1986 dollars), based on FAA's estimated monetary value of $54,000 for a serious aviation injury and a $1 million minimally accepted statistical value of life used by economists for the purpose of analysis. Subsequently, these benefits were distributed over the 10-year evaluation period based on total airplane-years of exposure in each year, discounted using present value factors, and summed over the 10-year period (1987–96). This procedure results in estimates of one-time total discounted present value benefits ranging from $92,000 to $425,000. In view of the expected total cost of $74,000 and benefits of $92,000 to $425,000, the FAA believes the proposed rule is cost-beneficial.

The Regulatory Evaluation that has been placed in the docket contains additional information related to the costs and benefits that are expected to accrue from the implementation of the proposed rule.

Regulatory Flexibility Determination

Under the criteria of the Regulatory Flexibility Act of 1980, the FAA has determined that the proposed rule would not have a significant economic impact on a substantial number of small entities.

Since this Act applies to U.S. entities, only U.S. manufacturers and air carrier operators of transport category airplanes would be potentially impacted. In the United States, there are only two manufacturers that presently specialize in commercial transport category airplanes: (1) The Boeing Company, and (2) the McDonnell Douglas Corporation. In addition, there are many manufacturers that produce transport category airplanes for general aviation (GA) use, such as business jets. Some of these GA manufacturers include, for example, Gates Learjet and Cessna Aircraft.

The FAA size threshold for a small entity for U.S. airplane manufacturers is 75 employees, i.e., any U.S. airplane manufacturer with more than 75 employees is considered not to be a small entity. None of the transport category airplane manufacturers are considered to be small entities because each manufacturer is believed to have more than 75 employees. Thus no significant economic impact would be incurred by U.S. manufacturers of commercial transport category airplanes.

In terms of small entities, none of those airplane operators under Part 121 would incur significant economic impact from implementation of the proposed rule. This assessment is based on the belief that the proposed rule would not have any cost impact on such operators for those reasons given previously for airplane manufacturers in the cost section.

International Trade Impact Assessment

The proposed rule is not expected to have an adverse impact on the trade opportunities of U.S. manufacturers of transport category airplanes doing business abroad nor on foreign airplane manufacturers doing business in the United States. Since the certification rules are applicable to both foreign and domestic manufacturers that sell in the United States, there would be no competitive trade advantage to either.

Federalism Implications

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that these proposed regulations would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Conclusion

For the reasons given earlier in the preamble, the FAA has determined that this is not a major regulation as defined in Executive Order 12291. As this notice concerns a matter on which there is significant public interest, the FAA has determined that this action is significant as defined in Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). In addition, the FAA certifies under the criteria of the Regulatory Flexibility Act that this regulation, at promulgation, will not have a significant economic impact on a substantial number of small entities.

directives and standards, Aviation safety, Common carriers, Crashworthiness, Emergency evacuation, Safety, Transportation.

The Proposed Amendments

Accordingly, the FAA proposes to amend Parts 25 and 121 of the Federal Aviation Regulations (FAR), 14 CFR parts 25 and 121, as follows:

PART 25—AIRWORTHINESS STANDARDS: TRANSPORT CATEGORY AIRPLANES

1. The authority citation for Part 25 continues to read as follows:

Authority: 49 U.S.C. 1344, 1354(a), 1355, 1421, 1423, 1424, 1425, 1428, 1429, 1430; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 49 CFR 1.47(a).

2. By amending § 25.803 by revising paragraphs (c)(3), (c)(7)(i), (c)(8) (i), (ii), and (iii), (c)(18), and (c)(19), and by adding a new paragraph (c)(8)(vi) to read as follows:

§ 25.803 Emergency evacuation.

* * * * *

(c) * * *

(3) Unless the airplane is equipped with an off-wing descent means, stands or ramps may be used for descent from the wing to the ground. Safety equipment such as mats or inverted life rafts may be placed on the floor or ground to protect participants. No other equipment that is not part of the emergency evacuation equipment of the airplane may be used to aid the participants in reaching the ground.

* * * * *

(7) * * *

(i) For compliance with this section and § 121.291 of this chapter, a member of a regularly scheduled line crew, except that flight crewmembers need not be members of a regularly scheduled line crew provided they have knowledge of the airplane; or

(ii) * * *

(8) * * *

(i) At least 40 percent of the passenger load must be female.

(ii) At least 35 percent of the passenger load must be over 50 years of age.

(iii) At least 15 percent of the passenger load must be female and over 50 years of age.

(iv) * * *

(v) * * *

(vi) An alternate passenger load may be used provided it can be shown to provide an evacuation rate equivalent to that provided by the passenger load specified above or the time limit is appropriately reduced from 90 seconds to compensate for any differences.

* * * * *

(18) Except as provided in paragraph (c)(3) of this section, all evacuees must leave the airplane by a means provided as part of the airplane's equipment.

(19) The applicant's approved procedures must be fully utilized, except the flightcrew must take no active role inside the cabin during the demonstration.

* * * * *

§ 25.811 [Amended]

3. By amending § 25.811 by removing paragraph (e)(3) and marking it [RESERVED] and by revising paragraph (e)(2) introductory text to read as follows:

§ 25.811 Emergency exit marking.

* * * * *

(e) * * *

(1) * * *

(2) Each passenger emergency exit operating handle and the cover removal instructions, if the operating handle is covered, must—

(i) * * *

(ii) * * *

(3) [Reserved]

* * * * *

4. By adding a new § 25.1423 to read as follows:

§ 25.1423 Public address system.

A public address system required by this chapter must—

(a) Be capable of operation within 10 seconds by a flight attendant at those stations in the passenger compartment from which its use is accessible;

(b) Be audible at all passenger seats, lavatories, and flight attendant seats and work stations;

(c) Be designed so that no unused, unstowed microphone will render the system inoperative; and

(d) Be capable of functioning independently of any required crewmember interphone system.

PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

5. The authority citation for Part 121 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1355, 1356, 1357, 1401, 1421 through 1430, 1472, 1485, and 1502; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 49 CFR 1.47(a).

6. By amending § 121.291 by revising paragraph (a) to read as follows:

§ 121.291 Demonstration of emergency evacuation procedures.

(a) Except as provided in subparagraph (1) of this paragraph, each certificate holder must conduct an actual demonstration of emergency evacuation procedures in accordance with paragraph (a) of Appendix D to this part to show that each type and model of airplane with a seating capacity of more than 44 passengers to be used in its passenger-carrying operations allows the evacuation of the full capacity, including crewmembers, in 90 seconds or less.

(1) An actual demonstration need not be conducted if that airplane type and model has been shown to be in compliance with this paragraph in effect on or after October 24, 1967, or, if during type certification, with § 25.803 of this chapter in effect on or after December 1, 1978.

(2) Any actual demonstration conducted after [insert the effective date of this amendment] must be in accordance with paragraph (a) of Appendix D to this part in effect on or after that date or with § 25.803 in effect on or after that date.

* * * * *

7. By amending Appendix D to Part 121 by revising paragraphs (a)(3), (a)(7), (a)(12), (a)(18), and (a)(19) to read as follows:

Appendix D—Criteria for Demonstration of Emergency Evacuation Procedures Under § 121.291

(a) * * *

(3) Unless the airplane is equipped with an off-wing descent means, stands or ramps may be used for descent from the wing to the ground. Safety equipment such as mats or inverted life rafts may be placed on the floor or ground to protect participants. No other equipment that is not part of the emergency evacuation equipment of the airplanes may be used to aid the participants in reaching the ground.

* * * * *

(7) A representative passenger load of persons in normal health must be used. At least 40 percent of the passenger load must be females. At least 35 percent of the passenger load must be over 50 years of age. At least 15 percent of the passenger load must be female and over 50 years of age. Three life-size dolls, not included as part of the total passenger load, must be carried by passengers to simulate live infants 2 years old or younger. Crewmembers, mechanics, and training personnel, who maintain or operate the airplane in the normal course of their duties, may not be used as passengers.

* * * * *

(12) Each crewmember must be a member of a regularly scheduled line crew, except that flight crewmembers need not be members of a regularly scheduled line crew, provided they have knowledge of the

BEST COPY AVAILABLE

airplane. Each crewmember must be seated in the seat the crewmember is normally assigned for takeoff, and must remain in that seat until the signal for commencement of the demonstration is received.

* * * * *

(18) Except as provided in paragraph (a)(3) of this appendix, all evacuees must leave the airplane be a means provided as part of the airplane's equipment.

* * * * *

(19) The certificate holder's approved procedures and all of the emergency equipment that is normally available, including slides, ropes, lights, and megaphones, must be fully utilized during the demonstration, except that the flightcrew must take no active role inside the cabin during the demonstration.

42 CFR Parts 410, 424, 466 and 473

[BPD-615-P]

RIN 0938-AD69

Medicare Program; Coverage of Home Interavenous Drug Therapy Services

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: These proposed regulations would expand coverage under Medicare part B to include coverage of home intravenous (IV) drug therapy services as authorized by section 203 of the Medicare Catastrophic Coverage Act of 1988. They include requirements for certification and for review and approval of the need for the covered services by a peer review organization, and they place limits on acceptance of and payments for certain patient referrals for covered home IV drug therapy services as specified in the statute. Home IV drug therapy services are covered by Medicare beginning January 1, 1990.

DATE: To assure consideration, comments must be mailed or delivered to the appropriate address, as provided below, and must be received by 5:00 p.m. on November 7, 1989.

ADDRESSES: Mail comments to the following address:

Health Care Financing Administration,
Department of Health and Human Services, Attention: BERC-615-P, P.O. Box 26676, Baltimore, maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309-G, Hubert H. Humphrey Building, 200 Independence Ave. SW., Washington, DC, or

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

Please address a copy of comments on information collection requirements to:

Allison Herron, Office of Information and Regulatory Affairs, Room 3002 New Executive Office Building, Washington, DC 20503.

Due to staffing and resource limitations, we cannot accept facsimile (FAX) copies of comments.

In commenting, please refer to file code BERC-615-P. Comments received timely will be available for public inspection as they are received, beginning approximately three weeks after publication of this document, in Room 309-G of the Department's offices at 200 Independence Ave. SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (phone: 202-245-7890).

FOR FURTHER INFORMATION CONTACT: Nancy Anne Null (for coverage issues), (301) 966-4654; Patricia Booth (for PRO review), (301) 966-6860.

SUPPLEMENTARY INFORMATION:

Background

The Medicare program was established by Congress in 1965 with the enactment of title XVIII of the Social Security Act (the Act). The program provides payment for certain medical services and supplies for persons 65 years of age or over, disabled persons, and persons with end-state renal disease.

Medicare consists of essentially two complementary insurance programs, the Hospital Insurance program (known as part A) and the Supplementary Medical Insurance program (known as part B).

Under section 1832 of the Act, part B covers a wide range of medical services and supplies such as those furnished by physicians or others in connection with physicians' services, outpatient hospital services, outpatient physical and occupational therapy services, and home health services. Physicians' services covered under part B include visits by patients to physicians' offices and visits by physicians to patients in their homes, in hospitals, and in other health care institutions. Part B also currently covers certain drugs and biologicals that cannot be self-administered, diagnostic x-ray and laboratory tests, purchase or rental of durable medical equipment (DME), ambulance services, prosthetic devices, and certain medical supplies. Our regulations concerning coverage of these services are found at 42 CFR part 410.

Many individuals with conditions such as osteomyelitis or servere pain require intravenous (IV) medication on an ongoing basis, because, for example, the patient is unable to take the medicine in some other form or the medicine would not be as effective if administered differently. Many patients require hospitalization for the initiation and, frequently, the duration of IV drug therapy. There is, however, an increasing number whose care (in whole or in part) can be managed at home. Many of these patients are anxious to be at home, rather than spending additional time in the hospital. Home IV drug therapy is also less expensive than IV drug therpy furnished in an inpatient setting.

Few services furnished in conjunction with home IV drug therapy to Medicare beneficiaries are currently covered by Medicare and those few are covered in a piecemeal fashion. Some of the services, such as the insertion of the IV needle by a registered nurse, might be covered as a home health benefit, if the patient is homebound and meets all other requirements necessary for coverage of home health services (see 42 CFR 409.42).

Legislation

On July 1, 1988, the Medicare Catastrophic Coverage Act (MCCA) of 1988 (Pub. L. 100-360) was enacted. Section 203 of MCCA revised sections 1832(a)(2)(A) and 1834 of the Act and added section 1861(jj) to the Act to cover home IV drug therapy services as a separate benefit when furnished by qualified home IV drug therapy providers (referred to hereinafter as "home IV providers"). Coverage becomes effective for services furnished on or after January 1, 1990. New section 1861(jj) of the Act defines the services to be covered and who may provide them. New section 1834(d) discusses payment for the services, describes limits on acceptance of and payments for certain physician referrals, and authorizes sanctions for violations of the referral limitations. Section 203 of Public Law 100-360 also provides for studies and reports, certification of home IV drug therapy providers, sanctions for noncompliance, physicians' certification of the need for home IV services, review and approval of the services by a utilization and quality control peer review organization (PRO), and the use of regional intermediaries to administer the provision.

The scope of this proposed rule is limited to coverage of the home IV services, limitations on and acceptance of payments for certain patient referrals, PRO review and approval, and physician certification of the need for services. We are preparing separate **Federal Register** documents to address payment issues (that is, the fee schedule for home IV services and payment for the IV drugs), coverage of home IV drugs, and qualifications of providers. Following is a description of the statutory provisions of Public Law 100-360 relevant to this proposed regulation.

A. Coverage of Services

As described in the new section 1861(jj) (1) and (2) of the Act, covered home IV drug therapy services are the items and services furnished to an individual who is under the care of a physician, in a place of residence used

as the individual's home, by a qualified home IV provider, as defined in section 1861(jj)(3) of the Act, or by others under arrangements made with the provider and under a plan established and reviewed by a physician. Covered items and services include nursing, pharmacy and related services (including medical supplies, IV fluids, delivery, and equipment) as are necessary to conduct safely and effectively an intravenously administered drug regimen through use of a covered home IV drug as defined in section 1861(t)(4) of the Act.

B. PRO Review

Section 1835(a)(2)(G)(v) of the Act requires that services initiated before January 1, 1993 must be reviewed and approved by a PRO. For services to be initiated in the home following an inpatient stay, the PRO review and approval must occur before the home services begin. The PRO must complete the review within one working day of its receipt of the request for the review.

For services first initiated on an outpatient basis, the PRO review and approval must occur within one working day of the date the services start (other than in exceptional circumstances).

New section 1154(a)(16) of the Act, as added by Public Law 100-360, requires the Secretary to establish criteria for the PRO to use in conducting reviews under section 1154(a) of the Act concerning the appropriateness of home IV drug therapy services.

C. Physician Certification Requirements

New section 1835(a)(2)(G) of the Act requires that, in order for home IV drug therapy services to be covered under Medicare, a physician certify that:

- The individual needs (or needed) the services for the administration of a covered home IV drug;
- A physician has established a plan for furnishing the services and reviews it periodically;
- The services are (or were) furnished while the individual is (or was) under the care of a physician;
- The services are or were furnished in a place of residence used as the individual's home; and
- The services, if initiated before January 1, 1993, have been reviewed and approved by a PRO within specified timeframes.

D. Limitations on Acceptance of and Payment for Certain Referrals

New section 1834(d)(3) sets forth several provisions governing referrals of patients to home IV providers by physicians.

1. General

Under section 1834(d)(3) of the Act, we may not pay for services furnished by a home IV provider to an individual if his or her referring physician, or an immediate family member of the referring physician, has an ownership interest in the provider or receives compensation from the provider.

"Referring physician" as defined in section 1834(d)(3)(D) of the Act means, with respect to a beneficiary receiving home IV drug therapy services, the physician who prescribed the covered home IV drug for which the covered services are provided or who established the plan of care for such services.

2. Exceptions

Exceptions to the above prohibitions apply in the following cases:

- Under section 1834(d)(3)(B)(i) of the Act, although a physician or immediate family member has an ownership interest in the provider, we may pay for the services if (a) the ownership interest is the ownership of stock traded over a publicly regulated exchange and was purchased on terms generally available to the public; or (b) the provider is a sole home IV drug therapy provider (as defined by the Secretary) in a rural area.
- Although the physician receives compensation from the provider, we may, under section 1834(d)(3)(B)(ii) of the Act, pay for the provider's services if the compensation is reasonably related to items or services actually provided by the physician and does not vary in proportion to the number of referrals made by the referring physician. This exception does not apply to compensation to a physician for direct patient care services furnished by that physician.
- If the referring physician's (or immediate family member's) only ownership or financial relationship with the home IV provider is as an uncompensated officer or director of the provider, the limitation on referrals does not apply, as stated in section 1834(d)(3)(B)(iii) of the Act.
- Finally, under section 1834(d)(3)(B)(iv) of the Act, we are authorized to establish in regulations additional exceptions for ownership or compensation arrangements that do not pose a substantial risk of program abuse.

3. Sanctions for Violations of the Limitations on Acceptance of Certain Referrals.

- As set forth under section 1834(d)(3)(C)(i) of the Act, we will not pay for home IV drug therapy services provided in violation of the limitations on acceptance of physician referrals described above.
- Section 1834(d)(3)(C)(ii) of the Act provides that any person (including a home IV provider or physician) who presents or causes to be presented a claim for an item or service that the person knows or should know is for an item or service for which payment may not be made under section 1834(d)(3)(A) of the Act will be subject to a civil monetary penalty of not more than $15,000 for each item or service. (As provided in new section 1834(d)(3)(C)(ii) of the Act, the provisions concerning civil money penalties in section 1128A of the Act will be applied to such a violation (except that the first sentence of section 1128A(a), which refers to fraudulent claims, and all of subsection 1128A(b), which refers to improper inducements) in the same manner that they apply to a penalty or proceeding under section 1128A(a) of the Act.)

Proposed Revisions to the Regulations

To implement the provisions of section 203 of Pub. L. 100-360, we would establish a new subpart F in 42 CFR part 410, amend part 424 by adding a new § 424.28, and add a new subpart E in part 466. In many cases, our regulations would parallel the statute. Below we discuss the areas that would require interpretation or expansion.

A. General

In § 410.201, Basic Rule, we would state the gist of the subpart; i.e., that Medicare part B pays for home IV drug therapy services when they are furnished by a "qualified provider" (or by others under arrangements with that provider) to a patient under the care of a physician in a place of residence used as the individual's home and under a plan of care established and periodically reviewed by the individual's referring physician. (A "qualified provider" is one that meets certain conditions of participation discussed below.)

B. Definitions

1. We would state in new § 410.203, Definitions, that a "place of residence used as an individual's home" is a place in which the beneficiary normally resides and is not an institution or facility defined in section 1861(e)(1), section 1819(a), or section 1919(a) of the Act.

Section 1861(e)(1) of the Act defines a hospital as an institution "primarily engaged in providing . . . diagnostic services and therapeutic services for medical diagnosis, treatment, and care of injured, disabled, or sick persons or . . . rehabilitation services for the rehabilitation of injured, disabled, or sick persons." Section 1819(a) of the Act defines a skilled nursing facility (SNF) for purposes of qualifying to participate in Medicate. Section 1919(a) of the Act defines a nursing facility for purposes of qualifying to participate in Medicaid.

Congress used the phrase "in a place of residence used as the individual's home" (section 1861(jj)(1)(A) of the Act). Section 1861(t)(4)(A) explicitly requires the Secretary to determine whether various drugs can "generally be administered safely and effectively in a home setting." (See also H.R. Rep. No. 661, 100th Cong., 2d Sess. 186 (1988). This would be a meaningless charge if a home setting included nursing facilities. Nursing facilities that qualify to participate in Medicare or Medicaid are already required to identify each resident's need for drug therapy (§ 483.20(b)(2)(xiii)), develop a plan to meet those needs (§ 483.20(d)), provide all necessary care (§ 483.25), including drug therapy (§ 483.25)), and obtain and provide routine and emergency drugs to meet resident needs (§ 483.60). For facilities that meet these requirements, the Secretary is assured that *all* drugs provided to residents can be safely and effectively administered in that setting. It does not appear that Congress intended this to be considered "a home setting."

Furthermore, explicit evidence of this view is contained in the conference report discussion of requirements for PRO review. PROs are required to assure that beneficiaries are discharged from hospitals to home IV therapy only if "the patient (or a family member) is able to carry out the home care regimen properly." (See the H.R. Rep. No. 661, 100th Cong. 2d Sess. 203 (1988.). In a nursing facility the regimen would be carried out by facility personnel. Only in a private residence would the focus be on the patient or a *family member*.

We considered an alternative option of recognizing nursing facilities as "homes" for those beneficiaries who live in those facilities rather than in private residences. We recognize that there are some people for whom the facility is in fact and in law a residence and who have no other home. Therefore, denial of coverage for home IV services and drugs for patients who reside in such facilities would mean that the patient would either have to pay for such therapy out-of-pocket or have another payor, such as Medicaid, pay on his behalf. Such a patient might seek to enter a hospital to receive Medicare coverage for such therapy. Under this alternate line of reasoning, the patient (either on his own or with assistance from facility staff who act as *de facto* "family members") would be entitled to home IV coverage whether his home is a house, apartment, or nursing facility. (Under current regulations, such facilities must provide or obtain the necessary care and services to meet the patients' needs). Furthermore, it might be inconsistent with the coverage of all other "outpatient" prescription drugs to exclude just "home" intravenous drugs, and not all drugs, from coverage in such facilities. (Under this alternative, the facility would not be considered a home for a person receiving Medicare part A SNF care because, in the case of a Medicare-covered SNF stay, IV drug therapy would be covered under part A and, more generally, a facility is rarely if ever a permanent residence for a Medicare SNF patient). We request specific comment on both alternatives, as well as suggestions for other approaches to resolving the dilemmas posed by the special case of residents of nursing facilities that are not paid under part A of Medicare.

2. We propose to define in § 410.203 the term "referring physician" as the physician who prescribed the covered home IV drug for which the services are to be provided or who established the plan of care for the services (or both). This follows the definition of the "referring physician" found in section 1834(d)(3)(D) of the Act. We would also require that the referring physician implement the plan of care by continual involvement in the individual's course of therapy through an ongoing assessment of the patient's care. In conjunction with this monitoring, we would also expect the referring physician to update the plan of care as necessary, but at least every 30 days. We believe that in order for high quality care to take place, the referring physician must be intimately involved with the patient's continuity of care beginning with its initiation through the course of the IV drug therapy. The role of the referring physician is therefore paramount in insuring continuity of high quality care. This fundamental point underlies our requirement that the referring physician establish and review the plan of care, as well as perform the certification and recertification functions.

There may be exceptional circumstances where there is more than one "referring physician" for purposes of this benefit. For example, a beneficiary may enter an out-of-State medical center and while in that institution (e.g., hospital) begin a course of IV therapy. After discharge from the hospital, the individual returns to his or her home State to continue the therapy. In this case, "a referring physician" at the medical center may have prescribed the covered home IV drug, established the plan of care, or both. A "referring physician" in the home State will assume responsibility for the plan of care from that point forward. He or she will assume responsibility for ongoing patient assessments, coordination with the home IV provider nurse or pharmacist (or both), modification to the plan, the review and signing of the plan, and the certification and recertification procedures. We therefore expect the "referring physician," except in circumstances similar to that cited, to be the same individual for purposes of plan of care establishment and review, and certification and recertification requirements.

3. "Home intravenous drug therapy services" or "home IV services" would be defined in § 410.203 as the nursing, pharmacy, and related services (including medical supplies, training, IV fluids except when they are a covered home IV drug, equipment, and delivery of any necessary items and services) that are necessary to conduct safely and effectively an intravenously administered drug regimen through use of a covered home IV drug. The items and services would be furnished to an individual who is under the care of a physician, in a place of residence used as the individual's home, by a qualified home IV provider or by others under arrangements (e.g., under a contract between the IV provider and other entities), and under a plan established and periodically reviewed by the referring physician.

We emphasize the term "intravenously administered"; we would not cover, under the home IV drug therapy services benefit, the services associated with the administration of a covered IV drug by some other access such as arterial, subcutaneous, intramuscular, or intrathecal modes of administration. The statute, in providing the definition of covered services and items, includes those that "are necessary to conduct safely and effectively intravenously administered drug regimen * * *."

4. We are also proposing to define in § 410.203 "home intravenous drug therapy provider" or "home IV provider" as an entity that has been approved as meeting the conditions of participation in part 485, subpart C and has a provider agreement with HCFA. The conditions are being proposed in another **Federal Register** document.

C. Covered Home IV Drug Therapy Services

For purposes of home IV drug therapy, nursing and pharmacy services are

those services that are necessary to conduct safely and effectively an intravenously administered drug regimen through use of a covered home IV drug. The home IV provider would have to provide the following related services as part of the therapy when they are necessary for the safe and effective administration of a covered home IV drug:

- Medical supplies;
- Training of the patient or his or her caregiver in the technique of IV drug therapy;
- Intravenous fluids except for those that meet the definition of a covered home IV drug under section 1861(t)(4) of the Act;
- Equipment, such as IV poles and infusion pumps; and
- Delivery of medical items and supplies.

We consider training of the patient or caregiver crucial to the initiation of IV drug therapy and want to clarify that outpatient training would be included in Medicare payment for a home IV drug therapy services. Before an individual or a caregiver can administer IV drugs, it is critical that he or she be adequately trained in all aspects of the IV drug therapy. We fully expect a hospital to perform the training when a course of IV drug therapy begins in that setting. (The proposed rule addressing conditions of participation for home IV providers describes training requirements.)

Except when IV fluids are used as a drug of choice to treat medical problems caused by dehydration or to hydrate patients before and after the administration of another drug to avoid medical problems that could arise from administration of that drug, we propose to cover these fluids as a supply under the home IV drug therapy services benefit. In other words, when IV fluids are administered by themselves for hydration purposes, we would consider them to be a drug, but when they are used as diluents for other drugs or for any other purpose we would consider them to be supplies and would pay for them under the fee schedule authorized under the new section 1834(d)(2) of the Act. Accordingly, if an IV fluid is used for hydration therapy, we would determine payment for it under the payment methodology for covered outpatient prescription drugs set forth in the new section 1834(c)(3) of the Act, as added by section 202(b)(4) of Public Law 100–360. (As noted earlier, under section 1861(t)(4)(B) of the Act, we addressed the list of drugs to be covered as home IV drugs in a separate rulemaking. That list includes a category of hydration therapy drugs that we propose to classify as "covered home IV drugs".)

The home IV drug therapy services benefit is a new benefit that represents an expansion of Medicare part B services. Under proposed § 410.205(c), only a participating home IV provider can furnish and bill for "covered home IV drug therapy services" as such. In addition, if the home IV provider does not furnish the covered home IV drugs, either directly or under arrangement, we would not pay for any home IV drug therapy services it provides.

We also want to emphasize that under new section 1834(c)(1)(A)(ii) of the Act, as added by section 202(a) of Public Law 100–360, when a beneficiary continues a course of IV therapy in his or her home after the therapy was initiated during an inpatient hospital stay, he or she does not have to pay a deductible on the home IV drugs dispensed in conjunction with that therapy. However, this exception to the deductible requirement does not apply if the services are not furnished by or under arrangements with a home IV drug therapy provider.

We have identified certain policy issues arising out of the interaction between the home IV services benefit and the home health care benefit. If a beneficiary is receiving home IV drug therapy, that fact could serve to meet the home health care criterion for skilled nursing care so that the beneficiary may receive both covered home IV drug therapy services and home health care services concurrently, assuming that the other qualifying criteria for home health care are met. However, in this situation, HHAs, assuming that they are not also certified as home IV providers, would not be able to bill for any covered services related to the home IV drug therapy. In other words, HHA services, such as home health aide services, could be furnished and billed by the HHA as covered home health services but not as home IV drug therapy services. Similarly, HHAs could not bill for skilled nursing services unless such services are necessary outside of those furnished in connection with administration of the home IV drugs. If an HHA is also certified as a home IV provider, it could furnish both covered home health services and covered home IV drug therapy services. However, we would require that the entity bill separately for the two benefits, using one provider number for home health services and another for home IV services. We are aware that this situation could result in program abuse such as double billing for services. For that reason, we will consider initiating contractor review of claims for beneficiaries receiving both home health services and home IV therapy services.

We note that, under the proposed conditions of participation for home IV providers, we would require that home IV providers ensure that prospective home IV patients or their caregivers are adequately trained to handle home IV drug therapy safely and effectively; that is, that the patient or caregiver would be capable of administering the medication while taking whatever safety precautions are necessary.

Furthermore, under the conditions of participation, we would require that any nursing service necessary to the administration of the home IV benefit must be furnished by the home IV provider or by others under arrangement with the home IV provider. Accordingly, Medicare home health services would not be necessary to supplement home IV services in connection with that aspect of the beneficiary's care. However, there is a potential issue concerning whether home health aides are qualified under the laws of the various States to provide assistance for home IV patients as caregivers in connection with the administration of the home IV drug. Therefore, we are requesting comments on whether State medical practice acts will permit someone other than a physician, a physician's assistant, or a registered nurse to hang an IV container and administer prescription drugs intravenously and, if so, under what circumstances and what supervision requirements.

We are further requesting comments on who should be responsible for coordination of care when the home IV beneficiary is also receiving home health care benefits under the Medicare program. Home IV therapy care for a beneficiary qualifying for the benefit, including appropriate nursing care, must be furnished by the home IV provider; however, a variety of other concurrent health care needs may be met by an HHA, which could supply non-IV related skilled nursing care and other home health care. We believe that there must be a mechanism to assure that the patient's needs are evaluated across provider lines and that care planning by all involved providers is coordinated.

D. Limitation on Acceptance of and Payments for Certain Referrals

In § 410.207 we would implement the provision in section 1834(d)(3) of the Act concerning limitation on acceptance of certain patient referrals. If the referring physician or his or her immediate family member has an ownership interest in or receives compensation from the home IV provider, services furnished to persons referred by that physician would not be covered (except in limited circumstances) and the Office of Inspector General (OIG) could impose civil money penalties.

We propose to define "immediate family member" as a "spouse, natural or adopted child, natural or adopted parent, natural or adopted or adoptive sibling, stepparent, stepchild, stepsibling, grandparent, grandchild, father-in-law, mother-in-law, brother-in-law, sister-in-law, son-in-law, or daughter-in-law." We believe that by including natural, adopted, and step relatives, as well as those related by marriage to a physician, we have encompassed the range of relatives who would be in a sufficiently close relationship to the referring physician to influence the pattern of his referrals if they had an ownership interest in or received compensation from the provider.

We want to note and emphasize several points concerning the limitation on acceptance of and payments for certain referrals, as described in section 1834(d)(3) of the Act.

First, regulations to implement this provision would be in addition to the proposed anti-kickback regulations published by the Office of Inspector General (OIG) on January 23, 1989 (54 FR 3088). The proposed regulations of the OIG (to be codified at 42 CFR 1001.952) describe various payment practices that, although potentially capable of inducing referrals of business under Medicare, would not be considered kickbacks for purposes of criminal prosecution or program exclusion because the standards in the regulations would make the potential for abuse sufficiently negligible. These practices are referred to as "safe harbors". The difference between the OIG regulations and ours is that our proposed regulations are for purposes of clarifying when Medicare payment may not be made for prohibited practices. Both of these proposed regulations would be applied independently and providers and physicians would need to examine ownership, compensation, and practice arrangements within the scope and objectives of each.

Second, we note that there may be some providers of home IV therapy who are now compensating a referring physician for patient care, or paying a fee for each referral made to them, or both. If these providers become qualified home IV providers under our conditions of participation and continue to operate in this manner, they would not qualify for the exception in section 1834(d)(3)(B)(ii) of the Act for any Medicare patient referred by a compensated physician. We base this interpretation upon sections 1834(d)(3)(A) and 1834(d)(3)(C) of the Act. Section 1834(d)(3)(A) of the Act indicates that a home IV provider may not provide services to an individual under Medicare part B if that individual's referring physician or immediate family member has an ownership interest in the provider or receives compensation from the provider. Section 1834(d)(3)(C) provides that no payment may be made under Medicare part B for home IV drug therapy services that are provided in violation of the ownership and compensation limitations.

Third, for purposes of the prohibition on compensation from the provider to the referring physician as provided for in section 1834(d)(3)(A)(ii) of the Act, we consider compensation and financial arrangements to span a variety of activities. They could encompass almost any type of remuneration. In addition, section 1834(d)(3) of the Act does not specify the period of time covered by the prohibition on compensation. We would take the approach that it covers the period of time during which a violation would occur or did occur. Even though it did not initially appear as if there were a violation of the prohibition, we would consider that the violation includes the period of time before the bonuses were paid. Since the bonuses (i.e., compensation) were of varying amounts, we would assume that an explicit or (more likely) implicit agreement existed between the provider and the referring physicians that the bonuses would vary in proportion to the number of referrals made.

Finally, we note that neither Public Law 100–360 nor existing authorities provide any protection for the beneficiary if it is found that the home IV provider and referring physician have violated either the ownership or compensation prohibitions under section 1834(d)(3) of the Act. Section 1834(d)(3)(C) provides only that no payment will be made for the services provided in violation of the aforementioned arrangements. Under section 1879 of the Act (limitation on liability of beneficiary when Medicare claims are disallowed), the beneficiary is not liable for payments relating to certain specified noncovered items and services, but this section does not apply to limitation of or payment for certain referrals. We emphasize that we expect home IV drug providers and referring physicians to be organized and to operate in accordance with the law and that we will monitor compliance with this provision very closely.

- Broad Exceptions

In addition, broad exceptions apply to both the limitations on ownership and compensation under sections 1834(d)(3)(B) (iii) and (iv) of the Act.

If the referring physician has only an ownership or financial relationship with the provider as an uncompensated officer or director of the provider, section 1834(d)(3) of the Act would not preclude us from paying for the services.

If the Secretary has determined that certain ownership or compensation arrangements do not pose a substantial risk of program abuse, section 1834(d)(3) would not preclude us from paying for the services.

Under this provision, we would rely, in part, upon OIG expertise by adapting for our purposes four of the "safe harbors" from the OIG proposed regulations to which we referred earlier. We believe these "safe harbors" are applicable to the prohibitions and limitations on provider ownership and compensation for puposes of precluding Medicare payment under section 1834(d)(3)(C) of the Act. By meeting the required criteria, these "safe harbors" could constitute beneficial commercial arrangements that are *bona fide* and that would permit referring physicians to engage freely in business practices and arrangements that encourage competition, innovation and economy, yet do not pose a risk of program abuse. With these four "safe harbors", we propose to allow reasonable ties between providers and referring physicians that we foresee as in no way purposely inducing the referral of Medicare beneficiaries from the physicians to the providers.

The four proposed "safe harbors" that we are adapting from the January 23, 1989 OIG proposed rule to be codified in 42 CFR 1001.952(b), Space rental; § 1001.952(c), Equipment rental; § 1001.952(d), Personal services and management contracts; and § 1001.952(i), Employees. As set forth in our proposed regulations in section § 410.207(e), those safe harbors would implement the Secretary's authority under section 1834(d)(3)(B)(iv) of the Act to allow physician-home IV provider relationships that do not pose substantial risk of program abuse.

Certain principles underlie the requirements that each of these new exceptions must meet in order to qualify as "safe harbors". First, any payments must be consistent with fair market value in an arms-length transaction. These payments apply to space rental, equipment rental, personal services, or managements contracts. Any

agreements or arrangements must be *bona fide*, in writing, signed by the parties involved, and specific as to what rental, services or items are involved. They must also establish a time period that, where relevant, is for not less than one year. In the case of equipment rental, if the equipment is used periodically, the schedule must be set in advance. Finally, some of the "safe harbors" directly provide that charges or payments will not be linked to the volume of Medicare referrals.

We will, of course, reconsider these "safe harbors" based upon the comments we receive. In addition, if substantial changes are made to the exceptions, as they are described in the January 23, 1989 proposed rule of the OIG, when the OIG issues final rules, we will consider the changes and any necessary revisions that may be needed in our rules as a result.

- Ownership

With respect to ownership, we would not allow the referring physician or an immediate family any ownership interest in the home IV provider except for the situations permitted in section 1834(d)(3)(B)(i) (I) and (II) of the Act. In the Conference Report accompanying Public Law 100–360, the conferees expressed their concern about a growing prevalence of ownership in health care providers and other arrangements the result of which is to bind the financial interests of referring physicians with those of the providers. The conferees saw these alliances resulting in overutilization, less independent judgment, and, in general, program abuse. (H.R. Rep. No. 661, 100th Cong., 2d Sess. 203 (1988).)

We recognize, however, that this restriction may pose problems for some existing organizational arrangements in which adverse consequences such as those discussed by the conferees do not occur. We are specifically seeking comments on whether it is possible to address these situations within the parameters of the statutory language.

The following exceptions to ownership interest in the home IV provider by the referring physician or an immediate family member apply:

If the ownership interest is the ownership of stock that is traded over a publicly regulated exchange and was purchased on terms generally available to the public, section 1834(d)(3)(B)(ii)(I) of the Act permits coverage of services furnished by a provider to a patient referred by the physician with ownership interest.

Under section 1834(d)(3)(B)(i)(II) of the Act, we may pay for services if the provider in which a referring physician has an ownership interest is a sole IV drug therapy provider in a rural area.

We propose to define "sole home IV drug therapy provider" in § 410.207(a)(2). We note that the language in this new section would be similar to that found in § 405.1633(f), Procedures for classification as a sole community HHA, and § 405.1633(g), Basis for classification as a sole community HHA. We believe that it would be reasonable to base our proposed definition of sole community home IV provider on the HHA experience. This is so because, of all Medicare providers, HHAs will be the most similar to the new home IV providers in terms of the scope of their activities. Under our definition, a home IV provider would have to submit to its intermediary a request for classification as a sole home IV drug therapy provider showing that it meets the requirements as discussed below. The intermediary would review the request and send it, with its recommendations, to HCFA. HCFA would review the request and the intermediary's recommendation and forward its approval or disapproval to the intermediary. An approved classification as a sole home IV drug provider would remain in effect without any need for reapproval unless a change occurs in the circumstances under which the classification was approved.

Under the proposed requirements, HCFA would approve a provider's classification as a sole home IV provider in a rural area only if the home IV provider designates a particular rural area, shows that no other home IV provider furnishes services within that area and shows there are no physicians (other than those with an ownership interest in the home IV provider) available to perform the certification and recertification and plan of care functions.

In addition, we propose to use the definition of rural area found in section 1861(aa)(2) of the Act. Under that definition, a rural area is one that is not an urbanized area (defined by the Bureau of the Census as an area with less than 2,500 people) and that is designated by the Secretary either as—

- An area with a shortage of personal health services under section 1302(7) of the Public Health Service Act; or
- A health manpower shortage area described in section 332(a)(1)(A) of that Act because of its shortage of primary medical care manpower.

We believe that this definition for "rural area" takes into account the fact that a major characteristic of most rural areas is a shortage of health manpower or personal health services. In addition, we would prefer, for purposes of clarity and uniformity, to use a definition that is commonly accepted throughout government; that is, that of the Bureau of Census.

- Compensation

With respect to compensation, section 1834(d)(3)(B)(ii) of the Act states that if the compensation is reasonably related to items or services actually provided by the physician and does not vary in proportion to the number of referrals made by the referring physician, the payment limitation would not apply; however, this exception would not apply to compensation provided for direct patient care services.

In other words, to qualify for the exception, the compensation could not be unreasonable for the items and services provided, and it could not deviate (e.g., rise) when compared to the number of referrals made. However, this exception under section 1834(d)(3)(B)(ii) of the Act would not apply to compensation paid by the home IV provider to the referring physician for direct patient care services. We expect the physician to bill Medicare (or the beneficiary) for such services in these circumstances. A home IV provider may retain and pay a physician a flat fee under a *bona fide* arrangement for consultative services under which the fee does not vary in accordance with the number of referrals the physician makes to the home IV provider and does not involve direct patient care. In this case, there is no prohibition against payment under section 1834(d)(3) of the Act since the compensation is set and direct patient care is not involved.

If, on the other hand, a physician provides direct patient care services to an individual, the home IV provider would not be able to pay the physician for these services. The physician would have to bill Medicare (or the beneficiary) for the services. "Direct patient care services" would be "any services covered under Medicare Part B for which a physician would bill and receive reimbursement from Medicare."

D. Physician Certification of Need for Services.

In new § 424.26, we would implement that portion of the statute that requires certification of the beneficiary's home IV drug therapy services. As required by new section 1835(a)(2)(G) of the Act, we would require the referring physician to certify that:

- The services were or are required because the individual needed or needs the services for administration of a covered home IV drug;

- A plan for furnishing the services has been established and is reviewed periodically by the referring physician;
- The services are or were furnished while the individual is or was under the care of a physician;
- The services are or were furnished in a place of residence used as the individual's home; and
- The services, if initiated before January 1, 1993, have been reviewed and approved by a PRO in accordance with §§ 466.201 through 466.224.

We would also require that recertification take place at least every 30 days to match the requirements in proposed 42 CFR 485.120 (contained in the separate proposed rule on home IV provider conditions of participation) that the referring physician review the patient's progress in attaining the objectives of the plan of care at least every 30 days. We believe 30 days would be a suitable period for recertification, as the physician would concurrently be reviewing the plan of care. Similarly, we propose that, because of the similar timing of the review of the plan of care with the period for recertification (that is, at least every 30 days), the referring physician should also perform recertification as well as the initial certification. In addition, he or she, because of active participation in the patient's course of therapy, would be the most appropriate and accountable individual to perform these functions.

E. Prior PRO Approval.

Background

The Peer Review Improvement Act of 1982 (Title I, Subtitle C of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97–248)) amended Part B of Title XI of the Act to establish the Utilization and Quality Control Peer Review Organization (PRO) program. The 1982 legislation authorized PROs to review services provided or proposed to be provided to Medicare beneficiaries. PRO responsibilities generally have included review of health care services provided under Medicare (Title XVIII of the Act) for the purpose of determining whether the services were reasonable and medically necessary, were furnished at the appropriate level of care, and were of a quality that meets professionally recognized standards of care. In addition, PROs monitor and validate a sample of diagnostic and procedural information supplied by hospitals to fiscal intermediaries to establish prospective payment amounts to hospitals.

To carry out their responsibilities, PROs acquire information from the medical records of patients and from other records maintained by health care facilities, practitioners, intermediaries, and carriers. In addition, PROs generate information as a result of their reviews regarding the quality and utilization of health care services. PROs use this information to develop statistical profiles (that is, practice patterns) to allow them, for example, to focus review efforts better and to assess the quality of care being furnished. PROs transmit their determinations to intermediaries and carriers responsible for making Medicare payments under the Act.

Current PRO Prior Authorization Requirements

Currently, HCFA requires 100 percent PRO approval of 10 surgical procedures. This review is, where possible, to be performed on a preadmission or preprocedure basis. If the review cannot be performed on a preadmission or preprocedure basis (e.g., the surgery is an emergency), the PRO performs the review retrospectively. The PRO also conducts retrospective sampling of prior approved cases to assure that the quality of care met professionally recognized standards of care and to validate the accuracy of the information provided during the prior authorization process.

In addition, PROs who have identified specific utilization or quality problems require prior approval before the identified service is furnished (e.g., admissions for medical management of back problems).

Section 9353 of the Omnibus Budget Reconciliation Act of 1986 (Pub. L. 99–509) amended section 1154 of the Act to require the review of services provided by health maintenance organizations (HMO) and competitive medical plans (CMP), which have contracts under section 1876 of the Act on a risk-basis with HCFA. However, notwithstanding our authority to include risk-based HMOs/CMPs within the scope of this regulation, we are not pursuing this inclusion at this time. Section 1835(a)(2)(G) of the Act cross-refers to section 1154(a)(16) as the basis for the PRO review of home IV drug therapy services. Section 1154(a)(16), in turn, refers to section 1154(a)(1) concerning the scope or nature of review that PROs are to perform with respect to this service. The statutory basis for the PRO review of risk-based HMOs lies not in section 1154(a)(1), however, but in section 1154(a)(4)(B). While this subsection would *allow* us to include these entities within the type of peer review that we expect to be performing with respect to all other health care providers, it does not require that this be the case. Rather, in our view, it permits the Secretary to set priorities for PROs in terms of selecting among all possible HMO quality issues those that require the greatest attention. While we reserve for future consideration whether home IV drug therapy performed under the auspices of risk-based HMOs/CMPs ought to be included within the scope of PRO review, we are not including it now because of what we perceive to be competing concerns in other areas. Moreover, because risk-based HMOs/CMPs already have the clear incentive to prevent unnecessary utilization of covered health care services, it would be largely duplicative and therefore wasteful to have PROs use their limited resources to make the same determinations.

In the discussion below, we describe a proposed new subpart E of 42 CFR part 466 that would implement the review of home IV drug therapy services.

1. Scope of PRO Review. The legislation states that coverage for home IV drug therapy services begins January 1, 1990 and that all payment for such services initiated before January 1, 1993 must be approved by the PRO. The Conference Report states that after 1992 (i.e., beginning January 1, 1993) "the Secretary could require PROs to conduct some focused reviews and could require prior approval in appropriate circumstances." (H.R. Rep. No. 661, 100th Cong., 1st Sess. 204 (1988)) We, therefore, have proposed that the regulations regarding PRO approval of home IV drug therapy services are effective for services beginning January 1, 1990. After the initiation of the review and before January 1, 1993, we would determine what types and amounts of review to continue.

The main thrust of the review required in this proposed rule is the assurance of quality care while a secondary concern is proper utilization. We would require the PRO to determine that the intravenous route of administration is appropriate and that the proposed home IV drug therapy services meet professionally recognized standards of care. The PRO would also determine whether the home IV drug therapy services are reasonable, appropriate, and necessary for the treatment of the illness or injury or to improve the functioning of a malformed body member.

When a physician proposes to discharge a hospital inpatient and continue administration of a drug or drugs approved to be administered at home, the PRO, while the patient is still hospitalized, would have to review and approve for payment the services required to administer the drug(s). In the case of a hospitalized beneficiary whose physician believes he or she should receive home IV drug therapy, the physician or health care facility would have to contact the PRO and request review during normal business hours on normal working days (e.g., 9 a.m. to 5 p.m., Monday through Friday).

The PRO also would periodically review home IV drug therapy services when, for example, the patient continues to receive IV drug therapy over time or where the administration of a particular drug requires close monitoring of bodily functions (e.g., kidney functioning).

If a practitioner or health care facility violates its statutory obligations (e.g., exhibits a pattern of not correctly monitoring the patient's bodily functions while on a particular drug or a combination of drugs), the PRO would have to carry out the responsibilities specified in subpart C of 42 CFR part 1004 regarding the imposition of sanctions.

2. PRO Notification of New Services That Need Prior Approval. We propose that each PRO be required to give timely notification to health care facilities and physicians in its State about the new services for which PRO review must be sought. This notification would have to include:

- The date upon which and the manner by which (e.g., telephone) the PRO plans to begin review of home IV drug therapy services;
- The information to be furnished to the PRO;
- A statement about need for expediency in responding to PRO questions;
- At no charge, a copy of the criteria and quality screening guidelines to be used in the review process;
- A description of types of validation and quality review to be performed on a sample of cases; and
- A statement about the financial liability for charges found to be not medically necessary and a statement that no claim will be paid without PRO approval before submission of the claim.

3. Responsibilities of Physicians and Health Care Facilities. We propose to require both physicians and health care facilities to meet the provisions of § 466.78, which describes their responsibilities in cooperating with PRO review. The proposed regulations also describe responsibilities specific to implementation of the provision of home IV drug therapy services.

a. Physicians. The referring physician would have the overall responsibility for correctly ordering (e.g., in the plan of care) the home IV drug therapy services and monitoring the patient while he/she receives the services (e.g., ordering and analyzing diagnostic studies and appropriately modifying the drug when necessary).

In addition, the physician would be required to seek (or allow the health care facility to do so) PRO approval of the proposed home IV drug therapy services. Some prior approval might be handled by telephone, such as in the case of non-hospitalized patients. In other cases (e.g., hospitalized patients), the review might consist of reviewing the inpatient clinical records. In either case, the physician would have to cooperate and either supply information orally or in writing (including supplying physician's office records when necessary).

b. Health Care Facilities. As used throughout this subpart, the term "health care facility" is used as defined at § 466.1. That is, all types of health care providers and HMOs/CMPs are included in the definition. We have decided to use that terminology rather than list each type of provider every time it is applicable.

For example, if an intravenous drug is being proposed to be administered at home immediately following a hospital stay, the hospital, home IV drug therapy provider or physician would seek the PRO prior approval. Conversely, if the IV drug was started outside of an inpatient hospital stay and was going to be administered to the beneficiary in his or her residence, the physician, home IV therapy provider, hospital emergency room, hospital clinic, skilled nursing facility (about to discharge the patient), cost-based HMO/CMP, or home health agency (seeing the patient for other reasons) might contact the PRO for review. Thus, for ease of reading, we have used the term "health care facility" rather than list all types of providers and cost-based HMOs/CMPs each time.

If the physician does not seek PRO approval, then the health care facilities (as defined above) would have the same responsibilities outlined above for physicians. However, even when the physician seeks the PRO approval, health care facilities (e.g., hospital, home IV therapy provider) would have the responsibility to supply the needed records (including the plan of care) to the PRO. To solidify these types of arrangements, the affected health care facilities would have to develop a memorandum of understanding with the PRO or, in the case of the hospital, modify an existing one.

c. Sanctions. If a health care facility or a physician does not comply with PRO review requirements, the PRO may determine that the requirements of 42 CFR part 1004, subpart C, have not been met. If the PRO makes such a determination, it would recommend to the OIG that the provider or physician (or both) be sanctioned for failure to meet the statutory obligations.

4. PRO Designation. The PRO "area" designation is the State or Territory (e.g., Virgin Islands). There currently are 54 PRO areas: 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, and American Samoa/Guam and the Commonwealth of the Northern Mariana Islands.

In implementing this provision, we had to decide which PRO to propose to perform the required review. For example, if a beneficiary lives in one State, is hospitalized in that State by a physician who practices in that State, and receives home IV drug therapy services from a home IV therapy provider in that State, assignment of review responsibility presents no problem; i.e., the PRO in that State would do the review. As beneficiaries cross State lines to receive hospital care or if IV therapy providers are located in a State different from the one in which the beneficiary resides or is hospitalized, the PRO designation becomes more problematic.

In analyzing the various options we believe that assignment of review responsibilities could be based on several choices; i.e., we can choose the PRO in the State in which the:

- Beneficiary resides,
- Physician's office is located,
- Hospital is located, or
- Home IV therapy provider is located.

After careful consideration, we have decided that for continuation of inpatient hospital services, the PRO conducting the prior authorization review would be the PRO for the State in which the hospital is located. This is because the hospital already has an agreement with the PRO and is familiar with PRO's review process. Since we believe the majority of home IV drug therapy services will be a continuation of hospital services, the requirement for PRO prior approval would be an easy transition.

For review of continuations of previously approved home therapy services, for approval of services started on an outpatient basis, and for retrospective reviews, we believe that the location of the home IV therapy provider should be the locus for PRO designation. Thus, we would require that, for these reviews, the PRO conducting the review would be the one in the State in which the home IV therapy provider is located.

5. PRO Review Process. When performing review of home IV drug therapy services (proposed to be provided or already provided), the PRO first would have to determine that the patient does not or did not require hospitalization for the provision of the home drug therapy. That is, the PRO would be required to determine that the patient's condition is or was stable enough that discharge from the hospital would not jeopardize his or her health or safety or (for outpatient initiation) that the patient's condition is such that inpatient hospitalization is not warranted. In addition, the PRO would have to be assured that:

- The patient or caregiver meets the selection criteria outlined in the conditions of participation proposed in a new § 485.115 (to be found in a separate Federal Register document);
- The patient or caregiver has been or will be sufficiently trained as to how to administer the drugs safely and effectively in the home and has independently administered or will independently administer intravenously at least one dose of the drug under supervision;
- The plan of care executed by the referring physician has enough information to support the coverage of home IV drug therapy services;
- The drug is being used for one of the stated indications listed in our Federal Register notice of covered IV drugs. See 54 FR for our proposed listed covered drugs.
- The drug is medically indicated for the treatment of the patient's condition;
- The dosage is correct (e.g., adjusted for body weight and height);
- Appropriate diagnostic studies (e.g., culture and sensitivities, kidney function tests) have been performed and will be performed as appropriate while the patient is receiving the therapy;
- Other appropriate periodic monitoring has been and will be performed;
- The drug is not contraindicated (e.g., based upon abnormal laboratory findings, drug interactions);
- The home IV drug therapy services meet professionally recognized standards of care, as well as Medicare standards; and
- The route of administration is appropriate. When deciding that the route of administration is appropriate, the PRO would carefully review to determine if another route of administration would be effective (e.g., oral, subcutaneous, etc.) If the PRO makes a determination that another route would be effective, the PRO would deny payment.) An example might be: a physician seeking prior approval for the administration of intravenous Aminophylline.)

We propose that when performing review, the PRO would use review coordinators to screen cases for PRO physician reviews. The review coordinators would use criteria or guidelines, developed by HCFA or the PRO (or both), which would be distributed to the affected health care facilities (e.g., hospitals, home IV therapy providers) and physician organizations in the State.

The legislation states that the Secretary shall establish criteria to be used by the PRO in conducting reviews. The major portion of the PRO's criteria would be the list of drugs and their indications for use (as outlined in a separate Federal Register document) about which the PRO has no latitude. In addition, any other criteria (e.g., intervals for review, severity of signs and symptoms necessitating administration of IV drugs) would be distributed as outlined above.

As currently drafted, the key provisions in the guidelines include:

- Criteria requiring intense scrutinization of certain drugs proposed to be administered intravenously in the home to determine that the intravenous route of administration was the only effective way to administer the drug. An example of this criterion would be the administration of Cimetidine intravenously in the home when the patient is not concurrently receiving total parenteral nutrition.
- Criteria relevant to obtaining specific laboratory tests while the patient is on a specific drug. An example of this would be when the patient is receiving an Aminoglycoside, a drug that has a known potential for kidney toxicity. In instances where the patient is receiving the drug, the patient's kidney function would need to be closely monitored; that is, at least twice a week.

These criteria would be used to trigger physician review. After the guidelines/criteria are made final, they will be available from HCFA or the PRO. We specifically invite comments on criteria that should be used when performing review of the necessity and appropriateness of home IV drug therapy.

As with the current PRO review process, the review coordinator could approve the case and issue an approval number if the criteria or screening guidelines are not failed. If, however, the cases does not meet the criteria or guidelines, the case would be referred to a PRO physician for review. If the PRO physician approves the case, a PRO approval number would be issued. If the PRO physician questions the case, the physician who prescribed the home IV drug therapy and the health care facility would immediately be given an opportunity to discuss the case. The prescribing physician can discuss the case with a PRO physician and the health care facility could discuss the case with a PRO representative. If, however, the health care facility designates a physician representative, that physician would also be able to discuss the case with a PRO physician.

Even though the opportunity to discuss would be of limited duration because of the review timeframes dictated by legislation, this process would allow the physician, health care facility, or both, to present information to support coverage of services. Thus, since criteria or guidelines would be used to screen cases, the criteria would be distributed by the PRO to affected health care facilities and medical societies in the State.

6. Timing of Review. In order for payment to be made for home IV drug therapy services, a PRO would have to fulfill the requirements below:

a. Prior Review of Home IV Drug Therapy Proposed as a Continuation of Inpatient Hospital Therapy.

- We would require the PRO to conduct its review and, when appropriate, authorize for payment any home IV drug therapy services before the patient is discharged from the hospital.
- The PRO would have to complete its review within one working day of receipt of all the information needed to complete its review. The one working day does not include the time involved in giving the health care facility and physician an opportunity to discuss the case. (Absent additional information, the PRO would make its determination based upon the information in its possession.)
- If a denial is proposed or a potential quality problem is identified, the prescribing physician and the health care facility would be given an opportunity to discuss the case. The PRO would be required to attempt to contact either the requesting entity (e.g., referring physician) or the other involved entity (e.g., health care facility) to discuss the case. For potential quality problems, the PRO will follow the timeframes set forth in its contract with HCFA.

b. Initial Review of Drugs Started on an Outpatient Basis. For nonhospitalized patients that a physician believes should receive home IV drug therapy services, the PRO would have completed its review within one

working day of initiation of the home IV drug therapy services.

For clarity, we have added a definition of "outpatient basis". As used in the subpart, "outpatient basis" means any setting other than an inpatient hospital setting.

Thus, section 1835(a)(2)(G) of the Act permits the PRO to have until the end of the working day following the initiation of home IV drug therapy by which to complete its review function. Assuming that the referring physician or health care provider provides prompt notice to the PRO of the start of the IV drug therapy (that is, notice that is either simultaneous with or precedes the initiation of the service), there should be no difficulty for the PRO in finishing its review tasks by the statutory deadline.

However, we believe that the PRO is entitled to have a reasonable length of time, within the constraints of the statute, to perform its review and, therefore, are requiring that PROs be allowed to have at least eight hours from the time they are notified to finalize their decision. Most of the time, we would expect PROs to complete their tasks well within this timeframe since we anticipate that physicians or providers will make the kind of prompt notification that will assure a timely PRO response. However, to the extent that a PRO does not receive timely notification (because of the practitioner's or provider's failure to provide such) and the delay of the PRO's final decision goes beyond the general statutory deadline, we would consider this to be the kind of "exceptional" circumstance" authorized by the statute that would permit the PRO to have the necessary time within which to make the kind of informed judgment necessary in these cases.

While this is the only "exceptional circumstance" that we are able to identify at this time, we are specifically seeking public comments about what other such circumstances, if any, we should consider.

c. Subsequent Reviews of Continued Home IV Drug Therapy. We propose that when the PRO approves the IV drug therapy, it would issue an approval number and instruct the requesting entity to request PRO approval again when the drug is administered beyond a certain date or number of days. The date or number of days would be based, for example, upon such things as:

- Duration of treatment thus far,
- Specific drug(s) being used, and
- Specific condition(s) being treated.

When home IV drug therapy services are to be continued past the date or days approved by the PRO, we would require the physician or health care facility to seek PRO approval as discussed previously. The request for this review could be no less than three working days before the expiration of the PRO approval and would have to be in accordance with instructions issued by the PRO.

d. Prior Review of Change in Drug Therapy. When a physician proposes to make a change in the drug therapy, the physician or health care facility would have to seek PRO approval. The PRO review process would be the same as for first approvals of drugs started on an outpatient basis.

Since we have a responsibility to assure that the IV drug therapy is safe and effective, we are proposing this policy. We do not believe that, at this time, we can define those changes that might be minor enough to not warrant PRO review. Therefore, we specifically invite comments about other approaches to changes either in drugs or dosages of drugs once home IV drug therapy has been approved. In the event that the final regulation continues this proposed policy, we would carefully monitor the situation and would consider modifying the policy if program experience shows that such a modification is warranted.

7. Notification Procedures. We propose that when the PRO has made its determination, it would notify, by telephone, the prescribing physician and health care facility of its determination. If the PRO denies the home IV drug therapy services, it would issue, within one working day of the date of the determination, a notice (in accordance with the requirements of § 466.94(c)) to the beneficiary, the prescribing physician, the health care facility, and the fiscal intermediary.

Any notification regarding possible or confirmed quality problems would be performed by the PRO in accordance with contractual requirements and the PRO confidentiality rules in 42 CFR part 476.

8. Retrospective Reviews. Periodically, in addition to the reviews for prior approval and the periodic concurrent reviews, we would require the PRO to conduct retrospective reviews of some cases.

First, the PRO would perform a review on a random sample of cases to be assured that the home IV drug therapy services meet professionally recognized standards of care. In addition, the PRO would have to be assured that all of the conditions in § 466.214 (concerning the safe and effective administration of home IV drug therapy) are met.

The PRO also would, on a retrospective prepayment basis, review any claims for home IV drug therapy services for which PRO review was required but never completed and make a determination in accordance with § 466.214. Since the fiscal intermediary will not pay a claim without a PRO authorization number, the physician or health care facility would have to seek PRO review. Should the claim inadvertently get paid, the PRO would identify and review the case and make a determination on a postpayment basis.

In addition, the PRO would periodically conduct a validation review of a sample of cases where approval was granted upon information given over the telephone. The purpose of this review would be to validate the accuracy of the information given verbally. For these sampled cases, the PRO would also ascertain that all of the conditions of § 466.214 are met.

9. Liability and Corrective Actions. No payment would be made if the PRO has not approved the services for payment. If a PRO does not complete its review timely because of a PRO administrative error, it would still have to complete the review and issue an approval number or a notice denying the services.

When the PRO denies home IV drug therapy services, financial liability would be determined by rules set forth in § 405.330, Payments for certain nonreimbursable expenses, and § 405.336, Criteria for determining that a provider, practitioner, or supplier knew that services were excluded from coverage as custodial care or as not reasonable and necessary.

When the review is not completed timely because the physician, health care facility, or both, did not comply with the requirements (e.g., failed to make the request on a timely basis), the PRO would take whatever corrective actions are necessary. The corrective action, ultimately, could be a sanction action.

We also propose that the PRO may take other types of corrective actions. For example, if information given over the telephone by a physician or health care facility is found to be misleading, dubious, or inaccurate, the PRO could require certain physicians or health care facilities to submit all information in writing.

The ultimate purpose of corrective action would be to ensure that future cases are submitted to the PRO for review on a timely basis with accurate information.

10. Appeals. Reconsiderations and appeals of PRO denials are available under 42 CFR part 473. We would revise that part so that a denial by the PRO for home IV drug therapy services are subject to an expedited reconsideration

others under arrangements), and under a

(§ 473.18) and so that a reconsideration for these services follows the time requirements in § 473.32(a)(1)(ii) for hospitalized patients and for discharged patients.

Regulatory Impact Statement and Flexibility Analysis

Executive Order 12291 (E.O. 12291) requires us to prepare and publish a regulatory impact analysis for any proposed rule that meets one of the E.O. criteria for a "major rule"; that is, that would be likely to result in—

- An annual effect on the economy of $100 million or more;
- A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or
- Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

We generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that a proposed rule would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, all PROs are treated as small entities. In addition, we believe that a majority of home IV providers, once certified, will also qualify as small entities under the RFA.

Additionally, section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if a proposed rule may have a significant impact on the operations of a substantial number of small rural hospitals. Such an analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital with fewer than 50 beds located outside of a Metropolitan Statistical Area.

This rule would implement section 203 of Public Law 100–360 that provides, effective January 1, 1990, Part B coverage for home IV drug therapy services including nursing services, pharmacy services, and related items and services necessary for the safe and effective administration of home IV drugs. We anticipate that Medicare coverage of home IV drug therapy services would provide approximately $810 million in benefits over the next five fiscal years, beginning in FY 1990. This amount reflects only expected benefit outlays for home IV therapy services and does not reflect any effects these new benefits may have on program spending for inpatient hospital care. The following table shows the amount of anticipated incurred home IV benefits by fiscal year for the next 5 fiscal years:

Projected Incurred Benefits As a Result of Medicare Coverage of Home IV Drug Therapy Services

[In millions]*

FY 1990	FY 1991	FY 1992	FY 1993	FY 1994
$100	$140	$260	$190	$220

*Rounded to the nearest ten million.

On the basis of projected incurred benefits, this proposed rule would be considered a major rule under the E.O. 12291 cost criterion. However, we believe that any effects of these provisions on the economy and public would primarily be the result of the statute and not this proposed rule. This is because we have proposed to implement the statute exercising administrative discretion in certain respects. For example, we propose to clarify the meaning of the statute by defining "home" and "referring physician". However, only the following two areas are of such significance that major effects would result: describing covered nursing services, covered pharmacy services, and covered related services and supplies; and establishing criteria to be used by PROs in conducting reviews with respect to the appropriateness of home intravenous drug therapy services. As discussed below, we do not believe these provisions would result in effects that meet either E.O. 12291 or Regulatory Flexibility Act criteria.

In this document, we are given discretion in proposing what constitutes the covered services that would have to be furnished by a home IV drug therapy provider. Although section 1861(jj)(2) of the Act covers nursing, pharmacy, and related services, it does not define services in detail. It, however, does require that these services "* * * are such as are necessary to conduct safely and effectively an intravenously administered drug regimen * * *." In describing these services, we have consulted with staff from established entities that furnish home IV drug therapy services, drug companies, and other concerned individuals to obtain advice and recommendations. In addition, we studied both the Standards for the Accreditation of Home Care issued by the Joint Commission on Accreditation of Health Care Organizations and the Intravenous Nurses Standards of Practice issued by the Intravenous Nurses Society. We have based our proposed list of services on these organization's standards, as well as on current practice for home IV drug therapy services. Therefore, we believe that our description of covered services essentially conforms with existing industry practices and, therefore, would result in only negligible effects on home IV drug therapy service providers.

We also are given administrative discretion in determining the review criteria that PROs would use in evaluating home IV drug therapy services. We believe that the effect on PROs of the criteria that we are proposing would be negligible since the review criteria are similar to those currently used for PRO review of other services. Funding for this additional review work would be provided to PROs through a modification in their current contracts.

As discussed above, we are using administrative discretion in two important areas. We believe our application of administrative discretion in these two areas would result in negligible effects. Moreover, any additional effects accruing to this proposed rule would be the result of the statute and not the proposed rule. Therefore, we do not believe this proposed rule meets E.O. 12291 criteria and an initial regulatory impact analysis is not required. Also, we have determined, and the Secretary certifies, that this proposed rule would not have a significant economic impact on a substantial number of small entities and would not have a significant economic impact on the operations of a substantial number of small rural hospitals.

Paperwork Burden

Sections 424.28, 466.206, 466.208, 466.214, 466.216, 466.218, and 466.220 of this proposed rule contain information collection requirements that are subject to Office of Management and Budget (OMB) approval under the Paperwork Reduction Act of 1980. The referring physician must establish a plan of care and certify (and recertify as necessary) that the services meet certain requirements (§ 424.28). In addition, the physician and health care facility would have to supply the PRO with needed information (§§ 466.208, 466.214, 466.216, and 466.220). The public reporting burden for the information collections in § 424.28 is estimated to be 730.3 hours annually shared among approximately 20,000 physicians.

A notice will be published in the **Federal Register** when approval for the burden is obtained. Organizations and

individuals desiring to submit comments regarding the burden estimate or any other aspect of this collection of information, including reducing this burden, should send comments to the agency officials specified in the "ADDRESS" section of this preamble.

Response To Comments

Because of the large number of items of correspondence we normally receive on a proposed rule, we are not able to acknowledge or respond to them individually. However, we will consider all comments that we receive by the date and time specified in the "Date" section of this preamble, and, if we proceed with a final rule, we will respond to the comments in the preamble of that rule.

List of Subjects

42 CFR Part 410

Health facilities, Health professions, Kidney diseases, Laboratories, Medicare, Rural areas, X-rays, requirements.

42 CFR Part 424

Assignment of benefits, Physician certification, Claims for payment, Emergency services, Plan of treatment.

42 CFR Part 466

Grant programs-health, Health care, health facilities, Health professions, Peer Review Organizations (PRO).

42 CFR Part 473

Administrative practice and procedure, Health care, Health professions, Peer Review Organizations (PRO), Reporting and recording requirements.

For the reasons set out in the preamble, 42 CFR chapter IV would be amended as set forth below:

PART 410—SUPPLEMENTARY MEDICAL INSURANCE (SMI) BENEFITS

A. 42 CFR part 410 is amended as set forth below:

1. In the table of contents for part 410, a new subpart F is added and the authority citation is revised to read as follows:

PART 410—SUPPLEMENTARY MEDICAL INSURANCE (SMI) BENEFITS

* * * * *

Subpart F—Coverage of Home Intravenous Drug Therapy Services

410.201 Basic rule.
410.203 Definitions.
410.205 Home IV drug therapy services.
410.207 Payment limitations concerning certain patient referrals.

Authority: Secs. 1102, 1832, 1833, 1834, 1835, 1861 (r), (s), (t), (cc), and (jj), 1871, and 1881 of the Social Security Act (42 U.S.C. 1302, 1395k, 1395l, 1395m, 1395n, 1395x(r), (s), (t), (cc), and (jj), 1395hh, and 1395rr).

2. Section 410.3, the introductory language to paragraph (a) is repeated and paragraph (a)(2) is revised to read as follows:

§ 410.3 Scope of benefits.

(a) *Covered services.* The SMI program helps pay for the following:

(1) * * *

(2) Services furnished by ambulatory surgical centers (ASCs), home health agencies (HHAs), home intravenous drug therapy providers (or home IV providers), and comprehensive outpatient rehabilitation facilities (CORFs).

* * * * *

3. A new subpart F is added to read as follows:

Subpart F—Coverage of Home Intravenous Drug Therapy Services

§ 410.201 Basic rule.

Under sections 1834(d) and 1861(jj), Medicare part B pays for home intravenous drug therapy services furnished by a qualified home intravenous drug therapy provider (see part 485, subpart C of this chapter) or by others under arrangements made by the qualified home IV drug therapy provider with them, to a patient who is under the care of a physician, in a place of residence used as the beneficiary's home and under a plan of care established and periodically reviewed by the beneficiary's referring physician.

§ 410.203 Definitions.

For purposes of this subpart—

Home intravenous drug therapy provider or "home IV provider" means an entity that provides home IV drug therapy services, has been certified as meeting the conditions of participation of part 485, subpart C of this chapter, and has a provider agreement with HCFA.

Home intravenous drug therapy services or "home IV services" means nursing, pharmacy and related services (including medical supplies, equipment, intravenous fluids only when used as diluents for covered home IV drugs, and delivery services) necessary to conduct an intravenously administered regimen safely and effectively in conjunction with the use of a covered home intravenous drug. These services are furnished to an individual who is under the care of a physician, in a place of residence used as the individual's home, by a qualified home IV provider (or by others under arrangements), and under a plan established and periodically reviewed by the referring physician.

IV stands for intravenous.

Place of residence used as the individual's home is a place in which the beneficiary normally resides and is not an institution or facility that is defined in section 1861(e)(1), 1819(a) or 1919(a) of the Act.

Referring physician means the physician who prescribed the covered home intravenous drug for which the services are to be provided or who established the plan of care for the services or both.

§ 410.205 Home IV drug therapy services.

(a) *Individual services.* Particular services included in the term "home intravenous drug therapy services" that are covered under this subpart are limited to the nursing services and pharmacy services described in §§ 485.135 and 485.140, respectively, of this chapter and related services described in paragraph (b) of this section that are necessary for the safe and effective administration of a covered home IV drug. Separate payment may not be made for any of these services furnished to a patient receiving covered home intravenous drug therapy services.

(b) *Related services and supplies.* The home IV provider must furnish the following if they are necessary for the safe and effective administration of a covered home IV drug—

(1) Medical supplies;

(2) Intravenous fluids for use as diluents for covered home IV drug;

(3) Training of the patient or his or her caregiver in the techniques of IV drug therapy;

(4) Equipment, such as IV poles and infusion pumps; and

(5) Delivery of medical items and supplies.

(c) *Prohibited payment.* Payment may not be made to a home IV provider for covered home IV drug therapy services unless the home IV provider furnishes the covered home IV drug either directly or under arrangements.

§ 410.207 Payment limitations concerning certain patient referrals.

(a) *Ownership and compensation rules.* Payment may not be made to a home IV therapy provider for the home IV drug therapy services furnished to a beneficiary if that beneficiary's referring physician or an immediate member of the referring physician's family has an ownership interest in the provider or receives compensation from the provider unless an exception under

OL
54
SS
1
7
3
E
8
989
MI

paragraph (b) through (e) of this section applies. For purposes of this paragraph, an immediate member of the family includes the physician's spouse; natural and adoptive parents, natural and adopted children; natural, adopted and adoptive siblings; stepparents, stepchildren and stepsiblings; fathers-in-law, mothers-in-law, brothers-in-law, sisters-in-law, sons-in-law, and daughters-in-law; and grandparents and grandchildren.

(b) *Exception applying to limitation on ownership.* (1) Payments may be made if the ownership interest is the ownership of stock in the home IV provider that is traded over a publicly regulated exchange and purchased on terms generally available to the public;

(2) Payment may be made if the provider is the sole home IV drug therapy provider in a rural area.

(3) For purposes of paragraph (b)(2) of this section, a rural area is one that is not an urbanized area (as defined by the Bureau of the Census) and that is designated by the Secretary either—

(i) As an area with a shortage of personal health services under section 1302(7) of the Public Health Service Act, or

(ii) As a health manpower shortage area described in section 332(a)(1)(A) of the Act because of its shortage of primary medical care manpower.

(4) For purposes of paragraph (b)(2) of this section, a sole home IV drug therapy provider in a rural area is one that is approved as such by HCFA after the provider—

(i) Designates a particular area;

(ii) Shows that no other home IV provider furnishes services within that area;

(iii) Shows that there are no physicians without an ownership interest in the provider available to perform certification and recertification and to write plans of care.

(c) *Exception applying to limitation on compensation.* Payment may be made under this section if the compensation is reasonably related to items or services actually provided by the physician and does not vary in proportion to the number of referrals made by the referring physician. This exception does not apply if the compensation is for direct patient care services.

(d) *Exception applying to uncompensated officer or director.* Payment may be made if the referring physician's or immediate family member's ownership or financial relationship with the provider is as an uncompensated officer or director of the provider.

(e) *Exceptions applying to instances in which there is no substantial risk of program abuse.* Payment may be made under this part in those cases in which the Secretary has specifically determined that the nature of the ownership or compensation does not pose a substantial risk of program abuse involving the following:

(1) *Space rental.* For purposes of this paragraph, the term "fair market value" means the value of the rental property for general commercial purpose (not taking account of its intended use), but it is not adjusted to reflect the additional value the prospective lessee or lessor would attribute to the property as a result of its proximity or convenience to the lessor where the lessor is a potential source of patient referrals to the lessee. As used in section 1834(d) of the Act, neither "ownership" nor "compensation" includes payments made by a lessee to a lessor for the use of premises, as long as—

(i) The lease agreement is set out in writing and signed by the parties;

(ii) The lease specifies the premises covered by the lease;

(iii) If the lease is intended to provide the lessee with access to the premises for periodic intervals of time, rather than on a full-time basis for the term of the lease, the lease specifies exactly the schedule of such intervals, their precise length, their periodicity, and the exact rent for such intervals;

(iv) The term of the lease is for not less than one year; and

(v) The rental charge is consistent with fair market value in arms-length transactions and is not determined in a manner that takes into account the volume or value of any referrals of business between the parties for whom the services would be paid by Medicare or Medicaid.

(2) *Equipment rental.* For purposes of this paragraph, the term "fair market value" means the value of the equipment when obtained from a manufacturer or professional distributor, but it is not adjusted to reflect the additional value the prospective lessee or lessor would attribute to the equipment as a result of its proximity or convenience to the lessor where the lessor is a potential source of patient referrals to the lessee. As used in section 1834(d) of the Act, neither "ownership" nor "compensation" includes payments made by a lessee of equipment to the owner ("lessor") of the equipment for the use of the equipment, as long as—

(i) The lease agreement is set out in writing and signed by the parties;

(ii) The lease specifies the equipment covered by the lease;

(iii) If the lease is intended to provide the lessee with use of the equipment for periodic intervals of time rather than on a full-time basis for the term of the lease, the lease specifies exactly the schedule of such intervals, their precise length, their periodicity, and the exact rent for such intervals;

(iv) The term of the lease is for not less than one year; and

(v) The rental charge is consistent with fair market value in arms-length transactions and is not determined in a manner that takes into account the volume or value of any referrals of business between the parties reimbursed under Medicare.

(3) *Personal services and management contracts.* For purposes of this paragraph, an agent of a principal is any person, other than a bona fide employee, who has an agreement to perform services for, or on behalf of, the principal. As used in section 1834(d) of the Act, neither "ownership" nor "compensation" includes payments made by a principal to an agent as compensation for the services of the agent, as long as—

(i) The agency agreement is set out in writing and signed by the parties;

(ii) The agency agreement specifies the services to be provided by the agent;

(iii) If the agency agreement is intended to provide for the services of the agent on a periodic, sporadic or part-time basis, rather than on a full-time basis for the term of the agreement, the agreement specifies exactly the schedule of such intervals, their precise length, their periodicity, and the exact charge for such intervals;

(iv) The term of the agreement is for not less than one year; and

(v) The aggregate compensation paid to the agent over the term of the agreement is set in advance, is consistent with fair market value in arms-length transactions and is not determined in manner that takes into account the volume or value of any referrals of business between the parties that is reimbursed under Medicare or any State health care program.

(4) *Employees.* As used in section 1834(d) of the Act, neither "ownership" nor "compensation" includes any amount paid by an employer to an employee who has a bona fide employment relationship with the employer, for employment in the provision of covered items or services. For purposes of this paragraph (f)(4), the term "employee" has the same meaning as it does for purposes of 42 U.S.C. 410(j)(2), part of the statutory definition of "employee" in the Federal Insurance Contributions Act; that is, the common law employment test.

B. 42 CFR part 424, subpart B is amended as set forth below:

1. The table of contents for part 424 subpart B, is amended by adding § 424.28 and the authority citation is revised as follows:

PART 424—CONDITIONS FOR MEDICARE PAYMENT

* * * * *

Subpart B—Physician Certification and Plan of Treatment Requirements

* * * * *

424.28 Requirements for home IV drug therapy services.

* * * * *

Authority: Secs. 216(j), 1102, 1814, 1815(c), 1832, 1835, 1842(b), 1861, 1866(d), 1870 (e) and (f), 1871 and 1872 of the Social Security Act (42 U.S.C. 416(j), 1302, 1395f, 1395g, 1395k, 1395n, 1395u(b), 1395x, 1395cc(d), 1395gg (e) and (f), 1395hh and 1395ii).

2. A new § 424.28 is added to read as follows:

§ 424.28 Requirements for home IV drug therapy services.

Medicare Part B pays for home intravenous drug therapy services only if the referring physician certifies, and recertifies as required under paragraph (b) of this section, that the requirements described in paragraphs (a)(1) through (a)(5) of this section are being met.

(a) *Certification: Content.* The referring physician must certify, or recertify if applicable, that—

(1) The home intravenous drug therapy services are or were required because the individual needs or needed the services for the administration of a covered home intravenous drug;

(2) A plan for furnishing the services has been established by the referring physician and is reviewed periodically by that physician;

(3) The services are or were furnished while the individual is or was under the care of a physician;

(4) The services are furnished in a place of residence used as the patient's home; and

(5) For services initiated before January 1, 1993, a PRO has approved the services in accordance with part 466, Subpart E, of this chapter.

(b) *Recertification*—The referring physician must recertify that the requirements in paragraph (a) of this section are still met at least every 30 days.

(c) *Plan of care requirements.*—(1) *Establishment.* The referring physician must establish and sign the plan of care and consult as necessary with the home IV provider nurse or pharmacist before the home IV therapy begins in accordance with §§ 485.135 and 485.140 of this chapter.

(2) *Content.* The plan of care must contain at least the information required in § 485.120 of this chapter.

(3) *Review.* The physician must review and sign the plan of care at least every 30 days.

C. 42 CFR Part 466 is amended as set forth below:

1. The table of contents for part 466 is amended by adding a new subpart E, and revising the authority citation to read as follows:

PART 466—UTILIZATION AND QUALITY CONTROL REVIEW

* * * * *

Subpart E—PRO Review of Home IV Drug Therapy Services

466.201 Statutory basis and applicability.
466.202 Effective dates.
466.203 Definitions.
466.204 Scope of PRO review.
466.205 Notification of PRO review procedures.
466.206 Responsibilities of physicians and health care facilities.
466.210 Lack of cooperation by a health care facility or physician.
466.212 PRO designation.
466.214 PRO approval.
466.216 Timing of review.
466.218 Notification.
466.220 Retrospective reviews.
466.222 Liability and sanctions for unreviewed cases.
466.224 Reconsiderations and appeals.

Authority: Secs. 1102, 1154, 1835, and 1871 of the Social Security Act (42 U.S.C. 1302, 1320c—3, 1395r and 1395hh).

2. A new Subpart E is added to read as follows:

Subpart E—PRO Review of Home IV Drug Therapy Services

§ 466.201 Statutory basis and applicability.

(a) *Statutory basis.* Sections 1154(a)(16) and 1835(a)(2)(G) of the Act require PROs to review all home intravenous (IV) drug therapy services before these services begin; or, in the case of services first initiated on an outpatient basis, within one working day (other than in exceptional circumstances) of the date of the initiation of the services.

(b) *Applicability.* The regulations in this subpart apply to reviews, conducted by a PRO and its subcontractors, of home IV drug therapy services furnished, or proposed to be furnished, to all Medicare beneficiaries other than those beneficiaries enrolled in HMOs or CMPs that contract with HCFA on a risk-basis as described in Subpart C of 42 CFR part 417.

§ 466.202 Effective dates.

All home IV drug therapy services intended to be furnished to Medicare beneficaries on or after January 1, 1990 are subject to the PRO review requirements of this subpart.

§ 466.203 Definitions.

As used in this subpart—

Outpatient basis means the patient receives services other than as an inpatient of a hospital.

§ 466.204 Scope of PRO review.

(a) *General rule.* After a PRO receives a request for review of home IV drug therapy services from either the referring physician or the health care facility, the PRO must determine (in accordance with the terms of its contract) whether the home IV drug therapy is reasonable, appropriate, and necessary for the treatment of the illness or injury. This review includes a determination that the intravenous route of administration is the correct route of administration and that the home IV drug therapy services meet professionally recognized standards of care.

(b) *Coordination of sanction activities.* In implementing review of home IV drug therapy services, PROs must carry out the responsibilities specified in Subpart C, Part 1004, Chapter V of this title, regarding imposition of sanctions on health care facilities and practitioners who violate their statutory obligations under Section 1156 of the Act. For example, a PRO is to refer to the HHS Office of Inspector General a case involving a physician who exhibits a pattern of not correctly monitoring, by appropriate laboratory tests, the administration of a drug.

§ 466.205 Notification of PRO review procedures.

(a) *Criteria.* The PRO must distribute, at no charge, the criteria/quality screening guidelines to be used in screening cases, at a minimum, to all affected health care facilities and medical societies in the State.

(b) *Information required.* Each PRO must give timely written notification to health care facilities and physicians in its State the following information:

(1) *Date.* The date upon which the PRO plans to begin review of home IV drug therapy services.

(2) *Manner.* The manner in which the referring physician or health care facility is to seek PRO review.

(3) *Required information.* The information to be furnished to the PRO by the physician and/or health care

facility and the need for expediency in responding to PRO questions.

(4) *Validation and quality review.* The validation and quality review that the PRO may conduct on a sample of the cases after the services are furnished in the home.

(5) *Financial liability.* A general statement about financial liability for charges related to home IV drug therapy services that are found to be not reasonable or medically necessary and a statement that no claims will be paid without PRO approval.

§ 466.208 Responsibilities of physicians and health care facilities.

(a) *Physicians.* The referring physician must cooperate (in addition to the requirements in § 466.78) in the conduct of PRO review as follows:

(1) The physician must, in accordance with PRO-issued procedures, either seek PRO prior authorization for the drug he or she proposes to have administered intravenously at home or assist in providing necessary information in support of a health care facility that seeks PRO approval.

(2) The physician must furnish relevant medical records, upon request, to the PRO for any of the reviews described in this subpart.

(b) *Health care facilities.* (1) In addition to the general requirements for health care facilities set forth in § 466.78, the health care facility must cooperate in the conduct of PRO review (in accordance with the regulations in this part and PRO-issued procedures) by obtaining the authorization number provided by the PRO—

(i) Before beginning the administration of an IV drug in the patient's home, except, in cases where the drug is to be started on an outpatient basis on a weekend (i.e., a non-workday), the authorization must be obtained the first working day thereafter; and

(ii) In certain cases, before continuation of home IV drug therapy that the PRO has previously approved as described in § 466.216 (c) and (d).

(2) Health care facilities must maintain a written agreement with the appropriate PRO.

(3) The health care facility must in accordance with PRO-issued procedures, either seek PRO approval of the IV drug therapy services proposed to be administered at home or assist in providing necessary information in support of a referring physician that seeks PRO approval.

(4) The health care facility must transfer relevant medical records (including the plan of care described in § 424.28(c)), upon request, to the PRO for any of the reviews described in this subpart.

§ 466.210 Lack of cooperation by a health care facility or physician.

If a health care facility or physician fails to comply with the requirements for review set forth in this subpart, the PRO may determine that the health care facility or physician has failed to comply with the requirements of Subpart C, Part 1004, Chapter V of this title concerning failure by providers or practitioners to meet statutory obligations under section 1156 of the Act and may report the matter to the Office of Inspector General.

§ 466.212 PRO designation.

(a) When home IV drug therapy is proposed for a currently hospitalized inpatient, the referring physician or health care facility must contact, for prior authorization, the PRO with whom the hospital has an agreement.

(b) When home IV drug therapy is proposed for a patient who has had the drug started on an outpatient basis, the physician or health care facility must contact, for authorization, the PRO for the State in which the home IV drug therapy provider is located.

(c) For all other reviews, the PRO for the State in which the home IV drug therapy provider is located will conduct the review.

§ 466.214 PRO approval.

(a) Before approving the home IV drug therapy services, the PRO must be assured—

(1) That the patient's condition is such that inpatient hospitalization is not justified either—

(i) As a continuation of an existing hospitalization; or

(ii) As a medically necessary and appropriate admission;

(2) Orally, in writing, or from documentation (or any combination of these three), that the patient meets the selection criteria outlined in § 485.115 of this subpart;

(3) That the patient or caregiver has been or will be sufficiently trained as to how to administer the drugs safely and effectively in the home; and

(4) That the patient or caregiver has or will independently administer(ed) intravenously at least one dose of the drug under supervision.

(b) The PRO must determine that:

(1) The plan of care, executed by the referring physician, has enough information to support the coverage of home IV drug therapy services;

(2) The drug is being used for one of the stated indications listed in a Federal Register notice issued by the Secretary;

(3) The drug is medically indicated for the treatment of the patient's condition;

(4) The dosage is correct (e.g., adjusted for height and body weight);

(5) Appropriate diagnostic studies (e.g., culture and sensitivities, kidney function tests) have been performed and will be performed as appropriate while the patient is receiving the therapy;

(6) Other appropriate periodic monitoring has been and will be performed;

(7) The drug is not contraindicated (e.g., based upon abnormal laboratory findings, or drug interactions); and

(8) The home IV drug therapy services meet professionally recognized standards of care.

(c) The PRO must also determine that the intravenous route of administration is the only route of administration that will be effective.

(d) In performing review, the PRO uses review coordinators to compare the facts about the individual case to the criteria/screening guidelines developed by HCFA, the PRO, or both.

(1) If the case meets the criteria/guidelines, the review coordinator issues a PRO approval number.

(2) If the case does not meet the criteria/guidelines, the review coordinator refers the case to a PRO physician.

(3) The PRO physician review either approves the case (using a PRO approval number) or questions the case.

(4) If the case is questioned by the PRO physician, the physician who prescribed the home IV drug therapy and the health care facility are immediately given an opportunity to discuss the case.

(i) The PRO atempts to contact either the referring physician or health care facility.

(ii) The referring physician may discuss the case with a PRO physician.

(iii) The health care facility may discuss the case with a PRO representative. If, however, the health care facility designates a physician representative, that physician may also discuss the case with a PRO physician.

(iv) For potential quality problems, the PRO follows the timeframes outlined in its contract with HCFA.

§ 466.216 Timing of review.

(a) *Prior review of continuation of inpatient hospital therapy.* (1) The PRO is required, for all IV drug therapy continued at home after a hospital stay, to authorize such use before hospital discharge.

(2) The review must be requested by the referring physician or the health care facility in accordance with PRO-issued instructions.

(3) The PRO will follow the review process outlined in § 466.214(c).

(4) The PRO must complete the review within one working day of receipt of a request for review.

(i) The date of the request for review is considered to be the date upon which the PRO receives all of the information it needs to complete the review.

(ii) In this timeframe, the PRO must give the health care facility and referring physician an opportunity to discuss the case as described in § 466.214.

(iii) Failure of the health care facility and referring physician to discuss the case within the time allowed is not a basis that will prevent the PRO from making its determination based upon the information in its possession.

(b) *Initial review of IV drugs started on an outpatient basis.* In the case of a patient whose IV drug therapy services are initiated on an outpatient basis, the referring physician or health care facility will request PRO approval no later than the first working day on which the home IV drug therapy services are prescribed.

(1) The PRO has eight working hours in which to complete its review after receipt of a request for review from the referring physician or health care facility.

(2) The date the PRO receives the request for review is the date on which the PRO receives all the information it needs to complete the review.

(3) PRO review follows a request from the referring physician or health care facility that is made in accordance with PRO-issued instructions.

(4) The PRO will follow the review process outlined in § 466.214(c).

(5) The PRO must complete its review within one working day of initiation of the home IV drug services.

(i) This timeframe includes the time the PRO must give the health care facility and physician to discuss the case as described in § 466.214.

(ii) If the health care facility and physician do not take advantage of the opportunity to discuss the review within the time allowed the PRO may make its determination based upon the information in its possession.

(c) *Subsequent reviews for continuation of drugs.* In accordance with the PRO's prior approval, when drugs are to be continued for a period of time beyond the date or number of days approved by the PRO, the PRO will periodically review to determine that coverage of the home IV drug therapy services continues to be appropriate in accordance with the requirements set forth in § 466.214 (a) and (b) of this subpart.

(1) If home IV drug therapy is planned to continue for a time past the date the PRO has indicated, the physician or health care facility must request PRO review no less than three working days before the expiration of the current PRO approval.

(2) The PRO follows the process outlined in § 466.214(c).

(3) The PRO must complete subsequent reviews within three working days of the request.

(i) In this timeframe, the PRO must give the health care facility, if applicable, and physician an opportunity to discuss the case as described in § 466.214.

(ii) If the health care facility and physician do not take advantage of the opportunity to discuss within the time allowed, the PRO may make its determination based upon the information in its possession.

(d) *Prior review of change in drug.* When the referring physician proposes a change to the IV drug therapy, the referring physician or the health care facility will request PRO approval of the revision in therapy within one working day of initiation of the change.

(1) The referring physician or health care facility must request PRO review in accordance with PRO-issued instructions.

(2) The PRO will follow the review process outlined in § 466.214(c).

(3) The PRO will complete its review within three working days of the request.

(i) In this timeframe, the PRO must afford the health care facility and referring physician an opportunity to discuss the case as described in § 466.214.

(ii) If the health care facility and referring physician do not take advantage of the opportunity to discuss the case within the time allowed, the PRO will make its determination based upon the information in its possession.

(e) *Retrospective reviews.* For retrospective reviews, the PRO must adhere to the timing of review requirements found in its contract with HCFA.

§ 466.218 Notification.

(a) The PRO must, within the timeframes given in § 466.216, provide notification if its determination as follows:

(1) The PRO notifies the health care facility and referring physician by telephone as to whether it has determined that—

(i) Services are reasonable, appropriate, and medically necessary. The PRO issues an approval number and informs the health care facility, if applicable, and referring physician of the date by which review and subsequent approval must be requested for continuation of the IV drug therapy;

(ii) Services are not reasonable, appropriate, or medically necessary;

(iii) Services are medically necessary but neither the patient nor caregiver meets the selection criteria; or

(iv) The patient should receive the services in another setting.

(2) If the PRO does not authorize the services because they are not reasonable, appropriate and medically necessary in the home setting, within one working day of the determination it must, in accordance with the requirements of § 466.94(c), notify in writing:

(i) The beneficiary;

(ii) The referring physician;

(iii) The health care facility, and

(iv) The fiscal intermediary.

(b) If the PRO determines that the services do not meet professionally recognized standards of care, the PRO will notify the referring physician and health care facility in accordance with the quality intervention plan in the PRO's contract.

§ 466.220 Retrospective reviews.

(a) *Random sampling.* The PRO must periodically review a sample of cases to determine that the home IV therapy services meet professionally recognized standards of care and that the conditions in § 466.214 are met.

(b) *Retrospective review of unapproved cases.* On a retrospective, prepayment (and on an exception basis, postpayment) basis, the PRO reviews (upon the request of the physician or health care facility) any claims for home IV drug therapy services for which PRO review was required but never completed and makes a determination in accordance with § 466.214.

(c) *Validation reviews.* The PRO in the State where the home IV drug therapy provider is located must conduct a validation review of a sample of cases in which approval for home IV drug therapy services under this subpart was granted by telephone after the PRO considered medical information by telephone but did not review actual medical records.

(1) The PRO must be assured that information provided to the PRO was accurate and that the home IV drug therapy services met professionally recognized standards of care.

(2) If inaccurate information was given to the PRO, the PRO must deny payment for the services if they are

found to be noncovered based upon the correct information.

(3) As a result of this review, the PRO may decide that future medical information must be submitted in writing.

§ 466.222 Liability and sanctions for unreviewed cases.

(a) *Payment contingent upon approval.* No payment will be paid for any claim where the PRO has not approved the services for payment.

(b) *Failure of PRO to complete review.* If, because of a PRO administrative error, the review is not completed within the timeframes outlined in § 466.216, the PRO still must complete the review and issue an approval number or a notice denying the services.

(c) *Financial liability.* Financial liability is determined in accordance with provisions of sections 1842(1) and 1879 of the Act and §§ 405.330 through 405.336 of this chapter.

(d) *Corrective action.* (1) If the review is not completed timely, whether or not the PRO determines that the home IV drug therapy is appropriate and the physician or health care facility (or both) are the cause of the problem (including failure to make the request on a timely basis), the PRO must take whatever corrective actions are necessary to ensure that future cases are reported to the PRO for review within the outlined timeframes.

(2) If the information given over the telephone is found to be inaccurate or misleading, the PRO may take appropriate corrective actions.

§ 466.224 Reconsiderations and appeals.

Reconsiderations and appeals are available under part 473 of this chapter for all PRO initial denial determinations.

PART 473—RECONSIDERATIONS AND APPEALS.

D. 42 CFR Part 473 is amended as set forth below:

1. The authority citation is revised to read as follows:

Authority: Secs. 1102, 1154, 1155, 1835, 1866, 1871, and 1879 of the Social Security Act (42 U.S.C. 1302, 1320c-3, 1320c-4, 1395r, 1395cc, 1395hh, and 1395pp).

2. Paragraph (c) of § 473.18 is revised to read as follows:

§ 473.18 Location for submitting requests for reconsideration.

* * * * *

(c) *Expedited reconsideration.* A request for an expedited reconsideration must be submitted directly to the PRO if the denial is a result of—

(1) Preadmission/preprocedure review; or

(2) Review of home intravenous drug therapy services before the initiation of or during the period in which the beneficiary is still receiving the services.

3. Paragraphs (a)(1) and (a)(3) of § 473.32 are revised to read as follows:

§ 473.32 Time limits for issuance of the reconsidered determination.

(a) *Beneficiaries.* If a beneficiary files a timely request for reconsideration of an initial denial determination, the PRO must complete its reconsidered determination and send written notice to the beneficiary within the following time limits—

(1) Within three working days after the PRO receives the request for reconsideration if—

(i) The beneficiary is still an inpatient in a hospital for the stay in question when the PRO receives the request for reconsideration; or

(ii) The initial determination relates to institutional services for which admission to the institution is sought, the initial determination was made before the patient was admitted to the institution; and a request was submitted timely for an expedited reconsideration; or

(iii) The initial determination relates to home intravenous drug therapy services for which approval was denied and a request was submitted timely for an expedited reconsideration.

(3) Within 30 working days after the PRO receives the request for reconsideration if—

(i) The initial determination concerns ambulatory or noninstitutional services;

(ii) The beneficiary is no longer an inpatient in a hospital or SNF for the stay in question or no longer receives home intravenous drug therapy services for which the PRO issued a denial determination; or

(iii) The beneficiary does not submit a request for expedited reconsideration timely.

Presidential Documents

Title 3—

The President

Proclamation 6010 of September 5, 1989

Uncle Sam Day, 1989

By the President of the United States of America

A Proclamation

The tall, white-haired figure of Uncle Sam—his stern, sagacious face graced by a flowing beard, and his distinguished top hat adorned by stars and stripes—is a beloved symbol of the United States. Recognized around the world, the striking visage of Uncle Sam recalls the pride and strength of the American people, as well as the freedom we enjoy.

One of the most familiar renditions of Uncle Sam is found on the James Montgomery Flagg recruitment poster used during World War I and World War II. With its now-famous headline, "Uncle Sam Wants You," this poster urged men and women to help defend our way of life by enlisting in the Armed Forces. Today, the figure of Uncle Sam continues to remind us of the great risks and personal sacrifices endured by generations of Americans in the quest for liberty.

In 1961, the Congress recognized Samuel Wilson of Troy, New York, as the progenitor of this celebrated American symbol. Hardworking and self-reliant, Samuel Wilson was a man of unwavering integrity. He was also an important source of food for the Army during the War of 1812. The marking "U.S." stamped on casks of meat that his packinghouse prepared for American troops represented "Uncle Sam" to many soldiers and eventually the name was associated with the U.S. Government itself.

During Samuel Wilson's lifetime, which spanned the exciting years of 1766 to 1854, Americans won our country's independence; formed a system of self-government under our great Constitution; explored and settled the frontier; and raised the hopes of freedom-loving peoples around the world. Because the character derived from his nickname embodies the proud and industrious spirit of the American people, it is fitting that we pause to remember "Uncle Sam" Wilson and his place in our Nation's history.

To honor Samuel Wilson on the anniversary of his birth and the occasion of the bicentennial of the City of Troy, New York, the Congress, by Public Law 100-645, has designated September 13, 1989, as "Uncle Sam Day" and has authorized and requested the President to issue a proclamation in observance of this event.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim September 13, 1989, as Uncle Sam Day and call upon the people of the United States to observe this day with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this fifth day of September, in the year of our Lord nineteen hundred and eighty-nine, and of the Independence of the United States of America the two hundred and fourteenth.

Bush

49 CFR Part 531

Passenger Automobile Average Fuel Economy Standards; Proposed Decision To Grant Exemption

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 531

[Docket No. LVM 06–02; Notice 1]

Passenger Automobile Average Fuel Economy Standards; Proposed Decision To Grant Exemption

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Proposed decision to grant exemption from average fuel economy standards and to establish an alternative standard.

SUMMARY: This proposal is being issued in response to a petition filed by Rolls-Royce Motors, Ltd. (Rolls-Royce) requesting that it be exempted from the generally applicable average fuel economy standard of 27.5 miles per gallon (mpg) for model year (MY) 1990 and 1991 passenger automobiles, and that a lower alternative standard be established for it. This notice proposes that the requested exemption be granted and that alternative standards of 12.7 mpg for MY 1990 and 12.7 mpg for MY 1991 be established for Rolls-Royce.

DATE: Comments on this proposal must be received on or before September 28, 1989.

ADDRESS: Comments on this proposal must refer to Docket No. LVM 86–02; Notice 1 and should be submitted to: Docket Section, NHTSA, Room 5109, 400 Seventh Street SW., Washington, DC 20590. Docket hours are from 8:00 a.m. to 4:00 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Orron Kee, Office of Market Incentives, NHTSA, 400 Seventh Street SW., Washington, DC 20590. Mr. Kee's telephone number is (202) 366–0846.

SUPPLEMENTARY INFORMATION:

Background

Section 502(c) of the Motor Vehicle Information and Cost Savings Act, as amended (the Act), provides that a low volume manufacturer of passenger automobiles may be exempted from the generally applicable average fuel economy standards for passenger automobiles if those standards are more stringent than the maximum feasible average fuel economy for that manufacturer and if the NHTSA establishes an alternative standard for the manufacturer at its maximum feasible level. Under the Act, a low volume manufacturer is one that manufactures (worldwide) fewer than 10,000 passenger automobiles in the model year for which the exemption is sought (the affected model year) and that manufactured fewer than 10,000 passenger automobiles in the second model year before the affected model year. In determining maximum feasible average fuel economy, the agency is required by section 502(e) of the Act to consider:

(1) Technological feasibility;

(2) Economic practicability;

(3) The effect of other Federal motor vehicle standards on fuel economy; and

(4) The need of the Nation to conserve energy.

Selection of the Type of Alternative Standard

The Act permits NHTSA to establish alternative average fuel economy standards applicable to exempted low volume manufacturers in one of three ways: (1) a separate standard may be established for each exempted manufacturer; (2) classes, based on design, size, price, or other factors, may be established for the automobiles of exempted manufacturers, with a separate average fuel economy standard applicable to each class; or (3) a single standard may be established for all exempted manufacturers.

On October 27, 1987, Rolls-Royce petitioned NHTSA for an exemption from the generally applicable fuel economy standards for MYs 1990–1991. A previous petition dated September 19, 1984, submitted for MYs 1987–1989 and requesting 11.2 mpg, was granted. In the current petition, Rolls-Royce states that its maximum feasible fuel economy for MY 1990–1991 fleets has increased to 12.7 mpg for each year. For MYs 1990 and 1991, NHTSA believes it is appropriate to establish a separate standard for Rolls-Royce. The analysis of the petitions submitted by other low volume manufacturers for MYs 1990 and 1991 have not yet been completed, so the agency cannot use the second or third approaches described above.

Background Information on Rolls-Royce

Rolls-Royce is a small company that concentrates wholly on the production of high quality prestige cars. Its annual production rate is 2,000–3,000 automobiles, 1,200–1,500 of which are sold in the U.S. market. The corporate philosophy is that concentrating on this limited range and volume is the only way to maintain its reputation for producing a car that it says is widely perceived as the best in the world.

Rolls-Royce states that it is making every effort to achieve the lowest possible fuel consumption consistent with meeting emission, safety, and other standards while maintaining customer expectations of its product. In the 10-year period from 1978, when Federal fuel economy standards were introduced, Rolls-Royce has achieved a fuel economy improvement of approximately 14% by optimizing and tuning its powertrain while leaving basic features of the vehicles unchanged. In view of its position of producing only luxury vehicles, and its long model runs (as much as fifteen years between major changes), the company states that significant fuel economy improvements cannot be made in the short term. Rolls-Royce further states that it has had difficulty increasing the fuel economy of vehicles specifically targeted for the U.S. market due to stringent emission standards.

In the longer term, technical innovation and weight saving should result in worthwhile improvements. A change in the basic concept of its cars to reduce size or downgrade the specifications would not be acceptable to its customers. The company has, on the other hand, been conscious of the need for weight saving for many years, and, since the introduction of the Silver Shadow, has made many parts of aluminum. These include the engine block and cylinder heads, transmission and axle castings, doors, hood and deck lid.

Areas specifically addressed by the Rolls-Royce petition to improve its fuel economy include mix shift, weight reduction, engine improvements, and drive train and transmission improvements.

Methodology Used to Project Maximum Feasible Average Fuel Economy Level for Rolls-Royce

Baseline Fuel Economy

To project the level of fuel economy which could be achieved by Rolls-Royce in MYs 1990 and 1991, the agency considered whether there were technical or other improvements that would be feasible for these Rolls-Royce vehicles, whether or not the company actually plans to incorporate such improvements in those vehicles. The agency reviewed the technological feasibility of any changes and their economic practicability.

NHTSA interprets "technological feasibility" as meaning that technology which would be available to Rolls-Royce for use on its 1990 and 1991 model year automobiles, and which would improve the fuel economy of those automobiles. The areas examined for technologically feasible improvements were weight reduction, aerodynamic improvements, engine improvements, drive line improvements, and reduced rolling resistance.

"Economic practicability" is interpreted as meaning the financial capability of the manufacturer to improve its average fuel economy by incorporating technologically feasible changes to its 1990 and 1991 model year automobiles and the effects of any shift in the mix of vehicles sold that may result from changes in market demand.

Throughout this analysis, NHTSA has considered only those improvements which would be compatible with the basic design concepts of Rolls-Royce automobiles. NHTSA assumes that Rolls-Royce will continue to produce a five-passenger luxury car. Hence, design changes that would make the cars unsuitable for five adult passengers and luggage or would remove items traditionally offered on luxury cars, such as air conditioning, automatic transmission, power steering, and power windows, were not examined. Such changes to the basic design could be economically impracticable since they might well significantly reduce the demand for these automobiles, thereby reducing sales and causing significant economic injury to the low volume manufacturer.

Mix Shift

Rolls-Royce has little opportunity for improving fuel economy by changing the model mix since it makes only one basic model in various configurations, all with similarly low fuel economy. Both corporate financial limitations and the unique market sector served by Rolls-Royce preclude significant changes to the basic concept of a Rolls-Royce car. For MYs 1990 and 1991, Rolls-Royce cars will fall into four car lines, under the Rolls-Royce and Bentley name plates. All cars except the Silver Spur Limousine model are in the 5,500-pound inertia weight class. The Silver Spur Limousine is in the 6000-pound inertia weight class and has slightly lower fuel economy than the other car lines. The differences in fuel economy values among the different models are small and the model mix is essentially fixed by the market demand. Variations in sales percentages among the models have negligible effect on CAFE.

Weight Reduction

As stated previously, Rolls-Royce has used aluminum for many of its components for some time. An in-house program has been conducted by the company to evaluate the effect of further weight reduction by removing items from the vehicle with no changes to engine or transmission. Dynamometer tests indicated that emissions as well as fuel economy improvements would result from reduced weight, but the tests were conducted simply by removing components from the vehicle. An 11% reduction in weight resulted in a 4% improvement in fuel economy. To achieve an equal or greater weight reduction through design changes would require complete redesign and retooling, which is not practicable. In its petition for MYs 1987–89, the company stated that it was investigating the practicalities of producing a lighter more fuel-efficient model. It has since abandoned this project in view of the current trend toward larger luxury cars with higher performance. In a 1988 telephone conversation with NHTSA personnel, a company spokesman stated that market analysis and dealer-supplied information lead to the conclusion that Rolls-Royce could not maintain its image by producing a smaller, lighter and more economical version under current market demands and pressures.

Engine Improvements

The current petition from Rolls-Royce restates past efforts to improve fuel economy in addressing engine improvements. Past developmental activities include test and evaluation of various technologies applied to the Rolls-Royce engine. These included the Texaco Controlled Combustion system, the Honda Compound Vortex Controlled Combustion system, diesel engines, cylinder disablement, increased engine displacement, the May "Fireball" Combustion Chamber, and overall engine downsizing in conjunction with all new features including bodyshell, transmission, and suspension. Each of these approaches was discarded in turn as failing to provide a feasible option for simultaneously meeting fuel economy and emissions requirements, and the expectations of the company's customers.

The one technique which does show a high likelihood of improvement is the programmed electronic ignition advance system. This has shown a possible 10% improvement in fuel economy due to the ability to accurately shape the ignition cycle. This system will be introduced on some models for MY 1989, and all models in MY 1990, and accounts for most of the projected CAFE improvement for MYs 1990–1991. A slight contribution is also realized from reduced axle ratios which can be used in conjunction with electronic engine controls without exceeding emissions standards.

Transmission and Drive Train Improvements

Rolls-Royce uses the General Motors THM 400 three-speed automatic transmission with torque converter and hypoid rear axle on all models. In the past, the company has considered a four-speed version of this transmission but found it unsuitable for the torque and power characteristics of the engine. Rolls-Royce is now exploring the development of a new four-speed version of a GM 400 series transmission. Rolls-Royce is currently entering the test and evaluation stage with this improvement, which will not be fully deployed until after MY 1991. The rear axle ratio has also been reduced as stated above.

Effect of Other Motor Vehicle Standards

The Rolls-Royce petition cites exhaust emission standards as having the greatest effect on fuel economy, and for this reason the company considers the fuel economy program to be an integral part of its emission control program. It states that, historically, emission standards have placed a severe strain on its limited technical resources; and only with the introduction of new emission control techniques such as oxidation and three-way catalysts has the trend to higher fuel consumption been reversed.

Of the Federal safety regulations it believes have an adverse effect on fuel economy, Rolls Royce considers the most significant ones to be 49 CFR part 581 (energy absorbing bumpers), Federal Motor vehicle safety standard (FMVSS) 214 (side intrusion beams in doors), and FMVSS 208 (passive restraints). The effect of these is to increase vehicle weight notwithstanding other efforts to reduce weight, including application of other materials.

The Need of the Nation to Conserve Energy. The agency recognizes there is a need to conserve energy, to promote energy security, and to improve balance of payments. However, as stated above, NHTSA has tentatively determined that it is not technologically feasible or economically practicable for Rolls-Royce to achieve an average fuel economy in the 1990 and 1991 model years above 12.7 mpg. Granting an exemption to Rolls-Royce and setting an alternative standard at that level will result in only a negligible increase in fuel consumption and will not affect the need of the Naton to conserve energy.

For illustrative purposes only, an estimate of the additional fuel consumed by operating the 1990–1991 fleets of Rolls-Royce vehicles at the company's projected CAFE of 12.7 mpg (compared to a hypothetical 27.5 mpg fleet) over 100,000 miles is 288,900 bbls. of fuel. This averages about 66 bbls. of fuel per day over the 12 year period that these cars will be an active part of the fleet. This is insignificant compared to the daily fuel used by the entire motor vehicle fleet which amounted to some 4.6 million bbls. per day for passenger cars in the U.S. in 1987.

Proposed Alternative Standard

This agency has tentatively concluded that it would not be technologically feasible and economically practicable for Rolls-Royce to improve the fuel economy of its model year 1990 and 1991 automobiles above an average of 12.7 mpg, that compliance with other Federal automobile standards will not adversely affect achievable fuel economy, and that the national effort to conserve energy will not be affected by granting the requested exemption and establishing an alternative standard. Consequently, this notice proposes to conclude that the maximum feasible average fuel economy for Rolls-Royce in the 1990 and 1991 model years is 12.7. Therefore, the agency proposes to exempt Rolls-Royce from the generally applicable standard of 27.5 mpg and to establish an alternative standard for Rolls-Royce of 12.7 mpg for model years 1990 and 1991.

List of Subjects in 49 CFR Part 531

Energy conservation, gasoline, imports, motor vehicles.

In consideration of the foregoing, it is proposed that 49 CFR Part 531 be amended as follows:

PART 531—[AMENDED]

1. The authority citation for Part 531 would continue to read as follows:

Authority: 15 U.S.C. 2002, delegation of authority at 49 CFR 1.50.

2. In § 531.15, the introductory text of pargraph (b) is republished and paragraph (b)(2) is revised to read as follows:

§ 531.5 Fuel economy standards.

* * * * *

(b) The following manufacturers shall comply with the standards indicated below for the specified model years:

* * * * *

(2)(b) Rolls-Royce Motors. Inc.

Model year	Average fuel economy standard (miles per gallon)
1978	10.7
1979	10.8
1980	11.1
1981	10.7
1982	10.6
1983	9.9
1984	10.0
1985	10.0
1986	11.0
1987	11.2
1988	11.2
1989	11.2
1990	12.7
1991	12.7

* * * * *

NHTSA has analyzed this proposal and determined that neither Executive Order 12291 nor the Department of Transportation regulatory policies and procedures apply, because the proposal would not establish a "rule," which term is defined as "an agency statement of general applicability and future effect." The proposed exemption is not generally applicable, since it would apply only to Rolls-Royce Motors, Inc., as discussed in this notice. If the Executive Order and the Departmental policies and procedures were applicable, the agency would have determined that this proposed action is neither major nor significant. The principal impact of this proposal is that the exempted company would not have been required to pay civil penalties if its maximum feasible average fuel economy were achieved, and purchasers of those vehicles would not have had to bear the burden of those civil penalties in the form of higher prices. Since this proposal sets an alternative standard at the level determined to be Rolls-Royce's maximum feasible level for model years 1990 and 1991, no fuel would be saved by establishing a higher alternative standard. The impacts for the public at large will be minimal.

The agency has also considered the environmental implications of this proposal in accordance with the National Environmental Policy Act and determined that this proposal, if adopted, will not significantly affect the human environment. Regardless of the fuel economy of the exempted vehicles, they must pass the emissions standards which measure the amount of emissions per mile traveled. Thus, the quality of the air is not affected by the proposed exemptions and alternative standards. Further, since the exempted passenger automobiles cannot achieve better fuel economy than is proposed herein, granting these proposed exemptions would not affect the amount of fuel available.

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

All comments must not exceed 15 pages in length. (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential business information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation. 49 CFR part 512.

All comments received before the close of business on the comment closing data indicated above for the proposal will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Comments received too late for consideration in regard to the final rule will be considered as suggestions for further rulemaking action. Comments on the proposal will be available for inspection in the docket. The NHTSA will continue to file relevant information as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose a self-addressed, stamped postcard in the

envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

(Sec. 9, Pub. L. 89–670, 80 Stat. 981 (49 U.S.C. 1657); Sec. 301, Pub. L. 94–163, 89 Stat. 901 (15 U.S.C. 2002); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on September 5, 1989.

Barry Felrice,

Associate Administrator for Rulemaking.

The Federal Register: What It Is and How to Use It

A Guide for the User of the Federal Register—Code of Federal Regulations System

This handbook is used for the educational workshops conducted by the Office of the Federal Register. For those persons unable to attend a workshop, this handbook will provide guidelines for using the *Federal Register* and related publications, as well as an explanation of how to solve a sample research problem.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC, and Atlanta, GA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the Federal Register.

How To Cite This Publication: Use the volume number and the page number. Example: 54 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

ATLANTA, GA

Rules and Regulations

Federal Register
Vol. 54, No. 174
Monday, September 11, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 910

[Lemon Reg. 682]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 682 establishes the quantity of fresh California-Arizona lemons that may be shipped to market at 320,000 cartons during the period September 10 through September 16, 1989. Such action is needed to balance the supply of fresh lemons with market demand for the period specified, due to the marketing situation confronting the lemon industry.

EFFECTIVE DATE: Regulation 682 (7 CFR part 910) is effective for the period September 10 through September 16, 1989.

FOR FURTHER INFORMATION CONTACT: Beatriz Rodriguez, Marketing Specialist, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523, South Building, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 475-3861.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory action to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 85 handlers of lemons grown in California and Arizona subject to regulation under the lemon marketing order and approximately 2,500 producers in the regulated area. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona lemons may be classified as small entities.

This regulation is issued under Marketing Order No. 910, as amended (7 CFR part 910), regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act (the "Act," 7 U.S.C. 601-674), as amended. This action is based upon the recommendation and information submitted by the Lemon Administrative Committee (Committee) and upon other available information. It is found that this action will tend to effectuate the declared policy of the Act.

This regulation is consistent with the California-Arizona lemon marketing policy for 1989-90. The Committee met publicly on September 6, 1989, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and unanimously recommended a quantity of lemons deemed advisable to be handled during the specified week. The Committee reports that overall demand for lemons is excellent.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary, in order to effectuate the declared purposes of the Act, to make these regulatory provisions effective as specified, and handlers have been appraised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Arizona, California, Lemons, Marketing agreements and orders.

For the reasons set forth in the preamble, 7 CFR part 910 is amended as follows:

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

1. The authority citation for 7 CFR part 910 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

2. Section 910.982 is added to read as follows:

Note: This section will not appear in the Code of Federal Regulations.

§ 910.982 Lemon Regulation 682.

The quantity of lemons grown in California and Arizona which may be handled during the period September 10, 1989, through September 16, 1989, is established at 320,000 cartons.

Dated: September 7, 1989.

Charles R. Brader,

Director, Fruit and Vegetable Division.

BILLING CODE 3410-02-M

Animal and Plant Health Inspection Service

9 CFR Part 78

[Docket No. 89-148]

Brucellosis in Cattle; State and Area Classifications

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of interim rule.

SUMMARY: We are affirming without change an interim rule that amended the regulations governing the interstate movement of cattle because of brucellosis by changing the classification of Florida from a split status of Class B/Class C to all Class B.

EFFECTIVE DATE: October 11, 1989.

FOR FURTHER INFORMATION CONTACT: Dr. Jan Huber, Senior Staff Veterinarian, Cattle Diseases and Surveillance Staff, VS, APHIS, USDA, Room 731, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–5533.

SUPPLEMENTARY INFORMATION:

Background

In an interim rule effective June 8, 1989, and published in the **Federal Register** on June 14, 1989 (54 FR 25225–25227, Docket Number 89–097), we amended the brucellosis regulations contained in 9 CFR part 78 by changing the classification of Florida from a split status of Class B/Class C to all Class B.

Comments on the interim rule were required to be received on or before August 14, 1989. We did not receive any comments. The facts in the interim rule still provide a basis for the rule.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing that rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

Cattle moved interstate are moved for slaughter, for use as breeding stock, or for feeding. Changing the status of Florida from Class C/Class B to all Class B reduces certain testing requirements and branding and spaying costs involved in the interstate movement of cattle from Class C areas.

The principal group affected by this change is the owners of herds in the former Class C areas of Florida that are not certified brucellosis-free and are not known to be affected with brucellosis. Buyers and exporters of cattle, stockyards, feedlots, and intermediate handling facilities are affected to a negligible degree.

In accordance with 9 CFR 78.9, all cattle in Class C noncertified-free herds can move interstate only to slaughter, or to a quarantined feedlot if they are "S" branded, unless they are steers, spayed heifers, or bulls under 18 months of age. It is estimated that there are 409,000 cows in such herds in the Class C area of Florida. We anticipate that these cows will produce approximately 174,000 heifers during the next year. We estimate that at least 50,000 of these will be sold interstate. The change to Class B status makes it possible to sell them for purposes other than slaughter or consignment to a quarantined feedlot, without spaying them, in accordance with 9 CFR 78.9(c)(3).

The cost of spaying 50,000 heifers is estimated at $550,000 or $11 per head. Not all the heifers would be spayed if the Class C status remained unchanged; many would be sold for slaughter or "S" branded and moved to quarantined feedlots. However, $550,000 can be considered one upper limit for benefits accrued by the change from Class C to Class B status.

Another cost of moving cattle from Class C areas is the cost associated with "S" branding, required if unspayed animals are moved to quarantined feedlots, or indirectly to slaughter through intermediate handling facilities, nonquarantined feedlots, or stockyards. Based on current prices and demand for light heifers, the net proceeds per animal will be increased by approximately $20 if the heifers from nonquarantined herds are not required to by "S" branded or sold for slaughter, resulting in a maximum $1,000,000 savings to the industry if 50,000 heifers were so moved.

The upper limit to the economic impact of this rule would be $1,550,000 of financial benefit accrued primarily by owners of herds that are not certified brucellosis free and that are located in former Class C areas. This figure assumes that all cattle moved from these herds are not spayed, and are moved to destinations that require "S" branding. Actual savings will be less, since some cattle will be spayed or not "S" branded.

According to National Agricultural Statistics Service estimates, there are 7,144 cattle herds in the Class C area of Florida. Of these herds, 2,269 are certified free. Of the 4,875 noncertified-free herds, 4,606 are not quarantined. These 4,606 herds would be directly and positively affected by the change. The owners of these 4,606 herds could each receive additional profits of up to $20 per calf sold, or an average of $217 per herd owner, assuming equal herd sizes. About 4,556 (99 percent) of the 4,606 herds are owned by small businesses (annual revenues of less than $500,000). Because the owners of the 50 herds that are large businesses have larger herd sizes, and because not all herd owners will sell their cattle in ways that do not require spaying or "S" branding, the actual profit to each small herd owner will be less.

We have therefore determined that changing Florida's brucellosis status will not significantly affect current market patterns, and will have a significant economic impact on small entities.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V).

List of Subjects in 9 CFR Part 78

Animal diseases, Brucellosis, Cattle, Hogs, Quarantine, Transportation.

PART 78—BRUCELLOSIS

Accordingly, we are adopting as a final rule, without change, the interim rule amending 9 CFR 78.41 that was published at 54 FR 25225–25227 on June 14, 1989.

Authority: 21 U.S.C. 111–114a–1, 114g, 115, 117, 120, 121, 123–126, 134b, 134f; 7 CFR 2.17, 2.51, and 371.2(d).

Done in Washington, DC this 5th day of September 1989.

James W. Glosser,

Administrator, Animal and Plant Health Inspection Service.

[T.D. 8262]

RIN 1545–AN43

Treaty-Based Return Positions

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary Regulations.

SUMMARY: This document contains temporary Income Tax Regulations relating to the requirement that any taxpayer who takes a position that a treaty of the United States overrules, or otherwise modifies, an internal revenue law of the United States shall disclose such position. This action is necessary to implement sections 6114 and 6712 of the Internal Revenue Code of 1986 as added by the Technical and Miscellaneous Revenue Act of 1988 (TAMRA). The text of the temporary regulations set forth in this document also serves as the text of the proposed regulations cross-referenced in the notice of proposed rulemaking in the Proposed Rules section of this issue of the **Federal Register**. In addition, regulations under tax conventions with Norway and Honduras have been removed as obsolete.

EFFECTIVE DATE: These temporary regulations are to be effective for taxable years of the taxpayer for which the due date for filing returns (without extensions) occurs after December 31, 1988.

FOR FURTHER INFORMATION CONTACT: David Bergkuist of the Office of Associate Chief Counsel (International), within the Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224 (Attention: CC:CORP:T:R) (202–566–3872, not a toll-free call).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

These regulations are being issued without prior notice and public procedure pursuant to the Administrative Procedure Act (5 U.S.C. 553). For this reason, the collection of information contained in these regulations has been reviewed, and, pending receipt and evaluation of public comments, approved by the Office of Management and Budget (OMB) under control number 1545–1126. The estimated annual burden per respondent varies from 1/2 hour to 3 hours, depending on the individual circumstances, with an estimated average of 1 hour.

These estimates are an approximation of the average time expected to be necessary for the collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances.

For further information concerning this collection of information, and where to submit comments on this collection of information, the accuracy of the estimated burden, and suggestions for reducing this burden, please refer to the preamble to the cross-reference notice of proposed rulemaking published in the Proposed Rules section of this issue of the **Federal Register.**

Background

This document contains temporary Income Tax Regulations (26 CFR part 301) under sections 6114 and 6712 of the Internal Revenue Code of 1986. Section 1012 (aa)(5)(A) of TAMRA added section 6114 to the Code while section 6712 was added by section 1012(aa)(5)(B) of TAMRA.

Need for Temporary Regulations

The proper application of sections 6114 and 6712, which are currently effective, is dependent upon the issuance of regulations as authorized by each of these Code sections. These regulations are necessary to provide taxpayers with immediate guidance in order that they may comply with the requirements of these provisions. Therefore, good cause is found to dispense with the notice and public procedure requirements of 5 U.S.C. 553(b) and the delayed effective date requirement of 5 U.S.C. 553(d).

Explanation of Provisions

Section 6114 requires each taxpayer who, with respect to any tax imposed by the Code, takes a position that a treaty of the United States overrides, or modifies, an internal revenue law of the United States to disclose such position on a return of tax for such tax or in such form as the Secretary may prescribe. Section 6712 provides penalties for the failure to comply with the disclosure requirement of section 6114.

This document contains temporary regulations describing the treaty-based return position reporting requirement. Section 301.6114–1T(a) describes this reporting requirement in general. Section 301.6114–1T(b) describes specific situations for which reporting is required. Section 301.6114–1T(c) describes specific situations for which reporting is waived pursuant to the grant of authority contained in section 6114(b).

Section 301.6114–1T(d) sets forth the information required to be furnished to comply with section 6114, as well as the form and the manner in which this information is to be submitted. A description of the facts relied upon to support the position taken (§ 301.6114–1T(d)(4)) must be submitted. This description must also specify the provisions (if any) of a limitation on benefits article relied upon.

These regulations do not apply to a withholding agent with respect to the performance of his withholding functions. The Service will continue to study whether this exception is appropriate.

This document also provides temporary regulations under section 6712 that describe the amount of penalties and the manner in which such penalties will be imposed for failure to disclose the information required by section 6114 as well as the procedure to be followed and the grounds upon which such penalties may be waived.

Special Analyses

It has been determined that these rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. A general notice of proposed rulemaking is not required by 5 U.S.C. 553 for temporary regulations. Therefore, these rules do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6) and a Regulatory Flexibility Analysis is not required.

Drafting Information

The principal author of these regulations is David Bergkuist of the Office of Associate Chief Counsel (International), within the Office of Chief Counsel, Internal Revenue Service. Other personnel from the Internal Revenue Service and Treasury Department participated in developing these regulations.

List of Subjects

26 CFR Part 301

Administrative practice and procedure, Bankruptcy, Courts, Crime, Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Investigations, Law enforcement, Penalties, Pensions, Statistics, Taxes, Disclosure of information, Filing requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 2 CFR parts 301 and 602 are amended as follows:

PART 301—[AMENDED]

Paragraph 1. The authority for part 301 continues to read in part:

Authority: 26 U.S.C. 7805. * * * Section 301.6114–1T also issued under 26 U.S.C. 6114. * * *

Par. 2. New § 301.6114–1T is added to read as follows:

§ 301.6114–1T Treaty-based return positions (Temporary).

(a) *Reporting requirement*—(1) *General rule.* (i) Except as provided in paragraph (c) of this section, if a taxpayer takes a return position that any treaty of the United States (including, but not limited to, an income tax treaty, estate and gift tax treaty, or friendship, commerce and navigation treaty) overrides or modifies any provision of the Internal Revenue Code and thereby effects (or potentially effects) a reduction of any tax incurred at any time, the taxpayer shall disclose such return position on a statement (in the form required in paragraph (d) of this section) attached to such return.

(ii) If a return of tax would not otherwise be required to be filed, a return must, nevertheless, be filed for purposes of making the disclosure required by this section. For this purpose, such return need include only the taxpayer's name, address, Taxpayer Identification Number (if any), and a subscription under the penalties of perjury (as well as the subject disclosure); also, the taxpayer's taxable year shall be deemed to be the calendar year (unless the taxpayer has previously established a different taxable year).

(2) *Application.* (i) A taxpayer is considered to adopt a "return position" when the taxpayer determines its tax liability with respect to a particular item of income, deduction or credit. A taxpayer may be considered to adopt a return position whether or not a return is actually filed. To determine whether a return position is a "treaty-based return position" so that reporting is required under this paragraph (a), the taxpayer must compare (A) the tax liability (including credits, carrybacks, carryovers, and other tax consequences or attributes for the current year as well as for any other affected tax years) to be reported on a return of the taxpayer, and (B) the tax liability (including such credits, carrybacks, carryovers, and other tax consequences or attributes) that would be reported if the relevant treaty provision did not exist. If there is a difference in these two amounts, the position taken on a return is a treaty-based return position that must be reported.

(ii) In the event a taxpayer's return position is based on a conclusion that a treaty provision is consistent with a Code provision, but the effect of the treaty position is to alter the scope of the Code provision from the scope that it would have in the absence of the treaty, then the return position is a treaty-based return position that must be reported.

(iii) A return position is a treaty-based return position unless the taxpayer's conclusion that no reporting is required under subdivisions (i) and (ii) of this paragraph has a substantial probability of successful defense if challenged.

(3) *Examples.* The application of section 6114 and paragraph (a)(2) of this section may be illustrated by the following examples:

Example (1). X, a Country A corporation, claims the benefit of a provision of the income tax treaty between the United States and Country A that modifies a provision of the Code. This position does not result in a change of X's U.S. tax liability for the current tax year but does give rise to, or increases, a net operating loss which may be carried back (or forward) such that X's tax liability in the carryback (or forward) year may be affected by the position taken by X in the current year. X must disclose this treaty-based return position with its tax return for the current tax year.

Example (2). Y, a foreign corporation, is engaged in a trade or business in the United States. Section 884(f)(1)(A) of the Code provides that any interest paid by Y's U.S. trade or business shall be treated as paid by a domestic corporation and, thus, as U.S. source income. However, section 1012(aa)(3)(E) of the Technical and Miscellaneous Revenue Act of 1988 provides that, to the extent that a U.S. treaty provision in effect on October 22, 1986, would treat certain interest paid by a branch of a foreign corporation with a U.S. trade or business as non-U.S. source income, the treaty shall prevail. If Y claims the benefit of such a U.S. treaty provision, Y must disclose such position (see also paragraph (b)(4) of this section).

Example (3). Z, a domestic corporation, is engaged in a trade or business in Country B. Country B imposes a tax on the income from certain of Z's petroleum activities at a rate significantly greater than the rate applicable to income from other activities. Z claims a foreign tax credit for this tax on its tax return. The tax imposed on Z is specifically listed as a creditable tax in the income tax treaty between the United States and Country B; however, there is no specific authority that such tax would otherwise be a creditable tax for U.S. purposes under sections 901 or 903 of the Code. Therefore, in the absence of the treaty, the creditability of this petroleum tax would lack a substantial probability of successful defense if challenged, and Z must disclose this treaty-based return position (see also paragraph (b)(7) of this section).

(b) *Reporting specifically required.* Reporting is required under this section except as expressly waived under paragraph (c) of this section. In particular, reporting is specifically required if the taxpayer asserts any of the following positions:

(1) That a nondiscrimination provision of a treaty precludes the application of any otherwise applicable Code provision, other than with respect to the making of or the effect of an election under section 897(i);

(2) That a treaty reduces or modifies the taxation of gain or loss from the disposition of a United States real property interest;

(3) That a treaty exempts a foreign corporation from (or reduces the amount of tax with respect to) the branch profits tax (section 884(a)) or the tax on excess interest (section 884(f)(1)(B));

(4) That, notwithstanding paragraph (c)(1) of this section, (i) a treaty exempts from tax, or reduces the rate of tax on, interest or dividends paid by a foreign corporation that are from sources within the United States by reason of section 861(a)(2)(B) or section 884(f)(1)(A), or (ii) a treaty reduces the rate of tax on fixed or determinable annual or periodical income subject to withholding under sections 1441 or 1442 and received by a foreign person from a U.S. person where either person controls, within the meaning of sections 6038 or 6038A, the other person;

(5) That, under a treaty, (i) income that is effectively connected with a U.S. trade or business of a foreign corporation or a nonresident alien is not attributable to a permanent establishment or a fixed base of operations in the United States and, thus, is not subject to taxation on a net basis, or that (ii) expenses are allowable in determining net business income so attributable, notwithstanding an inconsistent provision of the Code;

(6) That a treaty alters the source of any item of income or deduction; or

(7) That a treaty grants a credit for a specific foreign tax for which a foreign tax credit would not be allowed by the Code.

The foregoing list is not a list of all positions for which reporting is required under this section; reporting is required if not waived under paragraph (c) of this section.

(c) *Reporting requirement waived.* Pursuant to the authority contained in section 6114(b) of the Code, reporting is waived under this section with respect

to any of the following return positions taken by the taxpayer:

(1) Except as provided in paragraph (b)(4) of this section, that a treaty has reduced the rate of withholding tax otherwise applicable to a particular type of fixed or determinable annual or periodical income subject to withholding under section 1441 or 1442, such as dividends, interest, rents, or royalties;

(2) That residency of an individual is determined under a treaty and apart from the Code;

(3) That a treaty reduces or modifies the taxation of income derived from dependent personal services, pensions, annuities, social security and other public pensions, or income derived by artistes, athletes, students, trainees or teachers;

(4) That a nondiscrimination provision of a treaty allows the making of an election under section 897(i); or

(5) That a Social Security Totalization Agreement or a Diplomatic or Consular Agreement reduces or modifies the taxation of income derived by the taxpayer.

In addition, if a partnership, trust, or estate that has the taxpayer as a partner or beneficiary discloses on its information return a position for which reporting is otherwise required by the taxpayer, the taxpayer (partner or beneficiary) is then excused from disclosing that position on a return. Also, this section does not apply to a withholding agent with respect to the performance of its withholding functions.

(d) *Information to be reported.* If reporting is required under this section, the following information must be furnished in accordance with paragraph (a) of this section as an attachment to the return and set forth with the indicated heading and with paragraphs labelled to correspond with the numbers set forth below:

Treaty-Based Return Position Disclosure Under Section 6114

(1) Taxpayer's name, T.I.N. (if any), and address both in the country of residence and in the United States;

(2) Name, T.I.N. (if available to the taxpayer), and address in the United States of the payor of the income (if fixed, determinable, annual, or periodical);

(3) A statement whether the taxpayer (if an individual) is a U.S. citizen or resident or (if a corporation) is incorporated in the United States;

(4) A separate statement of facts relied upon to support each separate position taken, including for each position (i) the nature and amount of each separate payment or separate income item for which the treaty benefit is claimed, (ii) an explanation of the position taken with a brief summary of the facts on which it is based, (iii) the specific treaty provision relied upon, (iv) the Code provision overridden or modified, and (v) the provisions of the limitation on benefits article (if any) in the treaty which the taxpayer relies upon to prevent application of that article. For purposes of subdivision (i), a taxpayer may treat payments or income items of the same type (*e.g.*, interest items) received from the same ultimate payor (*e.g.*, the obligor on a note) as a single separate payment or income item.

(e) *Effective date.* This section shall be effective for taxable years of the taxpayer for which the due date for filing returns (without extensions) occurs after December 31, 1988. (1) If a taxpayer has filed a return for such a taxable year, without complying with the reporting requirement of this section, before November 13, 1989, or (2) if a taxpayer is not otherwise than by paragraph (a) of this section required to file a return for a taxable year before November 13, 1989, such taxpayer must file (apart from any earlier filed return) the statement required by paragraph (d) of this section before January 10, 1990, by mailing the required statement to the Internal Revenue Service, P.O. Box 21086, Philadelphia, PA 19114. Any such statement filed apart from a return must be dated and subscribed and sworn to by the taxpayer under the penalties of perjury. If a taxpayer files or has filed a return on or before November 13, 1989 that provides substantially the same information required by paragraph (d) of this section, no additional submission will be required.

(f) *Cross reference.* For the provisions concerning penalties for failure to disclose a treaty-based return position, see section 6712 and § 301.6712–1T.

Par. 3. New § 301.6712–1T is added to read as follows:

§ 301.6712–1T Failure to disclose treaty-based return positions (Temporary).

(a) *Penalty imposed.* A taxpayer who fails in a material way to disclose one or more positions taken for a taxable year, as required by section 6114 and the regulations thereunder, is subject to a separate penalty for each failure to disclose a position taken with respect to each separate payment or separate income item in the amount of—

(1) For a corporation taxable as such under the Code, $10,000; or

(2) For all other taxpayers, $1,000.

The penalty imposed by this section may be imposed more than once for a single taxable year if a taxpayer has failed to disclose one or more positions taken with respect to more than one separate payment or separate income item and may be imposed in addition to any other penalty imposed by law.

(b) *Penalty waived.* Pursuant to the authority contained in section 6712(b) of the Code, the penalty imposed by paragraph (a) of this section may be waived, in whole or in part, if it is established to the satisfaction of the Assistant Commissioner (International), the district director or the director of the Internal Revenue Service Center that the taxpayer's failure to disclose the required information was not due to willful neglect. An affirmative showing of lack of willful neglect must be made in the form of a written statement that sets forth all the facts alleged to show lack of willful neglect and contains a declaration by such person that the statement is made under the penalties of perjury.

(c) *Manner of payment.* The penalty set forth in paragraph (a) of this section shall be paid in the same manner as tax upon the issuance of a notice and demand thereof.

(d) *Effective date.* This section shall be effective for taxable years of the taxpayer for which the due date for filing returns (without extension) occurs after December 31, 1988.

PARTS 510 and 515—[REMOVED]

Regulations Under Tax Conventions

Par. 4. The following regulations under tax conventions are hereby removed.

1. Part 510—Norway

BILLING CODE 4830-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 936

Surface Coal Mining and Reclamation Operations Under the Federal Lands Program; State-Federal Cooperative Agreements; Oklahoma

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSMRE) is adopting a cooperative agreement between the Department of the Interior and the State of Oklahoma for the regulation of surface coal mining and reclamation operations on Federal lands in Oklahoma. Such a cooperative agreement is provided for under section 523(c) of the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This final rule provides the terms of the cooperative agreement and additional information on other issues.

EFFECTIVE DATE: October 11, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. James H. Moncrief, Director, Tulsa Field Office, Office of Surface Mining Reclamation and Enforcement, 5100 E. Skelly Drive, Suite 550, Tulsa, Oklahoma 74135; Telephone: (918) 581-6430.

SUPPLEMENTARY INFORMATION:

I. Background

The Oklahoma program was conditionally approved on January 19, 1981 (46 FR 4910). The Oklahoma program received full program approval on January 14, 1986. Information on the general background, revisions, modifications, and amendments to the proposed permanent program submission as well as the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Oklahoma program can be found in the January 19, 1981, **Federal Register** (46 FR 4910). Subsequent actions in conditions of approval and program amendments are identified at 30 CFR 936.10 and 936.15.

A. The State of Oklahoma's Application

Section 523(c) of SMCRA, 30 U.S.C. 1201 *et seq.*, and the implementing regulations at 30 CFR parts 740 and 745, allow a State and the Secretary of the Interior (Secretary) to enter into a permanent program cooperative agreement if the State has an approved State program for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands.

Permanent program cooperative agreements are authorized by the first sentence of section 523(c) of SMCRA, which provides that, "Any State with an approved State program may elect to enter into a cooperative agreement with the Secretary to provide for State regulation of surface coal mining and reclamation operations on Federal lands within the State, provided the Secretary determines in writing that such State has the necessary personnel and funding to fully implement such a cooperative agreement in accordance with the provision of this Act."

On September 21, 1988, Henry Bellmon, Governor of Oklahoma, requested that a permanent program cooperative agreement be entered into between the Secretary of the Interior and the Governor of Oklahoma.

Section 30 CFR 745.11(b) of OSMRE's regulations requires that certain information be submitted with a request for a permanent program cooperative agreement, if the information has not previously been submitted in the State program. Much of the information relating to the budget, staffing, organization, and duties of the State regulatory authority, the Oklahoma Department of Mines (ODM), was described in Oklahoma's proposed permanent program submittal. The State of Oklahoma submitted, with the proposed permanent program cooperative agreement, the remaining supporting documentation required by 30 CFR 745.11(b). As part of that documentation, ODM submitted a written certification from the General Counsel of ODM that no State statutory, regulatory or other legal constraint exists which would preclude ODM from fully carrying out the proposed cooperative agreement.

B. Relation to the Federal Lands Program of SMCRA

The nature and extent of the Secretary's ability to delegate authority for surface coal mining operations on Federal lands to States through cooperative agreements was a subject of a 1988 Court of Appeals decision in *NWF* v. *Hodel*, 839 F.2d 694, 766 (D.C. Cir. 1988). The Oklahoma cooperative agreement is consistent with that opinion and delegates the Secretary's authority under SMCRA which is required to be covered under the Federal lands program and retains the Secretary's non-delegable responsibilities under the Mineral Leasing Act of 1920 (MLA).

If changes to the Federal lands program are adopted which are not covered by this agreement, OSMRE and the Secretary will promptly initiate the steps necessary to revise the agreement.

II. Summary of Cooperative Agreement and Response to Public Comments

The proposed cooperative agreement which was published in the **Federal Register** on December 14, 1988 (53 FR 50247), announced that the public comment period would close January 13, 1989, and that a public hearing was tentatively scheduled for January 3, 1989. Because no one asked to testify, the public hearing was not held.

During the public review period, OSMRE received 7 responses from Federal and State Agencies, none of which included comments requiring revisions to the proposed cooperative agreement. See the discussion of Article X for the response to concerns raised by the Bureau of Reclamation. As a result of OSMRE's review, some minor organizational and editorial changes in the proposed agreement were made to improve clarity.

A. Article I: Introduction, Purposes, and Responsible Agencies

Paragraph A of Article I sets forth the legal authority for the Oklahoma Cooperative Agreement (Agreement), which is provided by section 523(c) of the SMCRA. This paragraph states that the Agreement provides for State regulation of surface coal mining and reclamation operations in Oklahoma on Federal lands. Paragraph B sets out the purposes of the Agreement.

Paragraph C was modified to clarify that the ODM, acting under the direction of the Oklahoma Mining Commission, is the agency responsible for administering the Agreement on behalf of the Governor of Oklahoma (Governor). Paragraph C also names the OSMRE as the agency responsible for administering the Agreement on behalf of the Secretary.

B. Article II: Effective Date

Article II provides that after the Agreement has been signed by the Secretary and the Governor, it will become effective 30 days after publication as a final rule in the **Federal Register**. It will remain in effect until terminated as provided in Article XI.

C. Article III: Definitions

Article III provides that any terms and phrases used in the Agreement have the same meanings as set forth in the Federal and State Acts, regulations promulgated pursuant to those Acts, 30 CFR parts 700, 701, and 740, and the approved State program (Program).

Defining terms and phrases in this manner ensures consistency between applicable regulations and the Agreement. Where there are conflicts in definitions, those included in the Program apply.

D. Article IV: Applicability

Paragraph A of Article IV states that the laws, regulations, terms, and conditions of the Program are applicable to Federal lands in Oklahoma except as otherwise stated in the Agreement, SMCRA, 30 CFR 740.4 and 745.13, and other applicable Federal laws, Executive Orders, or regulations. This provision is consistent with the Federal lands program, which adopted the Oklahoma State program as substantive Federal law on all Federal lands in Oklahoma.

The reference to the Oklahoma State program is intended to encompass the approval of that State program on January 19, 1981, and any amendments thereto which are approved in accordance with 30 CFR 732.17. Excluded from the scope of the Agreement are the authorities and responsibilities reserved to the Secretary pursuant to SMCRA, 30 CFR 740.4, 745.13, and other applicable Federal laws, Executive orders, or regulations.

Paragraph B lists four existing Federal permits that will not betransferred to the State by this agreement.

Paragraph C states that appealable orders or decisions would be appealed to ODM or OSMRE as appropriate in accordance with ODM's or OSMRE's established appeal procedures.

E. Article V: General Requirements

Article V mutually binds the Governor and the Secretary to the provisions of the Agreement.

Paragraph A requires that ODM continue to have authority under State law to carry out the Agreement.

Paragraph B provides that upon application for funds the State shall be reimbursed by OSMRE pursuant to section 705(c) of SMCRA if the necessary funds have been appropriated to OSMRE by Congress. Section 705(c) of SMCRA provides that a State with a cooperative agreement may receive an increase in its annual grant for the development, administration and enforcement of a State program on Federal lands by an amount which the Secretary determines is approximately equal to the amount of money the Federal government would otherwise have expended to regulate surface coal mining and reclamation operations on the Federal lands within the State. The regulations implementing section 705(c) appear at 30 CFR 735.16 through 735.28.

If, when requested by the State, adequate funds have not been appropriated, OSMRE and ODM will meet and decide on appropriate measures to ensure that mining operations are regulated in accordance with the Program. Funds provided to ODM under the Agreement will be adjusted in accordance with Office of Management and Budget Circular A-102 Attachment E.

Paragraph C of Article V requires the State to make annual reports to OSMRE with respect to compliance with this Agreement. Paragraph C also provides for a general exchange of information developed under the Agreement, unless such an exchange is prohibited by Federal law or State law. Final evaluation reports prepared by OSMRE on State administration and enforcement of this Agreement will be provided to ODM. The Agreement requires that ODM's comments on the report be appended before being sent to Congress and other interested parties.

Paragraph D requires ODM to maintain the necessary personnel to fully implement this Agreement.

Paragraph E requires that ODM avail itself of the facilities necessary to carry out the requirements of the Agreement. This provision ensures that the State has access to and will utilize any resources necessary to conduct the inspections, investigations, studies, tests, and analyses required to fulfill the requirements of this Agreement.

Paragraph F of Article V concerns permit application fees and civil penalties. Permit fees will be determined according to section 745.1 of the State Act, section 771.25 of the State regulations, and other applicable provisions of the Program and Federal law. Any permit fees collected by the State that are attributable to the Federal lands covered by the Agreement will be considered program income. The State will retain all permit fees from operations on Federal lands and deposit them with the State Treasurer. The State will report the amount of these fees in the financial status report required under 30 CFR 735.26. Civil penalties or fines collected by the State will not be considered program income.

F. Article VI: Review of a Permit Application Package

Paragraphs A through C of Article VI generally describe the procedures that the State and OSMRE will follow in the review and analysis of permit application packages (PAP) for operations on Federal lands.

"Permit application package" is a term adopted by OSMRE in the Federal lands program (48 FR 6912, February 16, 1983). It is the material submitted by an applicant proposing to mine on Federal lands, including applications for permit revisions and renewals. OSMRE adopted the term because there are requirements for mining on Federal lands in addition to those required by a permit application under the approved State program for non-Federal lands. For example, operations on Federal lands may be subject to requirements of the Federal land management agency under Federal laws other than SMCRA. The package concept allows for such information to be included with the permit application required by the approved State program. See the definition of "permit application package" under 30 CFR 740.5.

Under paragraph A, an applicant proposing to conduct surface coal mining and reclamation operations on Federal lands will be required by ODM and the Secretary to submit a PAP in an appropriate number of copies to ODM. ODM will furnish OSMRE and other Federal agencies with the appropriate number of copies of the PAP.

The PAP will be in the form required by ODM and include any supplemental information required by OSMRE, the Federal land management agency and other agencies with jurisdiction or responsibility over Federal lands affected by the operations proposed in the PAP. At a minimum, the PAP will be required to satisfy the requirements of 30 CFR part 740 and must include the information necessary for ODM to make a determination of compliance with the Program and for OSMRE and appropriate Federal agencies to make determinations of compliance with applicable requirements of SMCRA, the Federal lands program, compliance with applicable requirements of SMCRA, the Federal lands program, other Federal laws, Executive orders, and regulations for which they are responsible.

Paragraph B of Article VI discusses review procedures for PAP's where leased Federal coal is involved and consequently, where the Secretary must make a decision on a mining plan. The Agreement does not address Federal lands where leased Federal coal is not involved because no such areas are known to exist in Oklahoma.

Under paragraph B.1., ODM will assume the responsibilities listed in 30 CFR 740.4(c) (1), (2), (3), (4), (6), and (7), to the extent authorized.

Under 30 CFR 740.4(c)(1), ODM will, to the extent authorized, take on the delegable responsibilities for review and approval, disapproval or conditional approval of permit applications, revisions or renewals thereof, and applications for transfer, sale and assignment of such permits. OSMRE will assist ODM in this review, upon request, to the extent possible. The Secretary retains those responsibilities that cannot be delegated to ODM including those under the Federal lands program, the MLA, the National Environmental Policy Act of 1969 (NEPA), this Agreement, and other applicable Federal laws. The Secretary will consider the information in the PAP and, where appropriate, make decisions required by SMCRA, MLA, NEPA, and other Federal laws. The Secretary will carry out his responsibilities in a timely manner and avoid, to the extent possible, duplication of those responsibilities delegated to the State in this Agreement and the Program, applicable Federal laws may be specified in working agreements between OSMRE and ODM, with concurrence of any Federal agency involved, and without amendment to this Agreement.

Paragraph B.2., designates ODM as the primary contact for applicants in matters regarding review of the PAP. As such, ODM will inform the applicant of all joint State-Federal determinations. On matters concerned exclusively with 43 CFR part 3480, subparts 3480 through 3487, the Bureau of Land Management (BLM) will be the primary contact with the applicant, and will provide ODM with documentation on its decisions. ODM will provide OSMRE with copies of correspondence with the applicant and any information received from the applicant regarding the PAP. OSMRE will provide ODM with copies of all correspondence which may have a bearing on the PAP. OSMRE will not ordinarily contact the applicant regarding the PAP, although OSMRE is not prevented from doing so.

ODM will consult with and obtain the consent of the Federal land management agency concerning post-mining land use and protection of non-coal resources, and will consult with and obtain the consent of BLM with respect to development, production, and recovery of mineral resources where operations involve leased Federal coal.

The Secretary reserves the right to act independently of ODM to carry out Departmental responsibilities under laws other than SMCRA or provisions of SMCRA not covered by the Program, and in instances of disagreement over SMCRA and the Federal lands program.

Under paragraph B.3., ODM will take on the responsibilities under 30 CFR 740.4(c) (2), (3), and (4). These cover consultation with the Federal land management agency and with BLM, and the approval and release of bonds. ODM will prepare documentation to comply with NEPA under 30 CFR 740.4(c)(7), but OSMRE will retain the non-delegable responsibilities under 30 CFR 740.4(c)(7) (i) through (vii).

ODM will also obtain the comments and determinations of other Federal agencies with jurisdiction or responsibility over Federal lands affected by the operations proposed in the PAP. ODM will request that all Federal agencies submit their findings or any requests for additional data to ODM, and, when necessary, to OSMRE within 45 days of receiving the PAP.

Under paragraph B.4., OSMRE will assist the State in carrying out its responsibilities by coordinating resolution of conflicts between ODM and other Federal agencies in a timely manner. OSMRE will further assist by helping to schedule joint meetings, upon request.

OSMRE will exercise its responsibilities in a timely manner and will provide ODM with a work product within 50 days of receiving the State's request for assistance in reviewing the permit application unless a different time is agreed upon by OSMRE and ODM.

OSMRE will be responsible for Federal lessee protection bond requirements under 30 CFR 740.15.

Paragraph B.5. describes the procedures that OSMRE and ODM will follow in reviewing the PAP. OSMRE and ODM will coordinate their activities and exchange information during the review process. The State will review the PAP to ensure compliance with the Program and State law and regulations, while OSMRE will review the PAP to ensure compliance with the non-delegable responsibilities of SMCRA and other Federal laws and regulations. OSMRE and ODM will plan and schedule PAP reviews and each will choose a project leader, who will serve as the primary point of contact during the review process. OSMRE will provide the State with its review comments within 50 days of receiving the PAP.

ODM will prepare a State decision package indicating whether the PAP complies with the Program. The review and finalization of the State's decision package will be conducted in accordance with procedures agreed upon by ODM and OSMRE for processing PAP's.

ODM can issue a SMCRA permit pursuant to the Program on Federal lands before the necessary Secretarial approval of the mining plan. However, ODM must advise the operator that Secretarial approval of the mining plan must be obtained before the operator begins mining operations on the Federal lease. The permit issued by the State will be required to include the terms and conditions required by the lease and those required by other applicable Federal laws and regulations.

After making its decision, ODM will notify the applicant, the Federal land management agency, and any agency with jurisdiction or responsibility over Federal lands affected by operations proposed in the PAP. A copy of the permit and written findings will be submitted to OSMRE.

OSMRE will provide technical assistance to ODM upon request, if available resources allow and will have access to ODM's files concerning operations on Federal lands.

Paragraph C of Article VI addresses review procedures for permit revisions or renewals.

Paragraph C.1. assigns to ODM the authority to review, approve or disapprove permit revisions or renewals not constituting modifications of a mining plan pursuant to 30 CFR 746.18. ODM must consult with OSMRE on whether any permit revision or renewal constitutes a mining plan modification. OSMRE will inform ODM within 30 days of receiving a copy of the permit revision or renewal as to such a decision. Where approval of a mining plan modification is required, OSMRE and ODM will follow the procedures outlined in paragraphs B.1. through B.4. of this Article.

Under paragraph C.2., OSMRE may establish criteria consistent with 30 CFR 746.18 to determine which permit revisions or renewals clearly do not constitute mining plan modifications. Those revisions or renewals meeting the criteria may be approved by ODM prior to contacting OSMRE.

Under paragraph C.3., permit revisions or renewals not constituting mining plan modifications or meeting the criteria outlined in paragraph C.2. will be reviewed and approved or disapproved by ODM.

Under paragraph C.4., ODM will review applications for permit transfers, sales, and assignments of rights in accordance with the Program and 30 CFR 740.13(e). This last provision was added to clarify that an application for a transfer, assignment, or sale of permit rights is not a PAP.

G. Article VII: Inspections

Paragraphs A and B state that ODM will conduct inspections on lands covered by this Agreement and prepare and file State inspection reports in accordance with the Program.

Paragraph C designates ODM as the point of contact and primary inspection authority in dealing with the operator.

However, the Secretary retains the right to conduct inspections of surface coal mining and reclamation operations on Federal lands without prior notice to ODM for the purpose of evaluating the manner in which the Agreement is being carried out and ensuring that performance and reclamation standards are being met.

Paragraph D states that when OSMRE intends to conduct an inspection under 30 CFR 842.11, ODM will ordinarily be given reasonable notice of such an inspection to provide an opportunity for State inspectors to join in the inspection. Citizen complaints not involving an imminent harm to the public or the environment will be referred to ODM for action.

Article VII preserves OSMRE's obligation and authority to conduct inspections pursuant to 30 CFR parts 842 and 843. The right of Federal and State agencies to conduct inspections for purposes outside the scope of the proposed cooperative agreement will not be affected.

H. Article VIII: Enforcement

Article VIII sets forth the enforcement obligations and authorities of OSMRE and ODM.

Under paragraph A, ODM will have primary enforcement authority on Federal lands in accordance with the requirements of the Agreement and the Program. Enforcement authority given to the Secretary under other Federal laws and Executive Orders will be reserved by the Secretary.

Under paragraph B, ODM will have primary responsibility for enforcement during joint inspections with OSMRE. Paragraph B also includes a requirement that ODM notify OSMRE prior to suspending or revoking a permit.

Paragraph C preserves OSMRE's authority to take enforcement action to comply with 30 CFR parts 843, 845, and 846, where OSMRE conducted an inspection or where, during a joint inspection with ODM, the two cannot agree on the appropriateness of a particular enforcement action. Such action will be based upon SMCRA or the substantive provisions contained in the Program, or both, but will use the Federal procedures and penalty system.

Paragraph D provides that OSMRE and ODM will notify each other of all violations of applicable regulations and all actions taken on the violations.

Paragraph E provides that personnel of ODM and the Department of the Interior, including OSMRE, will be mutually available to serve as witnesses in enforcement actions taken by either party.

Paragraph F specifies that this Agreement will not limit the Secretary's authority to enforce Federal laws other than SMCRA.

I. Article IX: Bonds

Under paragraph A, ODM and the Secretary will require each operator conducting operations on Federal lands to submit a performance bond payable to both the State and the United States. All applicable State and Federal requirements must be fulfilled prior to releasing an operator from any obligation covered by the performance bond. If the Agreement is terminated, paragraph A requires that the portion of the bond covering Federal lands reverts to being payable solely to the United States. ODM will advise OSMRE of any adjustments to the performance bond pursuant to the Program.

Paragraph B states that a performance bond shall be released by the State after OSMRE concurs with the release.

Paragraph C states that forfeiture of performance bonds will be in accordance with the Program and subject to OSMRE concurrence.

Paragraph D clarifies that the performance bond does not meet the requirement for a Federal lease bond under 43 CFR part 3474, or for the lessee protection bond required in certain circumstances by section 715 of SMCRA.

J. Article X: Designating Land Areas Unsuitable for All or Certain Types of Surface Coal Mining and Reclamation Operations and Activities and Valid Existing Rights and Compatibility Determinations

Paragraph A.1. of Article X reserves to the Secretary authority to designate Federal lands as unsuitable for surface coal mining operations.

Paragraph A.2. states that ODM and OSMRE will notify each other of any petition to designate lands as unsuitable that could impact adjacent Federal and non-Federal lands, and solicit and consider each other's views on a petition. OSMRE will coordinate with the Federal land management agency with jurisdiction over the area covered by the petition, and will solicit comments.

The Bureau of Reclamation (BOR) stated that paragraphs A.1. and A.2. are difficult to understand and posed questions regarding the filing of petitions, decisions on petitions, and appeals of decisions. The Secretary notes that section 522 of SMCRA contains the requirements for designating areas unsuitable for surface coal mining. The detailed procedures for filing petitions for non-Federal lands for processing by ODM are outlined in part 764 of the Program, and those for Federal lands for processing by OSMRE are outlined in 30 CFR subchapter F, part 769. Therefore, reiteration of these detailed procedures in the Agreement is not deemed to be necessary.

BOR also stated that it should be responsible for designating areas as unsuitable for mining and should be considered the "decision maker" rather than a "commenter" in protecting BOR project resources.

The Secretary notes that the State and OSMRE processes for designating lands unsuitable for coal mining are separate from the Bureau of Land Management's unsuitability process (43 CFR part 3460) for designating no surface occupancy areas on Federal leases, for which BOR has input on protecting BOR interests. Therefore, in this respect, the cooperative agreement does not change BOR's authority or responsibility on Federal lands.

The Director of OSMRE is the decisionmaker on any Federal lands unsuitable petitions for coal mining under 30 CFR part 769.

For Federal lands petitions, the Director of OSMRE is required by 30 CFR 769.18(a) to consider information provided by governmental agencies such as BOR. If OSMRE and BOR as sister agencies within the Department could not reach an agreement on issues relating to a Federal lands petition, under 30 CFR 769.18(c), the matter would be referred to the Secretary of the Interior for resolution.

For the reasons stated above, the Secretary finds that it is not necessary to revise the cooperative agreement in response to BOR's comments.

Paragraph B discusses valid existing rights (VER) determinations. OSMRE's definition of VER, which was published on September 14, 1983 (48 FR 41314), relied on a general "takings" standard. In its March 22, 1985, decision, the District Court remanded this definition because the promulgation process violated the Administrative Procedure Act. On November 20, 1986, OSMRE published a suspension notice for the definition of VER pending further rulemaking (51 FR 41952). On December 27, 1988, OSMRE published a notice seeking comments on a proposed definition of VER (53 FR 52374), but OSMRE has not yet adopted a new definition. When the Federal rules are finalized, the Agreement will be amended as necessary to conform to the new rules.

The Secretary has decided, for areas covered by sections 522(e) (1) and (2) of SMCRA, to make VER determinations in

Oklahoma using the VER definition contained in the State regulatory program in accordance with 30 CFR 740.11(a) and the suspension notice at 51 FR 41954. Section 522(e) (1) and (2) of SMCRA address areas where, subject to VER, no surface coal mining operations shall be permitted except those which existed on the date of enactment of SMCRA.

Paragraph B.1. states that OSMRE has responsibility for processing requests for VER determinations on Federal lands within the boundaries of areas where mining is prohibited by section 522(e)(1) of SMCRA. For private inholdings within section 522(e)(1) areas, ODM, with the consultation and concurrence of OSMRE, will determine whether operations on such lands would or would not affect the Federal interest (Federal lands as defined in section 701(4) of SMCRA). OSMRE will have the responsibility for processing requests for VER determinations on private inholdings within the boundaries of section 522(e)(1) areas where mining affects the Federal interest.

Under Paragraph B.2., OSMRE will be responsible for processing requests for determinations of VER for proposed operations on Federal lands within the boundaries of any national forest, as identified in section 522(e)(2) of SMCRA. OSMRE will process compatibility determinations on Federal lands pursuant to section 522(e)(2) of SMCRA.

Under paragraph B.3., ODM will determine, for Federal lands, whether the prohibitions or limitations of section 522(e)(3) of SMCRA are applicable to proposed mining operations which would adversely affect any units of the National Park System, and any other public park, or any historic property listed in the National Register of Historic Places in consultation with the State Historic Preservation Officer. ODM will make the VER determination for such lands. When VER is determined to exist on a unit of the National Park System, ODM will work with the NPS before any proposed operation is permitted. When VER is determined not to exist, no surface coal mining operations will be permitted unless jointly approved by ODM and any Agency with jurisdiction over the lands in question.

Under paragraph B.4., ODM will process and make VER determinations on Federal lands, using the State program, for all areas limited or prohibited by sections 522(e) (4) and (5) of SMCRA as unsuitable for mining. For such operations on Federal lands, ODM will coordinate with the affected agency and any agency with jurisdiction over the proposed operations.

K. Article XI: Termination of Cooperative Agreement

Article XI specifies that the Agreement may be terminated as specified under 30 CFR 745.15.

L. Article XII: Reinstatement of Cooperative Agreement

Article XII provides that, if terminated, the Agreement may be reinstated under 30 CFR 745.16. That provision allows for reinstatement of a cooperative agreement upon application by the State after remedying the defects for which the agreement was terminated and the submission of evidence to the Secretary that the State can and will comply with all of the provisions of the Agreement.

M. Article XIII: Amendment of Cooperative Agreement

Article XIII provides that the Agreement may be amended by mutual agreement of the Governor and Secretary in accordance with 30 CFR 745.14.

N. Article XIV: Changes in State or Federal Standards

Paragraph A of Article XIV recognizes that the Secretary or the Governor may, from time to time, promulgate new or revised performance or reclamation requirements, or enforcement and administration procedures. If it is determined to be necessary to keep the Agreement in force, the State will request necessary legislative action and either the State or OSMRE will change or revise its regulations or promulgate new regulations, as applicable. Such changes will be made in accordance with 30 CFR part 732 for changes to the approved State program and section 501 of SMCRA for changes to the Federal lands program.

Paragraph B requires the State and OSMRE to provide each other with copies of changes in their respective laws and regulations.

O. Article XV: Changes in Personnel and Organization

Article XV requires ODM and OSMRE to advise each other of substantial changes in organization, funding, staff, or other changes which could affect the implementation of the Agreement.

P. Article XVI: Reservation of Rights

Article XVI recognizes that SMCRA, 30 CFR 745.13, and other legal authorities prohibit the Secretary from delegating certain authorities to the State. Article XVI states that this Agreement will not be construed as waiving or preventing the assertion of any right in this Agreement that the State or the Secretary may have under laws other than SMCRA, or their regulations, including those listed in Appendix A of the Agreement.

III. Procedural Matters

A. Executive Order 12291 and Regulatory Flexibility Act

On October 21, 1982, the Department of the Interior received from the Office of Management and Budget (OMB) an exemption for Federal/State cooperative agreements from the requirements of sections 3 and 7 of Executive Order 12291.

The Department has reviewed this proposed agreement in light of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Having conducted this review, the Department has determined that this document will not have a significant economic effect on a substantial number of small entities because no significant departure from either the State or Federal requirements already in effect will occur and no new or additional information will be required by the proposed agreement.

B. Paperwork Reduction Act of 1980

There are recordkeeping and reporting requirements in the proposed Oklahoma Cocperative Agreement which are the same as those required by the permanent program regulations. Those recordkeeping and reporting requirements needed clearance from OMB under 44 U.S.C. 3501 *et seq.* and were assigned the following clearance numbers:

Location of requirements	OMB clearance No.
Article V.C. (Required by 30 CFR part 745)	1029-0028
Article VI.A. (Required by 30 CFR part 773)	1029-0041
Article VII.A. (Required by 30 CFR part 840)	1029-0051
Article IX.A. (Required by 30 CFR part 800)	1029-0043

C. National Environmental Policy Act

Proceedings relating to adoption of a permanent program cooperative agreement are part of the Secretary's implementation of the Federal lands program pursuant to section 523 of SMCRA. Such proceedings are exempt under section 702(d) of that Act from the requirements to prepare a detailed statement pursuant to section 102(2)(C) of NEPA (42 U.S.C. 4332(2)(C)).

D. Author

The author of this regulation is Mr. David R. Alleman, Tulsa Field Office, Office of Surface Mining Reclamation and Enforcement, 5100 E. Skelly Drive, Suite 550, Tulsa, Oklahoma 74135; Telephone (918) 581-6430.

List of Subjects in 30 CFR Part 936

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: August 15, 1989.

James M. Hughes,

Deputy Assistant Secretary, Land and Minerals Management.

Accordingly, 30 CFR part 936 is amended as follows:

PART 936—[AMENDED]

1. The authority citation for part 936 is revised to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*

2. Section 936.30 is added to read as follows:

§ 936.30 State-Federal Cooperative Agreement.

The Governor of the State of Oklahoma and the Secretary of the Department of the Interior (Secretary) enter into a Cooperative Agreement (Agreement) to read as follows:

Article I: Introduction, Purpose, and Responsible Agencies

A. This Agreement is authorized by section 523(c) of the Surface Mining Control and Reclamation Act (Act), 30 U.S.C. 1273(c), which allows a State with a permanent regulatory program approved by the Secretary under 30 U.S.C. 1253, to elect to enter into an Agreement for the regulation and control of surface coal mining, operations on Federal lands. This Agreement provides for State regulation consistent with the Act, the Federal lands program (30 CFR, chapter VII, subchapter D) and the Oklahoma State program (Program) for surface coal mining and reclamation operations on Federal lands.

B. The purposes of this Agreement are to (a) foster Federal-State cooperation on the regulation of surface coal mining (b) minimize intergovernmental overlap and duplication and (c) provide uniform and effective application of the Program on all non-Indian lands in Oklahoma in accordance with the Act and the Program.

C. The Oklahoma Department of Mines (ODM), under the direction of the Oklahoma Mining Commission, shall be responsible for administering this Agreement on behalf of the Governor. The Office of Surface Mining Reclamation and Enforcement (OSMRE) shall administer this Agreement on behalf of the Secretary.

Article II: Effective Date

After being signed by the Secretary and the Governor, this Agreement shall be effective 30 days after publication in the **Federal Register** as a final rule. This Agreement shall remain in effect until terminated as provided in Article XI.

Article III: Definitions

The terms and phrases used in this Agreement which are defined in the Act, 30 CFR parts 700, 701, and 740, the Program, the Oklahoma Coal Reclamation Act of 1979, and in the rules and regulations promulgated pursuant to those Acts, shall be given the meanings set forth in said definitions. Where there is conflict between the above-referenced State and Federal definitions, the definitions used in the approved State program will apply except in the case of a term which defines the Secretary's continuing responsibilities under the Act and other laws.

Article IV: Applicability

A. In accordance with the Federal lands program, the laws, regulations, terms and conditions of the Oklahoma Program are applicable to Federal lands in Oklahoma except as otherwise stated in this Agreement, the Act, 30 CFR 740.4 and 745.13, or other applicable Federal laws, Executive Orders, or regulations.

B. The following permits will not be transferred to the State by this Agreement and will remain under the jurisdiction of OSMRE: 1. CFI-Bokoshe (Federal Permit OK-0002), 2. Stigler No. 9 (Federal Permit OK-0009), 3. Bokoshe No. 10 (Federal Permit OK-0001), and 4. McCurtain No. 2 (Federal Permit OK-0002).

C. Orders and decisions issued by ODM in accordance with the Program that are appealable shall be appealed to the reviewing authority in accordance with the Program. Orders and decisions issued by the Department that are appealable shall be appealed to the Department of the Interior's Office of Hearings and Appeals.

Article V: General Requirements

The Governor and the Secretary affirm that they will comply with all the provisions of this Agreement.

A. Authority of State Agency

ODM has and shall continue to have the authority under State law to carry out this Agreement.

B. Funds

Upon Application by ODM and subject to appropriations, OSMRE will provide the State with the funds to defray the cost associated with carrying out its responsibilities under this Agreement as provided in section 705(c) of the Federal Act, the grant agreement, and 30 CFR 735.16. Such funds will cover the full cost incurred by ODM in carrying out those responsibilities, provided that such cost does not exceed the estimated cost the Federal government would have expended to carry out such responsibilities in the absence of this Agreement; and provided that such State incurred cost per permitted acre of Federal land does not exceed the per permitted acre cost for similar administration and enforcement activities of the Program on non-Federal and non-Indian lands during the same time period.

The ratio or cost split of Federal to non-Federal dollars allocated under this Agreement will be determined by OSMRE and ODM based on the projected cost for regulation of mines within Federal lands that are under the jurisdiction of the State, in consideration of the relative amounts of Federal and non-Federal lands involved. The designation of mines based on Federal land will be prepared by ODM and submitted to OSMRE's Tulsa Field Office. OSMRE will work with ODM to estimate the amount the Federal government would have expended for regulation of surface coal mining operations on Federal lands in Oklahoma in the absence of this Agreement.

OSMRE and the State will discuss the OSMRE Federal land cost estimate, the ODM prepared list of acres by mine, and the State's overall cost estimate. After resolution of any issues, ODM will submit its grant application to OSMRE's Tulsa Field Office. The Federal lands/non-Federal lands ratio will be applied to the final eligible total State expenditures to arrive at the total Federal reimbursement due the State. This ratio or cost split will be agreed upon by July of the year preceding the applicable fiscal year in order to enable the State to budget funds for the Program.

The State may use the existing year's budget totals, adjusted for inflation and workload considerations, in estimating the regulatory cost for the following grant year. OSMRE will notify ODM as soon as possible if such projections are unrealistic.

If ODM applies for a grant but sufficient funds have not been appropriated to OSMRE, OSMRE and ODM will promptly meet to decide on appropriate measures that will insure that mining operations on Federal lands in Oklahoma are regulated in accordance with the Program.

Funds provided to ODM under this Agreement will be adjusted in accordance with Office of Management and Budget Circular A-102 Attachment E.

C. Reports and Records

ODM will make annual reports to OSMRE containing information with respect to compliance with terms of this Agreement pursuant to 30 CFR 745.12(d). ODM and OSMRE will exchange, upon request, except where prohibited by Federal or State law, information developed under this Agreement.

OSMRE will provide ODM with a copy of any final evaluation report prepared concerning State administration and enforcement of this Agreement. ODM comments on the report will be appended before transmission to the Congress or other interested parties.

D. Personnel

ODM shall have the necessary personnel to fully implement this Agreement in accordance with the provisions of the Act, Federal lands program and the Program.

E. Equipment and Laboratories

ODM will assure itself access to equipment, laboratories, and facilities to perform all inspections, investigations, studies, tests, and analyses that are necessary to carry out the requirements of the Agreement.

F. Permit Application Fees and Civil Penalties

The amount of the fee accompanying an application for a permit for operations on Federal lands in Oklahoma shall be determined in accordance with section 745.1 of the Oklahoma Coal Reclamation Act of 1979, section 771.25 of the State regulations and the applicable provisions of the Program and Federal law. All permit fees and civil penalties collected from operations on Federal lands will be retained by the State and shall be deposited with the State Treasurer in the Oklahoma Department of Mines Revolving Fund. Permit fees will be considered Program income. The financial status report submitted pursuant to 30 CFR 735.26 shall include the amount of fees collected and attributable to Federal lands during the prior State fiscal year.

Article VI: Review of Permit Application Package

A. Submission of Permit Application Package

ODM and the Secretary will require an applicant proposing to conduct surface coal mining and reclamation operations and activities on Federal lands to submit a permit application package (PAP) with an appropriate number of copies to ODM. ODM will furnish OSMRE and other Federal agencies with an appropriate number of copies of the PAP. The PAP will be in the form required by ODM and will include any supplemental information required by OSMRE and the Federal land management agency. Where section 522(e)(3) of the Act applies, ODM will work with the agency with jurisdiction over the publicly owned park, including units of the National Park System, or place included in the National Register of Historic Places (NRHP) to determine what supplemental information will be required.

At a minimum, the PAP will satisfy the requirements of 30 CFR Part 740 and include the information necessary for ODM to make a determination of compliance with the Program and for OSMRE and the appropriate Federal agencies to make determinations of compliance with applicable requirements of the Act, the Federal lands program, and other Federal laws, Executive Orders, and the regulations for which they are responsible.

B. Review Procedures Where Leased Federal Coal is Involved

1. ODM will assume the responsibilities listed in 30 CFR 740.4(c) (1), (2), (3), (4), (6), and (7) to the extent authorized.

In accordance with 30 CFR 740.4(c)(1), ODM will assume primary responsibility for the analysis, review, and approval or disapproval of the permit application component of the PAP for surface coal mining and reclamation operations and activities in Oklahoma where a mining plan is required. OSMRE will, at the request of the State, assist to the extent possible in this analysis and review.

The Secretary will concurrently carry out his responsibilities that cannot be delegated to ODM under the Federal lands program, the Mineral Leasing Act (MLA), the National Environmental Policy Act (NEPA), this Agreement, and other applicable Federal laws. The Secretary will carry out these responsibilities in a timely manner and will avoid, to the extent possible, duplication of the responsibilities of the State as set forth in this Agreement and the Program. The Secretary will consider the information in the PAP and where appropriate, make decisions required by the Act, MLA, NEPA, and other Federal laws.

Responsibilities and decisions which can be delegated to the State under other applicable Federal laws may be specified in working Agreements between OSMRE and ODM with concurrence of any Federal agency involved, and without amendment to this Agreement.

2. ODM will be the primary point of contact for applicants regarding the review of the PAP for compliance with the Program and State laws and regulations. On matters concerned exclusively with regulations under 43 CFR part 3480, subparts 3480 through 3487, the Bureau of Land Management (BLM) will be the primary point of contact with the applicant. ODM will send to OSMRE copies of any correspondence with the applicant and any information received from the applicant regarding the PAP. OSMRE will send to ODM copies of all OSMRE correspondence which may have a bearing on the PAP. OSMRE will request additional information from the applicant through ODM. Copies of OSMRE's request will be sent directly to the operator by OSMRE to help expedite the permit review process. The requested information will be submitted to OSMRE through ODM.

BLM will inform ODM of its actions and provide ODM with a copy of documentation on all decisions. ODM will be responsible for informing the applicant of all joint State-Federal determinations. Where necessary to make the determination to recommend that the Secretary approve the mining plan, OSMRE will consult with and obtain the concurrences of BLM, the Federal land management agency, and other Federal agencies as required.

The Secretary reserves the right to act independently of ODM to carry out his responsibilities under laws other than the Act or provisions of the Act not covered by the Program, and in instances of disagreement over the Act and the Federal lands program.

3. ODM will, to the extent authorized, consult with the Federal land management agency and BLM pursuant to 30 CFR 740.4(c)(2) and (3), respectively. ODM will also be responsible for obtaining the comments and determinations of other Federal agencies with jurisdiction or responsibility over the Federal lands affected by the operations proposed in the PAP. ODM will request all Federal agencies to furnish their findings on any request for additional information to ODM within 45 days of the date of receipt of the PAP. OSMRE will assist ODM in obtaining this information upon request of ODM.

ODM will be responsible for approval and release of performance bonds and liability insurance under 30 CFR 740.4(c)(4).

ODM will prepare documentation to comply with the requirements of NEPA under 30 CFR 740.4(c)(7); however, OSMRE will retain the responsibility for the exceptions in 30 CFR 740.4(c)(7)(i)–(vii).

4. OSMRE will assist ODM in carrying out ODM's responsibilities by:

(a) Coordinating resolution of conflicts and difficulties between ODM and other Federal agencies in a timely manner;

(b) Assisting in scheduling joint meetings, upon request, between State and Federal agencies;

(c) Where OSMRE is assisting ODM in reviewing the PAP, furnishing to ODM the work product within 50 calendar days of receipt of the State's request for such assistance, unless a different time is agreed upon by OSMRE and ODM;

(d) Exercising its responsibilities in a timely manner, governed to the extent possible by the deadlines established in the Program; and

(e) Assuming all responsibility for ensuring compliance with any Federal lessee protection bond requirement.

5. Review of the PAP:

(a) OSMRE and ODM will coordinate with each other during the review process as needed. ODM will keep OSMRE informed of findings made during the review process which bear on the responsibilities of OSMRE or other Federal agencies. OSMRE will ensure that any information OSMRE receives which has a bearing on decisions regarding the PAP is promptly sent to ODM.

(b) ODM will review the PAP for compliance with the Program and State law and regulations.

(c) OSMRE will review the applicable portions of the PAP for compliance with the non-delegated responsibilities of the Act and for compliance with the requirements of other Federal laws, Executive orders, and regulations.

(d) OSMRE and ODM will develop a work plan and schedule for PAP review and each will identify a person as the project leader. The project leaders will serve as the primary points of contact between OSMRE and ODM throughout the review process. Not later than 50 days after receipt of the PAP, unless a different time is agreed upon, OSMRE will furnish ODM with its review comments on the PAP and specify any requirements for additional data. To the extent practicable, ODM will provide OSMRE all available information that may aid OSMRE in preparing any findings.

(e) ODM will prepare a State decision package, including written findings and supporting documentation, indicating whether the PAP is in compliance with the Program. The review and finalization of the State decision package will be conducted in accordance with procedures for processing PAP's agreed upon by ODM and OSMRE.

(f) ODM may make a decision on approval or disapproval of the permit on Federal lands in accordance with the Program prior to the necessary Secretarial decision on the mining plan, provided that ODM advises the operator in the permit that Secretarial approval of the mining plan must be obtained before the operator may conduct coal development or mining operations on the Federal lease. ODM will reserve the right to amend or rescind any requirements of the permit to conform with any terms or conditions imposed by the Secretary in the approval of the mining plan.

(g) The permit will include, as applicable, terms and conditions required by the lease issued pursuant to the MLA and by any other applicable Federal laws and regulations, including conditions imposed by the Federal land management agency relating to post-mining land use, and those of other affected agencies, and will be conditioned on compliance with the requirements of the Federal land management agency with jurisdiction.

(h) In the case that valid existing rights (VER) are determined to exist on Federal lands under section 522(e)(3) of the Act where the proposed operation will adversely affect a unit of the National Park Service (NPS), ODM will work with the NPS to develop mutually agreed upon terms and conditions for incorporation into the permit to mitigate environmental impacts as set forth under Article X of this Agreement.

(i) After making its decision on the PAP, ODM will send a notice to the applicant, OSMRE, the Federal land management agency, and any agency with jurisdiction over the publicly owned park or historic place included in the NRHP affected by a decision under section 522(e)(3) of the Act. A copy of the written findings and the permit will also be submitted to OSMRE.

(j) OSMRE will provide technical assistance to ODM when requested, if available resources allow. OSMRE will have access to ODM files concerning operations on Federal lands.

C. Review Procedures for Permit Revisions or Renewals

1. Any permit revision or renewal for an operation on Federal lands will be reviewed and approved or disapproved by ODM after consultation with OSMRE on whether such revision or renewal constitutes a mining plan modification. OSMRE will inform ODM within 30 days of receiving a copy of a proposed revision or renewal, whether the permit revision or renewal constitutes a mining plan modification. Where approval of a mining plan modification is required, OSMRE and ODM will follow the review procedures where leased Federal coal is involved as outlined in this Agreement.

2. OSMRE may establish criteria to determine which permit revisions and renewals clearly do not constitute mining plan modifications.

3. Permit revisions or renewals on Federal lands which are determined by OSMRE not to constitute mining plan modifications or that meet the criteria for not being mining plan modifications will be reviewed and approved by ODM.

4. Transfer, sale, or assignment of permit rights on Federal lands shall be processed in accordance with the Oklahoma Program and 30 CFR 740.13(e).

Article VII: Inspections

A. ODM will conduct inspections of all surface coal mining and reclamation operations on Federal lands, except for those operations listed in Article IV, in accordance with 30 CFR 740.4(c)(5) and the Program and prepare and file inspection reports in accordance with the Program.

B. ODM will, subsequent to conducting any inspection pursuant to 30 CFR 740.4(c)(5), and on a timely basis, file with OSMRE's Tulsa Field Office a legible copy of the completed State inspection report.

C. ODM will be the point of contact and primary inspection authority in dealing with the operator concerning operations and compliance with the requirements covered by the Agreement, except as described hereinafter. Nothing in this Agreement will prevent inspections by authorized Federal or State agencies for purposes other than those covered by this Agreement. The Department may conduct any inspections necessary to comply with 30 CFR Parts 842 and 843 and its obligations under laws other than the Act.

D. OSMRE will ordinarily give ODM reasonable notice of its intent to conduct an inspection under 30 CFR 842.11 in order to provide State inspectors with an opportunity to join in the inspection. When OSMRE is responding to a citizen complaint of an imminent danger to the public health and safety, or of significant, imminent environmental harm to land, air or water resources pursuant to 30 CFR 842.11(b)(1)(ii)(C), it will contact ODM no less than 24 hours prior to the Federal inspection, if practicable, to facilitate a joint Federal/State inspection. All citizen complaints which do not involve an imminent danger or significant, imminent environmental harm will be referred to ODM for action. The Secretary reserves the right to conduct inspections without prior notice to ODM to carry out his responsibilities under the Act.

Article VIII: Enforcement

A. ODM will have primary enforcement authority under the Act concerning compliance with the requirements of this Agreement and the Program in accordance with 30 CFR 740.4(c)(5). Enforcement authority given to the Secretary under other Federal laws and Executive orders including, but not limited to, those listed in Appendix A (attached) is reserved to the Secretary.

B. During any joint inspection by OSMRE and ODM, ODM will have primary responsibility for enforcement procedures including issuance of orders of cessation, notices of violation, and assessment of penalties. ODM will inform OSMRE prior to issuance of any decision to suspend or revoke a permit on Federal lands.

C. During any inspection made solely by OSMRE or any joint inspection where ODM and OSMRE fail to agree regarding the propriety of any particular enforcement action, OSMRE may take any enforcement action necessary to comply with 30 CFR parts 843, 845, and 846. Such enforcement action will be based on the standards in the Program, the Act, or both, and will be taken using the procedures and penalty system contained in 30 CFR parts 843, 845, and 846.

D. ODM and OSMRE will promptly notify each other of all violations of applicable laws, regulations, orders, or approved mining permits subject to this Agreement, and of all actions taken with respect to such violations.

E. Personnel of ODM and OSMRE will be mutually available to serve as witness in enforcement actions taken by either party.

F. This Agreement does not affect or limit the Secretary's authority to enforce violations of Federal laws other than the Act.

Article IX: Bonds

A. ODM and the Secretary will require each operator who conducts operations on Federal lands to submit a single performance bond payable to Oklahoma and the United States to cover the operator's responsibilities under the Act and the Program. Such performance bond will be conditioned upon compliance with all requirements of the Act, the Program, State rules and regulations, and any other requirements imposed by the Department. Such bond will provide that if this Agreement is terminated, the portion of the bond covering the Federal lands will be payable only to the United States. ODM will advise OSMRE of any adjustments to the performance bond made pursuant to the Program.

B. Prior to releasing the operator from any obligation under such bond, ODM will obtain the concurrence of OSMRE. OSMRE concurrence will include coordination with other Federal agencies having authority over the lands involved.

C. Performance bonds will be subject to forfeiture with the concurrence of OSMRE, in accordance with the procedures and requirements of the Program.

D. Submission of a performance bond does not satisfy the requirements for a Federal lease bond required by 43 CFR subpart 3474 or lessee protection bond required in addition to a performance bond, in certain circumstances, by section 715 of the Act.

Article X: Designating Land Areas Unsuitable for All or Certain Types of Surface Coal Mining and Reclamation Operations and Activities and Valid Existing Rights and Compatibility Determinations

A. Unsuitability Petitions.

1. Authority to designate Federal lands as unsuitable for mining pursuant to a petition is reserved to the Secretary.

2. When either ODM or OSMRE receives a petition that could impact adjacent Federal or non-Federal lands pursuant to section 522(c) of the Act, the agency receiving the petition will notify the other of receipt and the anticipated schedule for reaching a decision, and request and fully consider data, information and recommendations of the other. OSMRE will coordinate with the Federal land management agency with jurisdiction over the petition area, and will solicit comments from the agency.

B. Valid Existing Rights and Compatibility Determinations

The following actions will be taken when requests for determination of valid existing rights (VER) pursuant to section 522(e) of the Act or for determinations of compatibility pursuant to section 522(e)(2) of the Act are received prior to or at the time of submission of a PAP that involves surface coal mining and reclamation operations and activities:

1. For Federal lands within the boundaries of any areas specified under section 522(e)(1) of the Act, OSMRE will determine whether VER exist for such areas.

For non-Federal lands within section 522(e)(1) areas ODM, with the consultation and concurrence of OSMRE, will determine whether operations on such lands will or will

BEST COPY AVAILABLE

not affect Federal lands. For such non-Federal lands affecting Federal lands, OSMRE will make the VER determination.

Under section 522(e)(1), for non-Federal lands within the boundaries of the National Park System, ODM, with the consultation and concurrence of OSMRE, will determine whether operations on such lands will or will not affect the Federal interest. For such non-Federal lands within the boundaries of the National Park System which affect the Federal interest, OSMRE will make the VER determinations.

2. For Federal lands within the boundaries of any national forest where proposed operations are prohibited or limited by section 522(e)(2) of the Act and 30 CFR 761.11(b), OSMRE will make the VER determination.

OSMRE will process requests for determinations of compatibility under section 522(e)(2) of the Act and 30 CFR 761.12(c).

3. For Federal lands, ODM, with the consultation and concurrence of OSMRE, will determine whether any proposed operations will adversely affect units of the National Park System with respect to the prohibitions or limitations of section 522(e)(3) of the Act. For such operations adversely affecting units of the National Park System, ODM, with the consultation and concurrence of OSMRE, will make the VER determination.

For Federal lands, ODM will determine whether any proposed operation will adversely affect any publicly owned parks other than those covered in the preceding paragraph and, in consultation with the State Historic Preservation Officer, places listed in the National Register of Historic Places (NRHP), with respect to the prohibitions or limitations of section 522(e)(3) of the Act.

For Federal lands other than those on which the proposed operation will adversely affect units of the National Park System, ODM will make the VER determination for operations which are prohibited or limited by section 522(e)(3) of the Act. In the case that VER is determined to exist on Federal lands under section 522(e)(3) of the Act where a proposed operation will adversely affect a unit of the National Park System, ODM will work with the NPS to develop mutually agreed upon terms and conditions for incorporation into the permit in order to mitigate environmental impacts.

In the case that VER is determined not to exist under section 522(e)(3) of the Act or 30 CFR 761.11(c), no surface coal mining operations and activities will be permitted unless jointly approved by ODM and the Federal, State or local agency with jurisdiction over the publicly owned park or place included in the NRHP.

4. ODM will process determinations of VER on Federal lands for all areas limited or prohibited by section 522(e)(4) and (5) of the Act as unsuitable for mining. For operations on Federal lands, ODM will coordinate with any affected agency or agency with jurisdiction over the proposed surface coal mining and reclamation operation.

Article XI: Termination of Cooperative Agreement

This Agreement may be terminated by the Governor or the Secretary under the provisions of 30 CFR 745.15.

Article XII: Reinstatement of Cooperative Agreement

If this Agreement has been terminated in whole or in part it may be reinstated under the provisions of 30 CFR 745.16.

Article XIII: Amendment of Cooperative Agreement

This Agreement may be amended by mutual agreement of the Governor and the Secretary in accordance with 30 CFR 745.14.

Article XIV: Changes in State or Federal Standards

A. The Department or the State may from time to time promulgate new or revised performance or reclamation requirements or enforcement and administration procedures. Each party will, if it determines it to be necessary to keep this Agreement in force, change or revise its regulations or request necessary legislative action. Such changes will be made under the procedures of 30 CFR part 732 for changes to the Program and under the procedures of section 501 of the Act for changes to the Federal lands program.

B. ODM and the Department will provide each other with copies of any changes to their respective laws, rules, regulations or standards pertaining to the enforcement and administration of this Agreement.

Article XV: Changes in Personnel and Organization

Each party to this Agreement will notify the other, when necessary, of any changes in personnel, organization, and funding, or other changes that may affect the implementation of this Agreement to ensure coordination of responsibilities and facilitate cooperation.

Article XVI: Reservation of Rights

This Agreement will not be construed as waiving or preventing the assertion of any rights in this Agreement that the State or the Secretary may have under laws other than the Act or their regulations, including but not limited to those listed in Appendix A.

Approved:

Henry Bellmon,

Governor of Oklahoma.

Date: August 2, 1989.

Manuel Lujan, Jr.,

Secretary of the Interior.

Date: August 30, 1989.

Editorial note: This appendix will not appear in the Code of Federal Regulations.

Appendix A

1. The Federal Land Policy and Management Act, 43 U.S.C. 1701 *et seq.*, and implementing regulations.
2. The Mineral Leasing Act of 1920, 30 U.S.C. 1818 *et seq.*, and implementing regulations, including 43 CFR part 3480.

[FIRMR Amdt. 17]

Restructuring and Simplification of Federal Information Resources Management Standards

AGENCY: Information Resources Management Service, GSA.

ACTION: Final rule.

SUMMARY: This rule introduces several changes being proposed to ensure that agencies have up-to-date information about Federal standards. The intent of these changes is to remove redundant and non-regulatory provisions from the Federal Information Resources Management Regulation (FIRMR) that may be found in other agency issuances, and to reorganize the FIRMR so that users may more readily locate standards provisions relevant to their particular requirements. These changes will also make FIRMR coverage of terminology to incorporate Federal standards in solicitations consistent with similar coverage in the Federal Acquisition Regulation (FAR). The changes do not relax an agency's obligation to comply with the standards. For example, Federal Information Processing Standards (FIPS) continue to be mandatory for Federal use after approval by the Secretary of Commerce.

The use of uniform standards permits the integration and sharing of information and processes among vendors, and helps agencies increase the productivity of their investments in information technology. Ready access to information about standards applicability and terminology for incorporating standards in solicitations is critical to realizing the benefits standards can help provide.

To ensure that agencies have up-to-date terminology to incorporate Federal standards in solicitation documents and contracts, GSA plans to update, publish, and distribute the "Federal ADP and Telecommunications Standards Index" at least twice each year, with updates published pursuant to a request for public comments. FIRMR changes are presently published infrequently, and continued inclusion of appropriate terminology to incorporate standards in solicitations in the codified regulation does not provide sufficiently timely information.

FIPS and the implementing terminology that is included in agency contracts can have important effects on agencies and on businesses that sell to the Government. Proposed changes to standards and applicable terminology will continue to be published in the **Federal Register** and circulated to agency regulatory and standards contracts for comment, and the comments resolved, before changes are adopted and printed in the Index. GSA plans to make the Index available on a subscription basis through the Government Printing Office to ensure widespread distribution. The FIRMR bulletin series will announce the availability of the Index and its updates.

EFFECTIVE DATE: September 11, 1989.

FOR FURTHER INFORMATION CONTACT: Margaret Truntich, General Services Administration, IRMS, Regulations Branch (KMPR), Washington, DC 20405. (Telephone: (202) 566-0194, or FTS 566-0194).

SUPPLEMENTARY INFORMATION: (1) A notice of proposed rulemaking regarding this action was published in the **Federal Register** on January 10, 1989 (54 FR 833). All comments received have been considered.

(2) In Part 201-2, Definitions of Words and Terms, the term "Standard terminology" and accompanying definition are removed.

(3) Part 201-8, Implementation and Use of Federal Standards, is removed and provisions are relocated as follows: (a) Provisions addressing overall policies and procedures for using Federal standards are relocated in part 201-13, and (b) contracting provisions that implement standards in the acquisition process are relocated in part 201-39. All existing Federal standard "requirements statements" for inclusion in solicitation documents will be removed.

(4) The changes made in part 201-13 are explained in the following paragraphs.

(a) Reserved part 201-13 is activated under the title, Operations and Control. It contains management policies and procedures pertaining to the use of standards. Information about other aspects of information resources management may be added in the future.

(b) Subpart 201-13.1, Standards, is established to contain overall policies and procedures for the use of standards, including Federal Information Processing Standards (FIPS), Federal Telecommunications Standards (FED-STDS), interim standards, and agency-unique standards. This subpart also contains the separation of Telecommunications standards in accordance with Public Law 99-500. All Federal Telecommunications Standards (FED-STDS) that relate to ADPE have been renamed by the National Institute of Standards and Technology as FIPS. All other FED-STDS remain unchanged and under the control of GSA.

(c) Other subparts in part 201-13 are reserved.

(5) In part 201-38, § 201-38.006 is amended to replace the reference "part 201-8" with "part 201-13."

(6) In part 201-38, subpart 201-38.1 is added and reserved.

(7) In part 201-38, subpart 201-38.2 is added and the information contained in part 201-39 is moved into this subpart.

(8) The changes made in part 201-39 are explained in the following paragraphs.

(a) Part 201-39 is removed. The information previously contained in part 201-39 has been moved to subpart 201-38.2.

(b) A new part 201-39 is added under the title, Acquisition of Information Processing Resources by Contracting. It contains the special acquisition rules that apply Governmentwide to information resources. The organizational structure established for this part is consistent with that of the FAR.

(c) Subpart 201-39.10, Standards, is established and organized consistent with part 10 of the FAR. It contains policies and procedures from part 201-8 pertaining to the implementation and use of requirements statements in the acquisition process. Provisions are amended by replacing the term "requirements statement" with the term "terminology to incorporate standards in solicitations", removing the applicability statements for individual standards, and prescribing language for obtaining the GSA "Federal ADP and Telecommunications Standards Index" when standards are to be incorporated into solicitations by reference.

(d) Subpart 201-39.52, Solicitation Provisions and Contract Clauses, is established and organized consistent with Part 52 of the FAR to contain provisions and contract clauses to be included in solicitation documents for information resources. Currently, this subpart only includes a provision for incorporating appropriate terminology in solicitations by reference to the "Federal ADP and Telecommunications Standards Index".

(9) In part 201-40, § 201-40.005 is amended to replace the references to "subpart 201-8.1" and "201-8.104" and replacing them with "part 201-13."

(10) The General Services Administration has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981. GSA decisions are based on adequate information concerning the need for, and the consequences of, the rule. This rule is written to ensure maximum benefits to Federal agencies and it will not have a significant effect beyond the internal operating procedures of Federal agencies. This is a Governmentwide regulation that will have little or no net cost effect on society. It is certified that this rule will not have a significant impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

List of Subjects in 41 CFR parts 201-8, 201-13, and 201-39

Computer technology, Telecommunications, Information resources activities, Government procurement, Competition, Hearing and appeal procedures.

Chapter 201 of title 41 of the Code of Federal Regulations is amended as set forth below:

PART 201-2—DEFINITIONS OF WORDS AND TERMS

1. The authority citation for part 201-2 continues to read as follows:

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c) and Sec. 101(f), 100 Stat. 1783-345; 40 U.S.C. 751(f).

§ 201-2.001 [Amended]

2. In § 201–2.001 remove the definition for "Standard terminology."

PART 201-8—[REMOVED AND RESERVED]

3. Part 201–8 is removed and reserved.

4. Part 201–13 is added to read as follows:

PART 201-13—OPERATIONS AND CONTROL

Sec.
201–13.000 Scope of part.
201–13.001 [Reserved]

Subpart 201-13.1—Standards

201–13.100 Scope of subpart.
201–13.101 General.
201–13.102 Policy.
201–13.103 Procedures.

Subparts 201-13.2—201-13.6 [Reserved]

Authority: 40 U.S.C. 486(c) and 40 U.S.C. 751(f).

§ 201-13.000 Scope of part.

This part prescribes policies and procedures pertaining to standards and other aspects of information resources management.

§ 201-13.001 [Reserved]

Subpart 201-13.1—Standards

§ 201-13.100 Scope of subpart.

This subpart prescribes policies and procedures of the General Services Administration (GSA) for the use of Federal Information Processing Standards (FIPS), Federal Telecommunications Standards (FED–STDS), interim standards, and agency-unique standards.

§ 201-13.101 General.

The FIRMR implements three types and seven categories of Federal standards. The "Federal ADP and Telecommunications Standards Index" published by GSA contains relevant information about the Federal standards.

(a) Types of Federal standards.

(1) Federal Information Processing Standards (FIPS). FIPS are automatic data processing standards adopted and issued under the provisions of 15 U.S.C. 278g–3 and 40 U.S.C. 759(d). FIPS are developed and issued by the National Institute of Standards and Technology (NIST) as part of their Federal Information Processing Standards Publications (FIPS PUBS) series.

(i) Public Law 99–500 title VIII, the "Paperwork Reduction Reauthorization Act of 1986," modified the definition of automatic data processing equipment (ADPE) to include most telecommunications resources (see 40 U.S.C. 759(a)).

(ii) Public Law 100–235, the "Computer Security Act of 1987," expressly provided the Secretary of Commerce authority for the development of Federal computer system standards, which were defined to encompass all ADPE standards (see 15 U.S.C. 278g–3(d)). All such ADPE standards are called FIPS.

(2) Federal Telecommunications Standards (FED–STDS).

(i) FED–STDS are official Federal Government publications relating to standards adopted and issued originally under the provisions of 40 U.S.C. 487. These standards are developed by the National Communications System under delegation from GSA. FED–STDS include those categories in the Federal Supply Class (FSC) of "Telecommunications" of the Federal Standards Program not redefined as ADPE by Public Law 99–500.

(ii) FED–STDS relating to ADPE that were in existence when Public Law 99–500 was enacted are covered by the modified definition of ADPE in Public Law 99–500 and therefore fall under the authority of NIST. These standards were redesignated by NIST as FIPS.

(b) Categories of Federal standards.

(1) Hardware standards include areas of standardization such as character recognition, interchange codes and media, transmission, interface, and keyboards.

(2) Software standards include areas of standardization such as programing languages, operating systems, operating procedures, and documentation.

(3) Application standards include items such as payroll, personnel, inventory, and accounting.

(4) Data standards include items such as data elements, data formats, data representations, and data codes.

(5) ADP operations standards include items such as benchmarking, computer performance management, computer security, and management of multivendor ADP systems.

(6) Telecommunications standards (i.e., FED–STDS) include those Federal Supply Class (FSC) telecommunications items not redefined as ADPE by Public Law 99–500 such as time and frequency reference, and transmission frequency for maritime mobile units.

(7) Computer-related telecommunications standards include those Federal Supply Class (FSC) telecommunications items redefined as ADPE by Public Law 99–500.

(c) Standards Index. GSA publishes the "Federal ADP and Telecommunications Standards Index" to provide information on mandatory standards as well as standards under development and interim standards. The Index includes terminology for incorporating Federal standards in solicitations. Applicable terminology for interim standards is not provided. Proposed changes to standards and applicable terminology are published for comment in the **Federal Register** and the comments resolved before changes are printed in the Index. The availability and ordering information for the Index is provided through the issuance of revisions to the FIRMR bulletin series.

§ 201-13.102 Policy.

(a) Mandatory use of Federal standards. Technical and requirements personnel shall implement Federal standards by:

(1) Reviewing each standard to determine its applicability to each requirement; and

(2) Working with contracting officials in accordance with subpart 201–39.10 to ensure that all applicable Federal standards are properly specified in any resulting solicitation and that the agency acquires only those information processing resources that comply with Federal standards.

(b) Use of interim standards. Certain Federal standards are published as "interim." Agencies are not required, but are encouraged, to apply these standards to the acquisition and use of automatic data processing and telecommunications resources in appropriate situations. Agencies should develop appropriate terminology for use in solicitations that is consistent with the intended use of the interim standard.

(c) Optional use of agency standards.

(1) In those instances where Federal standards do not exist for ADP and telecommunications resources being acquired, agencies should consider the use of applicable voluntary industry standards, such as American National Standards or International Standards. In cases where no Federal or voluntary industry standards exist, agencies should consider the development and use of agency-unique standards, provided such use is not in violation of the full and open competition requirements of Public Law 98–369, the "Competition in Contracting Act."

(2) The head of a Federal agency may allow the use of alternate standards in acquisitions of ADP and telecommunications resources when required by computer security and privacy considerations. Such standards must be more stringent than the applicable Federal standards and contain, at a minimum, the provisions of the applicable Federal standards.

(3) The use of agency-unique standards shall be coordinated with the National Institute of Standards and Technology.

§ 201-13.103 Procedures.

Each Federal agency shall implement Federal standards as provided in this subpart except as discussed in this section.

(a) Waiver to a Federal Information Processing Standard (FIPS). The Secretary of Commerce has delegated the authority to waive the mandatory use of a FIPS by Federal agencies to the heads of Federal agencies under certain conditions (see 54 FR 4322, dated January 30, 1989). Further information regarding such waivers may be obtained from the: National Institute of Standards and Technology; Attn: FIPS Waiver Decisions; Technology Building, Room B–154; Gaithersburg, MD 20899. If a waiver is obtained from the use of a FIPS, a deviation from the FIRMR is not required.

(b) Exception to a Federal Telecommunications Standard (FED–STD). GSA may grant an exception to the mandatory use of a FED–STD upon receipt of adequate justification from the requesting agency. Requests for exceptions, notifications, and assistance should be addressed to the General Services Administration (KMP), Washington, DC 20405. If an exception is obtained from the use of a FED–STD, a deviation from the FIRMR is not required.

5. The table of contents of part 201–38 is revised to read as follows:

PART 201-38—MANAGEMENT OF TELECOMMUNICATION RESOURCES

Sec.
201–38.000 Scope of part.
201–38.001 General. [Reserved]
201–38.002 Planning.
201–38.003 Controlling and reviewing.
201–38.004 Privacy.
201–38.005 Security.
201–38.006 Standards.
201–38.007 Policies on the use of telecommunications services.
201–38.007–1 Authorized use of Government telephone systems.
201–38.007–2 Abuse by employees.
201–38.007–3 Prohibitions.
201–38.007–4 Collections.
201–38.007–5 Privacy Act considerations.
201–38.007–6 Agency responsibilities.
201–38.007–7 Delegation of authority.
201–38.008 Use of toll-free telephone services.
201–38.008–1 Agency responsibilities.
201–38.008–2 GSA responsibilities.
201–38.009 [Reserved]
201–38.010 Analysis of data communication requirements. [Reserved]
201–38.011 Agency surveys and inventories of telephone station equipment.
201–38.011–1 Guidelines.
201–38.012 Use of functional telecommunications system specifications.
201–38.013 [Reserved]
201–38.014 Telecommunication requirements.
201–38.014–1 Submission of requirements to GSA.
201–38.014–2 GSA actions.
201–38.014–3 Review of proposed determinations by the Office of Management and Budget.
201–38.015 Competition.
201–38.016 Acquisition policies.
201–38.017 GSA provided service through the FTS.

Subpart 201-38.1—[Reserved]

Subpart 201-38.2—Major Changes and New Installations of Telecommunication Resources

Sec.
201–38.200 Scope of part.
201–38.201 General.
201–38.202 Description of major changes and new installations.
201–38.202–1 Local telephone service.
201–38.202–2 Intercity telephone service.
201–38.202–3 Data, facsimile, and record telecommunications services.
201–38.202–4 Communications security service.
201–38.202–5 Radio service.
201–38.202–6 Video and audio service.
201–38.202–7 Teleconference service.
201–38.203—201–38.205 [Reserved]
201–38.206 Submission of major changes and new installation requirements to GSA.
201–38.206–1 Local telephone service submissions.
201–38.206–2 Intercity telephone service submissions.
201–38.206–3 Federal Telecommunications System (FTS) intercity voice network service submissions.
201–38.206–4 Data, facsimile, and record telecommunications services submissions.
201–38.206–5 GSA common user data communication system submissions.
201–38.206–6 Other telecommunication services submissions.
201–38.207 GSA action on agency submissions.
201–38.207–1 Action on other than FTS submissions.
201–38.207–2 Action on FTS submissions.
201–38.207–3 Action on data telecommunication service submissions.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c) and Sec. 101(f), 100 Stat. 1783–345 and 2128; 40 U.S.C. 751(f).

§ 201-38.006—[Amended]

6. Section 201–38.006 is amended by removing the reference to "Part 201–8" and adding "part 201–13."

Subpart 201-38.1—[Added and Reserved]

7. Part 201–38 is further amended by adding and reserving subpart 201–38.1.

Subpart 201-38.2—[Redesignated From Part 201-39]

8. The current part 201–39 is redesignated as subpart 201–38.2 in Part 201–38. The old reference numbers to part 201–39 appear below on the left. The newly designated reference numbers to subpart 201–38.2 appear to the right as follows:

Old reference	New reference
Part 201–39	Subpart 201–38.2
201–39.000	201–38.200
201–39.001	201–38.201
201–39.002	201–38.202
201–39.002–1	201–38.202–1
201–39.002–2	201–38.202–2
201–39.002–3	201–38.202–3
201–39.002–4	201–38.202–4
201–39.002–5	201–38.202–5
201–39.002–6	201–38.202–6
201–39.002–7	201–38.202–7
201–39.003	201–38.203
201–39.004	201–38.204
201–39.005	201–38.205
201–39.006	201–38.206
201–39.006–1	201–38.206–1
201–39.006–2	201–38.206–2
201–39.006–3	201–38.206–3
201–39.006–4	201–38.206–4
201–39.006–5	201–38.206–5
201–39.006–6	201–38.206–6
201–39.007	201–38.207
201–39.007–1	201–38.207–1
201–39.007–2	201–38.207–2
201–39.007–3	201–38.207–3

9. A new part 201–39 is added to read as follows:

PART 201-39—ACQUISITION OF INFORMATION PROCESSING RESOURCES BY CONTRACTING

Sec.
201–39.000 Scope of part.
201–39.001 [Reserved]

Subparts 201-39.1—201-39.9—[Reserved]

Subpart 201-39.10—Terminology for Incorporating Standards in Solicitations

201–39.1000 Scope of subpart.
201–39.1001 [Reserved]
201–39.1002 Standards.
201–39.1002–1 General.
201–39.1002–2 Policy.
201–39.1002–3 Procedures.
201–39.1002–4 Solicitation provision.

Subparts 201-39.11—201-39.51—[Reserved]

Subpart 201-39.52—Solicitation Provisions and Contract Clauses

201–39.5200	Scope of subpart.
201–39.5201	General. [Reserved]
201–39.5202	Texts of provisions and clauses.
201–39.5202–1	Availability of Standards Index.

Subpart 201-39.53—[Reserved]

Authority: 40 U.S.C. 486(c) and 751(f).

§ 201-39.000 Scope of part.

This part sets forth the special acquisition rules that apply Governmentwide to information processing resources.

§ 201-39.001 [Reserved]

Subparts 201-39.1—201-39.9 [Reserved]

Subpart 201-39.10—Terminology for Incorporating Standards in Solicitations

§ 201-39.1000 Scope of subpart.

This subpart prescribes policies and procedures for the implementation and use of terminology for standards in the acquisition of information processing resources.

§ 201-39.1001 [Reserved]

§ 201-39.1002 Standards.

§ 201-39.1002-1 General.

(a) GSA publishes a handbook entitled "Federal ADP and Telecommunications Standards Index" which provides guidance to agencies regarding Federal standards. The Index provides terminology to incorporate applicable Federal standards in solicitations. The Index also contains a "Standards Checklist" that can be included in solicitations to incorporate applicable Federal standards.

(b) In instances where appropriate Federal standards do not exist for information processing resources being acquired, agencies may optionally develop terminology for interim Federal standards or agency-unique standards.

§ 201-39.1002-2 Policy.

The contracting officer shall include in solicitations terminology provided by technical and requirements personnel to incorporate each standard that is applicable to the information processing resource being acquired.

§ 201-39.1002-3 Procedures.

The contracting officer shall use one or a combination of the following methods to specify standards in solicitations:

(a) Include the full text of the terminology contained in the Index for each applicable standard.

(b) Incorporate the applicable terminology into the solicitation by reference to the Index.

(c) For each applicable standard, include the full text of the terminology as developed by the agency.

§ 201-39.1002-4 Solicitation provision.

If any of the terminology is incorporated by reference, the contracting officer shall insert in a solicitation the provision at § 201-39.5202-1, Availability of Standards Index.

Subparts 201-39.11—201-39.51—[Reserved]

Subpart 201-39.52—Solicitation Provisions and Contract Clauses

§ 201-39.5200 Scope of subpart.

This subpart contains provisions and contract clauses to be included in solicitations for information resources.

§ 201-39.5201 General. [Reserved]

§ 201-39.5202 Texts of provisions and clauses.

§ 201-39.5202-1 Availability of Standards Index.

As prescribed in § 201-39.1002-4, insert the following provision in solicitations:

Availability of the Federal ADP and Telecommunications Standards Index (Apr 89 FIRMR)

Copies of the "Federal ADP and Telecommunications Standards Index" may be obtained by submitting a written request to the Superintendent of Documents; U.S. Government Printing Office; Washington, DC 20402.

(End of provision)

PART 201-40—CONTRACTING FOR TELECOMMUNICATION RESOURCES

§ 201-40.005 [Amended]

10. Section 201-40.005 is amended by removing the references to "Subpart 201-8.1" and "§ 201-8.104" and replacing them with "part 201-13."

Dated: July 28, 1989.

Richard G. Austin,

Acting Administrator of General Services.

BILLING CODE 6820-25-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 442

[BERC-396-CN]

RIN 0938-AD12

Medicaid; Long-Term Care Facilities

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Correction.

SUMMARY: This document corrects technical errors in final rules with comment period that dealt with long-term care facilities and were published on February 2, 1989 at 54 FR 5316. In that document, we made changes in 42 CFR part 442 without taking into account—

- Changes already made to some of those sections by a final rule published on June 3, 1988 at 53 FR 20448, but not yet in the printed CFR; and
- The fact that Subpart B of 42 CFR part 483, established by the February 2, 1989 document, changed terminology previously used in connection with long-term care facilities. (The effective date of the February 2nd rule was postponed until January 1, 1990 by a final rule published on July 14, 1989 at 54 FR 29717.)

In order to preclude any confusion with respect to the requirements for long-term care facilities, we are presenting the complete correct revised text of the affected portions of part 442.

EFFECTIVE DATE: January 1, 1990.

FOR FURTHER INFORMATION CONTACT: Irene Gibson, (301) 966-6768.

List of Subjects

42 CFR part 442, Grant programs-health, Health facilities, Health professions, Health records, Medicaid, Nursing homes, Nutrition, Reporting and recordkeeping requirements, Safety.

PART 442—[AMENDED]

The authority citation for part 442 continues to read:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302), unless otherwise noted.

§ 442.13 [Amended]

1. In § 442.13:

a. Paragraph (b) is correctly revised to read as follows:

* * * * *

(b) *All Federal requirements are met on the date of the survey.* The agreement must be effective on the date the onsite survey is completed (or on the day following the expiration of a current

agreement) if, on the date of the survey the provider meets all Federal requirements.

* * * * *

b. In the February 2, 1989 rule, we failed to conform paragraph (c)(2) to the changed terminology used in the new 42 CFR part 483. Paragraph (c)(2) is revised to read as follows:

* * * * *

(c) * * *

(2) The date on which a SNF or ICF is found to meet all level A requirements, or an ICF/MR is found to meet all conditions of participation, and the facility submits an acceptable correction plan for lower level deficiencies, or an approvable waiver request, or both.

§ 442.30 [Amended]

2. In § 442.30, paragraph (a)(1) is correctly revised to read as follows:

(a) * * *

(1) The survey agency failed to apply the applicable requirements under subparts B and D of part 483 of this chapter, which set forth, respectively, the requirements for SNFs and ICFs, and the conditions of participation for ICFs/MR.

* * * * *

§ 442.101 [Amended]

3. In § 442.101, paragraph (d)(1) is correctly revised to read as follows:

* * * * *

(d) * * *

(1) The facility meets the applicable requirements:

(i) A SNF or ICF meets the requirements set forth in subpart B of part 483 of this chapter.

(ii) AN ICF/MR meets the conditions of participation set forth in subpart D of part 483 of this chapter.

* * * * *

§ 442.105 [Amended]

4. The undesignated introductory text is correctly revised to read as follows:

If a survey agency finds a facility deficient in meeting the level B requirements (for SNFs and ICFs) or the standards (for ICFs/MR), as specified, respectively, under subparts B and D of part 483 of this chapter, the agency may certify the facility for Medicaid purposes under the following conditions:

* * * * *

§ 442.117 [Amended]

5. Paragraph (a)(1) is correctly revised to read as follows:

(a) * * *

(1) The facility no longer meets applicable Level A requirements (for SNFs or ICFs,) or applicable conditions of participation for ICFs/MR as specified in Subparts B and D, respectively, of part 483 of this chapter.

* * * * *

§ 442.118 [Amended]

6. In § 442.118:

a. Paragraph (a) is correctly revised to read as follows:

(a) *Basis for denial of payments.* The Medicaid agency may deny payment for new admissions to a SNF or ICF that no longer meets the level A requirements or an ICF/MR that no longer meets the applicable conditions of participation specified under Subparts B and D, respectively, of part 483 of this chapter.

* * * * *

b. Paragraph (b)(1) is correctly revised to read as follows:

(b) * * *

(1) Provide the facility up to 60 days to correct the cited deficiencies and comply with the level A requirements (for SNFs and ICFs) or the conditions or participation (for ICFs/MR).

* * * * *

c. Paragraph (b)(3)(i) is correctly revised to read as follows:

* * * * *

(b) * * *

(i) The opportunity for the facility to present, before a State Medicaid official who was not involved in making the initial determination, evidence or documentation, in writing or in person, to refute the decision that the facility is out of compliance with the applicable level A requirements (for SNFs and ICFs) or the applicable conditions of participation (for ICFs/MR.)

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

RIN 1018-AA93

Migratory Bird Hunting; Zones in Which Lead Shot Will Be Prohibited for the Taking of Waterfowl, Coots and Certain Other Species in the 1989-90 Hunting Season

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule amendment.

SUMMARY: This final rule amendment redescribes State zones, in which the use of lead shot is prohibited for hunting waterfowl, coots and certain other species in the 1989-90 season, that were contained in the rulemaking dated Thursday, April 13, 1989 (54 FR 14814). The zones described below for the affected States (Arkansas, Kansas and Washington) consist of (1) the same areas that were already identified as nontoxic shot zones for waterfowl and coot hunting in § 20.108 of title 50 of the Code of Federal Regulations (50 CFR) for the 1988-89 hunting season and (2) the added counties identified for 1989-90 in Appendix N of the Final Supplemental Environmental Impact Statement on the Use of Lead Shot for Hunting Migratory Birds in the United States (see Table 1 in 54 FR 14814, Supplementary Information), and (3) those areas identified by the States where changes in zone descriptions are appropriate because of omissions, potential administrative, enforcement and/or lead poisoning problems.

EFFECTIVE DATE: September 11, 1989.

FOR FURTHER INFORMATION CONTACT: Byron K. Williams, Acting Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Room 634—Arlington Square, 4401 N. Fairfax Drive, Arlington, Virginia 22203, or write Director (FWS/MBMO) Mail Stop 634—Arlington Square, 18th & C Streets NW., Washington, DC 20240 (703/358-1773).

SUPPLEMENTARY INFORMATION: Subsequent to publishing the parent rule (referenced above) for this rule, the Service became aware of the need to revise certain State nontoxic shot zone descriptions for the 1989-90 waterfowl hunting seasons because of omissions and an accelerated conversion. States having revised zone descriptions are Arkansas, Kansas and Washington; the revised descriptions are as follows:

Arkansas

The Arkansas Game and Fish Commission advised that Sevier County was omitted from the list of Arkansas counties appearing in the codified section of the final 1989-90 nontoxic shot zone rule. Apparently, this mistake originated with the proposed rule, although the county name appears in the tables of the two rules. Nevertheless, Sevier County is scheduled for conversion to nontoxic shot status this current waterfowl hunting season, as per Appendix N of the Final Supplemental Environmental Impact Statement on the use of lead shot for hunting waterfowl in the United States;

the Arkansas zones are reprinted herein with the correction.

Kansas

The Kansas Department of Wildlife and Parks advised that the Flint Hills National Wildlife Refuge, in its entirety, should also be subject to nontoxic shot restrictions for the 1989–90 waterfowl hunting season. The Kansas nontoxic shot zone descriptions are reprinted herein with the Flint Hills National Wildlife Refuge added. It has been the policy of the Service to convert a refuge in its entirety with the first converting county of which it is a part.

Washington

The Washington State Department of Wildlife advised the Service prior to publication of the final rule that a significant change in zones was being contemplated for the 1989–90 waterfowl hunting season, but that confirmation would not be forthcoming until later in the summer. The proposed changes were confirmed to the Service on August 12, 1989, and identify 2 major zone areas as follows: (1) A Western Washington Zone that replaces the Puget Sound and Southwestern Zones and includes all areas west of the Pacific Crest National Scenic Trail and (2) a Columbia Basin Zone that is not really changed from the previous final rule coverage—but is redescribed. The Washington State zone descriptions are prefaced with an introductory statement warning that it is "* * * unlawful in the described zones to possess while hunting for or to take ducks, geese or coots with shotshells or a muzzle-loader shotgun loaded with any other metal than steel."

The Service takes this action under authority of the Migratory Bird Treaty Act (16 U.S.C. 703 *et seq.*; 40 Stat. 755).

In summary, this rule amends § 20.108 of 50 CFR to add areas to expand existing nontoxic shot zones for the 1989–90 waterfowl hunting season.

Economic Effect

Executive Order 12291, "Federal Regulation," of February 17, 1981, requires the preparation of regulatory impact analyses for major rules. A major rule is one likely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, government agencies of geographic regions; or significant adverse effects on the ability of United States-based enterprises to compete with foreign-based enterprises. The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) further requires the preparation of flexibility analyses for rules that will have a significant effect on a substantial number of small entities, which includes small businesses, organizations and/or governmental jurisdictions.

In accordance with Executive Order 12291, a determination has been made that this rule is not a major rule. In accordance with the Regulatory Flexibility Act, a determination has been made that this rule, if implemented without adequate notice, could result in lead shot ammunition supplies for which there would be no local demand. Conversely, nontoxic shot zones could conceivably be established where little or no nontoxic shot ammunition will be available to hunters. Therefore, this rule would not have a significant economic effect on a substantial number of small entities.

Waiver of 30 Day Effective Date

Since the upcoming waterfowl hunting seasons begin around October 1, 1989, the Service has determined that the effective date of this rule should be immediately upon publication. Delay of this rule for 30 days would place the requirements into effect after the seasons have begun and would be confusing to hunters as well as reducing the protection to waterfowl. Therefore, under the provisions of 5 U.S.C. 553(d)(3), the Service finds good cause to waive the 30 day effective date.

Paperwork Reduction Act

This rule will not result in the collection of information from, or place recordkeeping requirements on, the public under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Environmental Consideration

Pursuant to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(C)), a Final Environmental Statement (FES) on the use of steel shot for hunting waterfowl in the United States was published in 1976. As stated above, a supplement to the FES was completed in June 1986. In this supplement, pursuant to the Endangered Species Act, a "section 7" consultation was done on the potential impacts of the provisions of this rule on bald eagles. The "section 7" opinion concluded that implementation of the preferred alternative would not be likely to jeopardize the continued existence of the bald eagle. Also, a "section 7" opinion has concluded that the action being carried out is not likely to jeopardize the continued existence of the Aleutian Canada goose.

Authorship

The primary author of this final rule is Keith A. Morehouse, Office of Migratory Bird Management.

List of Subjects in 50 CFR Part 20

Exports, Hunting, Imports, Transportation, Wildlife.

Accordingly, part 20, subchapter B, chapter I of title 50 of the Code of Federal Regulations is amended as follows:

PART 20—[AMENDED]

1. The authority citation for part 20 continues to read as follows:

Authority: Migratory Bird Treaty Act, sec. 3, Pub. L. 65–186, 40 Stat. 755 (16 U.S.C. 701–708h); sec. 3(h), Pub. L. 95–616, 92 Stat. 3112 (16 U.S.C. 712).

2. Section 20.108 is amended by revising the entries for Arkansas, Kansas, and Washington to read as follows:

§ 20.108 Nontoxic shot zones.

The areas described within the States indicated below are designated for the purpose of § 20.21(j) as nontoxic shot zones for hunting waterfowl, coots and certain other species.

RIN 0648–AC74

Foreign Fishing; Groundfish of the Bering Sea and Aleutian Islands; Corrections

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule; corrections.

SUMMARY: This document corrects errors in the final rule to implement Amendment 12A to the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area published August 9, 1989 (54 FR 32642).

EFFECTIVE DATE: September 3, 1989, through December 31, 1990.

FOR FURTHER INFORMATION CONTACT: Jay J.C. Ginter (Fishery Management Biologist), 907–586–7229.

In rule document 89–18612 beginning on page 32642 in the issue of August 9, 1989, make the following corrections:

§ 675.2 [Corrected]

1. On page 32649, in the first column, in § 675.2, the bottom portion of the description of Figure 2 referring to "Bycatch limitation zone 2H", the second entry under the "North latitude" heading, "56°00′ " should read "56°30′ ".

2. On the same page, in the same column in § 675.2, the fourth entry "55°42′ " should read "55°46′ ".

§ 675.21 [Corrected]

3. On the same page, in the third column, in § 675.21(b)(1), in the fifth line of that paragraph, "bycatch" should read "PSC".

Dated: September 5, 1989.

James W. Brennan,

Assistant Administrator for Fisheries, National Marine Fisheries Services.

BILLING CODE 3510-22-M

Proposed Rules

Federal Register
Vol. 54, No. 174
Monday, September 11, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 532

Prevailing Rate System

AGENCY: Office of Personnel Management.

ACTION: Proposed rule.

SUMMARY: The Office of Personnel Management (OPM) is proposing regulations which will delegate to the Department of Defense (DoD) the responsibility for establishing and issuing the appropriated and nonappropriated fund wage schedules for United States citizen wage employees in foreign areas. The proposal will simplify the process and result in the issuance of wage schedules on a more timely basis.

DATE: Comments must be submitted on or before November 13, 1989.

ADDRESS: Send or deliver written comments to Barry E. Shapiro, Deputy Assistant Director for Pay Programs, Personnel Systems and Oversight Group, Office of Personnel Management, Room 7H28, 1900 E Street NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Allan Summers, (202) 632–7830.

SUPPLEMENTARY INFORMATION: The Federal Wage System law (Pub. L. 92–392), codified in subchapter IV of chapter 53, title 5, United States Code, requires that OPM shall establish wage schedules and rates for appropriated and nonappropriated fund prevailing rate employees who are United States citizens employed in foreign areas of the world. The implementing regulations are in §§ 532.233 and 532.235 of title 5, Code of Federal Regulations.

We are proposing that the responsibility for computing and issuing the overseas schedules be delegated to DoD. The computation of the schedules is a mechanical process which involves the averaging of regular wage schedules in effect at a certain time. Under current procedures, OPM each year obtains from DoD a data file of current regular wage schedules, computes the foreign area schedules, and issues them as Federal Personnel Manual Letters. This process is time-consuming and sometimes results in schedules not being issued or implemented on time. We are proposing to streamline this process by delegating to DoD the responsibility for computing, issuing and distributing the schedules. DoD has a large wage survey staff familiar with the preparation and issuance of wage schedules and is the employing agency for almost all of the wage employees covered by the schedules.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they are changes which will effect only employees of the Federal Government.

List of Subjects in 5 CFR Part 532

Administrative practices and procedure, Government employees, Wages.

U.S. Office of Personnel Management.

Constance B. Newman,

Director.

Accordingly, OPM is proposing to amend 5 CFR part 532 as follows:

PART 532—[AMENDED]

1. The authority for part 532 continues to read:

Authority: 5 U.S.C. 5343, 5346; § 532.707 also issued under 5 U.S.C. 552, Freedom of Information Act, Pub. L. 92–502.

2. In § 532.233, paragraph (a) is revised to read as follows:

§ 532.233 Regular appropriated fund wage schedules in foreign areas and certain U.S. possessions.

(a) The Department of Defense shall establish and issue regular appropriated fund wage schedules for U.S. citizens who are employees in foreign areas and for employees in Guam, Midway, and the U.S. Virgin Islands. The Department of Transportation shall establish and issue wage schedules for employees in American Samoa. These wage schedules will provide rates of pay for nonsupervisory, leader, supervisory, and production facilitating employees.

* * * * *

§ 532.235 [Amended]

3. In § 532.235, paragraph (a) is amended by replacing the term "Office of Personnel Management" with the term "Department of Defense" and by adding the words "establish and" after the word "shall".

BILLING CODE 6325-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 89–NM–134–AD]

Airworthiness Directives; Airbus Industrie Model A300, A310, A300–600 Series

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to require modification of the emergency lighting system on all Airbus Industrie Model A300, A310, and A300–600 series airplanes. This proposal is prompted by flight crew reports that the Floor Proximity Emergency Escape Path Marking System (FPEEPMS), which is part of the airplane's emergency lighting system, does not illuminate automatically with loss of AC power. This condition, if not corrected, could result in lack of FPEEPMS lighting for evacuation in an emergency situation. This proposal would also supersede an existing airworthiness directive (AD), applicable only to Airbus Industrie Model A300 series airplanes, which currently requires certain changes to the procedures in the Airplane Flight Manual (AFM) related to operation of the emergency lighting system.

DATE: Comments must be received no later than October 30, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANW–103, Attention: Airworthiness Rules Docket No. 89–NM–134–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. The applicable service information may be obtained from Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Greg Holt, Standardization Branch, ANM–113; telephone (206) 431–1918. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68996, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-addressed, stamped post card on which the following statement is made: "Comments to Docket Number 89–NM–134–AD." The post card will be date/time stamped and returned to the commenter.

Discussion

On August 8, 1988, the FAA issued AD 88–18–01, Amendment 39–5998 (53 FR 30975; August 17, 1988), applicable to Airbus Model A300 series airplanes, to require certain changes to the procedures in the Airplane Flight Manual (AFM) related to operation of the emergency lighting system. That action was prompted by pilot reports which indicated that the emergency lighting system did not illuminate with loss of AC power, and that the AFM does not contain compensating procedures which would ensure that the lights would be turned on by the flight crew prior to the need for an emergency evacuation. This condition, if not corrected, could result in failure of the emergency lights to operate when required in an emergency situation.

Since issuance of that AD, a modification has been developed to correct deficiencies in the emergency lighting operation on Airbus Industrie Model A300, A310, and A300–600 series airplanes.

Airbus Industrie has issued the following service bulletins which describe procedures for modification of the emergency lighting system:

Model	Service Bulletin
A300	A300–33–117, dated Apr. 17, 1989.
A310	A300–33–2015, dated Apr. 17, 1989.
A300–600	A300–33–6013, dated Mar. 30, 1989.

Although the Direction Générale de L'Aviation Civile (DGAC), which is the airworthiness authority of France, has classified only the service bulletins pertaining to the Model A300 and A310 series airplanes as mandatory, the FAA has determined that installation of the modifications described in all three service bulletins is required to ensure automatic operation of the emergency lighting system on all affected airplane models.

These airplane models are manufactured in France and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on other airplanes of the same type design registered in the United States, an AD is proposed which would supersede AD 88–18–01, Amendment 39–5998, with a new airworthiness directive that would require modification of the emergency lighting system on Model A300, A310, and A300–600 series airplanes, in accordance with the service bulletins previously described.

The A300 modification, when accomplished, would constitute terminating action for the AFM changes required by AD 88–18–01, Amendment 39–5998, for Airbus Industrie Model A300 series airplanes.

It is estimated that 103 airplanes of U.S. registry would be affected by this AD, that it would take approximately 25 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. The estimated cost for the modification kit is $500. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $154,500.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by superseding Amendment 39–5998 (53 FR 30975; August 17, 1988), AD 88–18–01, with the following new airworthiness directive:

Airbus Industrie: Applies to Model A300, A310, and A300–600 series airplanes, certificated in any category. Compliance is required within 120 days after the effective date of this AD, unless previously accomplished.

To ensure automatic operation of the emergency lighting system, including the

Floor Proximity Emergency Escape Path Marking System (FPEEPMS), accomplish the following:

A. Modify the emergency lighting system in accordance with Airbus Industrie Service Bulletin A300-33-117, dated April 17, 1989; or A310-33-2015, dated April 17, 1989; or A300-33-6013, dated March 30, 1989; as appropriate.

B. For Model A300 series airplanes: After the modification required by paragraph A., above, is accomplished, the Airplane Flight Manual (AFM) revisions required by Amendment 39-5998, AD 88-18-01, may be removed.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment and then send it to the Manager, Standardization Branch, ANM-113.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on August 29, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

[Docket No. 89-NM-130-AD]

Airworthiness Directives; Airbus Industrie Model A300 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD), applicable to certain Airbus Industrie Model A300 series airplanes, which would require repetitive inspections for corrosion and cracking in the area of the rear pressure bulkhead. This proposal is prompted by reports of corrosion and cracking in the various components associated with the rear pressure bulkhead. This condition, if not corrected, could lead to reduced structural capability of the fuselage and subsequent decompression of the airplane.

DATE: Comments must be received no later than October 30, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-130-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Greg Holt, Standardization Branch, ANM-113; telephone (206) 431-1918. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-addressed, stamped post card on which the following statement is made: "Comments to Docket Number 89-NM-130-AD." The post card will be date/time stamped and returned to the commenter.

Discussion

The Direction Generale de L'Aviation Civile (DGAC), which is the airworthiness authority of France, in accordance with existing provisions of a bilateral airworthiness agreement, has notified the FAA of an unsafe condition which may exist on certain Airbus Industrie Model A300 series airplanes. Fatigue testing by the manufacturer has revealed cracks and corrosion in various components associated with the rear pressure bulkhead. This condition, if not corrected, could lead to reduced structural capability of the fuselage, and subsequent decompression of the airplane.

Airbus Industrie has issued Service Bulletin A300-53-217, Revision 1, dated March 6, 1989, which describes procedures for a visual inspection for cracks and corrosion in the lower rim area of the rear pressure bulkhead, and removal of corrosion and repair of cracks, if necessary.

Airbus Industrie has also issued Service Bulletin A300-53-218, Revision 1, dated July 28, 1989, which describes procedures for a visual and eddy current inspections for corrosion and cracks in the upper rim area of the rear pressure bulkhead and the service apertures in the rear pressure bulkhead.

The French DGAC has classified these service bulletins as mandatory, and has issued French Airworthiness Directive 89-068-093(B).

This airplane model is manufactured in France and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on other airplanes of the same type design registered in the United States, an AD is proposed which would require repetitive visual and eddy current inspections of the rear pressure bulkhead and associated components, in accordance with the service bulletins previously described.

It is estimated that 66 airplanes of U.S. registry would be affected by this AD, that it would take approximately 44 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $116,160.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficent federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Airbus Industrie: Applies to Model A300 series airplanes, certificated in any category. Compliance is required as indicated, unless previously accomplished.

To prevent reduced structural capability of the fuselage, accomplish the following:

A. 1. Within the time limits specified in paragraph A.2., below, conduct the following inspections in accordance with Airbus Industrie Service Bulletin A300-53-217, Revision 1, dated March 6, 1989:

a. Perform a visual inspection and non-destructive testing (NDT) for cracking and corrosion of the lower rim area of the rear pressure bulkhead, forward and aft faces, including skin panels, circumferential joint doublers, stringers attachment fittings, cleat profile, Frame 80, attachment angles, circumferential strap, radial stiffeners, bonding points, and attach brackets of support struts between Stringer 27 left-hand (LH) and right-hand (RH).

b. Perform a visual inspection for cracking and corrosion of the drain and toilet system pipe couplings in the vicinity of the rear pressure bulkhead.

2. a. For airplanes whose first flight was less than 7 years ago as of the effective date of this AD, perform the initial inspection required by paragraph A.1., above, within 6 months after achieving 7 years since first flight, or within 6 months after the effective date of this AD, whichever occurs later.

b. For airplanes whose first flight was 7 years ago or more as of the effective date of this AD, perform the initial inspections required by paragraph A.1., above, within 6 months after the effective date of this AD.

B. If no corrosion or cracking is found as a result of the inspections required by paragraph A., above, perform repetitive inspections as follows:

1. Repeat the visual inspections at intervals not to exceed 3 years.

2. Repeat the NDT inspection at intervals not to exceed 8,000 landings.

3. If the modification specified in Airbus Industrie Service Bulletin A300-53-226, Revision 3, dated July 10, 1989 has been accomplished:

a. Repeat the visual inspection at intervals not to exceed 5 years.

b. Repeat the NDT inspections at intervals not to exceed 8,000 landings.

C. If cracking or corrosion is found as a result of the inspections required by paragraphs A. or B., above, repair prior to further flight, in accordance with Airbus Industrie Service Bulletin A300-53-217, Revision 1, dated March 6, 1989.

D. 1. Within the time limits specified in paragraph D.2., below, conduct the following inspections in accordance with Airbus Industrie Service Bulletin A300-53-218, Revision 1, dated July 28, 1989:

a. Perform an X-ray inspection for cracking of the rim area of the rear pressure bulkhead, in the area of Stringer 21 LH and RH.

b. Perform a visual inspection for corrosion and cracking of the upper rim area of the rear pressure bulkhead from the aft face.

c. Perform an eddy current inspection for cracks from the outboard side in the following areas:

(1) For airplanes, MSN 002 through 006: between Stringer 25 LH and RH.

(2) For airplanes, MSN 009 through 306: between Stringer 26 LH and RH.

d. Perform a visual inspection for cracks and corrosion of the service apertures in the rear pressure bulkhead.

e. Perform an eddy current inspection for cracks of the apertures for the auxiliary power unit (APU) bleed-air and fuel.

2. a. For airplanes having accumulated 26,000 landings or fewer as of the effective date of this AD, perform the initial inspections required by paragraph D.1., above, prior to the accumulation of 24,000 landings or within 2,000 landings after the effective date of this AD, whichever occurs later.

b. For airplanes having accumulated more than 26,000 landings as of the effective date of this AD, perform the initial inspections required by paragraph D.1., above, within 1,000 landings after the effective date of this AD.

E. If no cracking or corrosion is found as a result of the inspections required by paragraph D., above, perform repetitive inspections as follows:

1. Repeat the X-ray inspection of the rim area of the pressure bulkhead at Stringer 21 LH and RH at intervals not to exceed 4 years.

2. Repeat the visual inspections of the upper rim area at intervals not to exceed 8,000 landings.

3. Repeat the eddy current inspection from the outboard side between Stringer 25 LH and RH, or Stringer 26 LH and RH, as appropriate, at intervals not to exceed 8,000 landings.

4. Repeat the visual inspection of the service apertures at intervals not to exceed 6,000 landings.

5. Repeat eddy current inspections of APU fuel apertures at intervals not to exceed 6,000 landings.

6. Repeat the eddy current inspection of the APU bleed air line service aperture at intervals not to exceed 12,000 landings.

F. If cracking or corrosion is found as a result of the inspections required by paragraphs D. or E., above, repair prior to further flight, in accordance with Airbus Industrie Service Bulletin A300-53-218, Revision 1, dated July 28, 1989.

G. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment and then send it to the Manager, Standardization Branch, ANM-113.

H. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on August 29, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 89–NM–155–AD]

Airworthiness Directives; Airbus Industrie Model A300 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD), applicable to certain Airbus Industrie Model A300 series airplanes, which would require repetitive eddy current inspections of the left- and right-hand lower flanges of gantries 1 to 5 between Frame 47 and Frame 54, and repair, if necessary. This proposal is prompted by results of the manufacturer's full-scale fatigue testing, which revealed cracks in the lower flanges between Frame 47 and Frame 54. Undetected fatigue cracks could lead to reduced structural capability of the fuselage.

DATE: Comments must be received no later than October 30, 1989.

ADDRESS: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM–103, Attention: Airworthiness Rules Docket No. 89–NM–155–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. The applicable service information may be obtained from Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way, South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Greg Holt, Standardization Branch, ANM–113; telephone (206) 431–1918. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-addressed, stamped post card on which the following statement is made: "Comments to Docket Number 89–NM–155–AD." The post card will be date/time stamped and returned to the commenter.

Discussion

The Direction Générale de L'Aviation Civile (DGAC), which is the airworthiness authority of France, in accordance with existing provisions of a bilateral airworthiness agreement, has notified the FAA of an unsafe condition which may exist on certain Airbus Industrie Model A300 series airplanes.

The manufacturer reported that, during full-scale fatigue tests, cracks developed in the left-hand and right-hand lower flanges of gantries 1 to 5, between Frame 47 and Frame 54. Undetected fatigue cracks could lead to reduced structural capability of the fuselage.

Airbus Industries has issued Service Bulletin A300–53–266, dated March 13, 1989, which describes procedures for repetitive eddy current inspections of the left-handed and right-handed flanges of gantries 1 to 5, between Frame 47 and Frame 54, for cracks, and repair, if necessary. The DGAC has classified this service bulletin as mandatory.

This airplane model is manufactured in France and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on other airplanes of the same type design registered in the United States, an AD is proposed which would require repetitive eddy current inspections for cracks in the left-hand and right-hand flanges of gantries 1 to 5, between Frame 47 and Frame 54, and repair, if necessary, in accordance with the service bulletin previously described.

It is estimated that 66 airplanes of U.S. registry would be affected by this AD, that it would take approximately 12 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $31,680.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulations (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Airbus Industrie: Applies to Model A300 series airplanes, as listed in Airbus Industrie Service Bulletin A300–53–266, dated March 13, 1989, certificated in any category. Compliance is required within 30 days after the effective date of this AD or upon the accumulation of 28,500 landings, whichever occurs later, unless previously accomplished; and thereafter at intervals not to exceed 4,500 landings.

To prevent reduced structural capability of the fuselage, accomplish the following:

A. Perform an eddy current inspection of the left-hand and right-hand lower flanges of gantries 1 to 5, between Frame 47 and Frame 54, in accordance with Airbus Industrie Service Bulletin A300–53–266, dated March 13, 1989. If cracks are found, repair prior to further flight, in accordance with the service bulletin.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment and then send it to the Manager, Standardization Branch, ANM–113.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or at the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on August 29, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

The proposals contained in this Notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact, concerned with the substance of this proposal, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this Notice must submit a self-address, stamped post card on which the following statement is made: "Comments to Docket Number 89–NM–158–AD." The post card will be date/time stamped and retured to the commenter.

Discussion

The Direction Général de L'Aviation Civile (DGAC), which is the airworthiness authority of France, in accordance with existing provisions of a bilateral airworthiness agreement, has notified the FAA of an unsafe condition which may exist on Airbus Industrie Model A300 series airplanes. Full-scale fatigue testing by the manufacturer has revealed cracks in the left-hand and right-hand lower radius of fuselage frame 47. Undetected cracks could lead to cracking of the rear spar flange and bottom skin panel. This condition, if not corrected, could compromise the structural capability of the fuselage.

Airbus Industrie has issued Service Bulletin A300–53–259, dated January 26, 1989, which describes procedures for repetitive inspections of the right-hand and left-hand lower radius of fuselage frame 47 for cracks, and repair or modification, if necessary. The French DGAC has classified this service bulletin as mandatory.

This airplane model is manufactured in France and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on other airplanes of the same type design registered in the United States, an AD is proposed which would require repetitive inspections of the lower radius of fuselage frame 47 for cracks, and repair or modification, if necessary, in accordance with the service bulletin previously described.

It is estimated that 66 airplanes of U.S. registry would be affected by this AD, that it would take approximately 15 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $39,600.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that his proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above. I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Airbus Industrie: Applies to Model A300 series airplanes, certificated in any category. Compliance is required as indicated, unless previously accomplished.

To prevent structural failure of the fuselage, accomplish the following:

A. Prior to the accumulation of the number of landings indicated below or within 750 landings after the effective date of this AD, whichever occurs later, and thereafter at intervals indicated below, perform either a visual or eddy current inspection of the left-hand and right-hand lower radius of frame 47, in accordance with Airbus Industrie Service Bulletin A300–53–259, dated January 28, 1989.

PART 39—[AMENDED]

1. For airplanes identified as Configuration 3 in the service bulletin, the initial inspection must be performed prior to the accumulation of 22,200 landings.

a. If the immediately preceding inspection was performed using the visual method, the next inspection must be performed within 4,600 landings.

b. If the immediately preceding inspection was performed using the eddy current method, the next inspection must be performed within 13,200 landings.

2. For airplanes identified as Configuration 4 in the service bulletin, the initial inspection must be performed prior to the accumulation of 30,300 landings.

a. If the immediately preceding inspection was performed using the visual method, the next inspection must be performed within 4,600 landings.

b. If the immediately preceding inspection was performed using the eddy current method, the next inspection must be performed within 13,200 landings.

3. For airplanes identified as Configuration 7 in the service bulletin, the initial inspection must be performed prior to the accumulation of 19,200 landings.

a. If the immediately preceding inspection was performed using the visual method, the next inspection must be performed within 3,700 landings.

b. If the immediately preceding inspection was performed using the eddy current method, the next inspection must be performed within 10,800 landings.

4. For airplanes identified as Configuration 10 in the service bulletin, the initial inspection must be performed prior to the accumulation of 14,700 landings.

a. If the immediately preceding inspection was performed using the visual method, the next inspection must be performed within 2,800 landings.

b. If the immediately preceding inspection was performed using the eddy current method, the next inspection must be performed within 8,200 landings.

5. For airplanes identified as Configuration 12 in the service bulletin, the initial inspection must be performed prior to the accumulation of 27,600 landings.

a. If the immediately preceding inspection was performed using the visual method, the next inspection must be performed within 4,200 landings.

b. If the immediately preceding inspection was performed using the eddy current method, the next inspection must be performed within 12,600 landings.

B. If cracks found are less than or equal to 4.2 mm (.165 inch), repair prior to further flight and perform an eddy current inspection to ensure that the crack has been eliminated, in accordance with Airbus Industrie Service Bulletin, A300–53–259, dated January 28, 1989. Repeat the inspections at intervals indicated in paragraph A., above.

C. If cracks are greater than 4.2 mm (.165 inch), repair prior to further flight and reinspect in a manner approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM–113, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment and then send it to the Manager, Standardization Branch, ANM–113.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. These documents may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or the Standardization Branch, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on August 29, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certificate Service.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 89–CE–20–AD]

Airworthiness Directives; de Havilland Models DHC–2 Mk. I (L–20A, YL–20, U6, U–6A) and DHC–2 Mk. II Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This Notice proposes to adopted a new Airworthiness Directive (AD), applicable to de Havilland Models DHC–2 Mk. I and DHC–2 Mk. II airplanes, which would supercede AD 54–11–01, to require inspections for cracks and distorted rivets at the horizontal tailplane to fuselage front attachment brackets and replacement of these brackets if cracked. This proposal extends the serial number effectively of the AD and introduces additional modifications for these airplanes. This action is prompted by new service information from the manufacturer which will prevent failure of these brackets and the resultant loss of the airplane.

DATE: Comments must be received on or before November 13, 1989.

ADDRESSES: de Havilland Service Bulletin (S/B) No. 2/42, Revision C, dated February 2, 1989, applicable to this AD, may be obtained from Boeing of Canada Ltd., de Havilland Division, Garratt Boulevard, Downsview, Ontario, Canada M3K 1Y5, or may be examined at the Rules Docket at the address below. Send comments on the proposal in triplicate to the Federal Aviation Administration, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 89–CE–20–AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT: Mr. John Maher, Airframe Branch, ANE–

172, New York Aircraft Certification Office, FAA, New England Region, 181 South Franklin Avenue, Valley Stream, New York 11581: Telephone (516) 791–6220.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. Comments are specifically invited on the overall regulatory, economic, environmental and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Central Region, Office of the Assistant Chief Counsel, Attention: Docket No. 89–CE–20–AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

Discussion

AD 54–11–01 was issued in 1954 and is applicable to certain serial numbered de Havilland Models DHC–2 Mk. I and DHC–2 Mk. II airplanes, with the exception of the agricultural model. That AD was based on information presented in de Havilland Technical News Sheets (TNS) Nos. 73 and 75, Series B, which specified repetitive inspections for cracks of the tailplane to fuselage front attachment brackets, inspections for distorted rivets therein, and replacement of damaged parts with new parts. Also, the tailplane front attachment bolts were to be replaced at every 1000 hour repetitive inspection. During production of the Model DHC–2 Mk. I airplanes, the TNS were never updated to include airplanes with serial numbers (S/N) 619 through 1056. It was not until S/N 1057 was produced that Modification No. 2/1338 was incorporated on the production line. This modification involves the installation of thicker brackets and rivets, and eliminates the need for the 1000 hour repetitive inspections. de Havilland issued S/B No. 2/42, dated August 14, 1987, to include airplane S/N 1 through 1056 for the inspections, and to introduce Modification No. 2/1338, or Agricultural Modification 2/984, as applicable, with new replacement brackets for damaged Pre-Mod parts. Revision C to S/B No. 2/42 dated February 2, 1989, was issued to revise Figure 2 and change from AN456AD6–5 and –6 rivets to AN470AD6–5 and –6 rivets. As a result, Transport Canada who has responsibility and authority to maintain the continuing airworthiness of these airplanes in Canada, has issued Canadian AD CF–54–08R1, effective January 15, 1988, updating their original AD CF–54–08, and has classified this Service Bulletin and the actions recommended therein by the manufacturer as mandatory to assure the continued airworthiness of the affected airplanes. On airplanes operated under Canadian registration, this action has the same effect as an AD on airplanes certified for operation in the United States. The FAA relies upon the certification of Transport Canada combined with FAA review of pertinent documentation in finding compliance of the design of these airplanes with the applicable United States airworthiness requirements and the airworthiness conformity of products of this design certificated for operation in the United States. The FAA has examined the available information related to the issuance of de Havilland S/B No. 2/42, Revision C, dated February 2, 1989, and the mandatory classification of this S/B on de Havilland DHC–2 Mk. I and Mk. II airplanes by Transport Canada. Based on the foregoing, the FAA believes that the condition addressed by S/B No. 2/42, Revision C, dated February 2, 1989, is an unsafe condition that may exist on other products of this type design certificated for operation in the United States. Consequently, the proposed AD would supersede AD 54–11–01 and require initial and repetitive inspections for cracks in the horizontal tailplane to fuselage Pre-Modification No. 2/1338 attachment brackets P/N C2–FS–543A and P/N C2–FS–544A, and distorted rivets in the brackets on de Havilland Models DHC–2 Mk. I and DHC–2 Mk. II airplanes. Replacement of cracked brackets and distorted rivets with new brackets, P/N C2FS1589 and P/N C2FS1590, and bolts, AN174–H12A, in Modification No. 2/1338, would be required to be accomplished prior to further flight. Pre-Modification 2/1338 brackets, P/N C2–FS–543A and P/N C2–FS–544A are no longer available. The original AD 54–11–01 required that the ¼-inch diameter forward attachment bolts must be replaced every 1000 hours time-in-service, and the new AD will continue to require this replacement of these bolts per S/B No. 2/42.

The FAA has determined there are approximately 166 airplanes affected by the proposed AD. The cost of inspecting the tailplane-fuselage front attachment brackets, as required by the proposed AD, is estimated to be $200 per airplane. If a defective bracket is found, the replacement cost is $270 per bracket per airplane. The total cost for the inspection only is estimated to be $33,200. The total labor cost only of replacing one bracket per airplane for the fleet is estimated to be $39,840. The cost of compliance with the proposed AD is so small that the expense of compliance will not be a significant financial impact on any small entities operating these airplanes. The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. Therefore, I certify that this action (1) is not a "major rule" under the provisions of Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the public docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES**".

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of part 39 of the FAR as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); 14 CFR 11.89.

§ 39.13 [Amended]

2. By superseding AD 54–11–01 with the following new AD:

de Havilland: Applies to Models DHC–2 Mk. I (including L–20A, YL–20, U–6, and U–6A), and DHC–2 Mk. II (serial numbers 1 through 1050) airplanes certificated in any category.

Compliance: Required as indicated in the body of the AD.

To ensure the structural integrity of the horizontal tailplane to fuselage front attachment brackets, accomplish the following:

(a) Within the next 200 hours time-in-service (TIS), or prior to the accumulation of 1000 hours TIS, whichever occurs later after the effective date of this AD, unless already accomplished per the requirements of AD 54–11–01, and thereafter at intervals not to exceed 1000 hours TIS:

(1) Inspect attachment brackets, part number (P/N) C2–FS–543A and P/N C2–FS–544A for cracks and distorted rivets in accordance with paragraph 'A' of the "ACCOMPLISHMENT INSTRUCTIONS" in de Havilland Service Bulletin (S/B) No. 2/42, Revision C, dated February 2, 1989.

(2) Prior to further flight replace any distorted rivets as indicated in the above S/B, paragraph 'B', and any cracked brackets as indicated in paragraph 'C' of the Service Bulletin.

(b) At intervals not exceeding 1000 hours TIS since the last bolt replacement, replace all ¼-inch diameter forward attachment bolts on the tailplane front attachment brackets with new bolts, P/N AN174–H12A, in accordance with S/B No. 2/42 Rev. C.

(c) The repetitive inspections or modifications in paragraph (a) of this AD are not required on airplanes modified in accordance with de Havilland Modification No. 2/1338, or Agricultural Modification No. 2/984, as applicable.

(d) Airplanes may be flown in accordance with FAR 21.197 to a location where the requirements of this AD may be accomplished.

(e) An alternate method of compliance or adjustment of the initial or repetitive compliance times, which provides an equivalent level of safety, may be approved by the Manager, New York Aircraft Certification Office, FAA, New England Region, 181 South Franklin Avenue, Valley Stream, New York 11581.

Note: The request should be forwarded through an FAA Maintenance Inspector, who may add comments and then send it to the Manager, New York Aircraft Certification Office, at the above address. All persons affected by this directive may obtain copies of the documents referred to herein upon request to Boeing of Canada, Ltd.; de Havilland Division, Garratt Boulevard, Downsview, Ontario, Canada M3K 1Y5, Telephone (416) 633–7310; or may examine these documents at the FAA, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

This AD supersedes AD 54–11–01.

Issued in Kansas City, Missouri, on August 28, 1989.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 301 and 602

[INTL–361–89]

RIN 1545–AN67

Treaty-Based Return Positions

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: This document contains proposed Income Tax Regulations relating to the requirement that any taxpayer who takes a position that a treaty of the United States overrules, or otherwise modifies, an internal revenue law of the United States shall disclose such position. This action is necessary to implement sections 6114 and 6712 of the Internal Revenue Code of 1986 as added by the Technical and Miscellaneous Revenue Act of 1988. In the Rules and Regulations portion of this **Federal Register**, the Internal Revenue Service is issuing temporary regulations relating to these matters. The text of those temporary regulations also serves as the comment document for this proposed rulemaking.

DATES: These regulations are proposed to be effective for taxable years of the taxpayer for which the due date for filing returns (without extensions) occurs after December 31, 1988. It is anticipated, however, that any taxpayer desiring to apply the temporary regulations in lieu of the final regulations for the period prior to the adoption of the final regulations will be allowed to so choose. Written comments and requests for a public hearing must be delivered or mailed by November 13, 1989.

ADDRESS: Send comments and requests for a public hearing to: Internal Revenue Service (Attention: CC:CORP:T:R, INTL–361–89)), Room 4429, Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: David Bergkuist of the Office of Associate Chief Counsel (International), within the Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224 (Attention: CC:CORP:T:R (INTL–361–89)) (202–566–3872, not a toll-free call).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments on the collection of information should be sent to the Office of Management and Budget, Paperwork Reduction Project (1545–1126), Washington, DC 20503, with copies to the Internal Revenue Service, Attention: IRS Reports Clearance Officer T:FP, Washington, DC 20224.

The collection of information in these regulations is primarily in § 301.6114–1T(d). This information is required by section 6114 of the Code and will be used by the Service to identify taxpayers taking a treaty-based return position and the specific income for which such treaty-based return position is taken. This information will include the facts relied upon to support such position. The likely respondents are residents of foreign countries with which the United States has a treaty that affects the United States tax on income received by that resident.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents/recordkeepers may require greater or less time, depending on their particular circumstances.

Estimated total annual reporting burden: 10,000 hours.

The estimated annual burden per respondent varies from ½ hour to 3 hours, depending on individual circumstances, with an estimated average of 1 hour.

Estimated number of respondents: 10,000.

Estimated annual frequency of responses: Annually.

Background

The temporary regulations published in the Rules and Regulations portion of this issue of the **Federal Register** add new §§ 301.6114–1T and 301.6712–1T. The final regulations that are proposed to be based on the temporary regulations would amend 26 CFR parts 301 and 602. For the text of the temporary regulations, see T.D. 8262 published in the Rules and Regulations portion of this issue of the **Federal Register**.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It is hereby certified that the proposed rules will not have a significant impact on a substantial number of small entities because small entities will infrequently be required to report the information set forth in these regulations. Therefore, an initial Regulatory Flexibility Analysis is not required by the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Comments and Request for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying. A public hearing will be held upon written request by any person who submits written comments on the proposed rules. Notice of the time and place for the hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these regulations is David Bergkuist of the Office of Associate Chief Counsel (International), within the Office of Chief Counsel, Internal Revenue Service. Other personnel from the Internal Revenue Service and Treasury Department participated in developing the regulations.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR Parts 1602 and 1627

Proposed Modifications to Recordkeeping Provisions; Cancellation of Public Hearing

AGENCY: Equal Employment Opportunity Commission.

ACTION: Proposed rule: cancellation of hearing.

SUMMARY: Notice is hereby given that the Commission is cancelling the public hearing on the above-proposed modifications of its recordkeeping provisions. No requests to give oral testimony at the hearing were received from the public within the thirty-day time period specified in the hearing notice of July 8, 1989. Therefore it will not be necessary to hold the hearing.

FOR FURTHER INFORMATION CONTACT: Nicholas M. Inzeo, Assistant Legal Counsel, or Gary L. Janus, at 202/663–4669, Equal Employment Opportunity Commission, 1801 L Street NW., Washington, DC 20507.

Signed this day at Washington, DC.

Dated: August 29, 1989.

Clarence Thomas,

Chairman, Equal Employment Opportunity Commission.

ENVIRONMENTAL PROTECTION AGENCY

40 FR Part 52

[FRL–3643–9]

Approval and Promulgation of Implementation Plans; Maine Ozone Attainment Plan; Control of Gasoline Volatility

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve State Implementation Plan (SIP) revisions submitted by the State of Maine. These revisions will reduce emissions of volatile organic compounds from gasoline by reducing the Reid Vapor Pressure (RVP) of gasoline. EPA is also proposing to find that Maine's RVP regulations are "necessary to achieve" the national ambient air quality standards (NAAQS) for ozone and are excepted from federal preemption under section 211(c)(4) of the Clean Air Act. The intended effect of this action is to make reasonable further progress toward statewide attainment of the ozone standard as expeditiously as practicable as required under the Clean Air Act.

DATE: Comments must be received on or before October 11, 1989.

ADDRESSES: Comments may be mailed to Louis F. Gitto, Director, Air Management Division, Room 2311, JFK Federal Building, Boston, MA 02203. Copies of the submittal and EPA's evaluation are available for public inspection during normal business hours at the Environmental Protection Agency, Room 2311, JFK Federal Building, Boston, MA 02203; and the Maine Department of Environmental Protection, Upham Building, 71 Hospital Street, Augusta, ME 04333.

FOR FURTHER INFORMATION CONTACT: Jennifer York (617) 565–3220, FTS: 835–3220.

SUPPLEMENTARY INFORMATION: On February 14, 1989 and May 3, 1989 EPA received a SIP revision from the Commissioner of the Maine Department of Environmental Protection (DEP) that would add a new section to Maine Regulation Chapter 119. The new section requires that no person shall dispense, sell or supply gasoline from a bulk plant or terminal having a Reid Vapor Pressure (RVP) greater than 9.0 pounds per square inch (psi) from May 1 through September 15 beginning in 1989 and continuing each year thereafter.

Background

On November 12, 1987, the Commissioners of the Northeast States for Coordinated Air Use Management (NESCAUM) signed a Memorandum of Understanding expressing their intention to reduce the Reid Vapor Pressure (RVP) of gasoline to 10.0 pounds per square inch (psi) starting in the summer of 1988 and to 9.0 psi in the summer of 1989 and continuing every ozone season thereafter. The State of Maine held a hearing on April 7, 1988 on a regulation to implement this strategy. Since there were delays in adopting necessary regulations, the 1988 limit of 10.0 psi was eliminated and Maine is limiting RVP to 9.0 psi from May 1 to September 15 starting in 1989, and continuing each year thereafter. Maine adopted its regulation on August 10, 1988 and submitted it to EPA as a SIP revision on February 14, 1989. On May 3, 1989, EPA received a supplemental submittal from the state containing additional information on the state's VOC inventory and necessary changes to the state's RVP regulation.

EPA published a notice of final rulemaking on March 22, 1989 (54 FR 11868) which calls for the control of the volatility of gasoline nationally. The rule requires that in the Northeast the standard will be 10.5 psi beginning in the summer of 1989. The federal standard will be enforced each year beginning June 1 (for retail users and other end-users of gasoline) or May 1 (for all other points in the distribution system) except in 1989 when enforcement will begin June 30, 1989 and June 1, 1989 (100 days and 70 days, respectively, after the publication date of the final rule). Enforcement ends at all points in the system on September 15 of each year. The EPA regulation would normally preempt the state provision under section 211(c)(4) of the Clean Air Act (the Act). However, section 211(c)(4)(C) of the Act provides for approval of state control of fuel or fuel additives if the control is part of the SIP and is necessary to achieve the primary or secondary national ambient air quality standard (NAAQS) which the plan implements.

Criteria for Approval

Section 211(c)(4)(A) of the Act, in describing federal preemption authority, states:

> Except as otherwise provided in subparagraph (B) or (C), no State (or political subdivision thereof) may prescribe or attempt to enforce, for the purposes of motor vehicle emission control, any control or prohibition respecting use of a fuel or fuel additive in a motor vehicle or motor vehicle engine—(i) if the Administrator has found that no control or prohibition under paragraph (1) is necessary and has published his finding in the **Federal Register**, or (ii) if the Administrator has prescribed under paragraph (1) a control prohibition applicable to such fuel or fuel additive, unless [the] State prohibition or control is identical to the prohibition or control prescribed by the Administrator.

For the reasons described below, EPA does not believe this section of the Act preempts approval of the Maine revision. First, EPA has not made the finding described in subparagraph (i) of paragraph (A), that no fuel control or prohibition under paragraph (1) of section 211(c) is necessary; and EPA clearly has not published any such findings in the **Federal Register**. In fact EPA published a national fuel volatility regulation (54 FR 1188) on March 22, 1989.

Second, although EPA's national 10.5 RVP rule preempts a state's 9.0 RVP regulation, EPA may still approve certain state provisions for limits on RVP of fuel where EPA can make a finding under section 211(c)(4)(C) which would authorize EPA approval and, thus, eliminate the preemption problem. As set forth below, section 211(c)(4)(C) authorizes EPA to approve into the SIP a state-adopted fuel control measure that has otherwise been preempted by final EPA action if EPA finds that the state control "is necessary to achieve" the standard that the SIP implements.

Section 211(c)(4)(C) of the Act, in setting forth the circumstances under which an exception to federal preemption of state regulation may occur, states:

> A State may prescribe and enforce, for purposes of motor vehicle emission control, a control or prohibition respecting the use of a fuel or fuel additive in a motor vehicle or motor vehicle engine if an applicable implementation plan for such State under section 110 so provides. The Administrator may approve such provision in an implementation plan, or promulgate an implementation plan containing such a provision, only if he finds that the State control or prohibition is necessary to achieve the national primary or secondary ambient air quality standard which the plan implements.

EPA first interpreted this language as requiring the Agency to find that a fuel control requirement was essential to achieve timely attainment of the standard in the **Federal Register** discussion of EPA's approval of a state oxygenated fuels program in the Maricopa County, Arizona SIP. There EPA said that a fuel control measure may be "necessary" for timely attainment if no other measures that would bring about timely attainment exist, or if such other measures exist and are technically possible to implement, but are unreasonable or impracticable. Otherwise, no fuel control would ever be "necessary," since for any area there is at least one measure—namely, required shutdowns and prohibitions on driving—that would result in timely attainment of the NAAQS. It is doubtful that Congress would have intended to bar EPA from approving State fuel controls into a SIP based on the availability of such drastic alternatives.[1] EPA has since reaffirmed this rationale in its approval of state RVP control programs in Connecticut, Massachusetts, New Jersey, New York, and Rhode Island.

Evaluation of How the Maine Revision Satisfies the "Necessary" Criterion

The Maine submittal and related documents contain the state's and EPA's analysis of the emissions reductions that various measures would achieve and the remaining shortfall needed to achieve attainment. That analysis concludes that the Maine RVP regulation would reduce VOC emissions by an estimated 3750 tons per year (TPY) statewide from the 11.5 psi gasoline in use at the time the state prepared this revision. Subsequent EPA regulation to 10.5 psi resulted in a reduction of approximately 2175 TPY. The current effect of Maine's regulation to 9.0 psi would be a 1575 TPY reduction.

The quantity of reduction was derived from AP–42 emission factors for storage and transfer of gasoline and from the EPA MOBILE 3 emission factor model for motor vehicle emissions. This estimate may understate the actual reductions because it does not include the emissions reductions that would result from decreased running losses from motor vehicles associated with lower volatility gasoline. Running losses are emissions from the gasoline tank and fuel system that occur while a car is being driven and which result from an overload of the evaporative control system or escape through the filler cap.

EPA used information available in the 1979 Maine SIP, supplemental inventory information submitted by the state, emission and population factors, and National Emissions Data System (NEDS) data to determine whether Maine's RVP control program is "necessary to achieve" the standard. Since its 1979 submittal, Maine has not submitted, nor has it been required by EPA to submit, any additional VOC reducing strategies or reasonable further progress (RFP) reports.

The VOC strategies which have the greatest potential for significant future statewide VOC reductions are:

---

[1] **Federal Register** August 10, 1988, 53 FR 30220, 30228; See also EPA's approval of state RVP control programs in Massachusetts (54 FR 19173, May 4, 1989), Rhode Island and Connecticut (54 FR 23650, June 2, 1989).

Statewide measure	Statewide estimated tons reduced	Statewide estimated control	Percent Reduction from 1986 inventory
Enhanced I/M+basic I/M [1]	7236 TPY	N/A	6.0
Stage II controls	2730 TPY	70%	2.2
Stage I (gas stations) [2]	2506 TPY	85%	2.1
Consumer/commercial solvents	2244 TPY	60%	1.9
RVP 11.5 to 10.5 psi EPA	2175 TPY	100%	1.8
Misc. surface coating	1850 TPY	50%	1.5
Architectural coatings	1638 TPY	70%	1.4
RVP 10.5 to 9.0 psi	1575 TPY	100%	1.3
Paper coating	1559 TPY	70%	1.3
Bulk terminal controls	753 TPY	85%	0.6
Auto body	650 TPY	50%	0.5
Degreasing	650 TPY	50%	0.5
Printing	490 TPY	70%	0.4
Drycleaning	330 TPY	30%	0.3
Industrial solvents	350 TPY	50%	0.3
Furniture coating	210 TPY	70%	0.2
Tank truck tightness [3]	250 TPY	90%	0.2
Printing (non RACT) [4]	150 TPY	50%	0.1
Fabricated metal coating	140 TPY	70%	0.1
Traffic paint	90 TPY	90%	0.1
			22.8

Note: Percent reductions from 1986 inventory were calculated using total inventory value of 121,126 TPY in state submittal.

[1] I/M is being considered as part of post-1987 reduction strategy. To date, EPA has not required I/M in Maine as part of its post-1987 policy.

[2] The state has stage I controls which are being phased in statewide.

[3] The state has tank truck tightness regulations which are being phased in statewide. The regulations require compliance only at gas stations which have installed stage I controls.

[4] Reasonably Available Control Technology (RACT) is required for certain categories of sources in nonattainment areas.

The available control strategies, if found practicable, would collectively yield approximately a 22.8% reduction, given the expected estimated achievable control. Based on EPA's experience with Regional Oxidant Model runs it seems likely that a reduction of approximately 25% from 1986 levels in the nonattainment areas is needed for attainment of the ozone standard. This still leaves a VOC emission reduction shortfall of approximately 2.2%. Given the rural nature of much of Maine and the widespread distribution of traffic densities, and in light of the minimal VOC emission reductions that could be expected, neither Maine nor EPA has at this time concluded that any specific transportation controls are reasonable measures for achieving VOC emission reductions in Maine. No other measures that are clearly reasonable for implementation in Maine could provide sufficient reductions to achieve attainment without the state HVP control. In addition, none of the available control strategies which could achieve the same magnitude of reductions as limiting the RVP of gasoline can be as quickly implemented.

All or part of 12 of Maine's 16 counties are currently located in AQCRs which have a nonattainment designation. Recent monitoring data indicates that these areas will continue to be designated nonattainment. These 12 counties represent approximately 75% of the statewide VOC emissions inventory (based on NEDS data). NEDS data show that area source emissions of VOCs, which include mobile source emissions, represent approximately 95% of total VOC emissions measured statewide. Of those area source emissions of VOCs, 79% are in the nonattainment areas. (See the Technical Support Document which EPA has prepared for this proposal. The Technical Support Document is available as part of the docket for this action at the locations in the "**ADDRESSES**" section above.)

The NEDS data (Attachments One and Two to the Technical Support Document) indicate that there is a greater need for statewide area source controls than for statewide point source controls. While the amount of mobile source emissions in the available data cannot be apportioned between the attainment and nonattainment areas, data from the state's submittal, models and other factors suggest that mobile sources represent a substantial proportion of area source emissions. The mobile source categories in the table listing "VOC strategies which have the greatest potential for significant future VOC reductions" (above) represent approximately 15% (of the 22.8% total) of the VOC emission reductions potentially attainable.

Thus, Maine's RVP program appears to meet the appropriate test of being "necessary" to achieve attainment of the ozone standard in Maine's nonattainment areas. The fact that the state RVP regulation might not by itself fill the remaining shortfall and hence by itself achieve the standard does not mean the rule would not be "necessary" to achieve the standard within the meaning of section 211(c)(4)(C). EPA believes that if Congress intended EPA to approve a state fuel-content rule only if it were necessary and sufficient to achieve the standard, then it would have used that language in section 211(c)(4)(C). EPA believes that the "necessary to achieve" standard must be interpreted to apply to measures which are needed to reduce ambient levels (thus bringing the area closer to achieving the NAAQS) when no other reasonable measures are available to achieve this reduction. A contrary application of "necessary to achieve" in this situation would mean that measures which result in significantly improved air quality are nonetheless unacceptable (even though no other reasonable measures are available) just because they are insufficient to actually result in attainment.

Statewide Approval of the Maine RVP Program

Although not all of the State of Maine is designated as nonattainment for the ozone standard, Maine has requested approval of this SIP revision statewide. EPA proposes approving a statewide volatility limit in Maine based on a number of factors. The ozone problem in the State of Maine has worsened as population increases, vehicle miles travelled (VMT) increase, and industrial sources increase in number and density. As evidence of the worsening ozone problem, EPA's post-1987 SIP call and

BEST COPY AVAILABLE

requirements for post-1987 SIP strategies includes an additional county, Hancock County (53 FR 20722, June 6, 1988). The county is located further north and east of the presently designated nonattainment air quality control regions (AQCRs) in Maine.

Based on the locations of the gasoline terminals (which are primarily n the nonattainment region of the state), Maine would have administrative difficulties enforcing two separate RVP limits and distributors could be supplying two separate RVP gasolines to one state. This would result in the patchwork regulations which the petroleum industry has, in its comments on EPA's actions on other state RVP SIPS, been anxious to avoid. It is in the interests of both gasoline distributors and state enforcement agencies to avoid a patchwork of regulatory requirements within a state.

The success of Maine's volatility program depends on gasoline consumers using 9.0 RVP fuel. If 10.5 RVP fuel is available in part of the state, perhaps at a cheaper price, not only is there an incentive to use the higher RVP fuel, and thus undermine the program, but also certain distributors or retail outlets in the same state could be put at an economic disadvantage as gasoline consumers cross the boundaries of the nonattainment areas to purchase the less expensive, higher volatility gasoline. There might also be additional incentives for bootlegging noncomplying gasoline.

In light of the factors discussed above, until EPA is in a position to conclude that the RVP program is definitely not necessary in the areas designated attainment, the Agency believes it is appropriate to make a finding under section 211(c)(4)(C) with respect to the RVP program in the northern attainment areas. Such a finding is necessary in the northern attainment areas to preserve the integrity and enforceability of the RVP program in the southern nonattainment areas. EPA therefore proposes today to make such a finding. Furthermore, it appears that since the gasoline distribution patterns do not discriminate between attainment and nonattainment regions, logistically Maine had to make its RVP rule apply on a statewide basis in order to ensure compliance in the nonattainment areas without producing supply and distribution problems.

EPA acknowledges that the technical data to support a section 211(c)(4)(C) finding for the northern Maine attainment areas is not extensive. EPA therefore specifically requests comment on the propriety of such a finding under section 211(c)(4)(C) for the northern Maine attainment areas.

Enforceability

EPA's review of the enforceability of the Maine revision revealed a problem with the test methods section of Regulation Chapter 119 (section 4). The state requires that fuel sampling and testing shall be conducted in accordance with ASTM method D4177–82, ASTM method D4057–81, or D323–58, which are acceptable to EPA, or "* * * any other method approved by the Commissioner." EPA has informed the state that alternative methods must be approved by EPA as well. DEP has changed the regulation since the original submission to also require EPA approval of other methods by changing the language to read: "* * * any other method approved by the Commissioner and EPA." EPA is proposing to approve the DEP's RVP controls with the understanding that the state must submit an official copy of the amended regulation before EPA finally approves the regulation into the SIP. DEP has also agreed to clarify its definitions of "bulk gasoline terminal" and bulk gasoline plant." DEP must also submit an official copy of these changes before EPA will finally approve the program.

Waivers

As with its approvals of other state RVP programs, EPA proposes to approve Maine's program including any waivers or variances from compliance Maine may grant to address emergency supply dislocations that might occur as a result of Maine's lower RVP requirement. Such waivers would not affect the federal limit of 10.5 psi, but they will give the state some flexibility when initially implementing its program. EPA has received assurances from Maine that it possesses authority to grant such waivers in emergency situations.

Proposed Action

EPA is proposing to approve this revision to the Maine ozone state implementation plan to control gasoline volatility with the understanding that the state will revise the test method section of the regulation prior to final Agency action. EPA is also approving any variances Maine may issue to avoid supply dislocations. EPA is also proposing to make a finding that this SIP revision meets the requirements of section 211(c)(4)(C) of the Act for an exception to federal preemption. EPA is soliciting public comment on its proposed action. Comments will be considered before taking final action. Interested parties may participate in the federal rulemaking process by submitting written comments to the address noted at the beginning of today's notice.

Since Maine's RVP regulation cannot be implemented in time for a May 1, 1989 start date, if Maine is excepted from Federal preemption, EPA will publish a date of implementation in the final rulemaking notice on this SIP revision. EPA is proposing that the date of implementation be within thirty days of final approval of this revision. EPA requests comments on appropriate leadtime for implementation of this revision.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 52

Air pollution control, Hydrocarbons, Ozone.

The Administrator's decision to approve or disapprove the plan revisions will be based on whether it meets the requirements of sections 110(a)(2) (A)–(K), 110(a)(3) and 211(c)(4)(C) of the Clean Air Act, as amended, and EPA regulations in 40 CFR part 51. These revisions are being proposed pursuant to sections 110(a) and 301(a) of the Clean Air Act, as amended.

Authority: 42 U.S.C. 7401 and 7042.

EPA is today proposing approval of the Maine SIP revision pertaining to its state gasoline volatility program.

Dated: July 10, 1989.

Paul G. Keough,

Acting Regional Administrator.

[CGD 84–043]

RIN 2115–AB69

Portable Tanks for the Transportation of Bulk Hazardous Materials by Vessel

AGENCY: Coast Guard, DOT.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Coast Guard proposes to discontinue approving marine portable tanks ("MPTs") and to authorize liquid hazardous materials to be transferred to and from DOT specification portable tanks aboard vessels. Existing approved MPTs would be permitted to remain in service. The Coast Guard now inspects and approves MPTs while DOT tanks are inspected and approved by private sector agencies. Among the expected benefits of this proposal are removal of the Coast Guard from competition with private industry and greater availability of portable tanks, especially for overseas operations. In addition, in response to a petition for rulemaking, the Coast Guard proposes to permit DOT Specification 57 portable tanks to be used for the bulk carriage of high flashpoint Grade E combustible liquids and other low hazard liquids.

DATE: Comments must be received on or before December 11, 1989.

ADDRESSES: Comments should be submitted to Commandant (G–LRA–2/3600) (CGD 84–043), U.S. Coast Guard, Washington, DC 20593. Comments will be available for examination in Room 3600, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC, between the hours of 8 a.m. and 4 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Frank K. Thompson, (202) 267–1577.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, data, and arguments. Each comment should include the name and address of the person submitting it, identify this notice, and give the reason for the comment. Those desiring acknowledgement that their comments have been received should enclose a stamped self-addressed post card or envelope.

This proposal may be changed in light of the comments received. All comments will be considered before final action is taken on this proposal. Copies of all written comments will be available for examination by interested persons.

No public hearing is planned but one will be held at a time and place to be set in a later notice in the **Federal Register** if the Coast Guard determines that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The principal persons involved in drafting this notice are Mr. Frank K. Thompson, Project Manager, Office of Marine Safety, Security and Environmental Protection, and Mr. William Register, Project Attorney, Office of the Chief Counsel.

Discussion of Proposed Rules

a. Background

The Marine Portable Tank (MPT) regulations currently in part 64 of title 46, Code of Federal Regulations, were developed in 1973–74 by the Coast Guard in consultation with interested manufacturers and representatives of the offshore oil industry. These regulations were developed to be consistent with the portable tank standards of the International Maritime Organization (IMO) as incorporated into the International Maritime Dangerous Goods (IMDG) Code. Since the development of the Coast Guard's regulations, the IMO portable tank standards have been improved and expanded. Additionally, the Department of Transportation has authorized two specification portable tanks, IM–101 and IM–102, analogous to the IMO Type 1 and Type 2 portable tanks. The DOT specifications for these tanks (49 CFR 178.270 through 178.272) were published in the **Federal Register** of January 29, 1981 (46 FR 9895).

The DOT specification for portable tanks requires no approval action by the Coast Guard. Instead, the owner or manufacturer of an IM portable tank sends an application to an independent approval agency (The American Bureau of Shipping, for example) designated by the Director, Office of Hazardous Materials Transportation (OHMT) for approval of the tank. The designated approval agency reviews the owner's or manufacturer's design drawings and calculations, and witnesses the required tests. If the portable tank passes the tests, the designated approval agency affixes its identifying mark to each approved tank, issues an approval certificate to the applicant and forwards a copy of the certificate to OHMT.

The current regulations allow hazardous materials to be transferred to and from portable tanks on board vessels only if those tanks meet the requirements for MPTs in 46 CFR part 64. Further, the cargoes currently authorized to be transferred to and from these tanks are limited to Grades D and E combustible liquids and those 10 cargoes listed in 46 CFR 64.9 and 98.30–3(b).

The Coast Guard's involvement in the approval of marine portable tanks (MPTs) has been costly both in terms of manpower and money. Design drawings for MPTs must be submitted to the Coast Guard Marine Safety Center for design approval. Tanks constructed to approved plans must be inspected and hydrostatically tested in the presence of a Coast Guard inspector. As now administered, the Coast Guard is performing a service that could readily be performed by private industry.

Additionally, the availability of MPTs is a problem for U.S. flag mobile offshore drilling units (MODUs) operating overseas. Even though outside the territorial boundaries of the United States, MODUs, including their equipment, are subject to U.S. regulations and Coast Guard inspection. Many U.S. flag MODUs rarely return to U.S. waters; nevertheless, their MPTs must be fabricated and approved in the United States.

An analysis was performed to determine the suitability of DOT Specification IM–101 and IM–102 portable tanks for use in service presently restricted to MPTs. From this analysis, a copy of which is in the public docket, the Coast Guard concludes that DOT specification IM–101 and IM–102 tanks are equivalent to MPTs and are suitable for this service. There is nothing inherent in the design of IM specification tanks that prohibit their use in bulk cargo service; and in other modes of transportation they are filled and discharged in much the same manner as are MPTs on board vessels.

Under 46 CFR 50.20–30 and subpart 98.15, the Commandant may accept other equipment and designs as substitutes for those specified in the subchapters in which those sections appear, if it is established that the alternative arrangement will provide a level of safety consistent with the requirements of the regulations. As indicated above, these tanks are equivalent and are being accepted for the carriage and transfer of hazardous materials. Acceptance of these tanks under the equivalence provisions will facilitate the transition from MPTs to DOT specification tanks for manufacturers and vessel operators.

b. Objectives

The objectives of this proposed rulemaking are:

1. To discontinue approving MPTs and to authorize the continued use of existing MPTs, provided they are maintained in accordance with the plans originally approved by the Coast Guard and the applicable provisions of part 64 and subpart 98.30 as revised by this rulemaking. The Coast Guard would cease accepting applications to approve plans for MPTs under 46 CFR part 64 six months after the date on which the Final Rules become effective, and cease performing shop inspections approximately 18 months after that date. This lead time would afford manufacturers of MPTs under design or fabrication time to complete their work

and obtain approval of their current production before the approval program is terminated. The continued use of existing approved MPTs would be authorized ("grandfathered") for as long as they are maintained and repaired in accordance with the plans originally approved by the Coast Guard and the applicable provisions of part 64 and subpart 98.30 as revised.

2. To allow the transfer of liquid hazardous materials to and from DOT specification IM 101 and IM 102 portable tanks on vessels as long as they comply with the cargo handling requirements in subpart 98.30 as revised. By allowing the use of DOT specification tanks, difficulties that vessels on overseas operations have encountered in obtaining approved portable tanks would be alleviated since OHMT-designated approval agencies include agencies located outside the United States.

3. To revise the list of hazardous materials currently authorized to be transferred to and from MPTs on board vessels. The current list was originally developed to meet specific needs of the offshore oil production industry at the time of its publication. This list would be partially replaced by provisions allowing various hazardous materials which are authorized to be transported as packaged cargo in portable tanks to be transferred to and from portable tanks on board vessels. The effect of this revision would be to greatly expand the number of authorized cargoes.

4. To permit Grade E combustible liquids with flashpoints of 300 °F or higher and cargoes classed by DOT as hazardous substances (Hazard Class "ORM–E") which do not meet the definition of any other hazard class to be transferred to and from portable tanks meeting DOT Specification 57.

c. Description of Proposed Specific Changes

To achieve the preceding objectives, the Coast Guard proposes to make the following changes in 46 CFR part 64 and subpart 98.30:

1. Section 64.7 concerning submission and approval of MPT plans, and subpart D of part 64—Shop Inspection would be removed entirely. This removal would become effective 24 months after the final rules are published to give manufacturers ample time to fulfill existing contracts and to complete production that was going on or planned at the time the rules change. The provisions for approval of plans for cargo handling systems would be retained, but transferred to subpart F of part 64, since they would apply to all types of portable tanks authorized under 46 CFR subpart 98.30 and 98.33.

2. Two new sections, 98.30–2 and 98.30–3a, would be added to define the types of portable tanks to or from which hazardous materials could be transferred on board vessels; and to state the provisions under which portable tanks other than MPTs could be used for this service.

3. Existing § 64.9 and paragraph 98.30-3(b) would be replaced by a new section, § 98.30–5, which would authorize the transfer of hazardous materials to and from portable tanks on the basis of their conformance with the generic hazardous materials class definitions in 49 CFR parts 171 through 179. This would allow the transfer of more hazardous materials than are permitted to be transferred under the present regulations. All products now authorized would continue to be authorized either under a generic description or by name.

4. Section 64.3 would be revised to improve the statement of applicability of the proposed rules. The MPT descriptive information and design criteria from this section would be transferred to sections 64.5 and 64.11 respectively.

5. Section 64.3 would be revised to indicate that MPT plans would not be accepted for approval by the Coast Guard after a date six months after the effective date for these rules. This should give manufacturers ample time to complete and submit their plans. It should be noted here that the Coast Guard would continue to inspect and stamp MPTs for approximately 18 months after this date, and that MPTs which are maintained and periodically tested in accordance with the proposed rules may continue in use indefinitely.

6. Sections 64.53, 64.57, 64.65, and 64.77 would be revised to make it clear that these design standards apply only to MPTs but not to other types of portable tanks.

7. The references to the 1974 Edition would be removed from the citations of the ASME Boiler and Pressure Vessel Code in sections and paragraphs 64.5(d), 64.11(a), 64.13 (a) and (b), 64.21, 64.25(b), and 64.31. The ASME Code has been revised many times since 1974, and it is now unlikely that the 1974 Edition would still be available. A new § 64.2 "Incorporation by reference" which would be added, would give the date of the currently authorized ASME Code edition which supersedes the edition date cited in the text of the rules. It should be noted that the reference to the 1974 Edition would remain in § 64.7(a)(4) during the interval between the effective date of the bulk of the rules and the effective date of the removal of § 64.7. Since the incorporation by reference section cites a more recent edition of the ASME Code, it has not been considered necessary to revise the text of the rule which would soon be removed. During the interval, manufacturers would be expected to comply with the more recent edition.

8. The design standards for MPTs in subpart B of 46 CFR part 64 would be retained. Even though there would be no new construction of MPTs after the termination date mentioned above, the Coast Guard believes that these standards would stil be needed for inspection purposes and for future repairs and alterations of "grandfathered" MPTs.

Proposed Subpart 98.33. The American Institute of Merchant Shipping (AIMS) has petitioned the Coast Guard to permit the use of Department of Transportation Specification 57 aluminum portable tanks in a bulk cargo application in which Grade E combustible lubricants having flashpoints in excess of 400 °F would be transferred from a barge or lighter to an anchored vessel. AIMS proposes that all transfer operations would be conducted in accordance with 46 CFR subpart 98.30 under the supervision of a certified tankerman, and would take place only within the confines of harbors or bay areas. Further, the probability of spilling the lubricant during transfer operations would be reduced by the use of spring-activated, cam-type valves and hose couplings, and by enclosing the deck area to ensure that any spill would be contained on the deck. A copy of AIMS's petition has been placed in the public docket.

In consideration of AIMS's petition, the Coast Guard proposes to add a new subpart 98.33 which would permit Grade E combustible liquids which have a flashpoint of 300 °F or higher to be transferred to or from DOT Specification 57 portable tanks, tanks approved by the Coast Guard for the transport of combustible liquids under 49 CFR 178.340, and other tanks specifically approved by the Coast Guard. 300 °F is the maximum flashpoint limit for various operational requirements in subpart 98.30. The high flashpoint liquids described in the AIMS petition are not regulated as hazardous materials under 49 CFR Chapter I. Experience in transporting hazardous materials in both land and water transportation to and from these tanks. The proposal also includes stowage and transfer requirements which correspond to similar proposed requirements applicable to MPTs and DOT

Specification IM–101 and IM–102 portable tanks.

Subpart 98.35. Gravity type portable tanks constructed before October 1, 1974, were "grandfathered" under subpart 98.35, until October 1, 1984. Since the use of this type of tank is no longer authorized, subpart 98.35 would be removed.

Finally, the formula for minimum emergency venting capacity in § 64.63 is misprinted in the current edition of the CFR. This proposed rulemaking would restate this formula in its correct form.

Draft Regulatory Evaluation

This proposed rulemaking is considered to be non-major under Executive Order 12291 and nonsignificant under the Department of Transportation's "Policies and Procedures for Simplification, Analysis and Review of Regulations" (44 FR 11034, February 26, 1979). A draft regulatory evaluation has been prepared and placed in the rulemaking docket. It may be inspected and copied at the address listed above under **ADDRESSES.** Copies may also be obtained by contacting the person listed under **FOR FURTHER INFORMATION CONTACT.**

This proposed rulemaking would affect owners, manufacturers, and users of marine portable tanks for use in support of the offshore oil industry. The costs to the public of the proposed action would be minimal. Replacing MPTs in marine service with DOT specification IM 101 and IM 102 portable tanks would result in several benefits to the industry:

a. Design approval and construction would not be affected by backlogs in the Marine Safety Center or delays in scheduling inspections.

b. Approval agencies would be able to provide improved response to scheduling and problem resolution.

c. The IM specification tanks are truly intermodal providing flexibility in tank utilization.

d. Tank availability, especially overseas, would be improved.

e. The number of authorized cargoes would be greatly expanded.

Shifting responsibility for design review, inspection, and testing of portable tanks to third party approval agencies would remove the Coast Guard from competition with private industry while reducing the Coast Guard effort by 95 percent or approximately 600 manhours per year of predominantly technical support. The annual savings to the Coast Guard would be approximately $17,000. There might be some increase in costs to the industry in acquiring design approval, inspection, and testing of their portable tanks which could range up to $1,000 for a single tank built to a new design. This figure, however, could be reduced to as little as $100 per tank if multiple tanks were built from the same design drawings. This is the more common occurrence and should be considered a nonsignificant increment in the cost of the tank. The total estimated annual increase in costs to all purchasers of portable tanks for use in the service discussed in this preamble would be approximately $35,000.

Each of the three known private sector operators affected by AIMS's petition is believed to own approximately 20 DOT–57 portable tanks. If subpart 98.33 were not adopted, these operators would have to replace their existing tanks with MPTs or DOT Specification IM–102 portable tanks at an approximate cost of $8000 each. The estimated total cost of such a replacement would be approximately $160,000 per operator or $480,000 for the affected industry.

Based on the information in the draft evaluation, as discussed above, the Coast Guard certifies that this proposal, if adopted, would not have a significant impact on a substantial number of small entities.

Environmental Analysis

This rulemaking has been thoroughly reviewed by the Coast Guard and it has been determined to be categorically excluded from further environmental documentation in accordance with sections 2.B.1.c and 1 of Commandant Instruction M16475.1B. A Categorical Exclusion Determination statement has been prepared and filed in the rulemaking docket.

Federalism Implications

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Paperwork Reduction Act

This proposed rulemaking does not add any significant reporting or recordkeeping requirements or increase the paperwork burden on industry. Since no new applications for approval of MPTs would be considered after 6 months after the effective date of the final rule, the information collection approved under OMB Control Number 2115–0101 would be eliminated. The reporting and record-keeping burdens associated with the approval, inspection, and periodic retesting of DOT specification portable tanks are addressed under OMB Control Number 2137–0018.

Proposed §§ 98.30–5(a) and 98.33–3(a) would allow the Coast Guard to authorize the transfer of materials not specifically covered by the proposed regulations. It is not anticipated that this would generate more than one or two requests annually, resulting in only a minor increment to the existing information collection approved under OMB Control Number 2115–0016.

This proposed rulemaking contains information collection and recordkeeping requirements in sections 64.9(c), 98.30–3(a), and 98.33–5(a)(3). They have been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act of 1980 [Public Law 96–511, 44 USC 3501 et seq.]. Persons desiring to comment on these recordkeeping and information collection requirements should submit their comments to: Office of Regulation Policy, Office of Management and Budget, 726 Jackson Place NW., Washington, DC 20503. ATTN: Desk Officer, U.S. Coast Guard. Persons submitting comments to OMB are also requested to submit a copy of their comments to the Coast Guard as indicated under "**ADDRESSES**".

List of Subjects in 46 CFR Parts 64 and 98

Hazardous materials transportation, Marine safety, Packaging and containers, Vessels

In consideration of the foregoing, the Coast Guard proposes to amend parts 64 and 98 of title 46, Code of Federal Regulations as set forth below:

PART 64—MARINE PORTABLE TANKS (MPT) AND CARGO HANDLING SYSTEMS

1. The authority citation of part 64 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703; 49 U.S.C. App. 1804; 46 CFR 1.46.

2. By revising § 64.1 to read as follows:

§ 64.1 Purpose.

(a) This part contains the following:

(1) Requirements for the design, construction, repairs, alterations and marking of marine portable tanks authorized by this chapter to be carried on board inspected vessels.

(2) Requirements for periodic inspections and tests of marine portable tanks.

(3) Design and construction requirements for cargo handling systems

for marine portable tanks and other portable tanks authorized under § 98.30 of this chapter.

2a. By adding a new § 64.2 to read as follows:

§ 64.2 Incorporation by reference.

(a) Certain material is incorporated by reference into this part with the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a). To enforce any edition other than the one listed in paragraph (b) of this section, notice of the change must be published in the **Federal Register** and the material made available to the public. All approved material is on file at the Office of the Federal Register, Washington, DC 20408 and at the U.S. Coast Guard, Office of Marine Safety, Security, and Environmental Protection, 2100 Second Street SW., Washington, DC 20593–0001, and is available from the source indicated in paragraph (b) of this section.

(b) The material approved for incorporation by reference in this part and the sections affected are:

American Society of Mechanical Engineers
United Engineering Center, 1345 East 47th St., New York, NY 10017
Boiler and Pressure Vessel Code, Section VIII, Division 1, Pressure Vessels, 1980
64.5, 64.7, 64.11, 64.13, 64.21, 64.25, 64.31

3. By revising § 64.3 to read as follows:

§ 64.3 Applicability.

(a) This part applies to each Marine Portable Tank for which an application for approval is received by the Commanding Officer, U.S. Coast Guard Marine Safety Center, before (six months after effective date of Final Rules) and which is constructed, inspected and subsequently stamped by a Coast Guard inspector.

(b) Subpart F of this part also applies to portable tanks and cargo-handling systems for portable tanks authorized under subpart 98.30 of this chapter.

4. By revising paragraphs (a) and (d) of § 64.5 to read as follows:

§ 64.5 Definitions.

(a) *Marine Portable Tank* or "MPT" means a liquid carrying tank that—

(1) Has a capacity of 110 gallons or more;

(2) Is designed to be carried on board a vessel;

(3) Can be lifted onto and off a vessel in a filled or empty condition, or filled and discharged while aboard a vessel;

(4) Is not permanently attached to the vessel;

(5) Was inspected and stamped by a Coast Guard Inspector before (24 months after publication of Final Rules).

* * * * *

(d) *Maximum allowable working pressure* means the maximum gauge pressure at the top of the tank in the operating position at 122 °F, equal to or greater than the total containment pressure as defined in paragraph (c) of this section. The maximum allowable working pressure is used in the calculation of the minimum thickness of each element of the tank, excluding the allowance for corrosion and the thickness for loadings other than pressure, as provided for in Division 1 of Section VIII of the ASME Code.

* * * * *

§ 64.7 [Removed]

5. By removing § 64.7, effective (24 months after publication date of Final Rules).

6. By revising § 64.9 to read as follows:

§ 64.9 Maintenance, repair, and alteration of MPTs.

(a) Each MPT must be maintained in accordance with the approved plans, this Part, and Subpart 98.30 of this Chapter.

(b) Repair of an MPT is authorized, provided that the repairs are in accordance with the approved plans.

(c) An approved MPT may not be altered, except as approved in writing by the Commanding Officer, U.S. Coast Guard Marine Safety Center.

(d) After each welded repair or alteration, an MPT must be hydrostatically pressure tested in accordance with § 64.83(a) of this part.

7. By revising § 64.11 to read as follows;

§ 64.11 MPT design.

(a) An MPT must be designed:

(1) In accordance with Division 1 of Section VIII of the ASME Code and this subpart;

(2) With a maximum gross weight of 55,000 pounds;

(3) To hold a liquid cargo that has a vapor pressure of 43 pounds per square inch absolute (psia) or less at a temperature of 122 °F;

(4) With a minimum service temperature of 0 °F or higher;

(5) With a maximum allowable working pressure of at least 20 pounds per square inch gauge (psig) but not more than 48 psig; and

(6) To withstand dynamic loading conditions applied simultaneously.

§§ 64.13, 64.21, 64.25 and 64.31 [Amended]

8. In §§ 64.13(a), 64.21, 64.25(b), and 64. 31, and footnote 1 of § 64.13(b), by removing the comma and words reading ", 1974 edition".

9. By revising § 64.53 to read as follows:

§ 64.53 MPT information plate.

(a) A corrosion resistant metal plate containing the information in paragraph (b) of this section must be permanently attached to each MPT.

(b) Each information plate required in paragraph (a) of this section must have the following information in legible letters that are 3/16 inch or more in height:

(1) Owner's name.

(2) Manufacturer's name.

(3) Date of manufacture.

(4) Tank serial number.

(5) Maximum allowable working pressure in psig.

(6) Test pressure in psig.

(7) External pressure rating in psig.

(8) Total capacity in gallons.

(9) Maximum net weight in long tons.

(10) Maximum gross weight in long tons.

(11) Percent ullage at 122 °F.

(12) Hydrostatic test date.

10. By revising the heading of Subpart C to read as follows:

Subpart C—Pressure and Vacuum Relief Devices for MPTs

11. By revising the introductory clause of § 64.57 to read as follows:

§ 64.57 Pressure relief device acceptance.

A pressure relief device for an MPT must be—

* * * * *

12. In § 64.63(a), by revising the formula to read as follows:

§ 64.63 Minimum emergency venting capacity.

(a) * * *

$$Q = 633,000\left(\frac{A}{L\ C}\right)^{0.82}\sqrt{\frac{Z\ T}{M}}$$

* * * * *

13. by revising § 64.65 to read as follows;

§ 64.65 Vacuum relief device.

(a) Each MPT that is designed for an external pressure of less than 7.5 psig must have a vacuum relief device.

(b) A vacumm relief device for an MPT must—

(1) Open at an external pressure of not less than 3 psig; and

(2) Have an opening with a cross-section of 0.44 square inches or more.

Subpart D—[Removed]

14. By removing subpart D, effective (24 months after publication date of Final Rules)

15. By revising the heading of subpart E to read as follows:

Subpart E—Periodic Inspections and Tests of MPTs

16. By revising the introductory paragraph of § 64.77 to read as follows:

§ 64.77 Inspection and test.

For the handling and stowage requirements in § 98.30–3 of this chapter, each MPT must pass the following inspections and tests conducted by the owner or the owner's representative:

* * * * *

§ 64.85 [Removed]

17. By removing § 64.85.

Subpart F—Cargo Handling System

18. By revising § 64.87 to read as follows:

§ 64.87 Purpose.

Each cargo handling system required to meet § 98.30–25 or § 98.33–13 of this chapter must meet the requirements of this subpart.

19. By adding new § 64.88 to read as follows:

§ 64.88 Plan approval, construction, and inspection of cargo handling systems.

(a) Plans for the cargo handling system of a portable tank authorized under subpart 98.30 of this Chapter must be approved by the Coast Guard in accordance with the requirements of § 56.01–10 of this subchapter. In addition, the cargo handling system must be constructed and inspected in accordance with part 56 of this subchapter.

PART 98—SPECIAL CONSTRUCTION, ARRANGEMENT AND OTHER PROVISIONS FOR CERTAIN DANGEROUS CARGOES IN BULK

20. By removing all authority citations within part 98. The authority citation of the part continues to read as follows:

Authority: 33 U.S.C. 1903; 46 U.S.C. 3306, 3703; 49 U.S.C. App. 1804; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

§ 98.01-1 [Amended]

21. By removing and reserving paragraphs (b) and (d) of § 98.01–1.

22. By revising § 98.01–5 including the section heading to read as follows:

§ 98.01-5 Incorporation by reference.

(a) Certain material is incorporated by reference into this part with the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a). To enforce any edition other than the one listed in paragraph (b) of this section, notice of the change must be published in the **Federal Register** and the material made available to the public. All approved material is on file at the Office of the Federal Register, Washington, DC 20408 and at the U.S. Coast Guard, Office of Marine Safety, Security, and Environmental Protection, 2100 Second Street SW., Washington, DC 20593–0001, and is available from the source indicated in paragraph (b) of this section.

(b) The material approved for incorporation by reference in this part, and the sections affected, are:

Materials Transportation Bureau (now the Office of Hazardous Materials Transportation), Research and Special Programs Administration, Department of Transportation	
400 7th St. SW., Washington, DC 20590	
IM Tank Table, January 1, 1989 ...	98.30–3a, 98.30–5.

23. By revising the heading of subpart 98.30 to read:

Subpart 98.30—Portable Tanks

24. By revising § 98.30–1 to read as follows:

§ 98.30-1 Applicability.

(a) This Subpart contains regulations concerning transfer of a combustible liquid or other hazardous material to or from a portable tank on board a vessel.

25. By adding new § 98.30–2 to read as follows:

§ 98.30-2. Definitions.

(a) As used in this part, "Portable tank" includes—

(1) A marine portable tank (MPT);

(2) A Department of Transportation (DOT) Specification IM–101 or IM–102 portable tank constructed in accordance with 49 CFR 178.270 through 178.272 and approved under 49 CFR 173.32a; or

(3) A portable tank authorized for liquid hazardous materials, other than liquefied gases, by the Director, Office of Hazardous Materials Transportation, DOT, Under a DOT exemption issued in accordance with subpart B of 49 CFR part 107.

(b) *MPT* means a marine portable tank which was inspected and stamped by the Coast Guard before (24 months after the publication date of the final rule) and which meets the applicable requirements in this part and part 64 of this chapter.

26. By revising § 98.30–3, including the section heading, to read as follows:

§ 98.30-3 Vessels carrying MPTs.

(a) Each MPT on board a vessel to which this part applies must have—

(1) On a metal or other corrosion-resistant tag, an inspection date for pressure and vacuum relief devices in accordance with § 64.79(b) of this Chapter that is within 12 months before the month in which the vessel is operated.

(2) an inspection date in accordance with § 64.81(b) of this chapter that is within 30 months before the month during which the vessel is operated; and

(3) a hydrostatic test date in accordance with § 64.83(b) of this chapter that is within 60 months before the month during which the vessel is operated.

27. By adding new § 98.30–3a to read as follows:

§ 98.30-3a Vessels carrying portable tanks other than MPTs.

(a) Each portable tank, other than an MPT, on board a vessel to which this part applies must be one of the following:

(1) A DOT Specification IM–101 or IM–102 tank that is authorized for its contents in accordance with 49 CFR part 173 under the conditions set forth in the "IM Tank Table".

(2) A portable tank that is authorized by the Director, Office of Hazardous Materials Transportation, DOT under a DOT exemption issued in accordance with subpart B of 49 CFR part 107, and which is—

(i) According to the terms of the exemption equivalent to a DOT Specification IM–101 or IM–102 portable tank; and

(ii) Authorized for its contents under the terms of the exemption or by written acknowledgement from the Director, Office of Hazardous Materials Transportation.

(b) Each IM–101 and IM–102 portable tank must be tested and inspected in accordance with 49 CFR 173.32b, and used only as specified in 49 CFR 173.32c.

(c) Each portable tank authorized under a DOT exemption must be inspected and tested, maintained, and

---

used in accordance with the terms of that exemption.

§ 98.30-4 [Amended]

28. In paragraphs (a) and (b) of § 98.30-4, by removing the word "marine" before "portable tank".

§ 98.30-6 [Redesignated from § 98.30-5]

29. By redesignating present § 98.30-5 as § 98.30-6, and adding new § 98.30-5 to read as follows:

§ 98.30-5 Materials authorized for transfer to and from portable tanks.

(a) The following hazardous materials are authorized to be transferred to and from portable tanks under this subpart:

(1) Any Grade D or E combustible liquid listed in § 30.25-1 of this chapter that does not meet the definition of any hazard class in 49 CFR part 173 other than the definitions of "flammable liquid", "combustible liquid", or "ORM-E".

(2) Corrosive liquids that—

(i) Are compatible with the materials of the tank;

(ii) Meet to other hazard class definition in 49 CFR part 173; and

(iii) Are authorized for transport in IM-101 or IM-102 portable tanks under subpart F of 49 CFR part 173.

(3) A hazardous material listed in Table 98.30-5(a).

(4) Liquid hazardous substances classed as ORM-E and listed in the Appendix to 49 CFR Table 172.101, and aqueous solutions of solid hazardous substances classed as ORM-E and listed in that Appendix.

(5) Other hazardous materials authorized in writing by the Commandant (G-MTH).

TABLE 98.30-5(A)—CERTAIN HAZARDOUS MATERIALS AUTHORIZED FOR TRANSFER TO AND FROM PORTABLE TANKS

Acetone
Alcohols; flash point of 80 °F (27 °C) or less by open cup test
Benzene
Gasoline
Hydrochloric acid—hydrofluoric acid mixtures containing not more than 36 percent hydrochloric acid or 2 percent hydrofluoric acid [1]
Methyl Ethyl Ketone
Toluene (Toluol)

Note:
[1] Marine portable tanks (MPTs) must be lined with rubber or equally acid-resistant material of equivalent strength and durability.

(b) Grades D and E combustible liquids with flash points of 100 °F (38 °C) or higher by closed cup test which are not listed by name in the IM Tank Table may be transferred to and from MPTs or IM-102 portable tanks conforming to the IM Tank Table entry for "Combustible liquid, not listed by name in this table."

(c) MPTs for sulfuric acid having a concentration not over 51 percent must be lined with rubber or equally acid-resistant material of equivalent strength and durability.

(d) Sulfuric acid having a concentration of 65.25 percent or greater may be transferred to or from a portable tank, provided that the corrosion rate on steel measured at 100 °F (38 °C) of sulfuric acid having a concentration greater than 65.25 percent is not greater than the corrosion rate of 65.25 percent sulfuric acid.

(e) Liquids classed as ORM-E may be transferred only from an IM-101 or IM-102 portable tank or an MPT.

(f) A hazardous material authorized to be transferred to and from an IM-102 portable tank may also be transferred to and from an IM-101 portable tank.

(g) Hazardous materials not referred to in this section may not be transferred to or from a portable tank on board a vessel.

30. By adding a new § 98.30-8 to read as follows:

§ 98.30-8 Gaskets and lining.

(a) No person may transfer a hazardous material to or from a portable tank on board a vessel unless each gasket and the lining of the portable tank is made of a material that is—

(1) Chemically compatible with the product for which the portable tank is approved; and

(2) Resistant to deterioration from the product for which the portable tank is approved.

31. By revising § 98.30-9(b)(2) to read as follows:

§ 98.30-9 Portable tank stowage.

* * * * *

(b) * * *

(2) Unless all electrical equipment is explosion-proof or intrinsically safe, as defined in §§ 111.105-9 and 111.105-11, respectively, of this chapter, in the area of the tank and its associated equipment that is—
